Achievement

Only a few years ago a successful crossing of the Atlantic was in itself an achievement. To day giants of the air take the Atlantic in their stride as an everyday routine. In other spheres too science is continually contributing to modern progress

The important role photography is playing to day in Industry and in Science owes much to the many valuable discoveries made in the research laboratories of Ilford Limited

The recent introduction of Kryptoscreen the X ray paper incorporating its own intensifying screen will go far to simplify Industrial X ray technique Multigrade the variable contrast paper marks an epoch making advance in better and more economical print production

For more than sixty years sensitised photographic materials manufactured by Ilford Limited have been renowned the world over for their consistent high quality

A PROFITABLE INVESTMENT

Money is easy and cheap it requires investment Investment is so varied and markets so fluctuating that one can hardly be confident about a definite return. Insurance Policy is the best medium of investment its value always increases and it guarantees a definite return. Not only that it also provides against odds and old age. It offers absolute security coupled with safety and soundness of gilt edged investment. The Commercial Insurance Company offers policies which suit all purses and pockets and afford good investment—medium. It entails no obligation to get advice from the Company for all your insurance needs.

FOR THOSE WHO THINK

powerful locomotive reduce how MUCH of the principles of BOTH is incorporated in a PHILLIPS Cycle—a machine embodying in proportion to its size the strength of a bridge and the unfuling service of an engine

So light—you can pick it up with one hand—vet with mechanism that will function silently for years with a minimum of attention

Just a scientific structure of light Steel tubes and sweet running parts only a fraction of the weight of a 13 stone man yet bearing him through succeeding years surely swiftly silently—without perceptible ageing

A Cycle worth having?

Decidedly !

MYSORE STONEWARE

Salt glazed stone ware whether in the form of pipe or otherwise is the only material that needs no water pro o fing or protection and

can be used to protect sewers from the corrosive action of acids and gases in the sullage

This is borne out by facts drawn from ancient times. Ac Nippur one of Babylonia sancient cities a few clay drain pipes and T fittings removed after 6400 years are as good as

new In Chalde the kingdom Nimrod the clay PIP removed after a peri of 5700 years are as perfect when they were laid

This is the material we supply! preservation of health and sant tion of modern cities and towns. They imposed a keen test on our productin. We claim that we were equal to sever of the demands. But God be praised at conclusive victory we can confiden hope for a lasting and firm world per We shall soon go all outto meet; needs of cities towns and the public

From War into Peace

It isn't always easy to improve what most men already consider unimprovable. But war is a wonderful forcing-ground for technical achievement. And in six years' exacting precision work for the British Government, in the making and machining of accurate and highly-stressed parts and mechanisms to finer limits than we ever used before, we have added a new chapter to our volume of experience.

We are proud to have played a part in the war-effort, and we can honestly admit we are grateful for what we learnt

It is that experience which we are now embodying in the post-war Gillette products we shall be announcing at some future date. Moreover, our designers and engineers have not let the grass grow under their feet in exploring the new materials and processes which the war has discovered. It will be worth your while to KEEP YOUR EYE ON GILLETTE.

The Famous Cine Laboratory and Studios a gigantic Rs 1 00 00 000 enterprise is the largest of its kind in the East and are expected to have a yearly output of 15 36 00 000 feet of film

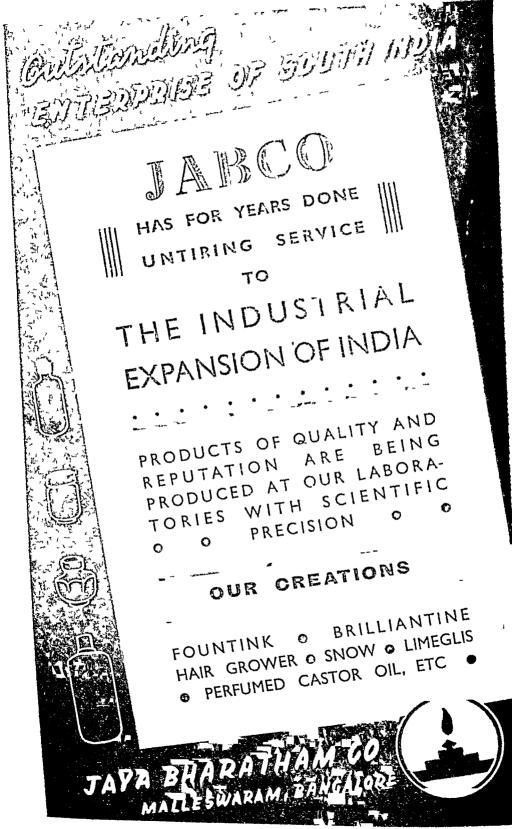

The famous Cine Laboratory remedies the present lack of a fully equipped automatic film processing laboratory, in India and will be a boon to India s Film Industry

Seth Shirazali Hakim Proprietor of Famous Cine Laboratory and Studios who conceived the idea of building and equipping the largest Cine Laboratory and Studios in the East

The Laboratory is the first amongst post war industrial developments in India and is expected to go a long way to improve film finishing technique in India Indeed it will bring the Hollywood film processing technique to India s film industry and should put an end to technical imperfections in Indian cinema films

The house of Famous Cine will also have an Air Conditioned Studio complete with make up and rest rooms and for the first time in India there will be a fully air conditioned Studio floor to bring Holly wood standard of comfort to film stars and technician

THE HOUSE OF MOTWANE

CROUI of flourishing companies with a wide reputation for reliability and service to the public i the proud achievement of the Motwanes in the short p riod of 35 years

The business was founded by the late G C Motwane who started as a telegraph eignaller on the Western Railway on R a month and soon rose to the position of Inspecting Tele The cope graph Master which a job on the Rulway offered young Notwane was soon to prove insufficient for

Late Mr G C

such an enterprising spirit. He gave it up in 1999 and started on a business career and The Lastern Flectric & Teadin Co Sind was the result. Motwane's natural aptitude for business and his shrewdness soon developed the business, and he moved the Headquarters of his offices to the more important centre of Karachi in 1912 closing the Sukkur office in 1013. The continued and rapid growth of the concern necessitated opening branches in Labore and Amnisar and ultimately found him opening up in Bombas in 1919 where he established another company also in 1919 under the name and style of The Chicago Telephone Supply Company. The was quite a landmark in Mr. Motwane's career as from then on the Bombay business absorbed all his time and energy and in order to concentrate on it, he closed all his molessit branches.

10 6 saw Mr Motwane entering the general engineering business and the name of the parent company started at Sukkur was changed to The Eastern Flectric & I ngineering Co which began to run parallel to The Chicago Telephone Supply Co the latter being changed to The Chicago Telephone & Radio (o Itd in 1936 with branches at Calcutta Lucknow Lahore New Delhi and a City Branch at 42

Lamington Road Bombay

The Khairpur Mir's Flectric Supply Co was purchased by Mr Motwane in 1934 and a new money lending and banl ing concern was started in 1940 under the name of Granchand Chandumal

The House of Motwanes was however to lose the driving force of Mr Motwane in 1943 as he died in that year full of years and nehieve Hi mantle has fallen on his two sons \ G Motwane and \ G Motwane who are now carrying on the family business. They have recently floated The Motwane Radio Manufacturing Co Ltd with a capital of Rs 50 lakhs for the manufacture of radios and allied goods in India which promises to develop into a unique establishment and an important contribution to India's industrial advancement

Manners and Customs.

Next to the complexion of the reople, which i varies from fair to black the tourists attention in India is drawn by their diess and personal decoration. In its simplest form a Hindu sons dress consists of a piece of cloth round the loins. Many an acete, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed to the constant of the police allowed. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the wrist and reaching to the arkles Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to day within the precincts of civilisation and will not meet the tourist seye Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich The child Krishna, with all the jewels on his person, is nude in his pictures and images

Dress—The next stage in the evolution of the Hindu dress brings the loincloth nearly down to the feet On the Malabar coast, as in Burma the ends are left loose in front the greater part of India, they are tucked up behind—a fashion which is supposed to best the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga Under this garment is often worn a coat or a shirt When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the culves the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right A shawl is tieu round the waist over the long cost, and serves as a belt, in which one may carry money or a weapon if allowed The greatest variety is shown in the head-dress More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay In the Punjab and the United Traines in Bengal in Burna and in Madage Provinces, in Bengul, in Burma and in Madras other virieties prevail Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles folded brims. projecting brime long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the parrot s beak' of the Maratha turban-all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head covering whether the wear r is a Hindu, Mahomedan or Parsi, and whether he halls from Poona or Dharwar, Ahmedabad or Bhavnagar

Pashion Variations -Fashions often vary with chinate and occupation The Bombay informan they were a short coat and a cap, and may carry a watch in his pocket yet as he must work for long hours in water, he does

of the cold north west wears loose bagge trousers, a tall head dress belitting his stoture and covers his ears with its folds as it to keep off cold. The poorer people in Bangai and Madras do not cover their heads, except when they work in the sun or must appear respect-Many well to do Indians wear Luropean dress at the present day, or a compromise between the Indian and Luropean costumes, notably the Indian Christians and Parsia Pursis however have retained their own laid dress, and many have not borrowed the I uro-pean collar and cuffs. The majority of the pean collar and cuffs. The majority of the people do not use shoes those who can afford them went sandals, slippers and shoes, and r new cover their fect with stockings and boots after the European fashion in public

Women's Costumes —The usual dress of 3 woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head The folds are sometimes drawn in and tucked up behind In the greater part of India women wear a bodice on the Mainhar coast many do not, but merely throw a piece of cloth over the breast In some communities petileoris or drawers, or both are worn Many Musselman ladles wear gowns and scarfs over them The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a veil when they appear in public a few converts from Hinduism have not borrowed the custom In Northern India Hindu women have generally adopted the Mussalman practice of seclusion In the Dekhan and in Southern India 'they have not

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do The former generally remove the hair from a part of the head in front over the temples, and near the neck, and grow it in the centre, the quantity grown depending upon the finey of the individual Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was paramount in the past Parsis and Chris tians follow their individual inclinations Hindu ascetics, known as Sadhus or Bairagis as dis tinguished from Sanyasis, do not clip their hair, and generally coul the uncombed hair of the head into a crest, in imitation of the god Shiva

Hindu women wear more ornaments than others of the corresponding grade in society Ornaments bedeck the head, the cars, the nose, the ncck, the arms wrists, flugers, the waist until motherhood is attained, and by some even later—and the toes Children wear auklets Each community affects its peculiar not cover his legs, but suspends only a coloured ornaments, though unitation is not uncommon herchief from his wai,t in front The Pathan Serpents with several heads, and flowers, like

gold or silver

Caste Marks -Caste marks constitute a mode of personal decoration peculiar to Hindu sepecially of the higher castes. The simplest mark is a round spot on the forehead it represents prosperity or joy and is omitted in mourning and on fast days. It may be red or y llowish a. when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot and as Lakshmi is the goddess of prosperity it is said to represent her A more elaborate mark on the forehead has the shape of U or V generally with the central line sometimes without it and represents Vishnus foot The worship pers of Shiva adopt horizontal lines made with and almood paste or ashes Some vasuanavas stamp their temples near the corners of the eyes with figures of Vahnus conch and disc Other parts of the body are also similarly matted. The material used is a kind of yel lossish clay. To smear the arms and the clest with sandawood paste is a favourite kind of tollet opecality in the hot season. Beads of sandalwood paste or ashes Some Vaishnavas Tulsi or sacred Basil and berries of Pudraksha

ŧ

the lotus the rose and the chempaka are among respectively. The Lingayats a Shaiva sect the most popular object of representation in su pend from their necks a metallic ca ket containing the Linga or phallus of their god Bairagis ascetics besid a wearing Rud alsha rosaries round their necks and matted hair smear their bodies with a hes Religious mendicants suspend from their necks figures of the gods in whose name they beg Strings of co tries may also be seen round it elr neck Muslim dervishes sometimes carry percock s feathers

Hindu women mark ti eir foreheads with a red spot or horizontal line High caste widows are forbidden to exhibit this eign of happiness nor may they deck themselves with flowers or ornaments Flowers re worn in the chignon Hindu women smear their faces arms and feet Hindu women sheat the lates and and sometimes with a paste of turmeric so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal laughtered for the purpose in former times In many other cases this colour has no such Th Mu hm dervish affects green association the bikh Akali is fond of blue the S nyasi adopts o ange for his robe and no reason can toscarp s gandrus, strung together are worn adopts o ange for his robe and no reason

Indian Names

The personal name of most Hindus denotes ; of a devil is to invite him to do harm a material object colour or quality an animal a relationship or a delty. The uneducated man who cannot correctly pronounce long Sansirit words, is content to call his child father benefits. father brother nucle or mother or sister as the case may be This practice survives as the case may be This practice survives among the higher classes as well Appa Saheb Anna Rao Babaji Bapu Lai Bhai Shanhar Tatacharya, Jijibhai are names of this d stription with honorific titles added It is semption with honorine times added it is possible that in early society the bell if in the re bitth of departed knamen lent popularity to this practice hothing could be more natural than to call a man white, black or red tian to call a man white, black or red good or sliver gen dusmood ruby pearl, or merely a tone small or tall weak or atrong a tion or small or tall weak or atrong a tion or small or tall weak or atrong a tion of the small or tall weak or atrong a tion of the small or tall weak or atrong a tion of the small or tall weak or the small or tall a dog chuka a parrot Shringa a horn the names previent at the pless t day Himsis a diamond Ratins or Ratina a lewel So u of Chinna go d Velli or Belli in the Dravidian languages means white metal or silver fien called after the days of the week on its (ten called after the days of the week on, ashich they were born and hence they bear the names of the seven heavenly bodies cerned. When they because the names of the Bindu deittes they practical. Bits uron a new stage of civilisation. It is deachtin whether the Aulmista ever venture to a new stage of the dreaded spirits whether the seven the dead of the seven of the deaded spirits.

spi its sometim s bear the n mes or human bel gs the reason seems to be tlat they were or inally hum p

High caste practices —The high caste Hindu on the other hand, believes that the more often the name of a deity is on he lips the more merit he earns Therefore he delibe rately names his children after his god; and godesses, so that he may have the oppor tunity of promounding the holy names as fre quently as possible. These are also sonorous and picturreque. Shiva is happy 'shinu is a pervader Govinda is the cowherd Krishna. a petrader Govinos is tre cownery arisana Keshaya has fine hair R ma is a delighter Laksimana is jucky hara ana produced the first living beig on the prineval waters Ganesha is the Lord of Shivas ho ts Dinaskara Ganesha is the Lora or Survey and Gay Sub ah is the luminary that makes the day Sub ah manya is a broth r of Ga esha Sita is a furrow Savitri a ray of light Tara a star Radha prospe ity Rukmi i is she of golden orname ts Bhama of the glowing heart Shiva and Vishnu has e ch got at least a thou sand names and thy may be free y drawn upon and paraphrased in naming one s child en and the whole Hindu pantheon is as crowded as it is large

Family names -When a person rises in imports ce, he adds to his person I name a family or caste name It was once the rule that the title Sharma might be added to n Brahman's name, Varma to a K hatriya's Gupta to a Val byas, and Dasa to a shudra's the name of the definition after venture in the name of the three definition of the lipse, and Dasa to a bludge's work of the three definition of the first of the definition of the lipse the first two titles, but the meaning of the other two has changed Dasa means a stave or servant, and the proudest Brahman cannot or servant, and the products Brahmin cannot disdain to call himself the servant of some god Thus, although Kalldas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivaji, was a Brahmin The Vaishnavas have made this fashion of calling onerelf a ferrant of some god exceedingly popultr, and in Western India high caste Hiedus of this sect very commonly add Das to their larmes. The Brahmans of Southern India add Aiyer or Aiyangar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukern, are among the titles indicative of the Brahmanical profession of studying and teaching the sacred books. Among warlike classes, like the Rajputs and Sikhs, the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mal, as in Gidmal. Varma The Sindhi Mal, as in Gidunal, means brave and has the same force Raja changed into Rava, Rao and Rai was a political title, and is not confined to any caste The Benga'ı family names, like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed Shet, chief of a guild or a town, becomes Chetty, a Vaishva title, in Southern India Mudaliyar and Nazudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers Nayar and Menon are the titles of important castes in Malabar Ram. Lal, Nand, Chand, are among the additions made to personal names in Northern India Suffixes like II, as in Rampi or Jamshedji, the Kanarese Appa, the Telagu Garu, the feminine Bai or Devi, are honorific Prefixes like Babu, Baba, Lala, Sobin, Pandit, Raja, and the Burmese Maung are also honorific

Professional names -I amily names sometimes denote a profession in some cases they might have been conferred by the old rulers Mehta, Kulkarni, Deshpande, Chitnavis, Mahal navis are the names of offices held in toriner times One fimily name may mean a flour seller, another a can eller, and a third a liquor seller. To insert the father's name between one e personal and the family name is s common prictice in Western India rire elsewher. When a family comes from a certain piace, the suffix hir or 'malleh' is added to the name of the place and it makes a family surname in Western India Thus we may have Chiphrikars and Suratualiahs, or without these adires ve may have Bhaynagris. Malabaris and Bilimorias, as among Parsis Thus Vasudey, Pandurang Chiplunkar would be a Hindu, whose personal name is Vasudev, his father's name Pindurang, and family name derived from the village of Chiplun, is Chiplunkar In Southern India the village name of Musalman names follows the same lines as Hindu names But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and picturesque as Hindu appellations. The agnomens Baksh, Din, Ghulam, Khwaje Lakir Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others, as well as honoring additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sicred and secular history Their surnames frequently indicate a profession or a place, as in the cases of Hindus in Western Indi Batliwaliah, Readymoney, Contractor, Sahlatwaliah Adenwallah and others lil o them are tell tale, names

In the relief deficting Buddha's life or that of his previous incurnations (jatalas) I uddha as never presented in human form but his presence is shown by symbols such is the tree of call liter ment his tootprints the throne on which he sat or the platform on which he used to will This, fundamentally un Indian principle indicates the try in component of Indian art while the buoy int passionate figures of yalshis on the Sanchi gates are pre Budd hist in spirit and in the true Indian tradition The wealth of form and movement the inventiveness of composition and the controlled dv namism of this early art ushers in the classic cra

Kushan and Andhra Art—The flist and second centuries A D siw the power of the Kushan empire establishing itself in the North West and North of India while the Andhris ruled the South | The classic progress shows itself in increased plastic penetration of large size sculptures and in greater vitality. The centre of artistic creation is Wathura (Mutta) budd continuation of the Mauryan tradition of large size stone fi-ures, overcoming bulk and crude ness in spirited modelling. Prinkly sensions but in a different was from the nudes of the Greek schools are the temale figures of Mathura and other centres. Nost probably originating from aboriginal symbols of fertility, these graceful if voluminous nymphs fix for centuries to come, the round breasted narrow wristed, full hipped ideal of female beauty for the Indian In the South the stupa of Amaravati has yielded a wealth of magnificent sculpture More fluid mellow and exuberant than the North it comes nearest to classic perfection

Early Fresco Paintings —Belonging to the flist century BC, the fresco paintings in cave 9 and 10 in Ajanta (Nizam's Dominions) are the callest well preserved Indian paintings though still earlier work survives in several other localities The high level of competence in Ajanta proves a long but lost, listory of this art. It in to reliefs in Bulbut and Sanchi, these early paintings have already the graceful outlines of later work.

School of Arts in Borning has tro a leto a large and many field institution. The halo i theme into Moghul art, but griduilly flavoured flavoured thonough training on Luro, and life it with an Indian spirit. In technical exect Under Mr W. I. Gliddone Solonou a chi i lence, accurate and delicate drawing, obser The art was fused with Indian decorative princial The School teaches a pariety of er it- and industrial arts with a stone environmental worl leather your textile design, etc. It has a large commercial art and photographic ection Regrethent and Pahari painting is obvious which was added by its present principal Mr C art developed in different parts of India such as Bijappur, Hyderabad, Ahmednagar, Lucknow, etc work with sound Indian traditions

> Many art schools flourish in India in different centres such as Lahore, Delhi, I wel now Benares Patna, etc., under the patronace of provincial governments, State governments or as private institutions. Indian artists of today strive for new forms of expression which would be in tune with present day life without bred in with the ancient traditions of their country. A most impressive solution for this problem

Indian Architecture.

Indian architecture, like Indian sculpture and which marks a definite advance in the treatment painting, is the visible expression of spiritual con ditions in successive phases While the require ments of various religious creeds decree and modify the forms of Indian buildings, the historical development of the architectural art in India is indicated by a gradual progress of constructional types and by the successive usage of different building material such as wood, brick or stone, which is primarily independent of religious domination The former division of Indian architecture into Buddhist, Jain and Hindu styles is for these reasons not satisfactory work, accessible to lay readers, to give a history Indian elements of styles in Indian architecture is Mr Percy | History of Styles — 1 history of styles in Brown's Indian Architecture in two volumes Indian architecture must be based on historical

of the subject over Tergusson's Indian and Lastern Architecture which for many years was

considered to be the standard work.
The chief characteristics of Indian architecture, especially in its later stone phase, are (a) its use of heavy masses, (b) construction based on vertical not lateral pressure, it without true arches or true domes (c) its plustic treatment and close relationship with sculpture (d) its un developed treatment of space and (?) its spiritual significance and symbolism These features dis tinguish Indi in building from most Western types and should be replaced by a division based on of architecture and from Islamic architecture in stylistic evidence. The first comprehensive India, though the latter naturally contains many India, though the latter naturally contains many

Indo S r cem Architecture —This bemns in India with the 13th century after the perma pent occupation of the Mohammedans first mosques were constructed of the mate lals of Hindu and Jaina temples and sometimes with comparatively sli ht alterations. The Q wwat and the Atha din La 3 ompra mosque in Ajmer are the best examples of this kind Gradually new methods and principles of construction were introduced from Persia and other Islamic coun tries of the West The Mohammedans brought the arch and the true dome they used mortar (which became necessary because of the lateral pressure exercised by arches) and they introduced movel types of buildin s (the mosque and the tomb) They laid greater emphasis on the per omin) They faid greater emphasis on the per fection and the proportions of interior spees than the Indian temple builders the did not re-quire lofty spaces. Tie Mohammedan architec tare of India varied at different periods and under the various dynasties imperial and local The the various uynasties imperia and notal and early Pathan architecture of Delhi was massive and at the same time characterised by elaborate inchess of ornamentation. The Quitb Minar and the tombs of Hitimish and Ala ut din khiliji are hypical examples. The tomb of Ghiasuddin Tu hak at, Tughlakabad, the Lodi tombs and lastily the tomb of the comb of the at at Tughnakanad the Lout tomos and assays the tomb of Sher 'Shah at Sastram in Bihar clearly flustrate the subsequent progress of Pathan architecture of the Sharqi style we have three mesques in Jannpur besides several combs. At Mandu in the Dhar State a third form of Saraconic architecture sprane up and we have have that a tent Mardid Hochan a Tomb. we have he e ti e Jami Masjid Hoshan s Tomb Jahaz Mahal and Hindola Mahal as the most hotable in tances of the secularand ecclesiastical styles of the Malwa Pathans & The Mohamme dans of Ren als ain developed their style some what feeble and ornate and Caur and Pandus what feeble and ornate and Gaur and Francius there with the rules of buildings of this type the most important of which are the Adian Massyll delication of the Market Mar from all mosques in India in having the whole central area covered over so that what in oth 18 would be an open court is here roofed by sixty
three small domes Of the various forms which racenic rehitecture assumed says Fer rance that of Ahmedab d may p obably be considered to be the most ele ant. It is notable to its carred tone work and the work of the of its carrier tone work and the both of the first indicates an indicate of the minars of many other most its the sculptured Wahrabs and domed and many the state of the sculptured Wahrabs and domed and many that the will rival the curred niel of the substance synta smoque in Confession of Architecture — A School of Architecture

thatched but type roof Civilian architect architecture employed by the Adil Shahl dynasty ture though of equial importance as sacred ar of Bijapur There is here relatively little trace chitecture has left fewer traces. The palaces of of Hindu forms or details. The principal build cuteture has left lewer traces. The palaces of of Hindu forms or details. The principal build Hajutana give an indication of list type. With in a now left at Bijaput are the Jami Masjid the Mohammedan conquests in the north. Indian sarkhteture declined in the 13th century. In and Mosque and the fold Gumbaz. The latter is the south it survived till the 18th century though will be profit in 1sp and preferation declined. Like their predecessors the Pathana of Delhu. Gagan Mahal Mihtari Mahal Ibrahim Rauza and Mosque and the Gol Gumbaz The latter is the Mo huls were a great building race style first began to evolve it elf during the reign of Akbar in a combination of Hindu and Moham medan features Noteworthy among the Em peror s buildings are the tomb of Humayun and the palaces at Tatchpur Sikri and Agra Of Jehangir s time his tomb at Lahore and the tomb of Itimad ud daula at Agra are the most typical structures The force and originality of the style gave way under Shah Jahan to a delicate ele ance and refinement of detail and it was durin his reign that the luxur ous buildings in the forts at Delhi and Agra and the most splendid of the Moghul tombs the Taj Mahal at Agra the tomb of his wife Mumtaz Mahal were constructed The Moti Massid in Agra Fort is another surpas sin ly pure and elegant monument of his time

> Modern Architecture in India -With the arrival of Europeans in India western styles of architecture were soon introduced The Portu guese built churches and palaces in an a recable baroque style The early British colonial style of which many pleasant examples survive e pe clally in South India was appealin in its sim plicity and its clever adaptation to the Indian climate During the 19th century public build ings were erected in a hybrid style composed of classic romanesque Gothic and Indian elements cassic romanesque toothe and include elements comparable with the derivative styles of the Victorian epoch in Europe In more recent times two schools of thought have fought for supremacy in India the one propagatin a re vival of Indi enous Indian art as still practised master builders survivin in by the Indian by the Indian master numbers survivii in Eapputans and other parts of the country the other proc! in g the development of a modern architecture on western lines The master budder has undoubtedly inherited a grew de! of the craft the taste and the sensitive artistic feeling of his forefathers but his structural know ledge is totally inadequate for modern require ments The western school has found more widespread acceptance The work of buildin the new capital in Delhi was entrusted to Sir Edwin Lutyens and Sir Herbert Baker most ambitious scheme incorporating the de ion and planning of a whole new city has led to a new style of official architecture the me it of which is still a controversial question. The con temporary u e of reinforced concrete structures though indubitably cheaper safer and faster emphasises the dangers of standardisation and suppression of national character The solution to the problem will have to be found by a youn, generation of Indian architects who while fully trained in modern methods of construction are yet conscious of the glorious artistic heritage of their country

The course of the contract with this wa, the form of present Professor of Architecture is Mr. C. M. C.

stones have been found in many prehi toric and tures and paintings tell us about the endless variety of jewellery to describe which would require a large trenti e Flowers bein the most primitive form of adornment many forms of jewellery up to the present day derive name and shape from floral prototypes Perhaps the finest fewellery work is done in gold enamelling Lahore and Jaipur giving the choicest pieces. Typical of India is the incrustration of gold and silver with gens which are always cabochon cut (never facetted as modern European jewellery) for a fuller colour effect Another very one ent tech nique i gold and silver fill ree applied to orna Nothing can compare with the exube rant splendour of Indian jewellery though the skill in stone c sting and also in setting has not a way reached the level of western craftsmen

Lag r work and p p r m h —Lac being an indigenous Indi n product laquer work in various techniques has assumed industrial pro portions in many parts of the country Best known perhaps are the products of the kashmin craftsmen e pecially in connection with papter maché painting Lac turnery for furniture toys and other objects is a widespread art in western India c pecially in Kathlawar and Gujerat In Sawantwadi (Konkan Coast) a small laquer industry produces artificial fruits playing cards toys etc

Te tiles.- No other country East or West has ever excelled India in the weaving of cotton and silken labrics and silken fabrics. Since ancient times. Indian fextiles were in great demand in all world market There is hardly a technique or art in fabric mak ing that was or is not known in India

I will ry—I rom time immemorial jewellery before weaving fine silks and brocades from of rich de ign was made in India and worn by Benares Murshidabad Hyderabad Madras both exes Simple beads of poli hed, precious Tanjore and other places finely woten voilen Tanjore and other places finely woven 1 collen Aushmir sha is delicate muslins from Dacca tie dyed fabrics from Raiputana various forms of die paintin on cotton (qalmdar similar to Javane e botic) from South India p inted silks and cottons from all parts of the country some of the finest cotton prints coming from Sanganir near Ja pur As there is no limit to the styles of embro dery mention may be made only of the phallars work of the Punjab the colourful em broideries of Kathiawar and the world famous Northern India Especially under Akbar in the 16th century gorgeous rigs and carpets were made exquisite in colour and f bric jet the finest work from Persis was never equalled

> It has been estimated that there are still million handlooms in India and the industry though depressed by the competition of the pov er loom is surviving with part of its wealth of artistic sense and skill

> R ng hs -Worth mentionin are the artistic designs made by the women of India with colour ed powders on the floor or on the doorstep of their houses as festival decoration Preserving the age old designs of religious symbolism they are age old designs of rengious symbolism they are known in all parts of the courtry in a great variety of patterns (ang l in Gujerat alpona in Bengal kolam in South India etc.)

There can be no doubt that the skill and artis tic sense of the Indian craftsman is still abve perhaps slumberin A Mr I red H Andrew deterioration is not the fault of the crafts man by t of his employer Well directed offici ! and private patron ge can do much to save the cultural heritage of the arts and crafts in India Galerat in which the threads are variously dyed industrialisation

Archæology

Although, Talina is one of the most succept lands in the world and the cradle of an ancient civilization it has long remained in the back ground owing to the absence of written histories ing back to the earliest period as in the case of other ancient lands such as Egypt and accopatant; J st o er a hundred yer as left foundation of Indian Arche logy ras hist foundation of Indian Arche logy ras hist consistent with the compared the way to the knowledge of the discovered the way to the knowledge of the consistent Which Akky and of the consistent which ground owing to the absence of written histories to the knowledge of the edicts of the adments which all then were a scaled book to the natives of he soil. Since then a large number of schola's both soil. Since then a large number of schola's both soil and European have helped in building up the edifice of Indian Archeology which though all the comprehensive is still which though fairly comprehensive is still incompl to in several respects

The story of Indian Archwology commences with the beginnings of human existence in the vast sub-continent Fine implements discovered in various parts of the country particularly in the easte n duriets of the Madras Presidency and the The rough and chipped

valleys of the babarmati Varmada and the Godavari have yielded hundreds of implements which show the first ttempts m de by man to wo k his tools with which to master his surround ings T o of the paleof this implements were found in association with the bones of extinct animals one from Bhut a in Narsin pur di trict CP on the banks of the \ rmada
and the other from Mungton the upp r Godava i
The age of the pal clith determined mostly by geological considerations may be anywhere f om 50 000 to 00 000 years and the geat interval of time between the microlithic and the paleolithic periods is shown by nearly a hundred feet of alluvi I and wind blown less deposits in the valley of the Sabarmati river

The whole fild of prehistory is gradually receiving mu h attention which is expected to systematize our knowledge of the earliest in habit ats of India and systematic work has been recently attempted at e eral sites in Madr May irbhanj Rajpi; la and liaroda State heolithicm n hou ed large v riety of poli h ed stone implement was more widely distributed

throughout the country, particularly in the Peninsula and the Vindham regions and his skeletal remains have for the first time been unearthed in Guierat To this period runt al o be dated some of the earliest me allthde tombwhich occur in a great a riets of forms in the which occur in a great viriety of forms in the central and southern parts of the Peninghalthough a vast majority belong to the non-use and some even perit to our are. The knowledge of metals supervened at a later stage but its development has been different in northern and southern India. Thus in portly in India. northern India the copper in plements of the Gangetic Vallet and the copper of brenz intiquities of the Indus culture exclude any knowledge of from In the court, his ever, though certain recent finds in Raichur Dt do not exclude the knowledge of copper +m Iting in the Peninsula, the neolithic settlements of the Bellary district seem to have been immediately Beliary district seem to have been infinediately followed by the knowledge of the smelling of iron, as evidenced by the large scale furnace which stand in the shape of cinder mound notably those at Ludatini. It is clear, how ever, that while copper and bronze were known in the north in the fourth millennium. BC the south 1 my ha e been generally conten with the use of stone implements right up t the first mellennium BC until stone was sup It is remarkable that in some o planted by iron the localities in the ancient Decean, comprisin the Bombay Karnatic the Ceded Districts c Madras south Hyderabad and North Mysore stone implements and printed pottery, ar followed by antiquities of the regular histori period. This gives the hope that a regular. sequence can be established and links forged be twicen the history and prehistory of the Decean

The most interesting and well developed phase of the prehistoric civilization of India is, however, that represented by the recent excavations at Harappa in the Punjab and Liohen jo daro in Sind These have completely revolu tionized ideas on this subject and proved that as far back as the 3rd or 4th millennium B C and probably much earlier still, India was in possession of a highly developed civiliza tion with well planned and populous cities, well built houses, temples and public buildings of brick carefully constructed wells and a system of drains and many other amenities not always enjoyed at that period by the peoples of Mesopotamia and Egypt Both at Mohen jo daro and Harappa there are the remains of some 5 or 6 cities super imposed one upon the ruins of another

The structures that have so far been exposed at Mohen 10 daro belong to the three latest cities on the site which do not appear to be far removed from each other in date, style of architecture or other cultural elements Most of the struc tures are dwelling houses, but there are others

That they polessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved vith vell executed animal devices and pictographic legends in an The method of disposit of unknown script the dead at Mohen to daro is uncertain but at Herapha two types of burial have been met with, namely, complete burials or fractional along, with funerary potters, and pot burials Only 27 of the latter were found to contain skulls and human bones and are seemingly post exposure fractional burials

The late Sir Aurel Stein a survey of the whole of Baluchistan and his last journey in Bahaw apur and Las Bela States have added to our I now ledge a number of ancient sites of the prehistoric epoch Among the 20 or more sites in Sind, discovered mostly by the efforts of the Inte Mr Majumdar, at least three are now recomised as representing distinct phases some earlier and some later than the main culture of Harappa an l Mohen jo daro

The Indus Valley culture has now been traced in the North east as far as Rupar in the Ambala District, relatively close to the watertures are dwelling houses, but there are others which appear to have been temples and one—of particularly massive proportions—is a large both, surrounded by fenestrated galleries and halfs Another massive and extensive building found at Harappa appears to have been a public granary All were built of well burnt brick and most of them were off two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities including gold and silver jewellery, referred to above from the historic period of shed of the Sutlej and Jumna and it is there

Indian Time.

Lor many years Indiantime to in a state of the might postpone or even alterester present chaotic confusion. What was called Madras of the acceptance of the form to instead of the Rilway time was kept on all the railways and each greate entre of population epitition noted. India Theoretical advance with both the second of the control of the form of the first part of the control of the form of the first part of the first par time, which was not based on any common scientific principle and was divorced from the standards of all other countries It 1 25 1 ith a view to remedying this confusion that the Government of India tool the matter up in 1904, and addressed the Provincial Governments and through them all loc I bodies, a long letter which reviewed the situation and made suggestions for the future. The escutful points in this letter were — "In India we have already a standard time

which is very generally though by no means universally, recognised. It is the Madras local universally, recognised. It is the Madraglocal time, which is kept on all railway and tele, raph lines throughout India and which is 6h 21m in advance of Greenwich Rangoon local time is used upon the rilways and telegraphs of Burma, and is 6h 21m 47s thend of Greenwich But neither of these standards bears a simple and easily remembered

relation to Greenwich time

"The Government of India have several time" been addressed by Scientific Societies, both in India and in England, and urged to full into line with the rest of the civilised world And now the Royal Society has once more returned to the The Committee of that Society which attack advises the Government of India upon matters connected with its observatories writes - 'The Committee think that a change from Madrastime to that corresponding to a longitude exactly 51 hours east of Greenwich would be an improve ment upon the existing arrangements but that for nternational scientific purposes the hourly rone system making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems all of which had adopted the European hour zone system, it would be imperative upon India to conform and to adopt the second suggestion But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt!

the first suggestion

'It is believed that this will be the better aolution There are obvious objections to n arbitrary line right across the drawing an arbitrary richest and most populous portions of India, and so as to bisect all the main lines of communi cation, and keeping times differing by an hour on opposite sides of that line India has be come accustomed to a uniform standard in the Madras time of the railways, and the substitu-tion for it of a double standard would appear to be a retrograde step, while it would, in all probability, be strongly opposed by the railway authorities Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would

possess over the first alernative and the former the difference become i each west standard that can be execut halfrulour whereas and rethe latter it vill elementeed and hour in the extreme color of kare blief Quities I'ut this inconventence is hills sed to be smaller than that of leoping to odd terms times on the Indi n system of radios, and tel mapla

It is proposed, therefor, to just on all the railway and tele replaced in India 1, 21, 30. They would then represent retime as hourse faster than that of Green left, which would be known as Indian Standard. Time and the difference but sen standard to it local time of the places mentioned belos would be approximately as follow—the flaces of president mentioned from the first strength and I and S meaning that the standard time is in advance of or is find because time respectively—Dibrugarh 51 %, Shillorg % S, Calcutt v 45, Allahab d 21, Madra 91, Lahore 311, Bombay 91 Pe hawar 441, Lahore 31 I, Bombay 3 I karachi 62 F. Quetta 62 I.

"This standard time would be as much as 54 and 55 minutes behind local time at Mondiday and Rangoon, respectively, and since the rule av system of Burma is not connected with the tof India, and aircary keeps a time of its own, namely, Rangoon local time, it is not subjected that Indian Standard Time should be adopted in Burma. It is proposed, however, that in stead of using Pausoon Standard Time as at present, which is 6h 24m 17s in advance of Greenwich, a Burma Standard Time should be adopted on all the Rurman rails are set acts. adopted on all the Burmese rulways and telegraphs which would be one hour in advance of Indian Standard Lime or 61 hours ahead of Greenwich time, and would correspond with 97° 30' I longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic com munication with other countries

' Standard time will thus have been fixed for rallways and telegraphs for the whole of the Its general Indian Lmpire adoption for all purposes, while eminently advisable, is a matter which must be left to the local community in

each case 1

The Government scheme left local bodies to decide whether or not they would adopt it Calcutta decided to retain its own local time Bombay the first reception of proposal was hostile, but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality Subsequently the opposing element in the Municipality brought in a side resolution, by which the Municipal clocks were put at Bombay time which was thirty nine minutes behind Standard Time On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time Bombav local time is retained only in the clocks which are maintained by the Municipality and puzzle the latter greatly, while by emphasising in the establishments of some orthodo the fact that railway differed from local time, Elsewhere Standard Time is universal in the establishments of some orthodox Hindus

Tie Ben al Government decided from October 1911 to move forward their clocks by 36 Bengal t me therefore became an hour ahead of Indian Standard Time and 36 minutes Ti is was followed shead of Calcutta local tim by the Judian Standard Time also bein advance b b one hour with effect fro a September 1 194 making it 64 hours ahead of Greenwich Mean

The measure wa introduced to ensure the continuance of suffice at daylight in the east ern provinces of Indi where it was essential to avoid any electricity overload due to overlap of factory demands with those of dome tic office and street 1 hting and where extra dayl it is needed to mitigate the effect of obscuration of li hts necessary as a v ar m asure

Comage, Weights and Measures

As the currency of India is ba ed upon the jehanjur 51 in Goshangunge The maunitupes studenests with re and to more are varies throughout all india from the Ben at gate illy apressed in rupees Down to about or railway mannd (8 M 71ba, to the Factory 1872 the gold value of the rupee (containing 165 maund of 4 lb 10 o 11 drs the Bombay grains of pure silver) was approximately equal to -8 0 one tenth of a £ and for that period it is easy to convert rupe a into sterlin by striking of the final cipher (Rs 000 = £100) But after 1873 owing to the depreciation of sliver But as compared with gold throu hout the world there came a s now and progressive fall in the societ came a s root, and progressive ian in the exchange at that one time the gold value of the rapee dropped as low as 1s. In order to provide a remedy for the heavy los caused to the Government of India in respect of its gold payments to be made in England and also to relieve foreign trade and finance from the inconvent nce due to constant and un foreseen fluctuations in exchange it was re of the rupe by restricting the circulation. The intent on was to tall the evalue of the rupe by restricting the circulation. of the rupee to 1 4d and then introduce a g ld ta lard t the rate of Rs 15 = £1 1892 onwards the value of the rupes 1899 onwards one value of the tupes were maintained with insignific nt fluctuitiors at the proposed rate of 18 4d until February 10 of when the recommendation of the Committee appointed in the previous year that the rupes should be linked with gold and not with string at a linked of 18 4d was Adorbad maintain at linked of 18 4d was adopted This was followed by great fluctua tions (See article on Currency System)

Dec mal C u g —In Jun 194 the Govern tof India is ued ommun que u esting ommun que u esting a d clm 1 olorge for I dia in which the rupe di il d i to 100 cents in t ad of 19 an i in ited public opinion on the propo al ni in ited public opinion on the proposa-to ermm nts re ons wer that the d c mal currency had displed of the forms in most oun ties the chief exceptions bein Indi Gr t iritain nd certain en pre count Public It the enter exceptions being the Public Pation of certain en pre count I Public ration w I voral I to the prop s I tut no of finite decl ion hal been taken at the time of

maund of 4 lb maund f 8 lbs with apparently answ re to tie Porest Department maund in use at th Fuel D pot and the Madras n aund which some author ties estimate at lbs and others

4 lbs and so o Committees of Inquiry -These a e mer ly typical that nees which are multiplied indefi n tely Ther are variations of evrv detail of weights and measu sin every part of India The lo es to trade a ling fom the confusion and the touble which the state of things causes are heavy. Mun clush and commercial bodies are continually r turning to the problem with a view to devising a practical chem-of reform. The Supreme and I rovincial Gov ernments has e made various attempts durin 40 years p t to solve the problem o univers I units of weights and measures and commer e and trade have agitated about the question for the past century Th Indian railways and Government departments adopted a standard tola (180 grains) seer (80 tolas) and maund (40 seers) and it was hoped that this w uld act as a successful lead which would gradually be followed by trade through out the empi e but the expectation has not been realised

The Governm nt of India con idered the whole que tion in con ultata n with the pro vincial Governments in 1890 1894 and vari s special steps have at different times been tken I differ at p ts of lucia. The Go ernme t of Iombay appointed a committee in 1911 to m ke propo al for reform f r the Bomb y Pres dency Their final report has in 1911 to m ke propo al for reform f r the Bomb y Fres dency Their final report has not been published but they presented in 191 n el ntrm r I t which has been less d to publi discuss on I no brief it points out the pr treal impossibility of proc eding by compulsory mea ures affect the whole granter, and et the Rombay Pro idence a cantic deel too hall be the prop at latt no of the deel too hall be the standard of which to have the decrease of the formulation of which common all over India but we shall too that it a given city ther are nearly from the formulation of the standard of which the standard of the standard of which the standard of the standar jakhs and crores thousand (written out as 1,00,000), and a crore is one hundred lakhs or ten millions (written out as 1,00,00,000) Consequently, according to the exchange value of the rupee, a lakh or rupees (Rs 1 00,000) may be read as the e mi valent of £10,000 before 1873, and as the equi valent of (about) £6 667 after 1899, while a crore of rupees (Rs 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) ±666 667 With the rupee at 18 6d i hih after 1899 is equivalent to £7,500 and a crore is equiva lent to £750,000

Comage - Finally, it should be mentioned that the rupee is divided into 16 anna, a fraction commonly used for many purposes by thath Indians and Europeans The anna was both Indians and Europeans formerly reckoned as 11d it may now be considered as exactiv corresponding to 1d The anna is again sub divided into 12 pies

Weights - The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units The scales used generally throughout Northern India and less commonly in Madras and stan dardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may he thus expressed as one maund=40 seers, one seer=80 tolas The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombas In the standard system the tolv Presidency is of 180 gruns, and seer thus weighs 2 057 lbc and the maund 82 28 lbs This stindard is This stindard is also used in official reports

Retail -For calculating retail prices, the universal custom in India is to e-press them in terms of seers to the rupce Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quanti ty to be obtained for the same amount of money In other words prices in India are quantity prices not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader It may, however, be mentioned that quantity prices are not altogether unknown in England espe cially at small shops, where pennyworths of many groceries can be bought Eggs, likewise, are commonly sold at a varying number for the shilling If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb, and that the value of the rupee remains constant at 1s 4d, 1 seer per rupec=(about) 3 lb for 2s, 2 seers per rupee=(about) 6 lb for 2s, and so on

The name of the unit for square measurement in India generally is the bigha, which varies greatly in different parts of the country But areas have been expressed in this work either in square miles or in acres

A lakh is one hundred the District of the Presidency, where it as 1,00,000), and a clore the District Officer, Mr. Sincox arradually during the course of three years, induced the people to adopt throughout the district uniform weights and measurer, the unit of sright in this case being a tola of 120 grains. But the committee ab tilred from recommerding that the same reights and measures should be adopted over the whole Presidency, preferring that a new system started in any orea should be as nearly as possible similar to the best wat m already prevailing there

Committee of 1915 -The whole problem wer again brought under special consideration by the Government of India in October 1918, when the following committee was appointed to inquire it to the entire subject and

C A Sliberrard (President) A Y G Campbell Rustomii Lardoonji

This Committee reported, in Auru t 1915, in favour of a uniform system of weights to be idopted in India bill on the 180 grain tola,

112 8 Lhaskhas = 1 chawal 8 chauals = 1 ratti = 1 musha 8 rtti-= 1 tol; 12 mashes or 4 tanl a = 1 chat il o tolas = 1 401 F 10 chatile = 1 mound 40 seers

The tola is the tola of 180 grains, equal to the rupes weight. The also has recently been fixed as 3 60 lbs or 140 tolas

Government Action -The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they ag in, for the present and subject to the restrictionimposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think agvisable to standardise dry and liquid measures of expecity within their provinces Similarly, they announced their decision not to adopt all India standards of length or area

As regards weights they decided in favour of the standard mentioned under the heading "Weights', earlier in this article, this having been recommended by article, this having been recommended by a majority of the Weights and Measures Committee having received and Local Governunanimous support of the ments At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that if subscriptions quently, opinion developed strongly in favour of the Imperial standardisation of weights, the Government of India would be prepared to undertake such legislation, but for the time being they considered that any such step would be premature

By 1939 opinion in favour of legislation by the Proposed Reforms—Indian weights and measures have never been settled upon an trade characteristic of the modern age. They vary from town to town and village to village to the descent of the descent of the weight and the will follow a good lead is apparent in the East. Part IV of the Cazette of India of the 1st April 1939 The Act laid down the following standard

- () the standard tola being a weight of 180 standard grains
- (b) the standard seer bein a weight of 80 standard tolas or 14 400 standard grains
- (c) the t ndard maund being a weight of 40 standard seers
- (d) the standard pound bein a wei ht of 7 000 standard grains
- (e) the standard ounce bein one-sixteenth part of the weight of a standard pound
 - (f) the stanlard lundred wel ht being a weight of 11 standard pounds
 - (c) the standard ton bein a wel ht of _ 40 standard pounds

Under sub section () of section 4 of the Act the Central Go crament undertook to supply ch Provincial Government a complete set of daly authenticated standard wei ht Accordingly in October 1941 Government of India surplied to the Provinci I Government of Bhar a complete et of Reference Standard Weights witch was placed under the charge of the benior M rketing Officer Libar

The enforcement of standard weights throu h out the P ovince of Bil ar as I id down in Act IX o 1939 of the Centr I Government was aw itin a suppl me tary provincial legitlation which in y be possible under normal co ditions Just 60 criment of Bihar in their notification to 185 D R. dated the 7th M y 194 in evereigh of the power conferred by sub section (1) of s ct on J of th Government of India Act 103 are disasted that it School of M y 194 in the Act 103 are disasted that it School of M y 194 in the Act 104 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M y 194 in the Act 105 are disasted that it School of M 194 in the M 194 in have directed that th Standards of Weight Act 19 9 (IX of 1939) shall pply to th Chota ha pur D vision and to the Santal Largan s Distri t a a special measu e In Bih r it was felt that it may be convenient to start with the enforcement of stand rd wel his alo e in the concrement of stand rd well his allo 6 in the first in tance and the mea ures of capacity may be left lone for some time to allow the buy 15 and sellers to adjust the mea ures on the la is of the tandard wel, this

The followin are the Standard Wei hts and Measur s coordin, to the Bombay Weights and Measures Act of 193 -

We ghts-

The Rombay Tola of 180 grains The Bombay Seer of 80 tolas

The I ombay Maund of 40 seers

The sub multiples 1 1 1/16 and 1/3 and the multiples 4 and 8 of the tola seer and maund

nirra 000 The pound avoirdupois equal to and the sub multiples 1 1 1 1 4 and 8 counces the multiples 1 2 4 7 14 8 lb (a quarter) 56 lbs 11° lbs (1 ct t) and 2 40 lbs (1 ton)

Hyderabad (blnd) Tiangoon	3	198	0 1	19 6	18 4	91	-06

Special causes contribute to the high mortality, cen us show a further continuation of the steady on infants in India

Owing to the custom of early marriage co hat itation and child birth commonly take place before the woman is physically m ture and this combined with the primitive and insanitary tollacined with the primitive and insolutely methods of midwilery seriously aff cts the health and vitality of the mother and through her of the child if the child survi cs the prevails and natal ch ness of congenital debility and the with a third that the child survive and the prevail and the constant of the constant of the child survive and the chi satal and natal choices of congenital deblity nature of the strain of bearing and the risks of child birth I its exposed to the and in adolescence by the strain of bearing and the risks of child birth I its exposed to the and in adolescence by the strain of bearing and the risks of the strain of

cen us show a further continuation of the steady it in the proportion of ten les to make that has been going on since the beginning of this tentistic of the population of India as compared to that of most European countries. The tentals in it is definitely better equipped by nature for serviced than the make but in India tentistic or serviced than the make but in India the compared to the service of the serv

SOCIAL AND ECONOMIC CONDITIONS.

census, 120 out or every 1,000 of the population are now literate as against 95 ten years ago and less than 40 half a century ago. The increase was 60 and the female 150

For the provinces the increase was 80 and for the States 70, with the sex components more or less the same The most remarkable figures are returned by the Punjab which professes a 140 per cent increase to a present literacy of 13 men and 34 for women. The latter figure is This figure covers 110 increase for males and no less than 390 per cent for females. In the UP British India

Literacy —Literacy, by which was meant, the literacy figure is below that of other areas until the 1931 census, ability to read a letter and all major provinces and is still only 8 per and write a reply, was in the 1941 census expanded to provide for a record of partial literacy, re ability to read only (See chart of 1931, and shows also an increase of over 100 less than 40 half a century ago The increase per cent to produce a 30 per cent literacy for in the case of India as a whole amounted to males and 0 per cent for females Bengal 70 per cent over 1931, of which the male increase was 60 and the female 150

The percentages The percentages and 7 for females The percentages and 7 for females The percentages are now interested in the female 150 are on the total population These figures are left far behind by Travancore and Cochin, These figures are which show a literacy figure over the whole population of 45 per cent, representing 58 for men and 34 for women. The latter figure is

Indian Roads.

as follows

There exist four great trunk roads, stretching diagonally across the country, which form the framework with which most of the important subsidiary roads are linked These trunk roads subsidiary roads are linked have been in existence for an immense period and are rich in historical association The most means of financing it The recommendations famous is the ancient marching route—known as the Grand Trunk Road—which stretches right across the northern part of the country whose conclusions upon them were emfrom the Khyber to Calcutta, the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 85,000 miles of metalled road in India None of these roads however can be considered safe 'all weather' trunk roads according to modern standards The Madras Calcutta road in particular is far from being bridged throughout its entire length The other three roads also require a great deal of improvement, on the Grand Trunk Road from Calcutta to the North-West Frontier, for example, there is as yet no road bridge over the river Sone in Bihar, and on all of them there are places where floods are liable to cause serious

interruption to traffic

Subsidiary Roads—As regards the subsidiary roads, the best and most numerous are to be found in Southern India As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its ardity and sparse population, and the latter because of the numerous unbridged and mostly unbridgeable waterways which dissect it In addition there are numerous other parts of the country, such as the lower Him alayas, which suffer from a dearth of communica

tions owing to the difficult terruin Besides surfaced roads, there is a very large mileage of Lutcha" roads in India amounting to approximately 260,000 miles, some of which are good for motor traffic during the dry weather

Development Committee -On Road

India's road system may be briefly described port, was altogether insufficient for her needs, and it is the increasing realisation of this fact that led to the appointment of the special Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing bodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose unexpended balances should not lapse at the end of the financial year

Road Development Account —The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legis lative Assembly in February, 1937 Its main features may be described as follows. The special tax on petrol introduced in 1929 shall continue to be levied for road development, the precede of which effer rate lying a received. the proceeds of which, after retaining a reserve of 15% for administration, research and special grants in aid, shall be allocated for expenditure in the different provinces, Indian States, etc , in the ratio of the petrol consumption in the various These sums may be spent on the conareas struction, re construction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of Provincial Boards of Communications and establishment connected the with the control of motor transport whole it is reasonable to say that India's road clause inserted in the present resolution lays system, even before the advent of motor trans down that "if in the opinion of the GovernorGeneral in Council the Government of any | Governor a province has at any time -(a) falled to take such steps as the Gover

nor General in Council may recommend for the regulation and control of motor vehicles within the province or

(b) delayed without reasonable cause the pplication of any portion of the Road Fund allocated or re-allocated as the case be for expenditure within the province

The Governor General in Council may resume the whole or part of any sums which he may at that time hold for expenditure in that province

With the le y of a Surcharge on petrol the share of the petrol duty available for the Road Fund was increased from 2 annas to 1 anna per gallon with effect from October 1931 The actual statement of the Account up to April 1943 is as follows -

The position of the Road Fund as at end of 194 43

Read Admini trati n —On the administra tive ide reads are a provincial subject and may tivo die roads sea provincial subject ud many be dvrided into two main classes. Provincial Roads under the Public Works Department Local Roads in charge of local bodies related to the result of the season of the roads in charge of local bodies of main can depend to Local bodies view to the considerate to Local bodies view to the considerate to Local bodies view to the considerate to Local bodies view to the consideration of the strain womented without the strain womented wi of the extra municipal mileage is under the ch tre of District Board or District Councils in lading a cert in mil ge mainly in Madra and the Central Provinces which i termed Provincial but m intained and their agency Within Municipal areas all roads ofb than

The Ro d Fund —Up to the introduction of the Road Fund in 19 9 all Provincial roads were finance i exclusively from the General Revenues of the provinces and local roads from local revenue local revenue supplemented by provincial grants Since 10 9 however the Road Fund is being distributed to Provinces and is available for construction reconstruction or improvement of roads but not for ordinary road upkeep. The object of creating the Road Fund was to supple ment and not to replace the normal expenditure

on original road works from provincial and local revenues but unfortunately the years following the lutroduction of the Fund have been marked by acute financial stringency, with the result that provincial governments and local bodies have I ad to make drastic curtailments in the allotments made for roads from their revenue

The effect of these curtailments has been to starve the construction and development of feeder toads as the Road Fund was being used exclusively for roads of inter provincial and inter district importance The Government of India however have now laid down th t at least 25 of the provincial shares in the Road Fund should be used on feeder roads and that not

more than 5 per cent can be used on roads 160 00 which compete with the Railways Expenditur n Ro ds -- As explained above 1 959 55 in spite of the inauguration of the Central

Road Development Fund the total expenditure on roads h s been on the decrease The expenditure in 1938 39 which amounted to Rs 60 1 lakhs in the Governors Provinces was Rs 41 7 lakhs less than in 19.8 29
Revenu fr m Mot r Tr nsp rt.—The

revenue from motor transport on the other hand has been steadily incre ing In 1938-39 the total revenue of the Cent I Government and Pro Incial Governments from this source was 960 lakh repre enting an increase of Rs 358

lakhs ove the total road expenditure

R d Mileag —The grand total of the
mileage of extra mupicipal roads maintained by public autho ities in India including Indian States was 347 13 on March 31 1938 of this the total mileage for Governors Provinces amounted to 850 for Central Areas 6 811 1 487 80 and for Indian St tes 61 819

The total mileage of roads with modern surface eith r bituminous or cement was 0 650 and the total mileage of water bou d macadam roads was 614 making a total mileage of roads which were eithe modern surfaced (bituminous or concrete) or water bound macadam of 85 79

The total mileage of lower typ s of roads was 61 340 The e roads are of three types was of saw ith artificially admixed granular material gravel moorum etc on natural soil having a total mileage of 9473 secondly roads of natural soil which are moto able in foal weather lavi ga total mileage of 1 73 thirdly ro ds of natural soil which are u motorabl having a total mile ge of 109 181

motorabl having a total mue ge or 100 to:
The total milesge of Ro ds that are motorable
was thu 38 001 out of whi h 115 265 miles
we e motorable throughout the year and the remaining 1 36 miles moto able in fair w ather

Out of the 85 313 miles of roads in British s tions attending a great all roads off than 1 Un on the course of the c

The province with the greatest road mileage and for fostering the conomic advancement of was Bengal with 91,192, out of which, however, only 3,887 was modern surfaced or macadam, while the province with the greatest mileage of modern or surfaced roads was Madras with 21,441 miles out of a total provincial mileage of of 35,717 Bombay had 11,134 miles of modern or surfaced roads out of a total provincial road the road mileage to 100,000. This is estimated or surfaced roads out of a total provincial road mileage of 19,571

There are in addition, the roads maintained by municipalities the length of which is approx mately 18,433 miles made up of 10,840 miles of metalled roads and 7,593 miles of unmetalled roads

Post-War Prospects - Considerable interest has been aroused during the past few months in the need for an extensive programme of road development in India after the war both for the

Cost of

schemes

the entire road system and designed to increase the road mileage to 400 000. This is estimated to cost roughly Rs 300 crores according to pre war values Post-war values, the Chief Engineers estimate, will be roughly 50 per cent above former levels, in which case the cost of the programme would be Rs 450 crores This programme is to be split into two parts one a short term programme for the immediate needs arising out of the war and the other a long term programme for economic advance ment. The provinces are engaged in preparing road plans in accordance with this recommendapurpose of assisting the transition from war of tion and there are indications that the main peace—when it will be necessary to find employ-trunk roads or national highways as they are ment for thousands of ex soldiers, thousands of to be called—will in the post war period be motor vehicles and large quantities of road taken over by the Government of India from making machinery now in use by the Army—the Provinces Statement showing the allocations made from the Central Road Fund and expenditure incurred therefrom upto the end of 1942 43 Expendi

The Government of India.

The impulse which drove the British to India | Crown was not conquest but trade The Government of India represents the slow evolution from conditions established to meet trading requirements On September 24, 1599, a few years before the deaths of Queen Elizabeth and Akbar, the mer chants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation The Government of this Company in England was yested in a Governor with a Genration eral Court of Proprietors and a Court of Direc-The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company The three "Presidencies" were independent of each other and subordinate only to the Directors in England

Territorial Responsibility Assumed

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors Step by step the Company became first the dominant, then the paramount power in India In these changed circumstances the system of government by mutually independent and un-wieldy councils of the merchants at the Presi-dency towns gave rise to grave abuses Parhament intervened, and under the Regulating Act of 1773, a Governor General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the pre-vious consent of the Governor-General of Bengal in Council, except in cases of immunent necessity Pitt's Act of 1784, which establish ed the Board of Control in England vested the administration of each of the three Presiden cles in a Governor and three councillors, including the Commander-in-Chief of the Presi-dency Army The control of the Governor-General in-Council was somewhat extended,

The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General in Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Muthny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown This Act made no important change in the administration in India, but the Governor Gaperal as represent India, but the Governor General, as representing the Crown, became known as the Viceros The Governor General was the sole representative of the Crown in India, he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration

Functions of Government

The functions of the Government in India are perhaps the most extensive of any great administration in the world It claims a share in the produce of the land and in some provinces it has restricted the alienation of land from agriculturists to non agriculturists It undertakes the management of landed estates where the proprietor is disqualified In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium It owns the bulk of the railways of the country, and directly manages a considerable portion of them, it has constructed and maintains most of the important irrigation works, it owns and manages the post and telegraph systems, it had until 1st April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic, estates It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one fifth of its population. The distribution of these great furc tions between the Government of India and the deneral in-Council was somewhat extended as it was again by the Charter Act of 1793
Under the Charter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body holding its territories in trust for the

THE REFORMS OF 1919 AND 1935

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921, having received the Royal Assent on 23rd December 1919 (For detailed particulars see The Indian Year Boot, 1936 37 and preceding years) Still vaster changes in the direction of Indian Self Government and of Dominion of 1935, which includes 321 sections and 10

schedules and is the largest and most complex of the Act the States should enter Federation legislative enactment of the kind ever negotiated by executing Instruments of Accession. The federal programme has now been suspended and the administration at the centre is carried on in The new Constitutional provisions relating to the Provincial Governments were brought into Period which have been included in part XIII of force on 1st April 1937 Under the provisions has Act of 1935

THE PROVINCES

An amending Act was presed in 1940 [introduced in Parliament in 1939 | to make certain readjustments found necessary in the operation of the 1935 Act To safeguard provincial ex chequers taxes on mechanical or other relicies or on the sale or consumption of elect-i city were added to the provincial list. By an amending passed in 1030 it was provided inter alia that in the event of a war emergency being proclaimed by the Governor General the Central Government may assume executive in addition to legislative authority over any field and can also with the specific senction of the Governor General empower Federal officers to perform functions ordinarily the concern of provincial administrations

THE CENTRAL GOVERNMENT

The structural changes made by the Act of 1 The structural changes made by the Act of 1919 in the system of government outside the "Governors' provinces" were of comparatively minor scope, though considerable modifications were made in the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The Act of of State in Council on the other The Act of 1935 provides for further extensive changes at the centre, but these will only come into force when the Indian States accede to Federation and meanwhile, at the Centre, the constitution established by the Act of 1919 prevails, subject to certain modifications required to bring it into harmony with the new conditions in the Provinces One of these changes is the vesting Provinces of certain responsibilities in the Governor General "in his discretion" which means that they are "in his discretion" which means that they are left in the charge of the Governor-General as distinct from that of the Governor General in Council The Act of 1935 has also taken the relations between the Crown and the States outside the purview of the Governor General in Council and entrared them to a new authority and of the Molecute Representative for the council and entrared them. called His Majesty's Representative for the

relations with Indian States (Crown Representative for short) The offices of Governor-General and Crown Representative are held by the same person The only concrete changes made in the constitution of the Central Government the 1919 Constitution were the removal of the statutory bar to the appointment of more than six members of the Governor Generals Executive Council (which, however, had the far reaching consequence that a majority of the members of the Council or a majority of the members of the Council are now Indians) and the reconstitution in a much more enlarged representative and independent form of the central legislature This became, like the Legislative Council in a Governor's province, a legislature with all the plenary powers generally given to such a body save such as are specifically withheld by the terms of the Act It consists of two Chambers The "Council of State" is a body of 58 members, including 32 elected and 26 nominated, of whom not more than 20 might be officials The "Indian Legislative Assembly" consists of 141 members, of whom 102 are elected Of the 39 nominated members not fewer than one-third are required 1 central legislature This became, members, not fewer than one-third are required to be non officials. The members of the Governo exercise of the functions of the Crown in its General's Executive Council have not bee

made ex-offices members of either Chamber | both in the Assembly and the Council of State but each of them has to be nominated a member of one or other Chamber and can vote only in the Chamber of which he is a member Anv member of the Executive Council may however speak in either Chamber The President of the Upper Chamber is appointed by the Governor General So also for the first four years after deneral So also for the institute years after the constitution of the Chamber was it e President of the Legislative Assembly But sider that period the Lower Chamber elected is own President and it elected its own Deputy President from the outset The normal lifetime of each Council of State is five years and of each Legislative Assembly three years but either Chamber or both simultaneously may be dissolved at any time by the Governor General who has also the power to extend the lifetime of either Chamber in special circumstances

Election—The method of election for both Chambers is direct and although the number of electors is considerably smaller than to the Provincial Councils, it is a great these on the very restricted and for the most part of the mo lature which then existed Generally speak ing the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils except that fir fly the property qualification for voters (and consequently for candidates) is bigher in order to obtain manageable consti-tuencles and past service with the colours is not per to a qualific tion for the franchise and see My that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council The distribution of seats in both Chambers and the arrangement of constituencies are on a provin cial basis that is a fixed number of the elective scats in each Chamber is assigned to represen tatives of each province and these represent atives are elected by constituencies covering an assigned area of the province

The Government of India Act 1935 by Separating Burma from India climi ted the Burma members

TIN 1937 Berar was represented by nomination

have been increased by one and a signed to Rerar

Since the area which returned perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 1_ members to the Legislative Assembly-namely the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arrang d on a territorial basis was made in the district it may be said that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group of districts controlled by a Divisional Commissioner)

The Franchise -The general result of the first franchise arrangements under the Act was thus that there vas in each province a body of electors qualified to vote for and stand for elec tion to the Provincial Council and that a select ed number of the evoters were qualified to vote for and stand for election to those seats in the Indian Legislative Assembly which were as signed to the province The qualifications for candidature for the Indian Legislative Assembly were made the same in each province mulatic mulandis as for candidature for the Provincial Council except that in the _provinces so long as the candidate could show that he resides somewhere within the province closer connection with his particular constituency was insisted upon

The franchise for the Council of State differs in character from that for the Provincial Council in character from that for the Provincial Council and the Indian Legislative Assembly The con-cern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a Senatof Elder Statesmen and thus to constitute a body capable of performing the function of a true revising Chamber With this Ant conowing table shows the original and before the addition and as an accurate to the directive seat plus one since added in the North Wast Evolution Province—

Legislative Council of with a stake in the county—the rules somit as the county—the rules some the county—the rules some table property of the county—the rules some table province the county—the rules and the rules of the qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted or of its predecessor or of the Pro-vincial Legisl ture the holding of high office in local bodies (district boards municipalities and oroprations) membership of the governing bodies of Universities and the holding of titles conferred in recognition of Indian classical learning and literature

Powers -The powers and duties of the Indian Legislature under the 1919 Act differed innian Legislature under the 1919 Act offered but little in character within the central sphere f om those of the provincial Councils under the same Act within their provincial sphere and it acquired the seme right of voting Adminus Retar was represented by nomination supplies fr the Central Gov rument Bt the the Commencement of the Government as no direct attempt was made to introduce of India Act 1933 the number of elected seats (responsible government at the centre the step ŧΙ

in that direction having been a vowedly confined to the provinces, and as consequently the Executive Government of India remained legally responsible as a whole for the proper fulfill. ment of its charge to the Secretary of State and ment of its charge to the Secretary of State and Parliament, it followed that the powers conferred of India Act, 1935, affecting the Government on the Governor General to disregard a decision of India, were described in an earlier part of this of the Indian Legislature were less restricted chapter

THE INDIA OFFICE.

relaxations were made in the statutory of control of the cost of samples of rinding relaxations were made in the statutory office stall and general maintenance which was rigidity which formerly bound their procedure attributable to the exercise of its administrative and that of the Office in general But provides distinct from purely agency functions sions were made which undoubtedly as time went on had a material effect on the activities of the Office A High Commissioner for India over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control His functions relate mainly to the control of Indian Government Trade Commissioners in Europe and America, arrangements in connection with exhibitions and fairs outside India, sale and distribution of Central Government publications, representation of India on Inter-Empire Organisations and at Conferences, relief and repatriation of destitute Indians, deputation, recruitment of persons for special respect of his personal power

The Act of 1919 made no structural posts, and payment of leave salary and pensions changes in the role of the India Office in of officers in Europe, etc Concurrently with the administration of Indian affairs Slight this change, it became possible to defray from alterations were effected in the number British revenues the salaries of the Secretary of and tenure of office of the members of State and of the Parliamentary Under Secretary, the Secretary of States Council, and some and that portion of the cost of salaries of India

The Act of 1935 provides for the appointment by the Secretary of State of not less than eight nor more than twelve persons (between this cand six after the establishment of Federation) whose duty it shall be to advise him on any matter relating to India on which he may desire their It also prescribes that the salary of the advice Secretary of State and the expenses of his De partmentshall be paid out of monies provided by Parliament (Under Tederation) The Governor-Generalis given in his sphere of responsibility reserve powers corresponding with those aiready mentioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible through the Secretary of State to Parliament Until the establishment purchase of stores outside India provision of of Federation, the Secretary of State continues educational and study facilities for Indian to exercise control both over the Governor students and Government officials on leave or General in Council and the Governor General in

PERSONNEL AND PROCEDURE.

The Governor General and the members of and for the administration of certain statutes his Executive Council are, under the Govern ment of India Act 1919 as continued by the Act of 1935, pending the establishment of Federation, appointed by the Crown No limit of time is specified for their tenure of office, but custom has fixed it at five years As an emergency measure during the war, the membership of the of War, Defence including Civil Defence, Finance, Home, Supply, Commonwealth Relations Law, Commerce, Information, War Transport, Posts & Air (Civil Aviation), Education, Health and Lands, Labour Food, Industries and Civil Supplies, Planning and Development The Commerce Department deals generally with commerce, tariffs, company law, insurance and actural work and with blue water shipping The Department of Post and Air deals with post and telegraphs civil aviation, meteorology and and telegraphs civil aviation, meteorology and roads The Dept of War Transport deals with Ports Inland navigation, Railway properties, Petrol rationing, etc Railways form a separate department, but are under the same member of the Council as the War Transport Department The Secretary for War Transport Department attends the meetings of the Railway Board as an ex officio member The Department of Labour deals with labour subjects In addition it assumes responsibility for labour in docks.

affecting labour on the railways It deals also with public works and irrigation, mines, technical education so far as that concerns industry, printing and stationery and various items of safety legislation and administration Ecclesiastical affairs are placed under the War Department measure during the war, the membership of the Civil Defence which was created as a separate Viceroy s Executive Council has been increased to Department in 1941 has now been merged to These members hold charge of the portfolios with the Defence Department

> The Viceroy is in charge of External Affairs The Viceroy is in charge of External Affairs The Commander in Chief in practice always is a member of the Executive Council He holds charge of the War Department The Council may assemble at any place in India which the Governor General appoints In practice it meets only in Delhi and Simila except for a meeting or two in Calcutta after Christmas, when the Viceroy is usually in residence in the Bengal Capital the Bengal Capital

which also affects another must be referred inections at which cases under his cordisance to the latter, and in the event of the Depart is are dit used that he attends on the Viceroy ments not being able to agree the case is instally once a week and discu see with him all referred to the Viceroy The Members of matters of importance will not in his D part Council meet among the considerable of the properties of the properti which also affects another must be referred meetings at which cases under his cognisance one ancurive councu. If there is a underence pave under them John Deputy Und rail of councin in the Council the decision of the Assistant Secretaries togetfor with the ordinary majority ordinarily prevails but the Vicercy clerical establishments. The Secretaries and can over rule a majority it he considers it at subordinate officers are often though by no the matter h of such grave importance as to means exclusively members of the Indian Civil sue matter is of such grave importance as to means exclusively members of the Indian Civil instity such as step Each departmental office is Serice. The Government of India has no in charge of a Secretary whose position corresponds to that of a permanent Under of the Provincial Governments and officers Secret y of St te in the United Aingdom but servin under the Cov rament of India are with these differences—that the Secretary is borrowed from the Pravinces or in the case of present though he does not speak at Council specialists recruited direct on contract

His Highners The Chancellor of the Chimber of Princes, and the representative from the Hyderabad State, however attend all the reservoir. the representative from the Hyderabad State, however attend all the sessions

Office R A Gopalaswami, 108, Secretary, Karam Chand, Superintendent, G S Bansal, Assistant

the map covers a total area of 67 334 sq miles stiduling Tribal territory encloses Indian States with an extent of 12 3 0 sq miles deduct-ing which the nett area of British territory is mg much the next sees of infilial territory is \$5014 sq miles. It is formed of the Assam or Brahmaputra valley the valley of the Surma to the south and portions of the hills which surround the e valleys on the North East and South or separate the valleys from one another To the West lie the plains of Bengal

Population -British territory -The total Population—British territory—The total population of the Province [British territory) in 1941 was 10 204 33 of which nearly 44 millions was Hindus over 34 millions Maulins 4 millions belonged to tribal religions 43 per cent of the population were recorded a speaking Ben gul I per cent Assamese other inanguages was province are Hindi Uriya Mundari Yeshe province are Hindi Uriya Mundari Yeshe British province are Hindi Uriya Mundari Men and Maria Mendari Menda Tibeto-Burman languages

Agricultural Products -The river basins Agricultural Products—The river basins are naturally fertile and present in the main few difficulties to the cultivator Rice is the staple food crop nearly 5 637 575 acres in 1943 44 being devoted to this crop Rainfall being high the problem in general is to dispose of the surplus water and to control the action of floods rather than irrigation in the usual sense and jute are the most important crops grown and nue are the most important crops grown, for export. The area under tea consists of 440 017 acres in 1943 44. About 43 800 acres are devoted to sugarcane. A good deal of short staple cotton is grown in the hills.

Meteorological Conditions—Rainfall is sverywhere abundant and ranged from 51 2 to 234 07 inches in 1938 leaving aside the highest recorded rainfall in this part of India which was the maximum reached at Cherrapunji in the Khasi Hills (569 50) this is one of the in the Anasi Hills (1959 00) this is one of the wettest places in the world Temperatures are moderate Earthquakes of considerable severity have taken place by far the worst being that which occurred in 1897

Accounts of the petroleum occurrences in Assam have been published in the memoirs of the Geological Survey of India The petro leum localities to this province are confined to a curred belt of country along the basins of the Brahmaputra and the Surma This belt is traceable over a distance of some 800 miles from N E Assam through Cachar and Chittagong to the Arakan coast where it has a S E trend

Mines and Minerals —The only minerals in Mines and Minerals —The only minerals in Assam we ken a commercial scale are coal limestons and petroleum oil. The most exten sive coal measures hitherto we ked are in the about 0 and the Lakhimpur districts where about 0 490 tons were raised in 1044 Impor tant deposits also exist in the Garo Hills Lime atone is quarried in the Ahasi and Jaintia Hills Petroleum is Petroleum is worked only in Lakhimpur and Cachar and has only been refined in Lakhimpur

Manufactures and Trade—Silk is manu-factured in the Assum valley the weaving being decay mean. Cotton weaving sea long by practice of the Manufacture of the Cotton in that valley and to contain a loom the cloth is being gradually displaced by imported goods

The Province of Assam which as shown on; of finer texture and colour but vicorous efforts at revival are being made by Gov rnm ut Tea manufacture is the most important industry of the province Boat bull ling brass and metal and earthenwares and limestone burning are other industries but a riculture employs about 80 per cent of the population Assam carries on a considerable trade with the adjoining foreign tribes and countries

Communications -Much of the trade of Assam is carried by river The extensive system of rivers makes the province less dependent upon roads than other parts of India but ti ere has been much advance in recent years in roal communication. A fleet of steamers maintained by the India General havigation Company and tl'e Rivers Steam Navigation Company plies on the rivers in bott Valleys. An altern te day the rivers in bott Valleys. An altern te day service of passenger boats runs between Goalundo and Dibrugarh There are two trunk roads on either bank of the Brai maputra most of which are metalled or gravelled There are excellent metalled to da from Shillong to Ganhati Shillong to Sylhet Shillong to Clerrapunji and also be tween Dimapur on the Bengal & Assam Rallway (A B zone) and Imphal the capital of the Mani pur State The Government of As am had in 10 8 carried out a considerable programme of road improvement and another programme which aimed at the improvement of nearly 300 n il s of road either by metalling or gravelling and the construction of 1° big bridges is complete In September 1937 a further road improvement programme totalling Ps 1 05 25 000 was drawn up from which 22 schemes amounting to Rs 41 11 0 4 were selected as a priority class The Government of India have recently approved a programme runni g up to 31 3 45 under which 15 at these priority class schemes amounting to Rs 3 00,000 will be financed from the Road Fund The work on some of from the Roya Tuna The work on some or these projects is already completed In addition to the above the Government of Assam propose spending about Rs 1 3 000 out of the Provincial Motor Taxation Road Fund on the improvement of secondary or feeder roads Fut ha roads are being maintained by means of mechanical plant which has proved successful in maintaining throughout the year a surf ce fit for motor v hicles Motor traffic has increased on all sides and the demands for better roads have be p insistent The open mileage of r ilway has loo shown a steady improvement and several branch lines to the Beng l & Assam Railway (A B zone) system have been added in recent years zone) system have been added in recent year; The main Bengal C. Assan Rallway (A B zone) line runs from Chittagong Port in Beng i through the North Cachar Hills to Thasukia a station on the Dibru Sadiya Rallway and connects the Surma and Brahmaputra Vall ys A Dichar t the Eastern end of the Surma Yalley Bichar t the Eastern end of the Surma Yalley Silchar t the Eastern end of the Surma Valley and anothe runs west down the Assam Vall y and anothe runs west down the Assam Vall y-from Lundi g to P ndu where it effects a junction with the Bengal & Assam Railway (B B zone) The Bengal & Assam Railway (B B zone) connects Assam with the Bengal system rea the Valley of the Br hampetra Railhead is now at Ra g p a north of Teopur Both Assam Bn I lily and Eastern By hav been annicamatied from 144 have been natured Ben al and Assam Ril have been natured Ben al and Assam Rly

80 Assam.

Administration—The province of Assam was originally formed in 1871 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1005, as the result of further deliberations, it was decided to add to the small Province of Assam the castern portion of its unwieldy neighbour and to consolidate those territories under a lieutenant Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912, the lastern Bengal Districts are united with the Bengal Commissioner-hips of Burdwan and the Presidency to form the Presidency of Bengal under a Governor in Council, Bihar, Chota Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor in Council and was thereby ranked with the older major provinces

of India

The capital is Shillong, partly in British and partly in Khasi State territors, which has for a number of years been growing rapidly and is now in parts over crowded. The town has grown up on somewhat rust clines in very beautiful country on the slopes of the Shillong Range which rises above it to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt with methods of construction more fitted to withstand the shocks of earthquake.

THE FINANCES OF BENGAL.

After a sequence of deficit budgets for several ven x, Ben at looket forward hopefully to an improvement in her financial position as a direct result of the special steps taken by the Central Government and by Parliament through the India Act to allow to them are pliched in his Productal Autonomy she was better off to the exent of Ps. 75 lakks a year than twiors. In the year 1935-36, despite the grant from Central resenues of an amount equal to half the process of the jute export duty, the budget showed a deficit of Ps. 512 latts. The Ni meyer report however, as subsequently implemented gave a further sam of Ps. 42 latts annually from an increase a share in the late export duty, and always an analysis of the 23 latts is to expecilled the Protings. as suscept neity impremented gave a further sain of 1's 4214 his annually from an increase 1 share in the jute export duty, and also an annual relief of its 33 lad 1 six cancelling the Provinces occurred lated debt to the Centre. Thus Bengal was able to face the future with more confidence. The Budget for the very 1937-78 was a surplus linded. The very 1938, however, mark of the beginning of another sequence of deficit budget. The budget for 1941 42 revealed a deficit estimated at more than a cross of ruples. Although the finances of the Irovince represented in the mated at more than a crose of supers. Atmosphene members of the Fronce was executed as an except a continuous improvem at the expanditure of the Province appears to have received a stop where it may be said the footenment are living well beyond their means. In ever 1915 if was misked by a considerable ris in income, but unfortunately flood and famine not only served to hamper normal development but resulted in heavily increased expenditure on relief and requistration measures. Another detects resulted, but discussions were instituted for assistance from the Central Government as the outlook wiseven worse for 1944 45. The assistance received however, proved fundequate to stop the rot, which was aggravated by economic conditions. A further request for assistance from the Centre has been made, but meantime the Prosince continues to budget for a deticit in 1915 16

ŧ

As in the case of Bombay Presidency, the province known hitherto as Bihar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details there fore appertain to the new Bihar province after the separation of Orissa as from April 1, 1926.

the separation of Orisia as from April 1, 1926

Bihar Hes between 20° 30 and 27°-30′ N
latitude and between 82°-31′ and 88°-20 E
longitude and includes the provinces of Bihar
and Chota Nagpur, and is bounded on the
north by Nepal and the Darjeeling district
of Bengal, on the eastby Bengaland the Bay of
Bengal, on the south by the new province of
Orissa, and on the west by the United Province;

Orissa, and on the west by the United Provinces of Agra and Oudh and the Central Provinces.

The area of the territories which constitute the Governorship of Bibar is 69,348 square miles. The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Resident, Lastern States and no longer form part of the Province Chota Nagpur is a mountainous region which separates them from the Central Indian Plateau Bihar comprises the valley of the Ganges from the spot where It issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal South of Bihar lies Chota Nagpur Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muraffarpur (for Tirhut), Bhagaipur and Ranchi (for Chota The headquarters of Government are at Patna The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called are at Patna "Patna City"

The People
The Province has a population of 36,340,151
persons Even so with 521 persons per square
mile, Bihar is more thickly populated
than Germany There are only four towns,
which can be classed as cities, namely, Patna,
Gaya, Jamshedpur and Bhagalpur During the
last ten years the population of Patna has
been steadily increasing Hindus form an overwhelming majority of the population Though
the Muhammadans form about one tenth of
the total population they constitute more than
one-fifth of urban population of the province
Animists account for 5 7 per cent These are
inhabitants of the Chota Nagpur plateau
and the Santal Parganas, the latter district
being a continuation of the plateau in a northeasterly direction

Industries

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still for the bulk of the population of the province agriculture continues to be the basic occupation. Over 80 per cent of the population depends wholly on Agriculture, while only 78 depends on industries.

The soil throughout the whole of that portion of the Indo Gangetic plain lying within the provincial boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile The province occupies a transitional position between Bengal with its

damp climate so suitable for the paddy crop and the provinces to the north and west where large irrication schemes have had to be provided to enable the roil to produce its bounty. As in Bengal, rice is by far the most important crop as it occupies normally an area of approximately 12 million acres or about 52 per cent of the nest cropped area of the province. In 1942-43 the area under rice was 9,291,200 acres. As canal irrication is available only in the Sone valley and to a moderate extent in Champaran District, the importance of the south west monsoon to the province of Biliar cannot be over estimated.

In addition to the rice crop, however, other grain crops are grown on a tolerably large scale. Of the monsoon cereals, malro is grown in a normal area of about 16 lakhs of acres while in the cold weather wheat and barles are extensively grown and occupy approximately 13 lakhs of acres. The cultivation of ollseeds like castor, mustard and lineed forms a large and important part of the agriculture of Bihar, the normal area under spring ollseeds being estimated at more than 17 lakhs of acres. The areas under malro, wheat, barley and spring ollseeds in 1943 44 were 1,513,100 acres, 1,220,800 acres, 1,270,100 acres and 1,504,300 acres respectively.

After the United Provinces, Biliar is the most important white sugar area in India, some 26 per cent of the total production of white sugar in the country being turned out in Biliar factories. The importance of the agricultural aspect of the industry cannot be overestimated as nearly 1 crore of rupees have been paid to the grower in the past season 1942 is for case purchased and crushed by the factories. Apart from this, numbers of young graduates and a large labour force find employment at the factories from vear to year. The number of factories in the province has risen from 12 in 1931-32 to 31 at the present time.

Jute Is also an important crop and is confined almost entirely to the Purnea district on the Bengal border where about 95 per cent of the total crop in the province is produced. The total area under the jute crop was 202 200 acres in 1943 44 but little of the produce is manufactured within the province.

Tobacco is a crop of increasing importance in the province and one which is likely to expand in importance The area under the crop in 1043 44 was 110,000 acres There are two factories at present in the province

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chiuese Government the Patna Factory has been closed At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinplate Company of India, Agricultural Implements, Ltd. Enfield Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 1½ million.

iron mines in the world and supplies the iron and steel works in both Bengal and Bihar with raw materials but the raising of coal is still the most important of the mineral industries in the most important of the mineral measurements from the most from the most free both on account of the quality as well as the size offits output Manbhum Palamau Ranchi the Santal Parganas and Gaya are also the chief c ntres for the production of lac and the manu facture of shellac the I tter of which is exported from India to the value of ten crores annually Cement is the other important industry of the province which is produced from the lime stones available in Palaman and Shahabad

Administration

The Province on first constitution was ad ministered by a Lieutenant-Governor in Council thus being unique in India as the only Lieu i nant Governorship with a Council Under the Reform Act of 1919 it was raised to the status of a Governorship with an Executive Council and Ministers The principles of the provincial administration are fully explained elsewh re

Public Works

The Public Works Department in the Pro vince of Bihar consists of two separate branches ri—(1) the B lidings and Rosds which includes Railways Flectrical and Public Health Engineering Branches and () Irrigation. There is only one Chief Engineer in charge of both the branches who is also Secretary to the Provincial Government with a temporary Second Cilef E gineer and Additional Secretary and an Engineer Officer a Under Secretary in the Buildings and Roads branch and Deputy Clief Engineer who also acts as Dy Seer to Govt In addition to the bove there i another Deputy Secret ry in el rg of Fmergency Irrigation cheme inità ted by Govt i connection with the Grow M re by Gott i connection with the Grow M rej. Food Campaign: In Bihar and on Sestional. Section of the Irrication branch under him because it is the Irrication branch under him to be the Irrication branch under him to be the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of the Irrication of Irricat staff of subordinate

The post-war Road D velopment & Plannin is carried out by n Fn ineer as special officer and a staff of subordinates

Justice

tons of coal annually. This part of the province the vever include the powers of a Small Cause has also some of the richest and most extensive | Court unless the c be specially conferred. The ordinary includiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs 1 000 thou h the limit may be extended to Rs 4 000 On the criminal side the Bess! as Judge hears appeals from Magistrates exercising first class appeals from hagistrates exercising first characters while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be though in point of fact he very tarely is a court of first instance. It is usual in most districts for a Joint Magistrate or a Deruty Magistrate to receive complaints and police reports cases of difficulty or importance being referred to the District Magist ate who is responsible for the peace of the district In the Santal Parganas and in the Chota Nag pur Division the Deputy Commissioners and their subordinates hear rent suits. In the Santal Parganas the Deputy Commissioner and his subordinates allo exercise civil powers

Land Tenure

Almost the whole of the province of Bihar is covered by the permanent Settlement of 1793 A number of estates are held direct by Government havin come into the direct management of Government in various ways Other estates are managed temporarily by the Board of Revenue under the Court of Wards Act while in Chota Nagpur a number of estates are managed by Managers appointed under the Chota Nagpur Fnoumbered Estates Act There Chota Nagury Froumbered Estates Act There see two Tenancy Acts in force in the Province—In Bihar the Bihar Tenancy Act is in force This is the same as the Beng i Tenancy Act 1885 with a number of important differences consequent on recent amendments of the Act to Chota Nagury which the Act to Chota Nagury In Chota Nagpur which is largely inhabitated by boriginal peoples the Chota Nagpur Tenancy Act 1908 n Act specially adopted to their re quirements is in force It has also recently undergone several important amendments bene unuergone several important amendments bene ficial to the people of Chota Nagpur There is a third tenancy system in the Santal Parganas where the tenancy law is contained in Regula tion III of 187 and II of 1883 and the record of if his prepared in the settlement Tinally in a small part of South Bihar where there is a jarge aboriginal population a special chapter of the Bihar Tenan y Act designed to prevent allenation of land by aborigines is in force

Throughout the province a system of periodi settlements in vogue. In these settlements the maps and cadastral ledgers are revised and f ir rents settled in many districts the settlement records are now out of date and in one or two it is nearly 40 years since the last settlement was undertaken

In the greater part of the Santal Parganas and in many parts of Chota Nagpur the head The administration of leastler is continued by the High Co et of Judicature to below the High Co et of Judicature to below the High Co et of Judicature to below the High Edward texture of civil judicature to below the High Edward texture of civil judicature to below the High Edward texture of civil judice i addocts after deduction of a percentage as Courtsof Appeal the Subordinate Judica as the High Edward texture the High Edward text Police

The Departments of Police, Prisons and Regis tration are each under the general direction of Government, supervised and inspected by an Inspector General with a staff of assistants. The Commissioner of Excise and Salt is also In pector General of Registration

Under the Inspector General of Police are three Deputy Inspectors General and 21 Super intendents There are also 21 Assistant Super intendents of Police and 14 Deputy Superintendents. The force is disided into the District Police, the Railway Police and the Military Police There is a college for the training of officers and two Schools for the training of recruit constables Both the institutions have selected Police officers on their staff A Criminal Inves tigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in in vestigations of crime of this class and other serious action which its assistance may be invoked. There are 11 companies of Un mounted Military Police and one Squadron and two troops of Mounted Military Police which are maintained as reserves to deal with ecrious and organised disturbances and perform no ordinary civil duties

Education

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (q v) showing in great detail the edu cational status of the administration The rand other suitable places in the province mass literacy movement which has been in augurated in Bihar for the education of adults is an interesting feature of the educational are supplied to other provincial Governments are supplied to other provincial Governments. programme of the province

There is a University at Patna, whose func under the Indian nto described Universities (o.t.)

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service Under him there are 16 Civil Surgeons who are responsible for the medical work of the dis tricts at the headquarters of which they are 57 ho-pitals & Dispensaries are stationed. maintained by Government in addition to 632 Dispensaries maintained by Local bodles. 0.138,038 Reilu 178, private persons, etc. 6,138,098 patients including 1,17,757 in patients were treated in all the dispensaries in 1943 dispensaries maintained by income of the Government and Local Bodies including that of the private aided institutions amounted to Ra 38,31,101/8

There is a large mental hospital for Europeans at Ranchi receiving patients from Assam, Bihar, Bengal, Baluchistan, the C P, the NWFP, Orissa, the Punjab and the United Provinces and another similar institution for Indians for the treatment of mental patients from Blhar, Orissa and Bengal A sanatorium has been established at Itki in the district of Ranchi for There is a treatment of tuberculosis the Medical College at Patna with a large and well equipped hospital attached to it including an There is a institute for Radium treatment Medical School at Darbhanga which also has a large hospital attached to it Centres for anti-rable treatment have been opened at Patna

also for use in the prevention of epidemics

The Bombay Province

Bombay minus Bind

The Bombay Province now stretches along the west coast of India from Gujerat in the North to Kanara in the Bouth It has an area of 76 443 square miles and a population of 20 849 840 Geographically 20 849 840 Geographically included in the Province but under the Government of India is the first class Indian State of Barods with an area of 81 6 square miles and a population There are no States in politi cal relations with the Government of Bom bay as they are all now under the Govern ment of India

The Province embraces a wide diversity of soil climate and people. In the Irovince there are the rich plains of Gujarat watered there are the rich plains of Gujarat watered by the Nerbolds and the Tapit whose fertillity is so marked that it has long been known as the Gorden of India South of Bombry City the Province is divided toto two sections by it wetern Ghata range of hills running parallel to the coast Above Chata ser the Deccan build the Coast Above Chata ser the Deccan Chataland Coast of the South of these come the Karnatic Statics. On the sea side of the Siotats is the Econkan Chataland Coast of the Coastan Chataland C creeks which make communication difficult

The People

The population varies as markedly as soil and elimate. Gujarat has remained true to Hindulam although long under the dominion of powerful Mahomedan kings Here there is an amplitude of caste divisions and the people who although of the divisions and the people who although softened by prosperity are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity the saying goes has been seasoned by adversity the saying goes that the Buccan experts a famine one year in every three and gets it the population i much bimogeneous than in dujarat and thirty of the season of the guages are spoken d Kannada with Ur Guiarati Marathi and Kannada with Urdu a rough lingua franca where English has not penetrated. The main eastes and tribes number five hundred

Industries

The principal industry is agriculture which supports sixty four per cent of the population. In Gujarat the soils are of two classes the black cotton soil which yields the famous Broach cottons the finest in India and alluvial which under careful cultivation in Ahmedahad and Kaira m kes splendid garden land The dominant soil characteristic of the Deccan is dominant sou characteristic of the Decom is black il which produces cotton wheat gram Number of Looms in the and millet and in certain tracts rich crops of Viggreane The Konkan is a rice land grown I land and Ahmedabad) under the abundant rains of the submontane Island and Ahmedabad)

Consequent on the separation of Sind from regions and in the south the Dharwar cotton Consequence of the separation of cloth flow reviews and in the state of the Dinds the the the bond at the orat in India. There Bombay has suffered a diminuition territorially late no great personnial rivers suitable for irri and otherwise The following details relate to gation and the harvest is largely dependent upon the seasonal rainfall supplemented by well trigation. A chain of irrigation works consisting of canals fed from great reservoirs in the region of unfalling rainfall in the Chats Is the region of untaining rainfast in the olars it gradually being completed and this will ultimately make the Deccan immune to serious drought store than any other part of India the Frovince has been scourged by famine and plagoe. The evil have not been until and plagoe. for tribulation has made the people more self reliant and the rise in the values of all produce synchronising with a certain development of industry has induced a con iderable rise in the standard of living The land is held on what is known as the ryotwari tenure that is to say each cultivator holds his land direct from Govern ment under a moderate assessment and as long as he pays this assessment be cannot be dis possessed

Manufactures

Whilst agriculture is the principal industry others have no inconsiderable place. The mineral wealth of the Province is small and is confined to building stone salt extracted from the sea and a little manga nese But the handlerafts are widely distributed The handloom weavers produce bright coloured satis and to a diminishing ext at the exquiite kincobs of Ahmedabad and Surat Bombay silverware has a place of its own as well as the brass work of Poona and hasik But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city Bombay and in Ahme

66 179 Number of Looms to Bombay Island Number of Spindles in Bombay Island Number of hands employed in the

Textile Industry in Rombay Island (daily average)

Consumption of Cotton by the Mills in Bombay Island (in candles of 784 lbs) 965 Number of Spindles in Ahmedabad 179 99 Number of Looms in Ahmedabad 4 961

Administration

With the introduction of Provincial Autonomy on April 1, 1937, the administration of the proince has been largely altered at the top opting unusual circumstances, there is now a Governor and a council of seven Ministers to aid and advise him in all matters except in fo fir as he is required by the Government of India Act to exercise his function in his discretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion, he fixes their galaries until determined by the legislature The Governor, as in other Provinces, has certain special responsibilities and these extend to (a) the prevention of menace to the peace or tran-(willity of his province or any part thereof, (b) the safeguarding of the legitimate interests of minorities, (c) the safeguarding of the rights of civil servants past and present and their dependants, (d) the securing in the executive sphere of protection against discrimination, (e) the securing of the peace and good government of areas declared to be partially excluded areas.
(1) the safeguarding of the rights of states and the rights and dignity of any ruler, and (g) the securing of the execution of orders given to him under Part VI of the Act (dealing with administrative relations) by the Governor General in his discretion

The Governor is assisted by a special secretarist staff presided over by a Secretary whose emoluments are fixed in his discretion

In the legislative sphere the Governor is assisted with two chambers, known as the Bombay Legislative Assembly and the Bombay Legislative Council The Council is a permanent Legislative Council The Council State of the members retire each body One third of the members retire each three years and the Assembly, unless sooner three years and the Assembly, unless sooner three years. The strength of three years and the Assembly, unless sooner dissolved, lasts for five years The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Anglo-Indians, 3 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Maiathas There are also six women

The Legislative Council will contain not less than 20 and not more than 30 members of whom not less than three and not more than four shall not less than three and not more than four shall be nominated by the Governor Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans The senior of the Civilian Secretaries is entitled the Chief Secretary The Government is in Bombay from November to the end of May, and in Poona from June to November, but the Secretariatis always in Rombay Unbut the Secretariatis always in Bombay der the Local Government the Province is administered by three Commissioners, namely, administered by three commissioners, namely, the Commissioner for the Northern Division, with headquarters at Ahmedabad, the Central Division at Poona, and the Southern Division at Belgaum, Each district is under a Collector, usually a Covenanted Civi lian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy as Assistant Collectors, and one or more Deputy as Assistant Collectors, and one or more Deputy as Assistant Collectors, and one or more Deputy as Collectors A collectors, and one or more Deputy as Stration in Province as Market Collectors A collectors, and one or more Deputy as Stration in Province as Market Collectors, and one or more Deputy as Stration in Province as Market Collectors, and one or more Deputy as Stration in Province as Market Collectors, and one or more Deputy as Stration in Province as Market Collectors, and one or more Deputy as Stration in Province as Market Collectors as Collectors

whose whole revenues belong to the State The villege officers are the patel, who is the head of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant, the messenger and the watchman. Over each taluka or group of villages is the maniatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukar. Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions

Justice

The administration of justice is entrusted to the High Court sitting in Rombay, and comprising a Chief Justice, who is a barrister, and mine pulsne judges, either Civilians, Barristers, or Indian lawyers Of the lower civil courts, the court of the first limitation is that the Subordinate Judge. instance is that or the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or testing the court of the court o or Assistant Judge, or of a first class subordinte judge with special powers. District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar In cases exceeding Rs 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge accision of the Subordinate of Assistant Sudge and from the decision of the District Judge in all original suits lies to the High Court Dis trict and Assistant Judges exercise criminal jurisdiction throughout the Province but province of the Assistant Sudges of hyoriginal criminal work is chiefly disposed of by the Executive District Officers and Resident the Executive District Officers and Levels and City Magistrates Capital sentences are subject to confirmation by the High Court In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has alx Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts the English County Courts

Local Government

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former avaraging authority authority aut exercising authority over a District or a Taluka, and the latter over a city or town bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes The tendency of recent years has been to increase the elective and reduce the nomi nated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Province The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Province The larger municipalities are now styled as Municipal Boroughs which are now 2 number. The executives of these Records The executives of these Borough

For the purposes of effective The Educational Department is administered supervision over the investigation and prevention by a Director with an Inspector in each of time some of the intere districts are divided Division and a Deputy or Assistant Impector into one or more sub-divisions each under a in each district.

at the end of the 3 ar Ivi" it as compred with 18 -1 in 1911 i The number of pupils in record at in tit ations was 1 to 000 in the state of th

the University so as to make it adequately from time to time epresentative with a view to bringing into closer association with the public the industrial, experienced for proving the property of the continued for proving consercing and civic life of the people of the senctioned for providing medical relief in rural province to enable it to provide greater facilities for higher education in all branches of the first relates to the extension of a former than including Tachpology and to undertake earning including Technology and to undertake on a larger scale than herotofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time.

The new University Department of Chemical Technology was formally inaugurated by His Lycellency the Governor of Bombay on 15th November 1933 The authorities of the University, as now constituted, are chiefly the Chan cellor, Vice Chancellor, the Syndicate, the Academic Council and the Senate The Senate consisting of fellows is the supreme governing body of the University The number of fellows body of the University are 144 of whom 40 are nominated by the Chan collor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions This body works in collaboration with the Syndicate which is the principal executive of University

IMS Officer Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district whilst sanitation is entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of entrusted to one of the Assistant Directors of mineral development, capitation in respect of mineral development, taxes, taxes on professions, taxes, taxes on animals, hoats, the and omployments, taxes on animals, hoats, the and omployments, taxes on animals, hoats, the and omployments, and sale of goods, advertisements, anusements, betting and ing entertainments, amusements, and sale of goods, advertisements, anusements, because of ingent of the above substances, taxing alcohol or any of the above substances, the injury of the injury of the above substances, the injury of the above substances, the injury of the injury of the above substances, the injury of the above substances, the injury of

Higher education in the Province is conpletely which was contained as Lunatic Asylums and 14 colled by the Bombay University which was recontained in 1857. The constitution of the institutions for the treatment of Lepers inversity has recontly undergone, however, considerable changes in virtue of a new enaction of the Director of Public Health ment known as the Bombay University Act of Sanitary work has received an immense stimulus This Act altered the whole constitution from the large grants made by the Government of the University so as to make it adequately from time to time

Two important schemes have been recently

scheme for subsidising medical practitioners in six Government have now relected rural centres Government have now decided to open, in all, 330 centres for medical aid in the Province by giving subsidies to private medical practitioners The subsidy will be given to Allopathic medical practitioners and to some Ayurvedic and Unani practitioners

Finance With the introduction of Provincial Autonomy the financial arrangements have been revised There is a clear cut division between the finance of the Federation and those of the Provinces The provincial sources of revenue in addition

to grants from federal taxation now include taxes raised by the local Government on land, as land revenue, taxes on land and buildings, hearths and windows, taxes on agricultural income and duties in respect of succession to agricultural land, duties of excise on goods manufactured or investigated in the province of countervalues duties. produced in the province and countervalling duti-The Medical Department is in the charge of the Surgeon-General who is a member of the I MS, and Public Health in that of the Director of Public Health, who is usually a non-Director of Public Health, who is usually a non-I MS Officer Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the medical work of the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for the district responsible for

The Central Provinces and Berar.

The Central Provinces and Berar compose a great triangle of country midway between Bom bay and Bengal Their area is 1,18,710 ag miles, of which 80,766 are British territory proper, 17,800 (tiz Berar) held on perpetual least from HEH the Nizam and the remainder held by Feudetory Chiefs The population is 16,813,581 in CP British Districts and Berar Various parts of the Central Province and the several parts were amalgamated after the Mutiny, in 1801, into the Chief Commissionership of the Central Provinces Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with HLH the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with HEH the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north west, the Vindhya plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water out ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the most important cotton tracts of India and the weal thiest part of the C.P. proper. The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Far ther east is the far reaching rice country of Chhattisgarh, in the Mahanadi basin. The south east of the C.P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kanker lie in this region. Berar lies to the southwest of the C.P. and its chief characteristic is its rich black cotton soil plains.

The People.

The population of the province is a comparatively new community Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the south east. The main divisions of the newcomers are indicated by the language divisions of the province Hindi brought in by the Hindustani speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and centre of the Central Province Hindi is spoken by 56 per cent of the population and is the lingua franca. Marathi by 31 per cent and Gondi

7 per cent The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedsminvasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising

Industries

When Sir Richard Temple became first Chief Commissioner of the C P, the province was land The only road was that leading in from locked Jubbulpore to Nagpur The British adminis tration has made roads in all directions, the two trunk rally as between Bombay and Calcutts run across the province and in the last few years a great impetus has been given to the construc-tion of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co operative credit movement The land tenure is chiefly on the malguzari, or landlord system, ranging with numerous variations, from the great Feu datory chiefships, which are on this basis, to holdings of small dimensions A system to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay raiyatwari system 16,084 square miles of the C. Is Government Reserved forest, in Berar the forest area is about 3,335 square miles, the total forest area being one fifth of the whole Province. The rugged nature of the great or part of the country makes forest conserved. er part of the country makes forest conserva-tion difficult and costly Excluding forest and waste, 67 per cent of the total land is occupied for cultivation, for the two most advanced districts in the Central Provinces, the proportion averages 81 per cent, while the average figure for the Berar Districts is 73 per cent The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons Rice is the most extensive single crop of the Central Provinces, covering nearly 33 per cent of the cropped area. Wheat comes next with over 13 per cent, then pulses and other cereals used for food and oil seeds with nearly 49 per cent, and cotton nearly 5 per cent. In Berar cotton is 35 per cent and juar 39 per cent, respectively and then come pulses and other cereals and oil of the cropped area. In agriculture more the half the working normalistics is famely. half the working population is female

Commerce and Manufactures.

Industrial life is only in its earliest develoment except in one or two centres, where introduction of modern enterprise also on railway routes has laid the foundations for future developments of the natural wealth of the province. Nagpur is the chief centre of busy cotton spinning and weaving industry. The Empress Mills, managed by Messrs T. Sons Ltd., were opened there in 1877 and

yarn experted from the Province during the years 1938 39 1939 40 and 1940 41 was 1 567 -50 446 and 296 40 maunds respectively

The largest numbers engaged in any of the modern industrial concerns are employed in mandances mining which in 1940 employed 930... persons and raised 65° 5 tons Then follow coal mining with an output of 1 806 313 tons and 15 518 persons employed the Jubbulpore marble quarters and allied works the limestone quarries and the mines for pottery clay soap stone etc

The total number of factories of all kind legally so described was 1 °0 and 1 08 in 1943 and 1914 respectively the latest period for which returns are available and the n mber of people employed in them 84 696 and 100 C 0 respec The same economic influences which are operative in every progressive country during its transition stage are at work in the C P and Berar gradually sapping the strength of the old vill ge industries as communications improve and industries are fading as ay a large develop ment of trade has taken plac. The last pre war reports showed an increase in volume by one third in eight years

Administration

The administration of the Central Provinces and Berar is conducted by a Governor who is appointed by the Crown He is assisted by eight Secretaries and six Under Secretaries Under the provisions of the Govt of India Act 1935 the administration is conducted by a Governor with a council of ministers chosen and summoned by him and sworn as members of the council but due to the arising of a situation which made it impossible to carry on the Government of the province in accordance with the provisions of the Government of India Act 1935 the normal working of the Constitution has been suspended with effect from the 11th November 1939 by a proclamation under section 93 of the Act and the administration is carried on by the Governor with the help of the

This Province which has a unicameral Legisla ture consists of 112 members distributed as follows -

The distributivities to administrative purposes into tabsils th average area of which is 1 500 square miles In each village a lambardar

or representative of the proprietary body is Justice

executive headman

The High Court of Jadicature at Nagpur which was established in January 1936 it the highest court of appeal in civil case and also had to the court of the court

Subordinate to the High Court are the District and Sessions Judge (9 in number) each of whom exercises civil and criminal jurisdic ar members of the Scheduled castes

The O P are divided for administrative purposes into three division in and Berar constitutes a division. Each of these is controlled by a Local Self-Government.

Municipal Administration was first intro-luced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1864 Several revising Acts extend its scope and the P Municipalities Act passed towards the end of the year 1922 has considerably mercased the powers of the Municipal Committees The C P Municipalities Act has also been Viewed generally, municipal extended to Berar self government is considered to have taken root successfully. The larger towns have municipalities, there being 82 such bodies

m the Province Under the Central Provinces Total Self Government Act passed in 1920 as unended in 1931 there is a local board for each tabil and a district council for each district excepting Hoshangahad Chlindwara and Saugor districts each of which has two district councils local pourd consists of elected representatives The constitution of the district of circle council is a certain proportion of elected representatives of local boards, and of members selected by those representatives. If the members elected on the local board or the district council do not include a Muslim, a Harijan and a woman the elected members of the local bond of the district council as the ease may be have to select a Muslim, a Harijan or a noman as may be required to be a member, and if they fail to do so the Provincial Government can appoint a Muslim, a Harijan or a woman as may be required

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils The new Central Provinces Total Self Government Act has also been applied to Berar The office bearers of all the district councils, and with few exceptions of local boards, also up non officials

Rural education sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimite charge upon the District

Council funds The Central Provinces Village Panchavat Act was passed in the year 1920 So far 1 089 Pinchavats have been established As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933. The post has again been kept in abeyance with effect from the date the Village Panchavat Officer made over energe until further orders

Public Works

The Public Works Department, which comrises Bulldings and Roads and Irrigation Branches, is under the control of the Chief Engineer. There are two Superintending Engineers who between them supervise the work of both branches. The Province is fairly well served by a network of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during of cases they are not trained at times during the rains

State Irrigation was introduced early in the present century mainly as a result of the re-commendations of the Irrigation Commission (1901-03) During the last forty four years a sum of Rs 7 25 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula-Mahanadi, Kharung and Maniari canals'

Three works, tiz, the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanc tioned originally as productive works and the remainder were all sanctioned as unproductive works. The three works sanctioned as productive works. ductive have all failed to justify their classifica-tion in that category and have now been trans ferred to the unproductive list The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine normal area of annual irrigation is at present about 7,22,000 acres, mainly rice and the income from these works more than covers the expenditure incurred on their maintenance and management

Police

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities is under one force The the Municipalities, is under one force strength is equal to one man per nine square miles of area The superior officers comprise an Inspector General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers On railways special Rulway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Police with headquarters at Hoshangabad There is a Police Hoshangabad There is a Police College under the control of a Superintendent of Police at Saugor and Constable's Schools under the control of Deputy Superintendents at Nagpur and Judiciples of Constable of Constabl and Jubbulpore A special Armed Force of 924 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear There is a small force of they may appear There is a small force of Mounted Police consisting of 1 Head Constable and 7 Constables for the escort of His Excellency the Governor The Central Provinces has no rural police as the term is understood in other parts of India The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect

During the war there has been an expansion of the District Police and the special Armed Force and the formation of a battalion of special armed constabulary

Education

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction assisted by (i) a Personal Assistant, (ii) two Deputy Directors of Public Instruction—one for Primary and Secondary education and the other for Technical Education, the former being assisted by two DRUY for Fost War Reconstruction Science (iv) a Other in-harge of Musilin I ducation (t) four Dlu-klonal Superintendents of Education (t) four Dlu-klonal Superintendents of Education seventy for the Superintendent of Schools as slated by seventy seven 4-rsl tant District Inspectors of Schools as I also Schools (t) a Deputy Directires of Tublic Totructum and (tul) two Inspectores of School assisted by als DLIrtit In prectress of Schools

The Director of Public Instruction is no longer the Secretary to Government in the Education Department has now an ICS Secretary like other, D partments of Government and an officer, of the Education Department acts as Under Secretary

schoos are divided into (a) schools for general education and (b) schools for special education.
The latter are schools in which instruction is grace in a special branch of technical or pro-lessional education The main division of schools for general education is into Irimary schools for general education is into I rimary and ecoodary. M die I

Ti e Medical and Pul be Healti services of the Province are respect vely controlled by the In pector General of Civil Hospitals and Dir ctor of Publi Health The Med cal Department has made some progrems since the year 1011 A striking adv nce has been nale in recent years with u ban an tation and the ope i g of a Medical School at Angpur in 1014 supplies a lon felt ne d The p incipal me lical supplies a lon felt ne d. The p increal me lited in-titutions are the Wayo II to pital at Angrur (opened in 1874) with commodat on for in prittents the Victoria Ho pital at Jubbulpore (opened in 18 6) with accommod trun for 10 in patient the Daga Memorjal (Dufferin) Hospital and the Muro M mori II Hospital at Augur and phe Lady Elpin Hospital and the crump children shospit lat Jubulpore thee last four being ir woman and children ment Primary Education of the Depart these case four owing a fine patients

In addition to these, hospitals for vomen exist in rural sanitation at Chindwara, Gondia, Saugor Khandwa ment is mainly concerned with the uplift of the Amraoti, Murtizapur Shegron and Khamgaon masses and in raising the health conscience of the and at all district headquarters where no separate women's hospitals exist, sections have tions working under the Department are been opened at the mun hospitals for the treat The Mayo ment of women by women doctors Hospital at Nagpur was provincialised in 1923, the Irwin Hospital at Amrioti in 1925, the Victoria Hospital at Jubbulpore in 1926 and the Silver Jubilee Hospital at Raipur in 1928 In accordance with recent policy 167 out of 223 local fund dispensaries have been trans ferred to the administrative and executive control of local bodies. With the object of bringing medical relicf within easy reach of the ruril population Government has sanctioned (*) suc-ldising 22 inedical practitioners (allo patule) one in each district council (7) theil (42) (2) establishment of 83 Avurveduce and Union dispensives in each tablil (46) (The figures in brackets indicate the number is actual operation at present). The Province is actual operation at present) The Place or Vental Hospital at Naupur tuberculosis clinics have been opened at Nagpur, Jubbulpore Rupur and Amraoti during year 1937 and 40 beds have been reserved at the Pendra Road Sanitorium for the treatment of pitients sent by Government. There is a great deal of eve disease in the province and the problem is receiving special attention. The Central Provinces and Berar Blind Relief Association is doing propagands work and helping the blind. So far 25 assistant medical officers have been given training in eye work for the months at the Mayo Hospital, Nagpur These specially trained officer, are posted to eve centres in the Province. Anti-rabic treatment is now available at 12 centres in the province, 112, Nagpur, Jubb dpore, Rupur, Al ola, Wardha He hangabad, Saugor Chanda, Caliladuara, Khandwa, Leotmal and Amraoti

Public Health

The Public Health services of the province are controlled by the Director of Public Health 1010, a separate cadra of Sub Assistant Health Officers was sanctioned by the Govern An appreciable advance has been made 38,985 villages respectively

The Public Health Départment is mainly concerned with the uplift of the

- The Central Provinces Vaccine Institute which was founded in the year 1915 Here, small pox vaccine lymph is manufactured for the whole province and the neighbouring feudatory states Vaccinators are also trained at the institute
- Public Health Institute established in the year 1928 undertakes the examination both chemical and bacteriological, of samples of water and food stuffs under the Food Adulteration Act
- There is a Health School at Nagpur, where Health Visitors are trained
- The problem of leprosy is being tickled in the province and the diputment has a leprosy specialist who if in charge of treatment, propagands and survey work. There are 27 leptosy Sub vho are Officers Assistant Health running 56 leprosy centres 6 centres are run by the British Empire Leprosy Relief Association (Provincial Branch)
 - There are 82 Sub-Assistant Health Officers in charge of epidemic dispersaries (One in each Tahsil)
 - One mechanised travelling dispensary in charge of a Sub-Assistant Health Officer with a trained compounder is working under the department This dispensity visits roadside villages and renders medical aid to the aboriginals
- A scheme for eradicating the discise of Yaws is in operation in Chand; and Bilaspur districts where the incidence of Yaws is high The results are satisfactory

Vaccination is compulsory in 105 towns and 16,843 villages out of a total of 119 towns and

The Madras Province

The Madras Pre Mency oc uples the whole scathers portion of the lenkuola and earluding the Indian States all of which have now one under the direct control of the Government of Indian Batars all of which have now one under the direct control of the Government of Indian has an area of 1 4 6 32 square ment of Indian has an area of 1 4 6 32 square and a cast the one of even on the layer of Indian States and Indian states of Indian States and Indian States of Indian States are and Indian States are all the states of an importance the ports with the exception of Madras and prinaps of Cochin and Yuza with the Indian States and prinaps of Cochin and Yuza with the Indian States of the Indian States of Indian States and Indian States of Indian States and Indian States of Indian States and Indian States

Population

The population of the Presidency was returned at the cenus of 1911 as 49 840 501 an Increase of 5 131 8 0 over the 49 840 501 an Increase of 5 131 8 0 over the 49 840 501 an Increase of 5 131 8 0 over the 49 840 501 and Increase was not uniform. The districts which had unifored m st 10 101 tended to at ow large increases in 1921—Bellary and Agencies were the statement of the contractions of the antique of the contraction of the statement of the statement of the 1921 and 1922 and 1922

Government

The executive autho ity of the Province is exercis d on behalf of His Majesty by the Governor He is aided by four Advisers

Agriculture and Industries

The principal occupation of the gravince is agriculture engaring about 65 per cont of the population. It e principal food crops are rice i lam ra land kambu. The Industrial crops are cotton surarrana ani groun inut. The agricultural education is rapidly progressing in the Presidency. The activities of the Agricultural Department in matters educational consist in the running of a college at Colmbators arbitated to the University of Madras for farm labourers schools an i numerous demonstration farms. Asit was found that it o present course of middle school education does not satisfy the needs of the rrots the only school maintained by the department at Tailparamba was closed with effect from 188 April 199 hort practical courses in farm management and allied subjects have been institut 1 at t! Agricultural Colle e While pad by which is the stapl food of the population occupies the large cultivable area cotton and sugarcane are by no means inconsiderable crops of the posince and are receiving class attention at the hands of the local agricultural authorities. The area under 14 cotton irrigated and unirriested was 14 acres in 1913 44 and as in the case of paddy efforts are being made to produce better strains of cotton suited to different localities strains or cotton suited to digerent localities by means of both selection and hybridi-zation from existing good staple areas inproved rittes to a been systematically introduc 1 A special fair of the a ricul-tural activities in the first in cy is the lurs. tural net 4tt's in the Ire II ncy is the lar, it dustry which the plantin community law built up contributing under the project They commerced the project They commerced the project They had under the till of The United Finater. at Act of 1939 elmultareous trianglal charts a to all its to is illibrate in the city te club whice i

The Malran District Muricipalities Act, 1020, as amended by Madras let X of 1900, and

Tun Madme Local Boards Act, 1920, as ame ided to the Meders Act XI of 1020

The amending Let of 19.0, which came into force on the _6th August 1950, provide, welce alia, for the abolition of the system of nomina tions to local lodies, for the inclusion of village penchasats within the scope of the Madras Local Boards Act with a view to making the village the unit of local roll government, for direct elections to illatrict Loards, for the crea tion of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the certation of office of the President of a district board or Chriman of a Municipal Council on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments relief Boards have been abolished with effect Local bodies in the Madras Presidency are Faluk Boards have been abolished with effect administered under the following Acts — from the 1st April 1984 from the 1st April 1984

In the interests of administration, commissioners have been appointed to all the Municipolitics in the presidency and these have replaced non-official chairmen as executive authorities

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April 1934 This stop was undertaken as these bodies became financially embarrassed Their functions have been entrusted to district boards, with a view to avoid extreme controllisation of admi-1036

But, it was actually found later on that many of the bifurcated district boards were financially untable so much so that the Government had to have recourse to a reversal of the policy of bifurcation and to amalgamate all of the bifurcated district boards

By an Act of 1935 the local boards in the presidency have been divided into three groups for the purpose of elections so that elections will be held to a third of the local boards every year. The object of this legislation was summistrative convenience

By an Act of 1936 ordinary courts of law have been debarred from issuing injunctions restrain ing proceedings which are being or about to be taken for the conduct of elections to local bodies and preparation of electoral rolls in connection therewish

By an Act of 1938 the franchise of the territorial constituencies of the Madras Le is lative assembly were assimilated to that of the local bodies in the Province of Madras inclusive of the Corporation of Madras with a view to widen the franchise of local bodies and to effect economy in the cost of preparation of the electoral roll of local bodies.

By an Act of 1939 Chairman or Vice-Chairman or dinnicipal Council and Presider is and vice Presidents of local board who have been temoved were made inclicit for election to either of the said offices for a period of six months from the date of removal or until the date on which notice of the next ordinary election is published.

By Acts passed in 1940 and 1941 persons who are in arrears of any kind due to any local body inclusive of the Corporation of Madras are disqualized from standing for election or holding office as a member thereof

By an Act of 1941 a new provision was made in the Madras Local Boards Act 19 0 enabling the Government to superseds District Boards upto a period of three years

By an Act of 194 the term of office of Counciliors and Aldermen of the Corporation of Madras of Connelliors of Mindicpalities and of members of Di triet Boards which expired on 1st bor 194 westerneds to 1st Aovember 1943 and power was all o taken by the Proli clai Cor Imment to advance or postpone the d te

By the same Act the Provincial Government have taken power to pupolity when reconstituting all members of appoint when reconstituting all members of appoints with a position on the date on which the Act came into diction on the date on which the Act came into diction on the proposed or dissolved after such date to be supersided or dissolved after such date than the term of their office to reduce the structure of the reconstituted fundicipal Council which is the presentative of the reconstituted fundicipal the reserving seats for any community or for woman.

The assistant engineers of the District Boards were constituted into a Local Fund Service for the Province known as the Madra Local Fund Assistant Engineers Service The Manicipal Envirorers in some of the Manicipalities and the Electrical Engineers in some of the Municipalities

and I unchayets have also been constituted into separate services known as the Madrar Municipal Ludineering Service and the Madra Lo Authorities Electrical In ineers Service respectively. The existing system of control and spectively of the existing system of control and population was recognized in 1940 and the Chief Earlineer (Communications) as made he head of the Diff tiel Board En Incern Service and three posts of Saperintending Funers (Communications) were created. The constitute important steps in Improving the state in the constitute important steps in Improving the state of the main services of the main services of local board employees.

By the amendment Acts of 1043-

(a) The provisions of the City Municipal tor relating to the powers of the standing committee in respect of establishment were placed on a line with the M D M and M LB Acts prohibilin these commutees from con siderin any proposals for the amendment of the establi himent schedule except at the instance of the executive authority.

(b) The M D M tot was amended in a comprehen is o manner remotin certain administrative difficulties which were found necessary

() Poner was vested in the Board of Revenue to returne an endo vment the management of which had been transfer ed to a local board and prot I on was also n ade for fi Ing the rent value of lands in proprietary estates for a triennium instead of for every year.

(d) Power was taken for the appointment of executive officers to punch yets

By the amendment Acts of 1914-

(c) Power was taken for the Collector to appoint any member of a local board or municipal council as president or vice-president or chair man and vice chairman re peet! ely when presi dents vie presidents or chairman or vice chair men are absent on account of their being detailed in prison

(b) Power was taken for Govt to direct any municipal coun it to levy property tax at su h rates and with effect from uch dates as may be specified in the order if the finance of the council are not enough to discharge its nobligations.

Co operation

Th year 1943 44 was one of marked progress The number of sect ties increased from 15 or to 15 540 their member hip from 14 51 94 to 18 833 the o Anne capital from Rs 255 31 lake the loats 1 oued from 18 055 32 lake the loats 1 oued from 18 055 32 lake the loats 1 oued from 18 055 32 lake the loats 1 oued from 18 15 1 lake 10 78 lakes The coll ctions by Central Banks were very good and the jercentage of overdness was 18 88 as against 18 44 in 194 43 which its If was the lowest for the pree ding 17 years There was a shrinks of in the loan business for The State 1 of the loan business of the state o

both the primaries and the wholesales reached the peak figure of Rs 184 crores. There were 1,198 primary stores with 692 branches or depots. Their purchases and sales amounted to Rs 806 96 lakhs and Rs 832 36 lakhs as against Rs 315 75 lakhs and Rs 298 49 lakhs, respectively, in the previous year. The trade of the wholesales also recorded a striking increase, the purchases and sales amounting to Rs 554 43 lakhs and Rs 518 93 lakhs against Rs 96 36 lakhs and Rs 80 05 lakhs, respectively, in 1942 43. Some of the important features of the working of the stores were their participation in schemes of statutory rationing and procurement, their sales to non members (60 per cent), formation of stores societies for the benefit of industrial labourers and extension of the consumers' movement in rural areas.

The total deposits and borrowings of the Midris Provincial Coop Bank fell from Rs 292 27 lakhs to Rs 272 27 lakhs on account of the bank s cautious policy in accepting deposits. There was a marked increase in its loan business (from Rs 56 04 lakhs to Rs 161 33 lakhs). By virtue of its position as the apea consisting of central banks. The working capital of central banks increased from Rs 673 16 lakhs to Rs 750 53 lakhs. Their total profits substantially increased from Rs 3 83 lakhs to Rs 5 04 lakhs. On account of the conditions created by the War the loans issued by the Madris Coop Central Land Mortgage Bank Ltd, decreased from Rs 23 66 lakhs in 1942 43 to Rs 18 26 lakhs in 1943 44. The maximum amount for which Government have guaranteed the debentures of the Bank s Rs 350 lakhs.

both the primaries and the wholesales reached the peak figure of Rs 13½ crores. There were 1,198 primary stores with 692 bianches or depots. Their purchases and sales amounted to Rs 806 96 lakhs and Rs 832 36 lakhs as against Rs 315 75 to give short term advances to the Bank, Iakhs and Rs 298 49 lakhs, respectively, in whenever required

Law and Order

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras, which consists of a Chief Justice and thirteen puisne judges The existing order pro-vides for a maximum of 15 puisne Judges For the administration of criminal justice there are 30 Sessions Judges in the Mufassal (including Additional agency tracts) Assistant Sessions Judges being provided to assist Courts in which the work is heavy there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates

North-West Frontier Province.

rontier of the Indian Empire It is in form have resulted in the establishment at Razmak, a in irregular strip of country lying north by position dominating the Mahsud Waziri country, east and south by west and may generally be of a permanent garrison of 10,000 troops drawn lescribed as the tract of country, north of mostly from stations lying in the plains immediately below the hills. A circular road from the Durand boundary line with Afghanistan Branu, through Razmak to Sararogha, Jandola Branu, through Razmak to Sararogha, Jandola To the north it extends to the mountains of and back to the Derajat provides communication Hindu. Kush. From this range a long tions transport with this force and facilitates its broken line of mountains runs almost due south, mobility. The effect of this measure has been dividing the province from Afghanistan, until a mari ed improvement in the internal peace of the Sulaiman Range eventually closes the south of the Province from Baluchistan. The south of the Province from Baluchistan The greatest length of the province is 408 miles its greatest breadth 270 miles and its total area about 39,276 square miles, a little more than hilf of Bonibay, or more than three liftles of the size of England without Wales. The territory falls into three main geographical divisions the Cis Indus district of Hazara, the narrow strip between the Indus and the Hills, rontaining the Districts of Peshawar, Mardan, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan Hazara and the five districts in the second division contain 14,290 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of H. E. the Governor in his problems of the Province from the control of the Punjab administration in 1901. To it was added the political Agent of which had never been submodified control of H. E. the Governor in his and Agent to the Governor General, with head ore occupied by tribes subject only to the political control of H E the Governor in his capacity as Agent to the Governor General The area of this tract is roughly 24,986 square miles and in it are situated, from north to south, the political agencies severally known as the Mala kand, Khyber, Kurram, North Waziristan and South Waziristan Agencies Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier A few hundred miles of the transborder territory are internally administered by the Political Agents, but the bulk of the transborder population is free from any internal interference, so long is offenced are not committed and the tribes

The North-West Frontier Province, as its and the protracted punitive operations against name denotes, is situated on the north-west the Waziris and Malisuds in 1919 1920. These

quarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department In April 1932 the Province was constituted a Governor's Province In political questions there is no intermediary between the Governor and the local officer, an arrangement deofficer, an both of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is to prompt signed selected The advisability of re uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the offences are not committed and the tribes of erve the conditions on which allovances are paid to many of them

The Ley to the history of the people of the N-W F P lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Maho medan times its population was mainly Indian by race Early history finds the Iranians dominating the whole Indus valley Then came the Greek invision under Alexander the Greek invision under Alexander the two great waves of Mahomedan invisions of the Salas, and of the White Huns and later the two great waves of Mahomedan invision that the great waves of Mahomedan invision the Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government Frequent warfare curred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistanin 1919. that i.ne The Hin ius argued that a separate members writing each a separate report favour able to the Hindu viewpoint already explained and the majority of the Committee comprised of all its other members, recommending advance on a Provincial basis. Their principal recom mendations were for-

Retention of the Settled Districts and Tril al Tracts as a separate unit in charge of a n inor administration under the Government of India

barly creation of a Legislative Council for the Settled District and appointment of Mem ber of Council and Minister

Appointment of a second-Judicial Comn is sioner which has since been sanctioned and reform of the judicial administration in various directions including interchange of officers with the Punjab so that the mem bers of the Service in the smaller Province should have the advantage of experience in the larger one

If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self development within the Indian Empire under the Reforms Scheme after which it is now striving we are as ured that with a contented Frontler population India can face with calm resolution the future that the Frontier has in store for her

Trade and Occupations

are already largely utilised by the Tribal inhabitants for motor traffic Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poor means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing On the other hand, high prices are a hardship to the non agricultural classes effects of recent extensions of irrigation have been important Land tenures are generally the same in the British administered districts as in the Punjub The cultivated area of the land amounts to 25 per cent and uncultivated 75 per cent

The work of civilisation is now making steady progress, both by the improvement of communi cations and otherwise Relations with the tribes have generally improved, tride has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments In the British administered districts the total percentage of male scholars to the total male population is 5 0 and that of female scholars to the total female population is 1 6 the total female population is for the year 1942 43 25 per cent males and 7 per cent females of the total population The are returned as literates figures for males denote a very narrow diffusion of edu-cation even for India Those for females are cation even for India Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh womer, of whom 13 3 per cent are returned as literate The mauguration of a system of light railways throughout the Province, apart from All considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering nistration over them The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to a number of peasant homes

Administration.

administration of the North-West Frontier Province is conducted by H E the Governor and Agent to the Governor General with the Council of four lamsters as follows

- Hon'ble Dr Khan Sahib (Chief Minister)
- (2)Hon'ble \mathbf{D} Bhana Ram Gandhi (Minister for Tinance)
- (3) Hon ble Q Ataullah Khan (Minister for Education)
- Hon ble Mond Abbas Khan (Minister for Industries) (1)
- (1) Officers of the Indian Political Service
- (2)Officers of the Indian Civil Service
- (3) Members of the Provincial Executive and Judicial Service
- (4)Members of the Subordinate Civil Services
- (5) Superintendents and Assistant Superintendents of Police.

Officers recruited for the service of (6) special departments requiring knowledge-Militin, Enginee Education, Medicine and Forestry Engineering,

-- Orissa

Like Sind Ories was constituted a grante province on April 1926 If Bind was a separate goverables! ethnological and linguistic unit inside the administrative boun lary-of logunity Presidency the n w province of Ories is if even of the amalgumation of various Origin and the second of the amalgumation of various Origin the second or the s

The Oriyas are an intensely ratioleteropic who beargrathove fortheir cultures and languar They have always opposed any move to dimember the Oriya speaking tracts for political or administrati e consider tions. The Oriyas trace tief tradition far lack to its days of kingdom of Ukal embrac nor a wida territory now known an Orisas Throuch success ive conquests and annexations in known history it of Uriyas passed through varyingf run s until at the time of the Moch il conquest the Orizac country was brok a up and the people common language and literature continued to act as a link.

Pau consciousness was revived with the spirit of education under the British regime and after the great I mise of 1868. Sir Stafford vorthoots surgested the separation of Orista from Bengal. The proposal was turned down but the particular fer un underlying the new move p raisted and gave rise to a series of domands.

History of Separation

The agitation for the unitestion of Oryan testing in a graph of the properties in 1993 when the Government of India accepted the principle of bringing in the scatter described at the O tys spe is a population under a single brown bit in a comparable of the Oryan when the organization of the Oryan and Oryan and Oryan an

The firststage of success was achieved in 101 then the area of modern Oris's was separated form shapst and a malagamated with Bilbar to the propose of the p

The Bihar and Orissa Legislative Council end the did a of malagamation but the Mairus Council held an inconclusive debate. The Mairus Gov rament was againt the surrender of any of its territory while the C 1 Government had an open mind.

Tie Government of Julia then appointed that is call 1 bit a hillip-Duff Committee to make local inquiries 1 tha view to secretaining it attitude of Orlya spaking people in the orld Madras Presidency on the quist in of their union with Orlsa. Mears of L. Philip and A. C. Duff reported that there was a greatly long standing and Orlya clarks of the Orlya spaking the orlya clarks of the Orlya spaking the orly a spaking the orly of the ore

The next stage came with the appointment of the Simon Commis ion in 10 A sub committee of the coronal ion pre ided over by 10 re title recommended the creation of a pre rates immistrative unit for Orises agreef a vitte the Origas contentian that under the autonomous conditions proposed by the Commission the Origas would be an ineffective minority in Mairas Ben al Bihar and Orisa and the OF

Round Table Conference

When the idea of a f 1 r tion of a tenomonus units dawed at the first Roual I able Conference the Orlyas demand was pre-ceted in a crystallised form by the Mahar Ja (then Risk) of Earladined it would be seen to the Conference of Earladined it was a constant and the seen of the Conference of the Conf

The O is a demand derived adventitious support from the stren th of the Mu lim claim forth a constitution of Sind assates rate province Those who betcked up the c. so of Sind could not oppose the Origos claim with their fore came to be recomised at the Round Table Conference

In September 1931 the Government of India appointed the O Donnell Committee to ex mine and report on the lin netal and other consequences of scitting up a sparste administration cases of scitting up a sparste administration in the second of

In J nuary 1926 an Orde in Council v s isa ed by Illa Majest, a Giovernmont con tituting Orlss as a separate province to be brought i to lie with other p vincial units on the I auguration of Provincial Autonomy on April 1 1937

Extent of Province

The following are the areas comprised in the new province of Orissa -

- That portion of the Province of Bihar and Orissa which was known as the Orissa Division thereof
- Areas transferred from the Presidency of Madras -
 - (1) The Ganjam Agency Tracts,
- (11) The following areas in the non-Agency poition of the Ganjam district, viz, the taluks of Ghumsur, Aska, Sunada, Rodah and Chatra-pur, so much of the tiluks of Ichapur and Berhan pur as nes to the north at west of the bound iry line,
- (11.) So much of the Parlakimedi Estate as lies to the north and cast of the said line, and
- The following areas in the Vizagapatam district, that is to say, the Jeypore (Impartible) Lstite and so much of the Pottingi taluk as is not included in that estate
- the Central Aleas transferred from Provinces -
- (1) The Kharrar Zamindan in the Raipur district, and
- (a) The Padampur Tract in the Bilaspur district, that is to say, the detached portion of that district consisting of 54 villages of Chandrapur Padampur estate and also of the following 7 villiges, viz, Kuhakunda, Badimel, Panch-pudgia (Soda), Barhampura (Malguzari), Panchpuragia (Palsada), Jogni and Thakurpal (Jogni)

Agriculture

Agriculturally and industrially, Orissa is a ackward region—It has suffered as the result backward region of being tacked to one or the other of many provinces for administrative purposes. This explains why there are no big factories in Orissa, This exalthough there are a large number of indigenous cottage industries bespeaking the people's artisanship Among the cottage industries may be mentioned handloom industries brass, bell metal silver filigree, cutlery, wood and paper pulpand form atticles Sugarcane and jute are it o important commerce berops in Orissa, and neas under both these tre already increasing The Ori, a torests can supply a large quantity of valuable timber and fuel. Fisheries too are in importest industry of Orissa The two rale ble acurces of supply are the extensive Child life and Puri where on an average 9,000 mounds of cured fish and 50,000 maunds of uncured fish respectively are exported to Calcutta every year

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica Ironore is mostly found in Mayurbhanj, Keonjhar, and Bonai, all States The deposits in this area are remarkable for the enormous quantity of extremely rich ore they contain. More than 60 per cent of the ore extracted in In lia comes from these areas of Orissa for which there is a really demand from the Teta Iron and Steel Works in Jamshedpur and Mesers Bird in principle and derogatory to the presti

Orissa cannot boast of such & Co of Calcutta extensive coal mines as those of Bengal and Bihar, but coal has been found in Angula, Sambulpur and in the States of Gangpura, Talcher and Athmalik Talcher has the largest conffields and they are being progressively exploited. The Agricultural and the Industries Departments which remained under the control of the Revenue Commissioner till November 1936 was taken over by the Director of Develop ment A Deputy Director of Agriculture was appointed for Orissa By the amalgamation of the ox Madras and ex Central Provinces areas 15 additional factories were added to those already in Orissa Division and four fish curing yards with their staff were transferred from the Madras Presidency

Administration.

Sir John Austen Hubback, Kosi, was ap pointed to be the flist Governor of the infant province of Orissa

Under paragraph 19 of the Order in Council, the Patn't High Court is the High Court for the Province To enable the High Court to hear on Circuit, cases of the Ex-Madras and ex-Central Provinces areas, Clause 35 of the Letters Patent was amended by Regulation XII of 1936 A new Court of an Agency Sub-Judge at Jey pore, a Munsif s Court at Nawapara and three addition al Criminal Courts, consisting of a District Magistrate's Court and two sub divisional Magistrate's Courts, were established in 1936

The Cadre of the Indian Civil Service was provisionally fixed at 17 including 13 superior posts and 4 inferior posts As it was considered undesirable to form a separate Cadre for such small number the Cadre is joint with Bihar

Provincial Autonomy—The first general elections under the constitution which estab lished Orissa as a separate province resulted in a clear majority for the Congress Party Out of 56 elective seats in the Assembly (four are nominated, making a total of 60) the Con gress counted 36 as its adherents. The Governor thereupon summoned the leader of the Congress Party to form a Ministry but the latter, in obedience to the directions of the party beadquarters. the party headquarters, declined unless he were given certain assurances by the Governor (See chapter on Indian National Congress) After a piolonged controversy this point was a microbly settled, and the Congress Party leader of Columbia. formed a Cabinet I ate in 1937 the legislatur decided that Cuttack should be the capita of the province

The working of self government in the infan province was threatened with interruption twice in 1938—once early in the year an later in the summer The former did not relate directly to Orissa, but the latter did In the charter was an early in the latter did not not be the charter was an early with the In this chapter we are concerned only with the latter Sir John Hubback wished, for reasons, health, to go home on leave In his place to Revenue Commissioner, the seniormost civilic in the province, was appointed to act for period of four months. The Premier oppose this appointment on the ground that it was be this appointment on the ground that it was by

and, while munsterialist spokesmen claimed growing support for the Government, the Opposition continued to challenge the Ministry to release the imprisoned M L A s and then face the House with a motion of confidence

Late in the summer of 1944, the cohesion of the ministerialist party showed signs of weaken-ing. This development affected the solidarity of the cabinet, and the Prime Minister tendered his resignation. The Governor held consult ations with the leaders of legislative groups and, finding that there was no prospect of the responsibility for the administration of the province under section 93 of the Government of India Act Thus provincial autonomy was once again eclipsed in Orissa

Laily in the new year the Ministry secured an accession of strength as the issult of seven settlement of excise and opium licences, the more Congress M. L. A. s.' deciding to join hands with the Ministry Even so, however, the internal party position continued to be fluid of the increase in the Treasury price of internal party position continued to be fluid of the increase in the Treasury price of open and while many targeties and opium and the increase in the Treasury price of opinions. revenue was anticipated

Expenditure under War Police, 60 per cent of which is borne by the Government of India, was expected to merense considerably, chiefly on account of increased staff, the increased cost of clothing and the grant of dearness and the war allowances

A sum of Rs 23 19 lakhs was provided in the revised estimates of 1944 15 and Rs 47 5 laklis in the budget for 1945 46 on account of advances to cultivators under the Land Improvement Loans Act and the Agriculturists' Loan Act Of these sums, Rs 17 70 lakhs in the revised estimates and Rs 44 88 lakhs in the budget represent loans for the furtherance of the food Provision was also made production campaign for loans to the Orissa Provincial Co operative 1945-46 Budget—The budget estimates for Land Mortgage Bank, central banks in North the year 1945-46, published in a Gazette Extraordinary, revealed a deficit of Rs 8,68,000 The total revenue was estimated at more fish scheme A loan of Rs 67,000 was provided for revenue at Rs 3,03,01,000 inclusive of a sum the revised estimates and Rs 80,000 in the budget of Rs 50,85 labbs provided for new expenditure. of Rs 50 85 lablis provided for new expenditure was provided for purchase and supply of raw Receipts other than revenue were estimated at materials to the distillers to supply country Rs 7,31,50,000 and expenditure not charged to liquor to North Orissa districts

The Puniab

The Tenight or I and of the five livers is expendituding of the Province in 1831 including a called from the five rivers by which it is est the Binder irition on the pooling of the Debra est cost of annely the Thetim Chenab Ravi least and Suile! Together with it expendituding the Province and the India n State the Theorem and Kashmir which lie to the north the Punjab complex the extreme north west. The greater p rt of the Punjab consists of en corner of the Indian Empire and with the one wast aliavial plais stretching from the exception of the above mentio ed province Jumna in the east to the Suleman R ng. in comprises all of British India north of Sind the west. The north east is occupied by a man and Reference of the Suleman R ng. in comprises all of British India north of Sind the west. The north east is occupied by a single Reference of the Suleman State Transcent

comprises all of Include Norda worth of Sind (the west. The north seat is occupied by and Rajptians and west of the river Junual section of the Himalayas and the Sail Large Fredious to Octob r 191 the Lunjab with forms its north western angle A fow small strendstones embraced an area of 193 330 spurs of the Aravailli mountain system traver e and 193 and a propulation at the Census the extreme south-east and terminate in the content halvest of Color and the Aravaill mountain system traver e and 193

the physical configuration is broken and conused and the mount mous tracts of Murrer
and Kahut, approximate closely in characteristics to the Himalayan tract. Locet in the
hills, the rainfull leaves little margin for protection against distress in unfavourable serious
and irrigation is almost unknown. Skirting
the base of the hills and including the low ranges
of the Simplify runs the parroy sub-montane.

The People

Of the population roughly one half is Maho of the Sivaliks, rune the narrow sub montane ract. This tract, secure in an umple rainfull, and traversed by streams from the hills, com piles some of the most fertile and thickly populated nortions of the province. Its populated piles some of the most fertile and thickly populated portions of the province. Its populations of over four millions is almost smillions, are the most important. Roughly speaking, one-half the Jats are Mahomedan, agricultural and pastoral but it includes one one third Sikh and one sixth Hindu. In distribution they are ubiquitous and are equally the gentler provides are asset of the plans of the distribution they are ubiquitous and are equally rige town in Stelkot Of the plains of the tribution they are ubiquitous and are equally Plinab, the eastern portion covers an area of divided between the five divisions of the province some 36,000 square miles with a population Next in importance come the Rajputs, who is everywhere so far sufficient that cultivation is possible without irrigation in fairly favourable seasons, but over the greater part of the real the margin is so slight that, except where province I both Jets and Rajputs of the Puncipation is employed, any material reduction in the rainful involves distress, if not actual indian Army. In fact all the agricultural immed. Within the eastern plains lie the large classes of the Puniab, except in the south-Within the eastern plains lie the large cities of I shore and Amrifan, and the popula wastern districts, made a magnificent response from the companison with the western Punjab to the appeal for recruits in the great war and is largely urban. The western plains cover the province's contribution of upwards of an area of 59,000 square miles, with a population of the Limpire for the contribution of the con ation of a little over six millions. The rain-speaks for itself. The Gujars are an important fall in this area, heaviest in the north and agricultural and pastoral tribe, chiefly found east and decreasing towards the west and south in the eastern half of the province and in the is everywhere so scanty that cultivation is only extreme north-west possible with the aid of artificial irrigation or upon the low-lying river-banks left moist by the retreating floods. In this very circum stance, these tracts find their security against famine, for there cultivation is almost inde nothing worse than a scarcity of tries. So little rain is sufficient, and absolute drought occurs so seldom that the crips may be said never to ful from this cause The western plains embrace the great colony areas on the Chenab and Jhelum Canels which now challenge the title of the castern plains as the most fertile, wealthy and populous portions of the province Multan and Lyalipur are the largest towns in the western area Owing to its geographical position, its scanty rainfell and cloudiess skies, and perhaps to its wide expense of untilled plairs, the climate f the Punjab presents greater extremes of both hear and sold than any other portion of racia The summer, from April to Septemoer, is scorchingly hot, and in the winter, sharp frosts are common But the bright sun and invigorating air make the climate

or the Punjab in the cold weather almost ideal

States.

The Indian States of the Punjab were formerly in the political charge of the Punjab Government In 1921, however, the thirteen most important States, including Patiala, Bahawalpur, Jind and Nibha, were formed into a separate "Punjah States Agency" under the control of the Agent to the Governor-General, Punjah States Theonly States remaining in the charge of the Punjah Government were the Simia the Punjah Government were the Simia the Punjah Government were the Simia the stable industry of the province affording the main means of substitute was Political Officer and three small is essentially a country of peasant proprietors

Of the population roughly one half is Maho medan, three eighths Hindu and one-eighth Sikh Socially the landed classes stand high, classes of the Punjab, except in the southorganisation In closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khojas, Parachas and Khakhas), and the numerous artisan and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population, are represented by the ments in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Minnwall districts Pathans are a'so found scattered all over the province engaged in horse-dealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages

The main language of the province is Pun pabi, which is spoken by more than half the population Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns), Western Pahari, which is spoken in the hill tracts, and Rajasthani, the language of Rajputana Baluchi, Pushto, Sindhi and Theto-Burman languages are used by small

of Simla was Political Officer, and three small is essentially a country of peasant proprietors

cultivation without exten ite irrigation Since 1,00 several big irri ation projects have been put into execution and irrigation facilities provided to large tracts of barren land as a result of which many colonies have sprung up The Lower Chenab Canal has brought under plough about 2 9 million acres most of which was formerly waste land Similarly the Lower Jhelum and Lower Bari Doab Canals are respon Jackim and Lower Bart Doab Canals are responsible for 1 a and 1 4 million areas respectively. The Sutley Vanals and Havell Canals accommand 3 3 and 1 5 million are frequently. Large areas in the hills and else where which are unsuited to cultivation after that industries in wooden russerved as f rest lands the total extent of which is about 6000 square miles of the crops which is about 6000 square miles of the crops are supported by the companies of the crops which is about 6000 square miles of the crops are supported by the crops of the crops o grown wheat is the most important and tie grown wheat is the most important and and development of irrigation has led to a great expansion of the wheat area. Next in import ance to wheat is gram. Other Important staples are barley rice millet maize offseeds (rape toria and secamum) cotton and sugarcane. In

Industries

Although the Punjab does not yet rank with Although the Punjab does not yet rank what he industrially adv need provinces of India he dy prog e s has been maintained in the establishment of n w factories durin the last decade. The number of registered f ctories has increased from 1101 in 1943 to 1 3 in 1944 including. including a large number of cotton ginning and prescin fa tories located all over the province and several modern cotton spinning and weaving milis at Amritsar L ho e Ljailpur and waving must a Amritsar L. no c. Administration

Prior to the amendment of the Government Prior to the amendment of the Government of India Actin 1919 thehead of the administration was a Hentenate-Governor drawn from the ranks of the Indian Civil Service Under the Act of 1919 the province was raised to the status of a Governorship with an Executive Council and Ministers the Governor In Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Council and Council being in charge of the Reserved Subjects and the Governor with his Ministers of Subjects and the Governor with his Alminister of Subjects and the Governor with his Alminister of Subjects and the Governor with his Alminister of the Council Subjects and the Governor with his Alminister of the Council Subjects and the Governor with his Alminister of the Council Subjects and the Governor with his Alminister of the Council Subjects of t Subjects and the Governor with his ministers of the Transferred Subjects. With the Introduction of part III of the Government of India Act 105 this Executive Council has been substituted by a Council of Ministers and this Legislative Council by an enlarged Legislative Assembly with wide powers of Explanative Assembly with wide powers of the Council Government is carri d on through the usual attories and sike warth factor is several carrier is decreased in the control of Secretary and of the I dication Department a order to modernia the towns of the province, Secretary to Government The Government the Punjab Jown Improvement Act, 1922, middle of May to the middle of October) in ment Trusts, has been extended to nine imporsional distribution of May to Commissioners (for Ambala, Jullundur, Lahore, Rayalahadi and property of the constitution of Improvement Act, 1922, which provides for the constitution of Improvement Trusts, has been extended to nine important towns and instance of the constitution of Improvement Act, 1922, which provides for the constitution of Improvement Act, 1922, and the provides for the constitution of Improvement Act, 1922, and 1922, and 1922, and 1922, and 1922, and 1922, and 1 Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district

The principal heads of Department in the province are the three Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Lucineers, the Inspector General of Police, the Director of Public Instruction, the Inspector General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co operative Credit Societies and Joint Stock Companies and the Legal Remembrancer

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil juris diction in special cases. The Court sits at Lahore and is composed of a Chief Justice and ten Puisne Judges (either civilians or barristers), Subordinate to the High Court are the District and Sessions Judges (22 in number) each of whom exercises civil and criminal jurisdiction in a civil and sersion division comprising one or more districts. In districts in which the I rontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment

Local Government

Local Government is secured in certain anches of the agministration by the branches of the auministration by the constitution of District Boards, each exer cising authority over a district of a Corpo ration at Lahore or of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Panchaga's, each exercising authority over a revenue estate or a compact group of revenue estates The funds of District Boards are derived from a ccss on the land revenue of the district supple mented by Government grants, profession and other taxes and miscellaneous fees, and those of the Lahore Corporation and Municipal, Town, and Notified Area Committees from octroi or terminal tax and other forms o' taxation, from Government grants and from rents and miscellaneous fees Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abate

The Police force is divided into District Police, Rallway Police, Criminal Investigation Department and Provincial Additional Police The combined force is under the control of the Inspector General, who is a member of the greeted force and his under him five Deputy In-pictor? General in charge of ranges comprising several districts and a sixth Deputy Inspector-General in charge of the Criminal Intestigation Department and of the Linger Print Bureau at Phillour There Is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police and the Provincial Additional Police are cach under an Assistant Inspector General The District Police are controlled by Superin tendents each of whom is in charge of a district and his under him one or more Assistant superintendents or Deputy Superintendents

As a war measure the creation of a Civic Guard has also been effected. It is under the control of an Assistant Inspector General of Pouce

Iducation

Rapid strides have been made in education in the Punjab during the last two decades The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains Eventien arts colleges (including two for Europeans and Four for women), five normal schools for males, fourteen training classes, and combined institutions for females, one hundred and sixty eight secondary schools for boys and girls and fifty eight centres for vocational training Apart from these institutions for general education, Government institutions for general education, Government mulatains nine higher grade professional institutions, viz, the King Edward Medical College, de Montmoreney College of Dentstry and Veterinary College at Lahore, the Agricul tural College at Lyalipur, the College of Engineering and Technology at Moghalpura, the Central Training College, Lahore, the Lady Maclagun Training College for Women, Lahore, and the Chelmsford Training College at Ghoragali, and one school. viz. the Lugineering School at and one school, viz, the Lugineering School at Rasul In addition there are forty two technical and industrial schools (thirty one for males and eleven for females) scattered over the province

The Department of Education is in the charge of the Minister for Education, who is assisted in the work of administration by the Director of Public Instruction

Medical

The Medical Department is controlled by the Inspector-General of Civil Hospitals, Punjab, who is an officer of the Indian Medical Service holding the rank of Colonel He is assisted by ment of nuisances and other matters In a Deputy Inspector General of Civil Hospitals, Punjab an I M S Officer of the rank of a Major an Assistant Inspector General of Civil Hospitals Punjab who is an officer of the rank of Provincial Civil Medical Service of the rank of a Civil Sungab on a Lady Assistant Inspector Ceneral of Civil Hospitals Punjab who is senior Ceneral of Civil Hospitals Punjab who is senior Member of the Women a Medical Service (Indian Stat s are, m t

Sind.

Sind Is one of the two provinces created in and the infant in respect of development loans 1926, the other being Orissa Unlike the incurred during the joint family period Lands, latter, which has been carved out on a linguistic forests, buildings, property, etc., will pass to the basis from three older provinces, Sind was a compact unit and was considered a province taxes will belong to the province where the taxed within a province even before its separation From the point of view of geography, ethnology took place Of the outstanding Bombay and language, Sind has greater affinity to the Irrigation Debt incurred before April 1, 1921, Punjab than to Bombay Nevertheless it has been attached to the Bombay Presidency debt on account of the Lloyd Barrage and Canals administratively ever since its conquest by Sir Charles Napler in 1843

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years 1go that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming mejority, should have separate administrative machinery under the next reformed constitution, so that it might be a counterblast to provinces where the Hindus are in a majority What was started as a bargaining point in inter communal negotiations has now become an accomplished

The Muslim delegation at the first Round Table Conference put forward the demand in Lordon in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked

Demand for Separation

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation divergence of opinion prevailed at this confer ence, whose charman eventually submitted a report according to which the canual deficit of the new province for the first ary years of its ence, whose charman eventually submitted a and the Muslims 3,208,325. The rest of the report according to which the canual deficit population is made up of 20,209 Christians, of the new province for the first ary years of its 31,011 Sikhs, 3,687 Juns, 3,838 Parsis, 1,082 life would be Rs 80 lakhs, the revenue from the Barrage being eaten up by interest, charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the Barrage being eaten up by interest, charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the Barrage being eaten up by interest, charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the Barrage being eaten up by interest, charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 222 molecular and 20,020 chrose to the canual charges [Cancer et 1041, 280 Barrage being eaten up by interest charges Roughly from 1945 onwards, there would be a surplus from the Barrage to help province Based on this assumption authorities set about perfecting the admini manguration of the new regime

With the stage set for the advent of the new province, an Order in Council was issued in January, 1936, announcing that the new province would start on its career on April, 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is maugurated in accordance with the provisions of the Government of India Act, 1935

or the Order in-Council which sever Sind from literate in English are 119 per 10,000—186 per

property is situated or the taxed transactions system, will be borne by Sind, and the rest by Bombay Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabid section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind The out standing Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay Other loan works will be chargeable alone to the province where the works are located

It is also understood that the Central Govern ment will have to come to the rescue of Sind by providing the funds to meet the deficit in the first fow years In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry He completed his investigations and submitted his report, according to which Sind gets a cash subvention of Rs 105 lakhs for a period of ten for it An expert inquiry was held and it subvention of Rs 105 lakhs for a period of ten drew a gloomy picture of the financial future of Sind Its findings can best be sum marised by its remark, "There is thus obviously no question of Sind standing surers to the Niemeyer recommendations, Sind will for the Barrage—the problem is whether the Barrage—the problem is whether the Barrage—can stand surety for Sind" the income tax revenue

Population.

Sind has an area of 48,136 sq miles and a population of 4,535,008. Of this, the Hindus (including Scheduled castes) number 1,229,926 Census of 1911, 389,333 males and 90,020 females in the Province of Smd are literate, representing 156% and 44% of the total male and female population respectively 138,249 Mus lim males and 16,416 Muslim females 231,869 strative machinery in preparation for the Hindu males and 64,498 Hindu females are literate The language of the Province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in Perso Arabic script, is nearer the original Sanskrit than any other Indian language The Hindus are far more advanced than the Muslims and enjoy a virtual monopoly of the trade of the province As against 263 Hinduliterate males per 1,000, only the Government of India Act, 1935

Of a permanent character are those provisions the Order in-Council which sever Sind from literate Muslims females. The number of those the Order in-Council which sever Sind from literate in English and the literate in English. Bombry and settle the liabilities of the parent 10,000 males and 34 per 10,000 females

Sind

ed in a riculture and animal husbandry. Ten per cent are engaged in manufacturing indus tries most of which are however of the cottage type there being very few factories in Sind

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals which with other cansis and the Indus river itself supply water binding as the Indus liver listell supply waves to be supply as the Indus liver listed supply acceptable to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supply of the Sindhi to the supplied by the Barrage with which lands supplied by the Barrage with which lands supplied by the Barrage with supplied by the Sindhi to the S with which lands supplied by the larrage system re being taken up august well for the success of the scheme and the prosperity of the province as a whole Already there has been strongly the many supplied by the last been a growth in the production of long staple cotton all of which is easily absorbed by Indian textile mills

Lloyd Barrage

The Barrage owes its existence largely to the real of the I te Lord Lloyd the then Governor of Bombay whose name it bears Started in July 1923 it was completed in January 193 It was the completion of the dream of many an engineer and an almo t incredible boon to the cultivator who f rmerly carried on his agricul tural operations in a haphazard manner being unable to depend on the proverbial vagarles of the Indus What it means to the Sindhi the Sindhi alone knows for the Barrage has convert ed-or hopes to convert-a waterless desert into a uniling garden flowing with milk and honey

The magnificence of the achievement that is use more more than the imagined vines as a successful worker of the second condition realised that it is a bage water regulator control to the realised condition and the second district of the second condition and the second condition of the seco i ngth is thus some 36 000 miles which means about 1; times the circumference of the earth

The total quantity of earthwork involved extending to a height of over 115 miles

The function of the Barrage is to head up the river at Sukkur and from that to distribute it all the year round according to requirements of cultivators The distribution is made throu h seven great canals regulated through regulators on both banks of the river four on the left bank three on the right our on the left bank three on the right Tho c n the left bank are Rohri the Eastern Nara-tha Rhitpur Feeder East and the Khalipur Feeder West. Those on the right bank are the Korth Western Can-it.

Outofevery 100 workers in Stod 59 are engag electrically operated gates. The total discharge in a resulture and animal husbaudry. Ten jot water into all the canals is approximately recet are engaged in manufacturing indus. total length of all irrigation channels including total rengial of all integration commers including old and new watercourses is 54 300 m le To accomplish this staggerin feat excavation of earthwork to the extent of 7500 000 000 cubic feet was involved as much as would fill a dra n 14 feet wide and four feet deer du rourd the equator It was estimated that the ultim te area of annual cultivation on the scheme would

This denoted in produce would man the following approximate quantities

Wheat 1 1 3 000 tons cotton 549 000 bal rice 417 000 tons jaceare bijri etc tons and oliseeds 117 000 tons

Inter-communal Co-operation

Politically the province is backward the Hindu minority is politically minded the Muslims owning allegiance to personalities ratics than to principles The Hindus are openly atraid of hiuslim dominance and of being ousted from public life On the other hand there is growing evidence of a desire on the part of the Muslim community to reassure the minerity in regard to the continued enjoyment of its rigi ta Leaders of both communities are working for the creation of an understanding between the two which will bring about an area of inter communal co-operation and goodwill so necessary for the the Hoyd Barrage can be imagined then it is successful workin of the reformed constitution under unfavourable financial conditions

No account of Sind will be complete without were excursed varying in which from 36 feet comparatively new town for coording to known in the case of main can is to only two or three facts it was as recently as 17 9 th t a few traders feet in the case of main can let only two or three facts it was as recently as 17 9 th t a few traders feet in the case of main can let only two or three facts it was as recently as 17 9 th t a few traders feet in the case of was the wire rated to of the neighbouring State of Kalat migrated to the Kalachi the land of the sand dunes feet in the came of water courses. The total of the meighbouring State of Raink migrified assignt of Government channels which were the Kafachi the land of the sand il is examined was over 8 000 miles and that of it was several years later that its postul it is water course over 30 000 miles. The total as a harbour were realized by utilities that is also also the said of the said that is also the said that the said water that the said is a constant were realized by utilities that is also the said that the said water that Charles Napler the Conqueror of Sind is said to have forecast that Karachi would some day become the Glory of the East Recent developments in Karachi hold out fresh hopes cross cube feet of earthwork which means a of this prediction being fulfilled for with the solid clump and solid clumn measuring 100 feet by 100 feet growth of aviation harachi which is on the main line of Imperial aerial communication between London and Austral a right across India is bound to become a vital airport if it is not already one in ad litton to bit the capital of Sind K rachi is the outlet for the products of the Punjab II the Barrage become 8 Products of the Funday in the Darrige become a little tarties expected of it Karachi may ha e to hadle in 1960 a very large portion of the produce mentioned above of the Barrage produce as also the produce from 4 9 800 acres of Dubari cropped land That this is not ltog the Utoplan is evident from the fact that within The total number of openings in all the canal Regulators is 55 each being of 25 f et span and each of the canal ca

The United Provinces.

Nepal, on the cast and south east by Bilar, November 3 1939 But after the outbreak of the on the south by two of the Choia Nagrur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gualier, Dholpur, Bharatpur, Shimoor, and Jubbil, and by the provinces of Delhi and the Punjab Its total area amounts to 106,247 Province The medium for the transaction of the public business to the transaction of the public business to the contract of the transaction of the public business to the contract of the transaction of the public business to the contract of the transaction of the public business to the contract of the transaction of public business to the contract of the transaction of the provinces of the transaction of the provinces are the contract of the transaction of the provinces are the contract of the transaction of the provinces. equare miles, to which may be added the area of the three Indian States of Rampur, Tchil-Garliwal and Benares with an area of 6,276 square miles, giving a total of 112,523 square miles. The total population according to the 1941 census 15 5 60,46 456

The Province, originally termed the North-Western Provinces and so imalgamated in 1877, has named the United Provinces of Agri and Oudh in 1902 and received its present designation on April 1, 1937 It includes designation on April 1, 1937 It four distinct tracts of country of the Himalayas, including the portions of the Himalayas, including the Kumnon division which consists of three hill districts, two of which are entirely in the hills and one is half in the submontane belt, the sub-Himilivan tract, the great Gangetic plain and portions of the hill systems of Central India including Bundelkh nd The Gangetle plain 13' projected by an extensive canal system, which though somewhat hable to run short of weter in catremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two or these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equal-tar is in charge of the Information and Rural information better populated. The soil of the Gangetic plain, however, posseases an extreme ferfulty and here the density of population varies from 542 parsons per source role. extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Province as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal In the south there are low rocky hills, broken spurs of the Windhya mountains, covered with stunded trees and jurgle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass or sidges, ever higher and aigher, until to reaches the line of the eternal snows, but the greater part of the province consists of level plain, teeming with highly-cultivated fields and writted by three rivers the Ganges, Jumna and Gogra

Administration

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service

The United Provinces lies in practically the centre of Upper India It is bounded on the north by Tibet, on the north east Ly Numstry remained in office from July 17, 1937 to Nepal, on the east and south east by Bihar, November 3 1939 But after the outbiest of the Nepal, on the central India Agency and States of the Central Provinces (under section 03 of the C I Let of 1935 This c Secretary), and 11 Deputy Secretaries including one Deputy Tegal Remembrancer who is exOffico Deputy Secretary in the Judicial Depart-There are also four Under Secretaries 1 Assistant Secretaries The Chief Secre and Il Asistint Secretaries The Chief Secretary is in charge of Appointment, General Administration, Secretariat Litablishment and Accounts, and Ecclesiastical Departments, the Finance Secretary deals mainly with the Finance Department , the Revenue Secretary is in charge of the Revenue, and Searcity Departments, the dienter Revenue, and seatent Bepartments, the Lducation Secretary is in charge of the Education Department, the L S G Secretary is in three of the Local Self Government, Municipal, Medical and Public Health Departments, the Judicial Secretary and Legal Remembrance is in charge of the Judicial, Civil and Legislative Departments, and perform the duties of Legal Departments and perform the duties of Legal Remembrance, the Public Works Secretary is in charge of the Buildings and Roads and Irrigation and Forest Departments. The War Production Commissioner, is also ex Officio Secretary to Government in the Industries and Department is in charge of the Home Department (Cimmal), Home Department (Jails) and Home Department (Police) There is one Secretary, Rationing who is in charge of the Rationing Deputment. The Secretary, Department of Loonomics and Statistics, is also Economic Adviser to Government. There is a Secretary in the Department of Civil Supplies. We as also Director of Food Supplies. Supplies He is ilso Director of Food Supplies Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in remains Lucknow, though the Secretariat remains throughout the year at Lucknow The Governor and some of the Secretaries and Deputy Secretaries spend part of the hot weather in Nami Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases lying within its jurisdiction, being the chief revenue authority in the province. There are forty-eight British districts, thirty say in Agra and twelve in Oudh, average area 2,213 square miles and average population a million. though the Secretariat Under the Reform scheme the Province was raised to the status of a Governor in Council, the Governor being assisted by two members of the Executive Council in charge of the Executive Council in charge of the Executive Council in charge of the Transferred Subjects with effect from April 1, 1937, provincial autonomy was in augurated in this Province and a Cabinet of Each division is under a Commissioner except

Agriculture

hief industry is agriculture, which is the il source of livelihood of a little over 70 it of the population and a subsidiary of income to a further 8 per cent the province full into three groups, lley soils of the Himaliyas, the main m and the Central Indian alluvium, the haracteristic soil or the Central Indian m is the black soil, with a lighter variant, here also there are light loams and it ivel implay an soils are of local origin and vary he neture of the rock from which they seen formed, whilst the main illuvium re sand, clay and loun, the loun being liv the most productive Inc soil liv vields excellent crops of rice, millet, linseed, mustard cotton wheat, barley, ane, pulses and pot itoes, rice being grown m low lying heavy class and pot iters higher villeys. The greater part of the ac is highly cultivated. The rainfall from 50 to 70 inches in the hills to 10 to hes in the Benarcs and Gorakhpur Divisions, the Agra Division receives only about Droight seriously 30 inches annually ed Bundelkhand and the Agra Divisions ie past, better draining and irrigation acs have effected considerable improve In the latter men, however, shortnge ter in the circle and the general lowering a water trule still continue to react igainst griculturil retuins Steps are being tiken cre ise the amount of witer passing down canals. Learpt in the case of nice, the s of chief food grains showed on the whole The price of rice ndency to decline almost steadily till August when the mum price was attuned, followed by a ly decline. As regards wheat, the price to (bly till March when it attained the peak, after which it steadily declined till June, wed by a rise during July and Angust and endy falling off thereafter In the case of es, giam and arher dal, the maximum prices attimed during the month of I muary, seeded by a more or less storty decrease in subsequent months nere was some increase in the trea under ent but a marked decrease in that under

on, as compared with the corresponding res for the preceding var The average turn for cotton remained more or less sta my, that for wheat being uncertain , a slight increase in the area under rice but to decrease in the veriet outturn ards sugarcane, the swas a decrease both in area as well as the mange outturn and is held on Zam adari tenure in Agra and

The principal land lugarii tenure in Oi di Falugdurs, some of ates. The area held ners in Oudh are the om own very large estates Taluqdari tenure amounts to 54 per cent of ; total area in Oudh

The People

at the previous census. The total of all other communities was 1 44% comprising of Indian at the previous census Christians, Anglo Indians, other Christians, Sikhs, Jains, Piraces, Buddhists, Jews, Tribes other than scheduled castes and of persons who declared themselves as belonging to no caste or religion Among the Hindus are included scheduled eastes, easte Hindus and

Arya Samajists The three main physical types are Dravidian, Arvan and Mongolioid, the latter being confined to the Himalavan and sub Himalayan districts and the former to South Mirzapur and Bundel khand, whilst the high caste Aryans frequent the western district of the Province Most of the people, however, show a mixed Arya Dravidian origin

The ordinary spol en language of the Province is Hindustani, vritten in Nagri and Persian There are distinct literatures in Hindl and Urdu languages respectively and a ch ir ictera ecriain proportion of residents in urban areas, irrespective of their religion, speak and write in Urdu which has a close relationship with Persian and Arabic

Local Self-Government

The main units of local self government are which the district and municipal boards, of the Most Chairmen have non official municipal boards having an annual income of Rs 50,000 or over have executive officers to whom certain administrative powers are reserved The administrative functions of the municipal and district boards are performed by the Chair man and Executive Officer or the Secretary, but the boards themselves are directly responsible for most of the administration. The district for most of the administration boards obtain 45 77 per cent of their income from Government grants The other chief sources of income are the local rate levied from the land owners and the tax on circumstances and property imposed by some of the boards The United Provinces Motor Vehicles Taxation Act came into force with effect from January The tra realised under this Act is 1st, 1936 The tax realised under this Act is also utilized in the payment of grants to local also utilized in the payment of grants to local also utilized in the authorities for purposes of expenditure on the construction, muntenance and improvement of The chief source of municipal income is the octrol or terminal tax and toll which is at octron in modified form Local opinion a strongly in favour of indirect as opposed to direct taxation for municipal purposes

Tustice

Justice is administered by the High Court of Judicature at Allahabad in the portion of the province known as Agra and by the Chief Coursiting at Lucknow in the portion of the province known as Outh They are the final approvince known as Outh They are the final appropriate the control of the province known as Outh They are the final approximately as the control of the control of the province known as Outh They are the final approximately as the control of the province known as the control of the province known as the control of the province known as the province known pellate authorities in both criminal and civil cases The former consists of a Chief Justice and ten perminents, and one Additional Judge six of whom are Indians and the latter consists of a Chief Judge and three permanent and one addl judges two of whom are Indians There are 30 posts of district and sessions judges of which nine are held by officers not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar Usually they exercise appellate jurisdiction in The population is mainly Hindu. The 1941 listed to the proximal service and the bar assumed has disclosed slight variations in the minimal percentages. The Hindus were 27 per cent as against 84.4% in 1931, the listed to the proximal service and the bar usually they exercise appellate jurisdiction in Usually they exercise appear appear appear appear appear appear appear appear appear appear appear appear appear infinitelian The Chief Court e or in al juri die the construction of about 18 000 ; lies of un tion w a soli heef in 1927 by an Act of the installed roat A larer number of triffer is Protected Levilature District Officers and all o proposed to be contracted out I which this, a istant including tall blars presided over 18 will have from 100 feet w. 300 fee in criminal courts as ma istrates and as collectors and as I tant collectors in rent and revenue courts and dispose of a good deal of the work Honorary magnitrates and honorary as litted 14 railway bridges will be decked f r carry collectors who function in all the districts all of whicular traffic. It is proposed to a art dril with criminal revenue and rent cases tipendiary Revenue officers I ve be a appointed temporarily all over the Province to speaked temporarily an over the Fronzec to me an unter prepared to the Cortex work kumaon has been brought under its work kumaon has been brought under its Citil jurisdiction of the High Court from 1st bail 10 6. The a hors includ the contruction of 5.00 metalled miles and the reconstruction ples power for domestic industrial and agri in m to concrete bitumen and naterbound cultural purposes to 14 districts in the west of about 5.000 miles of roads. They also include the province and to Shahdara in Delhi province

Seven of the ten available falls have been head created by the storage dam at barnessed for generating electric energy and a station situated immediately below stand by steam power station has been capacity of the installed plant is expected at Chandrusi of 9000 KW The United Province constructed at Chandrusi of 9000 KW The United Province constructed at Chandrusi of 9000 KW strind by sterm power station has been constructed at Chandlusi of 9,000 KW capacity, making a total of 28,000 KW savallable on the Grid Besides supplying energy for lights and fans and minor industries to about 93 towns, the Grid provides power for under consideration at present irrigation pumping from rivers, tube wells and The Gauges Vallet State Tubew open wells In addition to the Chandaus steam which originally comprised 1656 t station, the steam station at Harduagan, will now being extended by the consistency be in commission generating about 600 more additional tubewells to hel 10,000 K Ws when in operation The More I and Campaign These tul Mohammadpur water power station de igned to generate about 9,000 K Ws 18 at present under construction and in addition a project for the construction of a further water power station at Pathri, ner miles 10 of the Ganges Canal sistem is under preparation and when completed is expected to generate 22 000 K.W. This supply If cheap power from over 2000 sub stations in the Grid is already having an important be which on the economic disposal of crops and the development of industries in the urban and rural erens of the Grid zone which had materially helped the war efforts

The steam power station at Sohwal has a capacity of 2,500 Kilowatts. It supplies energy to the towns of Fyzabad and Ajudhla and for pumping 180 cusers of water from the Gogra at Reunahi into a canal system 129 miles long,

designed to irrigate 43,000 acres

The United Provinces Government have various irrigation and poter projects under consideration for the postwar period. Prief details of these projects on which investigations have advanced sufficiently are given below

Sarda Can'l Hydro Llectre Schime It is maposed to recenstruct 12 miles of the Sarda Main Canal to combine the present falls on the e isting channel into one drop of 59 it for generating 20 000 K W minimu n at one power station with an installed capacity of 41 000 K W The station would in the first instance, be linked with the Ganges Cinal Hydro thermal system in which it will inject 10,000 KW Transnussion lines will also be run into Piliblut, Barelliy, Naini Tal, Shahjahanpur and Khen districts Transn ission where energy well be made available for domestic agricultural and industrial purpose. Investigations with regard to this scheme have been completed and construction work will start It is anticipated that after the rains of 1945 power from this power station will be available for consumption by 1949

It is proposed to im Nayar Dam Project pound 1 1 million acre fret gross in the vallet of the Navar a tributary qu the Langes 50 miles above Herdwar, by he ilding a dam 650 it high a cross the gorge in the river near village Marora in Carhwal district 0/8 million , ere feet is in Carnwai district by andion are left is expected to be available annually for irrigation draw off Primary could be secondary power to the extent of 15,000 KW and secondary power important to 70,000 kW is also proposed to be generated at the dam site Geological Geological investigations with regard to lock at dam site are to be taken shortly and the project will

for the medical work of each district and in a few of the larger stations he has an assistant In two stations (Ranikhet and Roorkee) Medical Officer, in military employ hold collateral civil charge. There are about 100 Provincial Medical Service officers in charge of important dispensations and on the reserve list and a large number of Provincial subordinate medical service officers Women's hospitals are in service officers Women's hospitals are in charge of PMS (W) or PSMS (W)Officers Government have also instituted Provincial and Subordinate Nursing Services to be controlled by a Superintendent of Nursing Services, WP, whose appointment is under consideration

The best equipped hospitals for Indian pa tients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the newly-constructed Hallett Hospital, Cawnpore, the Prince of Wales Dispensary and the Ursula Horsman Memorial Hospital Cawnpore, King Edward VII Hospital, Benires, and the Civil Hospital at Allahabad (for Europeans, Anglo Indians and Indians living in European style) The Ramsay Hospital for Europeans at Nami Til is a first-class institution and there are also the Dufferin and Women's Hosp tals at various places for rendering medical Hosp tals it various places for rendering medicity and to women H E the Vicerov performed the opening ceremony of the Hullett Hospital, Cawnpore, on December 16, 1944 The King George's Medical College, Lucknow, and the Agra Medical College, Agra, are two of the best equipped colleges, in the country, with a staff of highly efficient professors and the hospitals attached to the Colleges are the best equipped hospitals in the Province. The Cucen May's hospitels in the Province Hospital for women and children is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwifery and gynaecology Agre this is done at the Lidy Lvall Hospital There are sanatoria for British soldiers in the hills The King Edward VII Sanatorium at Bhowall in the district of Nainl Tal is an up to date and well equipped institution for the treatment of European and Indian consumptives. There is also a Government T B clinic at Allahabad

Arrangements have been made for about 175 Avurvedic and 50 Unani dispensaries to work in villages, under the charge of qualified Vaids and Hakims under the Rural Development pro A compounder has been engaged to assist Forty eight Fixed and sixteen Travelling allopithic dispensives are also woiling under the Rural Development programme at suitable places in the country side. The duty of the medical officer appointed to the Rural Development Dispensaries is not only to provide medical and in villages but also to inculcate habits of clevuliness and carry on propaganda to ensure personal hygiene and health

The aim which has been kept in view in opening rural indigenous and allopathic dispenetries is to male available medical aid in alloges elected in the interior of the districts

Gircinment ilso conction every year grants for the trictment of eye diseases at certain entres is rural arcis. A good number of rule suffering from entaract and other decrees have received treatment under the ruh me r.h me

There were about eighty subsidized dispen saries and thirty subsidized medical practitioners working at the end of December 1944

Facilities for the training of Indian girls as nurses and midwives have been provided at almost all important hospitals in the Province A Government Nursing Service has been in augurated

The Government have established a Hospitals Fund to improve Medical facilities A sum of rupees eighty-two lacs has so far been allotted to this fund Applications for grants out of this fund are considered and sanctioned by Government from time to time but it is in the main being conserved for post war developments, when articles of equipment and building materials will be much cheoper

A systematic campugn has been undertaken and large funds allotted to bring the hospitals at District Headquarters and the Dufferin

Hospitals to a direct level

Adequate steps have been taken to ensure that the hospitals and dispensaries in the U P do not run short of medicines, drugs and equip ment during the war period A sum of Rs 41 lakhs was illotted to provide a reserve stock of medical Stores To tide over the difficulty of getting imported drugs a new pharmacopoer of indigenous drugs has been introduced at hospitals and dispensaries and an Indigenous Drugs Factory has been started at Agra Arrangements have also been made with the Director General, Indian Medical Service to obtain supplies of medical stores from the Medical Stores Department A Scheme is being sanctioned to train 90 Compounders every year for hos-pitals and dispensaries in the Province and it is in operation now

An important event in the medical administration of the UP during 1943 44 was the decision to take over under the direct control of Government important hospitals in the Drawing According to the According to the medical administration of the Control of the Cont Province Accordingly, 9 important hospitals were taken over under Government's direct control in 1944 45 and it is proposed to take over 15 more during the financial year 1945 46 has also been decided to provincialise women's hospitals at Dist headquarters in instalments

The Board of Indian Medicine, UP, esta blished by Government in 1926, advises Govern ment for giving grants in aid to Avurredi and Unani Dispensaries These aggregate about Rs 50,000 every year It also conducts Avur vedic and Unani examinations of student studying at its affiliated Ayurvedic and Unan Colleges and awirds diplomas to successful candidates. It also maintains a register of qualified vaids and hakims. Government also give and to subsidised Ayurvedic and Unan dispensaries and proceptioners in rural areas on dispensaries and practitioners in rural areas on of an allotment of Rs 42,500 Government object is to render medical aid through a system in which villagers have confidence

A Blood Bank scheme has also been started

It is getting quite a good response Particular care has been taken in recent year to provide X rays and cold storage plants a important hospitals at the expense of the Provincial Government. The surplus stock of the provincial determinent of the surplus stock of the provincial determinent. medical stores and equipment which was store

at hospitals in the Province for ARP purposes is also being acquired for use at hospitals an

dispensaries in U P

Administration

The head of the local administration is the officer styled Agent to the Governor-General, Resident and Chief Commissioner Next, in rank comes the Revenue Commissioner the who controls revenue administration and exercises the functions of a High Judicial Commissioner The keynote of ad of the Court administra Province tion in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime The district levies play an unob trusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three frregular Corps in the Province, the Zhob Militia, the Mekran Levy Corps and the Chagal Levy Corps Fundamentally the Province is not self-supporting, the deficit being met from Imperial Funds

DELHI.

The Capital of India

The transfer of the capital of India from Calcutta to Deihi was announced at the Deihi Durbar on December 12, 1911 It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was un attainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the Bengal Gov ernment-for several months in every year It was also desirable to free the Bengal Government from the close proximity of the Govern ment of India which had been to the constar To achiev disadvantage of that Province these two objects the removal of the capital from Calcutta was essential its disadvar tages had been recognised as long ago as 1861 when Sir Henry Maine advocated the change Various places had been discussed as possible Capitals, but Delhi was by common consenthe best of them all Its central position an Its central position an situation as a railway junction, added to it historical associations, told in its favour and as Lord Crewe said in his despatch on th subject, "to the races of India, for whor the legends and records of the past are charge with so intense a meaning, this resumption by the Paramount Power of the seat of vene table Empire should at once enforce the con tinuity and promise the permanency of Bri sovereign rule over the length and breadth of the country"

The foundation stone of the new capita was laid by the King-Emperor on Decembe 15, 1911, the finally selected site being on th eastern slopes of the hills to the south of Delhi on the fringe of the tract occupied by the Delh of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing reverent treat ment, and the site is near the present centre of the town of Delhi A Committee consisting of Surgn -General Sir C P Lukis, Mr H T Keeling, CSI, AMICE, and Mijor J C Robertson, IMS, was appointed to consider the comparative healthiness of the site and of ar alternative one to the North of the existing city Their report, dated 4th March, 1913 stated that "the Committee, after giving ful consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can exist as to the superior healthmess of the southern site, the medical and sanitary advantage of which are overwhelming when compared with those of the northern site"

The Town Plan and Architecture -A Town Planning Committee, appointed to advise Government, submitted its report in March, 1913, with a plan of the lay-out and work was begin in accordance with that Report The central point of interest in the lay out, which gives the motif of the whole, is Government House and two large blocks of Secretariats This Govern ment centre was given a position at Raisina hill near the centre of the new city

Delha

Lutvers is the architect for Covernment House [19 1 that the revised estimates then amounted for extensio a in case if used has already partly been utilised. The Scretariat personnel has largely increased in the past tew years and nu into the new capital at the end of the Simla season 19 9 To the east of the forum and below it is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indrap ast Across this main axis runs an avenue to the shop ping centre Other ro ds run in different directions from the entrance to the forum The axis runnin north east towards the Juma Masiid forms the principal appro ch to the new Legisla tive Chambers They are officially described as the Council House and the road is named Parlia ment street The railway station for the new city finds its place about half way between the old and new cities off the road through Paharguni which lies to the west of Old Delhi in the direction of The Ridge The main roads or avenues range from 6 feet to 150 feet in width with the excep tion of the main avenue east of the Secretariat buildings where a parkway width of 1 175 feet has b en allowed The principal avenues in addition to the main avenues are those running at right angles to the main east to west anis

In October 191 by proclamation there was constituted an administrative enclave of Delhi under a Chief Commissioner Thi unities of the Fu jab and its total are self-siza square miles. On the basis of the Census of 1911 the population of the area originally lacided in the Province wa 398 209 and of the new area 14 552 or a total of 41 8 1 The Dopulation of the Municipal town of Delhi ws ... 144 The plus of the New Capital allow for a population with in it of 000 Sites have been allotted for forty Rullug Princes and Children and Capital and Chiefs to build houses for their own occup tion during their visits to the Capit I and several of these habitations ha e been erected

There was as regards architecture a probrand battle of the styles over Finally to use the language of the architect it has be n the aim to express within the limit of the medium and of the powers of its u ers the ideal and the fact of British rule in India of which the New Delhi must ever be the monu The inspiration of the designs is ma 1 festly Western as is that of B itish rule but thy combine with it di finctive India features without abandoning the architect a

and Sir Edward Baker for the Secretariats The so 1 30 lakh of rupees this amount included former building was estimated to cost approxi allowances for building new Lezislatt e Ch miters mately Rs 140 lakhs and the latter groups were and Hostels for Members of the Indian Legis of all vestimated to some Rs 1 4 lakis. The lattne which wer not allowed for in the earlier provision made in the design of the Secretariats estimates The New Capital Enquiry C m ittee in its report published in January 19 3 astimated the total expenditure at Rs 1 29 takhs including Rs 4 Jakhs f r loss by Fx merous addition I rooms had to be provided to ich nge Actual expenditur upto approxi make toom for Army Headquarters which moved mately the end of 12 a mee Pe 14 a core m y be taken as the foure for the compl tion of the main projet

The Project Estimate contains certain items such as land residences water supply electric I ght and power and irrigation on which re coveries in the form of rate or taxes will in ad dition to meeting current expenditure partially at any rate cover the interest on the anital outlay whilst there are other items on which some return on account of the sale of leases general taxes and indirect receipts is secured The proj et after being complet d and clo ed was re-opened in 1933 34 This becam neces sary owing to the need to increase residential accommodation for officers and staff and was f cilitated by a period of cheap money Gov ernment utilised the occasion for extending the residential accommodation for visiting member of the Indian Legil tue The expenditure on the construction of h D lhi is Rs

0 49 6 5 (Includin Rs 15 70 914 debited to D fence Istim tes) upto the end of 1944 45 The population of the new City is 93 733 according to the 1941 C nsus Practically II the buildin sites within it (except in a small area whe e shortcomin s in d aina e are a han licap) anciare was entirely taken from the Delhi ar taken up and the time for extendin the district of the Pu lab and its total area is layout has almost arrived

Progress of the Work -The construction of Yew Delhi was made t satisfactory speed having regard to the ourtailment of the Budget allotment in consequence of the G e t War and the absence of officers and other establishments at the war The Secretariats were so far advan ced that there were tran f rred to th m from Calcutta in October 19 4 the offices of the Accountant-General Central Revenu s, and the headqu riers of the Royal Air Force in Indi were also housed in them in the winters of 19 4 5 and 19 6 The original programme of 6 The original programme of resident! Ib illdings for Go ernment o licer a d stall of various grades were then nearly com leted The whole of the ci il side of Gov rnment moved from Old Delhi into their qu rters in the new Secretariats on coming down from Simla in ovember 19 6 All Gov rum at Depart ments including the Army Dep rtm nts and Army Headquarters and R A F Headqu rters have their offices in the new Secretariats of which the builders ha e al eady had to carry out the first section of the extension extension Central without abandoning the architects out the first section or the excession as not over doing loine to the pinciples of structural fitness and artistic unity the control of the cont while be four million testing and that sum The Go cament of India in 10 7 devoted was firs in the original despatch of the Gor special to learning to the question with the rament of India on the subject Various in its ordin present of the control

Delhi.174

duced for trial in 1928 by keeping the Secretariat individual artists, were invited through local in New Delhitill mid April and bringing it down bovernments, to send in by the beginning of from Simia again in mid-October The experi ment was not very successful and was not by a Committee repeated till 1932-33, when Retrenchment mittee both as regards the design and colour Committees had strongly recommended a longer the pictures were to be drawn out and painted to stay in Delhi in order to extract rent for a longer full size on canvas, and, if finally approved by period from the seasonal official occupants of its the Committee, fixed according to the marou residential buildings, the rents in Delhi being higher than those for residences in Simla early descent from Simla was postponed in the autumn of 1934 on account of a report by the Public Health Commissioner on the general them unhealthiness of the Winter Capital in October But various factors, including especially the increase in personnel in the Secretariat and consequential congestion of office and residential accommodation in Simia, are making the extension of the Delhi season unavoidable The pro vision of considerable further housing accommo dation both for offices and residences has become imperative The only question is whether this should be undertaken both in Delhi and in Simia Pressed by sharp financial or in Delhi only stringency, arising partly out of the emergency created by the institution of the Constitutional Reforms, the Government of India appear decisively moving in the direction of making of India appear Delhi an all the year round Capital Certain Departments are already now kept in Delhi throughout the year The office personnel of others are kept in Delhi throughout the year

There was in recent years an increase in malaria bearing mosquitoes and consequential fever in New Delhi This led to a special inquiry in 1936 The inquiry showed that both Old and New Delhi were ringed about with prolific mosquito breeding places, one of the worst being the area utilized for sewage outfall The water borne sewage of both Old and New cities is dealt with in a farm which, when the new city was built, was placed immediately outside its southern boundary The Government of India after the 1926 inquiry were forced to adopt a new scheme for the removal of the farm to a more distant site and chose one some four miles further away from the city Anti-malaria , operations on a large scale, scientifically directed, were simultaneously undertaken, the estimate of their cost being Rs 14 lakhs Improvements in the water supply of the new Capital with a view to a larger population being retained in it during the summer has also been effected

When the residential buildings in New Delhi were, in the course of the original construction of the new city, about to be designed, the Government of India issued orders that they were to be for cold weather occupation only This rule was followed. The general principle embodied in the design of the houses was that of planning them to capture as much warmth from the sun as possible Secretariat, residen tial bungalows and staff quarters are largely inappropriate for hot weather occupation

Art Decorations — The Government of India in 1927 approved a scheme for the encouragement or Indian artists by providing facilities for the decoration of certain buildings in New Delhi The outlines of the scheme are briefly as tollows briefly as tollows A certain number of domes and ceilings in the New Secretariat Buildings

March 1928 small scale designs for approval After approval by the Com tlage process in situ Other techniques, such as fresco or tempera, were optional Artists or schools of art, who sent in small scale draw ings, had to bear the initial expense of preparing When these were approved by the out-of-pocket Committee, the a suitable honorarium paid in addition to Government undertook to pay for the finished pictures done from approved sketches but give no guarantee that the finished paintings will permanently be preserved Government intimated that historical or allegorical sub Government jects would be given preference over religious ones and English artists living in India were barred from competition, the work being trictly reserved to Indian artists Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that the specially appointed Expert Committee approved of nearly all A great deal of painting has now been completed and the work was continually progressing until the world-wide depression in recent years dried up funds

All India War Memorial —H R H the Duke of Connaught on 10th February, 1921, laid the foundation stone of an All India War Memorial at the southern end of the Central The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's The memorial Lord Irwin in sake proceeded with slowly was formally inaugurated by Lord Irwin in February, 1931, in the presence of representatives of every unit of the army in India, of the Royal Air Force and of a large concourse of official and other spectators

George V Memorial —It was decided in 1936 to erect a memorial statue to His Late Majesty, King-Emperor George V, in Princes' place, the large park-like area lying between the All-India War Memorial and the Purana Qila The origin of this proposal was a movement started among the Ruling Princes, some time previously to erect a white memorial statue to His Majesty in the new city and this scheme had made considerable progress when His Majesty died The matter was then considered in a broader light and in consultation between Their Highnesses and His Excellency The Princes agreed to the Earl of Willingdon nerge their scheme in a larger one for an All India memorial to His Late Majesty H E the H E the Viceroy issued an appeal for subscriptions to the major scheme and he and Her Excellency the Countess of Willingdon opened the general subscription list with a donation of Rs 5,000 oir Edwin Lutyens was invited to submit a design for a memorial and the statue was even tually unveiled by His Excellency the Viceroy, Lord Linlithgow, on November 14, 1939

Public Institutions —It was The various schools of art in India, as well as should be established at Delhi and in this Delhi 175

connexion a conference of Chiefs and Political; Omce s was held at Delhi at which the Viceroy presided The proposal is still under considera tio To implement it would require an estimated capital outlay of Rs 1-1 lakhs

The Government of India further in the Sprin session of their Legislature in 19 introduced and carried a Bill for the est bli h or ry of Daini the business for which would be erected in the new e pits. The plan was to provide a local uni ersity on the model recommended for Dacca University by the Calcutta University Commission. The provision funds for the complete of re lisation of the university being a m tter of time it was decided to comme ce work with the e isting colleges in their prese the buildings and to permit them gradually to modify their organisation. The initial work of organization was quickly effected by the Free cut e Council Unfortunately the inability of the Government of India to liot considerable of the Government of India to liot considerable funds was a severe handlesp It was hoped that H E the Viceroy would be able to lay the found tion stone of the university build lags in Averember 19 but this proved in the land of the diametes of the University was in 10 7 the subject of 1 quiry by a special Committee university and the land of the diametes of the University was the land of the time belief the University was under the University was the land of the time belief the University was under the Political to the University was under the University was under the University was under the Political to the Cl il Secret it until 19 9 and in 1931 the old Vicers I Lodge was allocated to it for its Vicereg ! Lodge was allocated to it for its f tu chome The Co ernment of India have also allotted free land to various colleges in Old Delhi

H II the Maharaja of Bhavnagar having offered Rs 5 00 000 for the provision of some amenity in the new city the Government of In its decided to utilize the sum for the provision of a Stadium. The ground which they took for this was a large area lying immediately below the western walls of the Purana Olla ie b tween them and Princes pi ce This area w tween them and Princes pi ce This area w originally marked by Sir Edw rd Lutyens in hi plan to be an ornamental i ke Practica pun to be an ornamental I ke Practical to siderati n led to its abandonment for that purpo nd the area wa laid o t as a park Alag propo tion of the M h rajas R 5 00 000 wis utilized f r the provision of a huge brick grandstand overlooking th central portion of the park taken for the Stadium

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the company were originally managed by the Court of Directors and the General Court of Proprietors In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government and revenues of India By de-grees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State for India With modifications this system lasted until 1858 when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change Under the Act of 1858 (merged in the con-solidating measure passed in 1915) the Secre-tary of State is the constitutional adviser of the Crown on all matters relating to Ind'a He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India

The Secretary of State

Until the Act of 1919 came into force, the Secretary of State and the Secretary of State in Council had and exercised the fullest powers of superintendence, direction and control over the government and revenues of India, subject, of course, to a large measure of delegation Secretary of State was the statutory heir of the East India Company and the Board of Control, and it was as such that the generality of his powers were exercised

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Provincial Legislatures and Ministers while it greatly increased the elected element in, and the influence of, the Central Legislature at Delhi sphere so affected the power and responsibilities of Farliament and its representative, the Secretary of State, were correspondingly curtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired No stitutory change in the rela tions between the Secretary of State and the Central Government was made, but there was a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention should be allowed to grow up that only in exceptional circumstances should the Secretary of State be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement

The Council of India

The Act of 1858 established besides the Secretary of State the body known as the Council of India which was associated with the

conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India of 1919 established the number of members at a minimum of 8 and a maximum of 12, one half of whom were required to have served or resided in India for at least ten years Lord Morley opened the door of the Council to Indians, and from 1917 the usual number of Indian Members was three

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and servants known in this case as the India Office Its staff are recruited through the same source and serve on the same conditions as Civil Servants in corresponding positions in the other Government Offices in London Until 1919, the whole cost was forne by Indian revenues, except that the Home Government made certain grants and remissions, in lieu of a direct contribution, amounting to £50,000 a year The Act of 1919 transferred the salary of the Secretary of State to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £115,000 was made to the total cost The basis of the contribution was that Home esti mates should bear the outlay needed for the controlling and political functions of the India Office, Agency functions being still an Indian charge

The Government of India Act, 1935.

Substantial changes in the machinery de scribed above have resulted from the Government The Secretary of State is of India Act of 1935 no longer the final authority upon whose superintendence direction and control depend the Acts of the Government of India and all grants, payments and charges arising out of the revenues of India The powers of the Executive in India now run in the name of the Governor General and the Governor, to whom they flow direct from the Crown, and there is no delegation of powers through the Secretary of State In so far as the Executive Governments in India function on the advice of the Ministers responsible to the new Legislatures, the responsibility of the Secretary of State to Parliament, and consequently his con trol, is at an end Where, however, the Governor General or the Governors are empowered to act in their discretion or on their individual judgment, they are subject to direction by the Secretary of State who remains, in these matters, the channel of their responsibility to Parliament During the interim period between the 1st April, 1937 (the date on which Provincial Autonomy came into operation) and the establishment of the Federation, the Secretary of State has power to issue directions to the Governor-General in Council, and such directions, if they are with respect to the revenues of the Governor General in Council, require the concurrence of his Advisers The Council of India ceased to exist from the 1st April, 1937 Some of its functions, particularly in relation to Service matters, have passed however to a body of Advisers with the powers and in particular, held control of the revenues of India and was charged with the

Office as the Department serving the Secretary | Ad terr to the Secretary of Stat | Str O Wilco of State remain but the change brought about | Str O | State remain but the change brought about | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str O | Str functions till performed by the Secretary of State for the Government of India

To some extent the working of the Home Government is affected by the separation of Burma involvin as it does the separate exercise in respect of Burms of the functions of the ecretary of State Tle Government of Burms Act provides al o for the appointm nt of not more than 3 Advisers to the Secretary of State in relation to Burma hose status and functions are analogous to those of the Advisers e tablished by the Government of India Act Provision has also been made for the payment from the revenues of Burma in respect of the expenses attributable to the performance on beh if of the Go ernment of Burma of such functions as the Secretary of State agrees that hi Department

The Indian States

The area enclosed within the boundaries of like area enclosed within the boundaries or ladia is 1806 479 squ re miles with a popula ti n of 390 million of people—nearly one fifth of the hu n race But of this total a very large part is not u der B itiah Administration The area covered in the Indian States is 712 508 step and covered in the indian States is a second of sec Raiputana with an area of 19 square miles and the Simla Hill States which are little : ore than small holdings, to States like Hyderabad as large as Italy with a population of over fourteen millions Th y incl de the inhos-pitable region of We tern Rajputana Barods part of the Gardan of Fedia Myso e tich in region of the term nappusance rich in ag icultural wealth and Kashmir on of the most favoured spots of the fice of the globe

Relations with the Paramount Power So diverse are the condition under which the Indian States were established and came Lto pol ti al relation with the Government of ladia that it is impossible even to summarise permit no aggression on our dominions or our

them But broadly it may be said that as the British bound ries exp nded the states came u der the influence of the Government and the rul s were confirmed in their posses sions. To this gen rai policy however there was for a brief period an important departure During tie regime of Lord Dalhousie the Government introduced what was call d nuck then through lapse That is to say when the was no direct heir the Governm nt considered whether public interests would be secured by granting the right of adoption Through the application of this policy the st t # of Satara and of happur f ll in to the ha t India Company and the kingdom of Oudh was annexed because of the gross misgovern ment of its rulers. The came the Muti v came the Muti y it wa followed by the transfe nce of the dominions of the Last India Company to the Crown and a irre ocable declaratio of policy toward the Indian States In the historic Proclamation of Queen Victoria it was set out that We Jesire no extension of our present territorial possessions and while we will

rights to be attempted with impunity, we shall must act so that no just cause of offence is allow no encroachments on those of others liven by its subordinate allie. All Indian We shall respect the rights, dignity and honour of the Native Princes as our own, and we desire that they, as well as our own subjects should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government. Since the states of the energencies, and for the instance of that provide the states of the every question of dispute with other states. The Indian States maintain a fixed proportion of Indian States Forces units for co-operation with the Imperial Government of the issue of that provide their base has been in the event of emergencies, and for the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India On the contrary, the movement has been in the op posite direction In 1881 the State of Mysore which had been so long under British admini stration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house In 1911 the Maharajah of Benares, the great talugdar of Oudh, was granted ruling powers over his extensive pos sessions on many occasions the Govern-ment of India has had to intervene, to prevent gross misgovernment or to carry on the administration during a long minority always with the undeviating intention of re storing the territories as soon as the necessity for intervention passed Almost all states possess the right of adoption in default of heirs

Rights of Indian States

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer The Chiefs have, without excep tion, gained protection against dingers from without and a guarantee that the protector will respect their rights as rulers. The Para mount Power acts for them in relation to foreign Powers and other Indian States The in habitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India Criminals es caping to an Indian State must be handed over to it by its authorities, they cannot be arrested by the police of British India without the per mission of the ruler of the State The India: Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their in at ternal authority The suzerain also intervenes when the internal peace of their territories is seriously threatened Finally they parti is seriously threatened cipate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the rail ways, the ports, and the markets of British ways, the ports, and the markets of division India Except in rire cases, applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states, the authority of their rulers has no existence out side their territories Their subjects outside their dominions become for all intents and purposes British subjects Where foreign interests are concerned, the Paramount Power Princes"

internal security purposes. These units are, generally speaking, organised and armed on the lines of regular Indian Army units addition, many states keep up irregular forces, maintained almost on a feudal basis These forces do not possess modern arms and equip ment Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajahs' dependants or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the 'Government of India is not precluded from stepping in to set right such serious abuses in a Native Covernment as may threaten any part of the country with anarchy or disturbed area, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so" Of this necessity the Representative is the sole judge subject to the control of Parliament the law of British India conters jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised ny the British courts which possess it The subjects of European Powers and the United states are on the same footing Where can tonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power

Political Officers

The powers of the British Government are exercised through Political Officers who, a rule, reside in the states themselves. In the a rule, reside in the states themselves in the larger states the Crown Representative is represented by a Resident and in groups of states by a Resident, assisted by local Political Agents These Officers form the sole channel of communication between the Indian States and the Crown Representative with the officials of British India and with other Indian States They are expected to advise and assist the Ruling Princes and Chiefs in any administrative or other matters on which in any administrative or other matters on which they may be consulted

Not only in preparation for the framing of an eventual constitution for the government of the whole of India, but also to ensure the enjoyment of modern amenities by the subjects of smaller States whose rulers do not all have the where withal to provide such amenities, the Crown Representative in April 1943 announced a scheme to attach the smaller States to some of the bigger ones purely for administrative purposes The process of attachment, which was at first confined to the very small States, namely, the non jurisdictional and the semi jurisdictional ones, was in November extended to what are called the 3rd and 4th class States

Details of the attachment scheme, its repurcussions and sequel in Parliament are discussed

Production and Industry—The principal industry of the State is agriculture, which maintains 56 2 per cent of the population. The common system of land tenurely ryo was About 58 per cent of the total area is directly administered by the State. The rest consists of private estates of His I salted Highness the Nizam called Sarfe Khas and the estates of the Jagirdar and Paigah nobles. The total I and Revenue is over 3.3 crores. The principal food crops are rice wheat, milicia and pulses the chief money crops are Cotton and Oll seeds Cotton is grown extensively on blick cotton roll. The total area under Cotton cultivation was about 2 million acres in 1914. 15. Hyderabad is well known for its Gnorani Cotton It is one

is well known for its Gnoran Cotton. It is one of the finest indigenous Cotton in India and is grown over an area of 555,000 acres.

Hyderabad possesses the mot Southerly of the Indian Coulmines and the whole of the South India is dependent on them for such coal as is transported by rull. These mines produced 1,277,151 tons in 1912, but the output was reduced to 1,067,159 tons in 1913.

Textiles, Cement Paper and Sugar are the chief industries of the State There are 6 large Cotton Spinning and Weaving mills and 385 ginning and pressing factories. About one half of the cloth consumed in the State is manufactured locally on hand looms. Besides the Shahebed Coment world which produced the Shahabad Cement works which produced 1,72,628 tons of cement in 1043 the question of establishing another cement factory at Mancherval is under consideration. The Sirpur Paper Mills, whose further expansion is under consideration. Paper Mills, whose further expansion is under consideration, is one of the most up to date paper mills in India. It not only supplied the requirements of the State in these days of war but also helped the Government of India and the British Indian Provinces to a considerable extent in meeting their requirements. The Nizam Sugar Factory has a cane crushing capacity of about 1500 tons. Attached to this is a distillery for manufacturing alcohol out of milasses. There are four cigarette factories with a large export trade. factories with a large export trade.

During the War several large scale industries have sprung up in the State Noteworthy among them are a metal works, which has been supplying knives and cutlery on a large scale to the Ordnance Department, a machine tool works starch factory, a chemical and pharmaceu tical works, a biochemical and synthetic products tical works, a bioenemical and synthetic products works, a factory for producing refined oils and manufacturing hydrogenerated ghee, a soap factory and three glass factories, one of which will manufacture sheet glass as well. There are also two roller flour mills and an Enamel works and a Surgical dressing factory. A

As recards small scale industries it may be mentioned that luttons and dispressing fac tories of which there are 10 at present lines made a great progress and earned a good repu factor, with an appreciable export trade there are two power driver and twelve hand worked match factories

The number of factories relistered under the Hyderabad Factories Act is 668

Taxation—Apart from the Land Revenue the miln sources of taxation are Ixel a and Customs. The receipts from each are estimated for the preent year, at 424 lakhs and 210 lakhs respectively. After these come interest on Investments, 55 51 lakhs, Rallways 237 37 laths and Berar Rent 29 17 lakhs. The Contemporary of Calcius and Customs Revenue is derived from an ad Velorems , duty of not more than 5 per cent, on all imports duty of not more than 5 per cent, on all imports and exports. The Government have lately levied I xees. Profits Tax by promulgating an Ordinance called "Pxees. Profits Tax Ordinance," which seeks to impose tax only on excess profits, but not on the normal profits or a business—the taxable level being profits in excess of Rs 21,000. It is expected to derive an additional revenue of roughly Rs 80 labbs in excess of R5 21,000. It is expected to derive an additional revenue of roughly R8 80 Inlies per year from this source and the proceeds of the tax are to be wholly utilized to ameliorate the condition of the poorer sections of the community and low paid Government servants by supplying foodstuffs and other necessities of life at reasonable rates

Communication -The State of Hyderabad is in the proud and unique position of having within its limits the largest system of rulway in any Indian State and of being the pioneer in the field of road transport operated and controlled by an Indian Railway Administration

State Railway —132 miles of broad guige line from Bombay to Mudras traverse the State, also '30 miles of metre gauge of the Masulipatam to Mormugao line At Wadi, on the Bombay Mcdras line, the broad gauge system of H L H the Nizam's State Ruilway takes off and running east through Hyderabad system of Helf the Alzam's State Ram's takes off and running east through Hyderabad City and Warngal, reaches the Calcutta Madras line at Berwada, a total length of 338 miles From Kazipet a link to Balbarshah strikes north, providing the shortest route between Madras and Delhi From Secundera bad the metre gauge Codever Valley Railway bad the metre gauge Godaveri Valley Railway runs north-west for 386 miles to Manmid-on the main line of the Great Indian Pennasula Railway to Calcutta A metre gauge line runs south from Secunderabad through Mahbubnagar thy has to the border and connects with Dronachellam on the Madras and Southern Mahratta Railway oool Branch lines exist from Purna to Hingoli, bed Parbhani to Purli-Vaijnath, Karepalli to Kothagudium, Vikarabad to Bidar and Purli Vaijnath and Jankampet to Bodhan A branch oup line of 101 miles from Mudkhed to Adalabad is under construction. Thus with branch lines, there are now 790 miles of broad gauge and 665 of the metre gauge in the State. The A Barsi Light Railway owns a short extension.

of 6 miles from Kurduwadi on the Bombay Madras line to Latur in the Osmanabad District HEH the Mizams State Raliway was worked by a Company until April 1930 when it was purchased by H E H the Miram a Government

An innovation worthy of special mention was the intro luction by HEH the Vizams State Rallway in 1940 of broad gauge Diesel Rail Cars for 3rd clas passengers. The rail cars are the first of their kind provided on Indian Railways and the design is unique in that they are self propelled and fitted with

air conditioning equipment

H I' H the Nizam a State Railway also intro duced a further innovation by commencin i 1938 the installation of fans in third class carria es

Tra spo t Serv ces -"he State of Hyd rab d has given a definite lead i India as a result of the comprehensive schene for the o-ordination of Rail and Road ransport introduced by H L H the Aizam's Government A small beginnin was made in 193 by operating

7 vehicles over 80 route miles and at the present time H E H the Nizans State Rallway road motor transport fleet totals 50" motor vehicles operated under the control of

th State Railway Admini tration nam ly 9 passenger bites (operating over 4 50 miles) and 211 goods forries and departmental vehicles

The Rail and Road Transport co-ordination in Hyderabad State has eliminated wasteful competition and provided ele per and better means of transport. The State Railway Bus Services run to scheduled advertised times and the advantages of regular time table services

duced by the State Railway in a number of districts in Hyderal ad State Several out agencies located at important owns and villages not served by the Railway system have been established for the throu h bookin of goods and parcels the State Railway lorries operating between the e out a encles and the nevrest railway station

Goods collection and delivery ervices have also been introduced at important centres Under these arran ements goods are conveyed to and from the rallway station the State Railway Road Transport Departm at lorries undertaking the collection and dell ery wo k to and from merchants premises c rtage area baving been defined at each place Ti is scheme e ables door to door transport of goods to be effected

Ar T am po t Services -A further develop ment in the co-ordination of all forms of transport in Hyderabad State was achieved by the for in hyperaoda state was achieved by the lor mation early in 1938 of an Air Department under the State Bailw y Administration. This department has been responsible for the training of personnel for air it e ope attor for the operation of chuter services no for the loan of machine and technical staff to the State Aero Club

The St te Air Transport organization t Begampet is now providing ital facilities for the training of Indian Air Forc Pilots on a lar e scale and only the foresight in building up the ground organisation d technique for the pu po e of Air D velopment has made the pre ent Air Force training centre possible

Education—In October 1944 (1353F) the total number of Educational Institutions exclusion University Education was 1885 with an enrolment of 4 7 69 pupils There ws a fairly large increase in the number of schools and scholars of the Primary stage and in advantages of regular time tabl services providing bott on fort and realiability such that the control of the residual provides a fully gradised and appreciated by the till public of the passenger bas service permit of H? H that the control of H? H that the control of H? H that the control of H? H that the control of H? H that the control of H? H that the control of H? H that the control of H? H that the control of H? under conditions and stipulations laid down in The Mysore Army—The total strengti an Instrument of Transfer That Ruler brought of the Mysore Army was 4,015, consisting o Mysore to a sinte of great prosperity in 1804 at the early are of 31, and was succeeded at the end of June 1944. The Combatan by His Highness the late 3rl Krishnarajendra strength of the Mysore Lancers was 767, and Wadiyar Bahadur, 6 0 8 1 G B P 1 ho 1 as in-that of the Mysore flores was 125. The strength by His Highness the late Sri Krishnarajendra Wadiyar Bahadur, 6091 GBF the tas in-stalled in 1902 In November 1919, the Instru ment of Transfer was replaced by a Trenty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore In 1927, the Government of India romitted in perpetuity Rs 101 liths of the annual subsidy which till then had stood at Rs 35 lakhs. A further provisional remission of Rs 5 30 laths in the subsidy has been allowed from 1937-38, in accordance with the recommendation of the Indian States Enquiry Committee (Hannels), 1932. H. H. Sri Krishnarajendra Wadlyar died in August 1940 at the ago of 57 and was succeeded by H. Sri Irya Chamaraja Wadlyar Bahadur, GSI who was installed on September 8, 1910

Administration - Constitutional reforms of a far reaching character were announced in a Proclamation of His Highness the Maharaja on November 6, 1939 These provide for the grant of enlarged powers and privileges for the Representative Assembly and Legislative Council, the widening of the electorate and the appointment of the elected representatives of the people to His Highness's Lyccutive Council

The Representative Assembly and the Legislative Council which have been hitherto functioning under separate Acts now function under a consolidated law. The term of both the Houses has been increased from three to four years The strength of the Representative Assembly is 310 The Assembly is being invariably consulted in regard to any legislative measure before it is introduced in the Legislative Council The Assembly has the right of considering the general principles underlying any Bill or any of its provisions and of proposing amendments thereto The powers of the Assembly in respect of the budget have been enlarged by conferring on it the right of passing resolutions on any of the major heads on the budget provided that such resolutions do not have reference to particular grants of appropria Certain heads of expenditure hitherto excluded from discussion continue to be so excluded except in the case of "the Military Forces of His Highness the Maharaja" where discussion is permitted

The strength of the Legislative Council has been raised from fifty to sixty eight, forty-four places being filled by election. The Council has a non official President who will be elected by the House after its first term and an elected Deputy President

Certain provisions calculated to widen the electorate for the Assembly and the Legislative Council have also been made

An important reform designed to enable the Legislature more largely to influence the nature for starting new industries, undertaking experi of the advice and assistance which the Executive Council tenders to His Highness has been the loping existing industries and serving as a general selection of two non officials, from among the bureau of information in industrial and commer elected representatives, in His Highness's Executive Council Such Ministers are eligible to hold any portfolio of the Administration.

He died 3,409 Combatants and 617 non combitants of the Mysore Infantry was 2,653. The expenditure under "army amounted to nearly 263 lat his of runces

> The cost of the Police administration was 22 02 111 117

Agriculture - Nearly three fourths of population are employed in as riculture and the general system of land tenure is ryoticari the principal food crops are ragi, rice, jola-millets, gram and supercase, and the chief fibres are cotton and sun hemp. The Seri-cultural industry is the most important sub-sidiary industry practised by the agriculturists. The prospects of the sill industry has been bright in the continuational signature and bright in view of the international situation and the limited imports of foreign silk. The area under mulberry during the year ended June 1944 was 75,000 acres. The Department of Agri culture is popularising agriculture on scientific lines by means of demonstrations, investiga-tions and experiment. There are 7 Government Agricultural I arms at Hebbal, Babbur Marthur Nagenahaliv, Hungur, Mandya and the coffee experimental station at Balehonnur A live stock section has been organised which has been taking necessary steps for the improvement of live stock. A cattle breeding station has been established at Parvatharay anakere, near Aljam pur in the Kadur District, with a sub station at Basur A Scrum Institute has been opened at Bangalore for the manufacture of serum and virus for inoculation against rinderpest and other contagious diseases. There are 80 Veterinary contagious diseases Institutions in the State under the control of the Civil Veterinary Department

Relief -The improvement Medical medical relief and sanitation in urban and rural areas has also received special attention The hendquarters of every one of the taluks in the State is provided with a hospital and there are 305 dispensaries and medical institu scheme of subsidising rural A practitioners has been in practice and is working successfully

Water Works and Electricity—Water-works have been established at great cost in Mysore and Bangalore Both these cities (and 222 towns and villages) are lit by electricity, and much has been done in the way of clearing out congested areas, providing them with lungs," opening out extensions, and inducing the nearly to build houses of in improved type the people to build houses of an improved type

Industries and Commerce —A Department of Industries and Commerce was organised in 1913 with a view to the development of industries and commerce in the State Its main functions are stimulating private enterprise by the offer of technical advice and other assistance mental work for pioneering industries, deve loping existing industries and serving as a general cial matters The following factories are owned and run by Government—The Government Soap Factory, Government Porcelain Factory

G vt Silk Weavin Factory Government Electric | under Factory Implement Factory Government Lac and Paint Works the Central Industrial Work and raint works the Central Industrial Work shop and the Government Industrial and Test ing Laboratory with a section devoted to the man of cture of pharmaceutical drugs and pre-parations The Well Boring Section which is nevged in the drilling of boreholes for meeting the requirements of drinking water in the rural areas is now under the control of the Bureau of areas now under the control of the intread of Sanitary Engineering Department of Public Health. Mysore is the larg st producer of silk in India and the care and development of this industry i entrusted to a Departm nt of Sericul ture. Arrangements have been made for the supply of disease free seed and a central and five taluk popular schools have been doing good work

With a view to demonstrating and imparting Instruction in the utilisation of the high grade silk produced in the State Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore The S dalwood Oil Factory at My ore started on an experimental basis is now working on a commercial scale

The Mysore Iron and Steel Works are owned and run by the Go ernment The works are the se ond largest of their kind in the British Empire se ond largest of their kind in the British Empire and contain the onl charce I blast furmac and wood distillation plant in the East A plant in the manufacturing steel and ateel products has been added at ea April 1935. The sig produced by the blast furnace is now being utilled by the newly rected cement plant attached to the Para X tryl is also situated the Mysoro Para X tryl is also situated the Mysoro which most my varieties of per Bladdra which most last to become one of the most importa t i dustrial centres in India

A notable feature during the past few years has been the comi g into being of several state nais ceen the comi g into being or severa named aided joint-stock companies for the manufacture of ugar paper chen I als and ritil ers ply wood implements and tools spun silk tob co and coffee e ring lectri I batteric glass making nd yetable oil There are now 30 la g cade industrial establi hments in the State giving employme t to about 86 202 persons

A Trade Commissioner in London has been appointed to look after the interest of the tr de and industry of the State

Hydr E ctre a d Irrig t n Works— The ri er Cau ery in its course through the State has a natural fall of about 380 feet-near ri e island of SI asamudr m a d this fall was harnessed! the year 1902 for the develop ment of statetic name to the average of about

irrigation about 000 00 RCTPS of land situated in an area si bject to more or less continuous drought. The new Canal Works were started in 19 7 and the main canal is named the Irwin Canal after Lord Irwin the then Viceroy An area of about 18 thousand acres under this Canal has been brought under sugarcane culti ation and a S gar F ctory with a cru him cap city of about 9 000 tons of cane per day has been estab about "ood tons of care per usy has been estable in the ne thy at Mandya An up-to date Distillery has been erected as an adjunct to the Sugar Factory Full advantage is being taken of the available electric power for small indu tries and the electrification of towns and lift irrigation

The construction of a reservoir across the river Kumad athi n ar Anjanapur Shikaripur Taluk was completed at a cost of Rs 18 lakhs and the reservoir was opened for irrigatio The area expected to be irrig ted is a out 10 000 acres The area In addition to large new irrigation works in progress the work of constructing a Reservoir across the river Shimsha at Marconahalli Kunigal Taluk at a cost of Rs lakhs to irrigate an extent of about 10 000 acres has been completed

Fo provide for the ever widening demand for power for industrial domestic and town lighting purposes the Shimsha and Joe I vdro-electric schemes were sanctioned at an aggregate co t of o er 4 Olakhs of r pees Ti c Shim ha Power Scheme has been complited and Tle Jog Sch me is being p shed through

The e are 6 0 power in tallations and 0044 lighting installations The total number of towns and villages electrified at the end of June 1944 was

F'n n e -The actual revenue receipts and disbursements charged to revenue for 1943 44 were its 857 8 lakhs and its 854 8 lakhs respectively

University for Education —A separate Universitys re as est blined on 1st July Mys re as est blithed on let Juny 1946
It is of the teaching a d re idential type composed of the Central Engineering and Mahar nis
Colleges at Bangalo e and the Medi al and
Maharajas College at Mysore and four Intermediate Colleges The colleges are efficiently equipped and organised and there is a traini g college for men t achers locat dat Mysore The Maharani's College at Ban lore is a college for Women

There re 47 High Schools for Boys and 15 High Schools for Gi is 381 Middl School for Boys a d 66 for Girls Provisi n has been made for was harmoned to be year 100c for the development of electric the year 100c for the development of electric the year 100c for the development of electric the year 100c for the development of the third that the tendency of the third that the tendency of the third that the tendency of the third that the tendency of the third that the tendency of the third that the tendency of the third that the tendency of the ten a d to for Girls Provisi n has been made for teaching sev at vo tional ublects in gener I with a view to creating an interest in the voc tions and in ord to enable the pupils to take to such vocatio s after their High School life There ac 8 Training Institutions for training teachers in Middle and Primary Schools

strength of 173,258 pupils This gives one school for every 3 26 square miles of the area, and for every 793 persons of the population The total expenditure on education was Rs 81,92,200 giving an average of Rs 1 3 0 per head of population

War Effort of Mysore State -The State has been contributing to the war effort to the fullest limit of its resources In February 1940, shortly after the outbreeak of hostilities His late Highness the Maharaja made an appeal to his subjects to respond to any call made on them for the pro secution of the war and to help the cause of freedom by service or by money. In addition to the gifts made from time to time by His Highness and his Government for the purposes connected with the war, the people and the several industries of Mysore have played their part on a scale worthy of the traditions of the State The State has contributed so far Rs 60 inkhs in aid of the war effort, of which contributions from His Highness's Privy Purse and the Government amount to Rs 50 lakhs, apart from investments in the Defence Loans of the Govern ment of India to the extent of over Rs 6 85

The services of the First Battalion, Mysore Infantry, were placed at the disposal of the Government of India at the outbreak of the war The unit was selected for service with His Majesty's Forces overseas Another Infantry Battalion was recently sent for service under the Crown

When the Defence Department expressed a desire to raise a Transport Company in the State, all facilities were afforded to them for the pur-pose and also for the training of the men The State is also actively co operating with the Defence Department in regard to the recruit ment and selection of suitable candidates for emergency commissions in the Indian Army

An area of 14,300 acres in the State has been made available for the location of military camps, prisoners of war camps, hospitals and other similar purposes. A number of buildings belonging to Ilis Highness the Maharifi and the Mysore Government have been placed at the disposal of the Military authorities

Over 90 medical men, including officers of the State Medical Department, have joined the IMS, besides four ladies who have joined the Auxiliary Nursing Service

A Welfare Club has been opened in Bangalore for the provi-ion of amenities to members of the Royal Indian Air Force

Special facilities have been provided for the training of war technicians. The number of persons trained so far in the State institutions is over 2,500 The various industrial concerns in the State have executed war orders of the value of over Rs 11 crores The Lorest Department has supplied to the Defence services timber, bamboos and other articles of the total value of The sericulture industry has been Rs 20 lakhs reorganised and expanded to meet the demands A scheme for the production of of war supply high grade silk for parachutes has been undertaken at the instance and with the support of the Government of India So for about 198,000 lbs of filature silk have been supplied for war purposes

BARODA.

The State of Baroda is situated partly in himself Gujerat and partly in Kathiawar. It is divided After 1 into five district blocks (1) the southern district of Navari near the mouth of the Tapti river, and mostly surrounded by British territory, (2) central district north of the Narbada, in which lies Baroda, the capital city, (3) to the north of Ahmedabad the district of Mehsana, (4) and to the west, in the peninsula of Kathiawar the districts of Amreli, and (5) Okhamandal formed of scattered tracts of land The area of the State is 8,176 square miles population 2,855,010, of whom over 89% are Hindus

In pursuance of the Government of India's scheme of attachment, about 255 States, Estates and Talukas from the Western India States and the Gujerat States Agencies have been attached to the State The total area so attached is about 6,000 sq miles with a popula tion of about 6 lakhs

History -The history of Baroda State as such dates from the break-up of the Mughal Empire

nimseir Songhad was the headquarters After 1723 Pilajir o regularly levied tribute in Gujerat Hisson Damaji R o finally captured Baroda in 1734, since when it has always been in the hands of the Garkwars, but Mighal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa In spite of the fact that Damaji Rao was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory He died in 1768, leaving the succession in dispute between two rival sons He was succeeded in turn by his sons Sayaji Rao I, Fattesing Rao, Manaji Rao and Govind Rao The last died in 1800 and was succeeded by Anand Rao A period of political instability ensued which was ended in 1802 when the authority of Anand Rao at Baroda was finally established By a treaty of 1805 between the British Government and Baroda, it was that the foreign arranged inter was that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged Baroda was a staunch ally of the The first Maratha invasion of Gujerat took arranged Baroda was a staunch ally of the place in 1705 In later expeditions Pilajirao British during the wars with Baji Rao Peshwa, Gaekwar, who may be regarded as the founder the Pindari hordes and Holkar But from 1820 of the ruling family, greatly distinguished to 1841, when Sayaji Rao II was the Ruler,

deposed in 18 5 for notorious misconduct and gross misgovernment but the surgestion that he had instigated the attempt to poison Col. Phayre the Resident was not proved Sayaji Rao III a boy of 13 years of age and a descend nt of a distant tranch of the

GWALIOR

The House of Scindia traces its decent to a samily of which one branch in Mercant the capital of the Scindia dominions leaving to which one branch in Mercant that the same that the sam

reached the renith of their glory under the dia-1 (Upper House) will have identical powers and ciplined training of the celebrated French adventurer Do Bolgne Mahadil was succeeded by his grand nephew Daulat Rao in whose service Perron, a military commander of great renown played a leading part The strength of Schulla's arms was, however, considerally westened by the reverses sustained at Ahmedneser, Aranve, Asigarh and I rewari Daulat Rao Scindia died Till his death he remained in undisput in 1827 able possession of almost all the territory which belonged to him in 1805

Daulat Rao was succeeded by Jani off Rao who passed away in the prime of life. On his demise in 1613 intrigues and party spirit were rampant and the army was in a state of mutiny, with the result that it came into collision with the British forces at Maharajpur and Panniher

Jankoji Rao was succeeded by Jayaji Rao Scindla whose adherence to the British cause in the dark days of the Mutiny, when his own troops deserted him, was unshalable In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Impress Subsequently he received other titles He entered into treaties of mutual exchange of territories with the British Government On his death on June 20, 1886, he was succeeded by his son Lieutenant General H. H. Maharaja Sir Madhay Rao Scindia, Alijah Bahadur, 6600 GGSI, GBF, ADO to the King who assumed powers in 1894 In 1901 he went to China during the war He died in June 1925 and was succeeded by his son His Highney Sir Jivoji Rao Scindia, Alijah Bahadur, 6 0 1 1 He died in June 1925 and Highness During His Highness s minority the administra tion of the State and been conducted by a Council of Regency His Highness ruling powers on November 2, 1936 His Highness assumed full

Gwalior has an area of 26,307 sq miles and the population is 4,006,150 Its average rainfall varies from 25 to 36 inches The estimated gross revenue for 1944 15 is Rs 274 39 lakhs The Ruler enjoys a salute of 21 guns and the State is in direct relations with the Government of India

In matters of administration His Highness is assisted by a Council of Ministers under his direct control The State Army consisting of Cavalry, Infantry and Artillery units is well organized and is considered to be the best among Indian State Forces The State maintains its own Postal system and a light Railway Educa tionally the State is much advanced

There are two degree Colleges at Gwalior, the Capital, including one for women, one Inter mediate College at Ujjain, and High Schools in practically all the districts There are a few technical schools imparting education in arts and crafts and there is a Public School on the Gwallor Fort which is run on the English Public the Artillery Truning Centre, Training Squadron, School lines

The political reforms announced in June 1939 were further supplemented by His Highness Proclamation of Sept, 1941 The strength of the Praja Sabha which was formerly 85 has now been raised to 90 and of this number 55 instead of 50 will be elected representatives, thus pro viding for still greater non official element in the The Praja Sabha and Raj Sabha total figure of Rs 79,20,169 11 0 only

the range of their functions will be co extensive The communities and interests to which special projection has been afforded are the Muslim Community, the Bhils, the Backward classes and women. To each of these a minimum number of seats have been guaranteed in the Praja Sabha To Muslims and somen scats have been quaranteed in the Raj Sabha also

Another special feature of the recent reforms is that the legislature will have the power of direussing the constitution as well

Since the assumption of Ruling powers by the present Maharaja, commendable activity has been witne sed in all branches of administration The construction of Harsi Peservoir costing about Pa 14 crores, the gr nt of one crore of rupees for rural reconstruction and the establishment of a Degree College for women as also the scheme for construction of an up to date Female Hospital are some of the important beneficent measures undertaken during the period The network of roads has been utilized by motor bus services run by the Gwallor and Northern India Transport Company, and those places which were uncon nected are now being foined with important highways. His Highness also constructed at Unding Signs a scriptane base which serves as a halting station for the boats flying on the Imperial Air I ine

Guallor maintains an up to-date aerodrome

On the declaration of the War His Highness was one of the first rulers in India to place the Army and the resources of his State at the disposal of His Majesty the King-Emperor

Immediately after the outbreak of present war Gwalior took steps to sponsor effective measures such as were taken in British India, by promulgating rules for the safety of the public, registration of European subjects, restriction of the movements of foreigners, control of the Press and Price Control in order to prevent profiteering The pick of his splendid army was offered by this Highness to the British Among the army units which Government left the State for service outside are -The 1st Gwalior Mountain Battery, the 2nd Gwalior Mountain Battery, Scindia's Tield Battery, the 3rd Gwalior Infantry, the 4th Gwalior Infantry, the 3rd Gwalior Lancers and Gwalior Pony Company have left the State for various destinations. destinations

In December, 1943, His Highness visited the Eastern front and inspected British and Indian troops including Gwalior State Forces as well as American Airfields

The 1st Gwalior Infantry has also been entrusted with the duties connected with the war Thousands of recruits have been enlisted to provide reinforcements. These are trained at Training Battalion, Transport Training Centre and Driving and Maintenance Training Centre The Army Training School is training cadets preparatory to their joining the Indian Army Training School for Officers

Besides these, handsome contributions have been made and large sums invested in the shape These have by now reached a of war bonds

University is under the consideration of Giern

Lirls, 59 Middle Schools and 156 Primary Schools Primary education for all children and educa tion for kirls up to the Matriculation is entirely free, while education for boys is theap, the first being low and there being a considerable number of scholar-hips and 10 per cent of free-hips Hariran education is free even during the College course.

Compulsory primary education has been started in Indore City and in the Nemawar District of the State

The State also maintains a Sanskrit College, an Arts and Music School, 9 special schools including one for the deaf and dumb.

A Medical School in Indore coaches students for the L M P and L C P & S courses and it is proposed to convert this into an up to date Medical College, the Holkar State sharing a very large part of the expenditure for providing facilities for clinical instruction

The Institute of Plant Industry which con ducts research work on cotton and other crops is another institution of which the State may be proud

Industries -Indore is one of the few leading industrial States of India Next to Bombay Ahmedabad and Campore, Indore is probably the most important textile centre in India With nine spinning and weaving mills, the loomage of the textile mills in Indore is more for instruce than that of the whole of Madras Province It is also the biggest distributing market for cloth and other commodities in Central India and Rajputana Cloth produced in Indore Mills finds a ready market in the Punjab, North West Frontier Province, the United-Provinces and Bengal, and soits like "Mazri" are invariably associated with the name of Indore in several countries beyond the frontiers or India Sprees woven by the skilled handloom weavers of Maheshwar have been famous throughout India for decades past. The textile and other industries of Indore have made a for reaching contribution to the war effort

Factories to manufacture tentage and camouflage nets have sprung up to issist the war effort in addition to the established textile mills which were geared up for war production Indore annually about 2,200 tons of contings, mouldings,

The Indoce (its Municip life is autoromous, State Lactory at Lipita, which it is e instell the Indian and Italian
Education—I duration at all state is Presenting is telem underfaken of Lurania directly financed by the State There are there are the first knulle Colleges in Indian, of which is a with the research in the most important—Holler Colleges—coughed a souther, but was abunded in the research of attuants for the highest extinitions in Arta and Science There are the Summer for LLB is a standard for the first and the first and the first and the first and the first and the first and the first and the first and the first and the first and the first and the first and the first are the first and Projection is telegraphed of the allegands Itial quentity of the ore, an important basic industry may soon be established in the State. A bene has been given for the working of There are 10 High Schools, including 2 for chinacles, the quality and quantity of which have been definitely established to be good enough for the manufacture of potteries in the State. A further survey of the Leonomic Geology of the State Is contemplated

> The project for a first class and large unit to manufacture vegetable thee and allied chemical products is only awalting the import of machinery from abroad as also a strawboard factory that would produce ten tons of finished product per day at Amargarh A factors to manufacture Hume Pipes is expected to materialise in a few months

> In view of the fact that availability of cheap power is indispensable for industrial progress, the possibilities of a Hydro electric project based on the Chambal river are being examined A scheme for electrification of the district towns has made considerable progress. Additional plant for the Indore Heetric Supply is expected shortly. The establishment of a plant for the manufacture of Power Alcohol is also considered to be feasible

> Cottage industries are receiving the sympathetic attention of the Industries Department The establishment of a Central Larn Depot if necessary with the help of a properly selected private entrepreneur has made considerable progress, and the starting of an emporium to sell the fibrics manufactured by the hindloom weavers and the products of other cottage industries has been sanctioned Harijans among others are taking advantage of the facilities for training at the hand made Paper Factors and the Tanning Demonstration Unit Multiplication of Tanning Demonstration Units in the districts and establishment of a large scale Leather Works and Tanners are being considered. A large plastics project is also under investigation

Side by side the policy of assisting industries, Government are following a liberal labour Indore is one of the few places in India policy where standardisation of wages for textile labour has been established and successfully maintained Recently a bonus of 27 months wages was sanctioned by Government for textile workers. Indoor led other industrial centres by giving in idvance of Rs 17 per worker as compensation for involuntary unemployment etc., 124 ginning factories, 26 pressing factories due to coal shortage pending final decision of

coming forward in ever increasing numbers the Technical Training Scheme, and alread to play their part in varied spheres in the service 772 trained recruits for war service have been of their country

 \mathbf{H} Maharaja Holkar's Forces consist of 1 Crealry Unit of 1 S S Squadron incur an additional expenditure amounting and a Training and Depot Wing, 3 Battalions of Infantry, an Animal Transport Company, an Army Medical Service A M T Unit in and Juli Departments, etc., and over Rs 15 process of expansion to the strength of a company, and a first class State Band

the above units battalion—the one MAHESH GUARDS (1st Indore Infantry)have been serving under the Crown for four The same applies to the bulk of the A T Company These units are provided with reinforcements by the Infantry Training Centre and the A T Training Centre

In addition to the above the State has provided a complete Garrison Company for service under the Crown, viz No 50 (Indore) Garr Coy It has also furnished a complete Indore Platoon for No 58 (Central India) G P T Company

War efforts —On the outbreak of hostilities in Europe, H H the Maharaja Holkar placed the entire resources of the State, including the State Army and his personal services, at the disposal of the British Crown His Highness donated a sum of Rs 5,00,000 and placed it at the disposal of H E the Vicerov to be utilised towards war purposes in any manner Subsequently, His Excellency thought best His Highness and his Government, in keeping with the traditions of the illustrious House of Holkar and the close ties that bind it with the British Crown, intensified the State war effort and took various measures with a view to contributing to the ulmost degree towards the effective prosecution of the war

The Holkar Transport Corps was deputed to Jhansi for undergoing training early in 1940 In July 1940, under special orders of His Highness the whole of the 1st Brttahon was placed at the disposal of the Crown and steps were taken to bring up all Units of the Holkar State Forces to full strength The 1st Battahon of Maharaja food problem. Indore was the first in India Holkar's Army is serving with His Majesty s Torces overseas

Consequent upon the despritch of Holkar's Transport and 1st Battalion for service with H M's Forces, the Maharani's Own Guards Infantry Unit, was converted into a full Infantry Unit A recruiting campaign was launched and the following Units were organised—(1) a training centre for Holkar's Transport, (2) a training Company, 432 strong, for reinforcements to 1st Bittilion overseas, as also a reserve of 42 officers, the selected candidates being trained at the I S F and O T S Schools In addition the following units and personnel were supplied to the Govern ment of India —(1) 1 section of M I Drivers (2) 2 Garrison Compune 165 strong (3) 10 signillers, with 100 per cent reinforcements per innum And a number of other facilities were provided eg accommodato the Malun Garrison Company accommodation, etc.,

supplied from the State

His Highness's Government are committed to annually to over Rs 29 lakhs as a result of the war on the Army, Police, Civil Defence, A R P lakhs on account of dearness allowance granted to State servants getting upto Rs 100 pm in the Districts and Rs 120 pm in the City and war allowance to all Government servants getting upto Rs 700 p m

With a view to encouraging recruitment for war services, His Highness has ordered that 50 per cent of the vacancies should be reserved for those who have rendered approved war service And the fullest co operation is being offered to the Government of India in a number of other matters connected with the war

The scheme regarding the conferment of emergency commissions was given due publicity and a number of candidates have been recommended Similarly, applications for other kinds of War Services are being forwarded both from the State servants and the public Special steps have been taken to effect recruitment to the Medical Services for the War, important concessions being announced in favour of those in the State Medical service or in private practice, who offer themselves for war services Candidates from the State were also recommended under the Bevin Training Scheme

A Holkar State War Front has been set up, its work being carried out by the Holkar State War Front Council, and its propaganda and Publicity Sub Committee A fully equipped cine van has been made available for visual propaganda in the interior of the State An organisation has been set up to carry on an intensive drive in connection with the Small Savings Scheme within the State

Liberal concessions in land revenue have been made to give impetus to the "Grow More Food" campaign In order to deal with the to introduce successful rationing by the coupon system The arrangements earned proise from all quarters, including the Economic Advisers to the Central and United Provinces Govern ments, both of whom visited Indore to study the working of the scheme and expressed their complete satisfaction. The scheme featured m a B B C broadcast as well All the textile mills in the State continue to be engaged in executing very substantial orders of the War Supply Department The State had introduced their own system of supplying Standard Cloth to the poor population of the State, but even-tually joined the All India Standard Cloth Scheme

His Highness with his characteristic real for measures calculated to further successful prosecution of the war, convened a unique conference at Indore, of all n unique conference at Indore, of all the Patels (headmen) of the State with The State a view to bringing home to the headman

Benares.—The kingdom of Benares unler its Hindu rulers existed from time immemorial and finds mention in Hindu and Buddhist literature In the 12th century it was conquered by Shahab ud din Ghori and formed a separate province of the Mahommadan Empire In the 18th century when the powers of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram, an enterprising zamindar of Gangapur (Benares district), founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler During the next 30 years attempts were unsuccessfully made by Safdar Jang and after him by-Shuja-ud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh He was expelled by Warren Hastings and Balwant Singh s daughter's son Mahip Naram Singh was placed on the gads The latter proved an imbecile and there was maladministration which led to a recomment in 1701 his which which led to an agreement in 1794 by which the lands, held by the Raja in his own right which had been granted to him by the British Government, were separated from the rest of the province The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the the within which Raja Domains revenue powers similar to those of a Collector in a British district There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohl and Chakia (or Kera Mangraur) The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State The Maharaja s powers are those of a Ruling Chief, subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdic-tion within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise

The present ruler is H H Maharaja Vibhuti Narain Singh Born on November 5, 1927, he was adopted by His late Highness as his son and

succeeded to the gade in 1939

r—Brigadier His Highness Tarzand 1 d Rasikh ul-Itikad, Daulat-i-Inglishia Rajgan Maharaja Sir Ranhir Singh ira Bahadur, GOSI GOIR, etc ha — Nabha, which became a separate n 1763, is one of the 3 Phulkum States ha, Patiala and Jind—and though second at of population and revenue of the 3 States, it claims seniority owing to its claiming descent from the eldest branch ising 12 separate places of territory ed among the other Punjab States and its, forms the City of Nabha and the ats of Phul and Amloh, the second portion the Nizamat of Bawal in the extreme east of the Punjab on the border of Raj-. this Nizamat of Bawal was subsequently to its territory as a reward from the British nment for the loyalty of the Rulers of The State now covers in area of about square miles and his-a population of 3,40,000 It maintains a Field Service consisting of a full Battalion of Infantry as the Nabha Akal Infantry under the n States Forces Scheme, 1939, and a State e Unit of one full Company Strength otal strength of the state Forces is 1,600 ie preservation of the peace there is also a force consisting of about 500 men
State is traversed by the main and 3
h lines of the N-W Railway and
B & C I crosses the Nizamat of Bawal
Ortion of the State is irrigated by
Irinand Canal The crops of the State are pulses, bajra, sugarcane, cotton, wheat arley, to facilitate trade the Durbar has d grain markets and Banks near the pal railway stations within the State bry The chief industries of the State of the manufacture of silver and gold neets, brass utensils, cotton, carpets nents, brass utensils, cotton, carpets, and gota, etc There are some ginning ries and 5 cotton Steam Presses in the State n are working successfully Captain Iighness Maharaja Pratap Singh Malvendra dur, who was born in 1919, was invested ruling powers on 5th March 1941. In the nistration of the State His Highness is ed by a cabinet of Ministers. The Chief ster, S. S. Sant Singh is an officer of the c Civil Service

ched pieces of territory in the great plain the Jullundur Doab. The ancestors of the of Kapurthala at one time held possessions in the Cis and Trans Sutley and also in the Doab. In the latter lies the village of Ahlu the the family springs, and from which it is the name of Ahluwalia. When the Juliur Doab came under the dominion of the ish Government in 1846, the estates north the Sutley were maintained in the independent ession of the Kapurthala Ruler, conditional is paying a commutation in cash for military the engagements by which he had previously bound to Maharaja Ranjit Singh, of ore This annual tribute of Rs 1,31,000 a was remitted by the Government of India in etuity in 1924 in recognition of the splendid

record and uniformly efficient administration he State The Bari Doab estates are held the head of the House as a jaghir in perpe y, the civil and police jurisdiction remaining

in the hands of the British authorities. Fo good services during the Mutiny, the presen Maharaja's grandfather was rewarded with grant of other estates in Oudh which yield large annual income equal to those of Kapurthal State The present Rules a titles are Brigadic H II Larand-I-Dilband Rasikh ul-Itiqa Daulat-I-Inglishia Raja-I Rajgan Maharaj Jagatjit Singh Bahadur Maharaja of Kapurthal GCSI (1911), GCIL (1918) GBI (1927) wh was born on 24th November, 1872 and succeede his father, His Highness the late Raja i Rajga Kharak Singh of Kapurthala in 1877 granted the title of Maharaja as an hereditar distinction in 1911 His salute was raiscu to 15 guns and he was made Honorary Colonel to 10 guns and he was made Honorary Colonel of the 15th Rattray Sikhs and promoted Brigadie: in January, 1943 The Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the Order of Carlo 3rd of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order of Menelck of Abyssinia, Grand Cross of the Order of Mencick of Abyssinia, Grand Cross of the Order of the Nile of Eb, pt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba, represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927, and the Diamond Jubilee in December 1927, and the Diamond Jubilee in 1937

The rulers of Kapurthala are Rajput Sikhs and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer Only a small proportion of the population, however, are Sikhs, the majority being Mahomedans The chief crops are wheat, gram, maize, cotton and sugarcane The town of Sultanpur in this State is famous for hand-printed cloths Phagwara is another important town in the State, has a large Sugar Factory on modern lines, and is very prosperous also on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State The main line of the North Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it A branch railway from Jullundur City to Ferozepur passes through the capital Recently a second large sugar factory has started working and other industries are also being promoted The Imperial Service and local troops of the State have been reorganized and are now designated as Kapurthala State Forces These State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier The Maharaja Kumar Amarjit Singh, Cie, IA, served with the Indian Army in France He also made two month's tour in Meer and Parforce visiting the Indian troops stationed there in summer of 1944, but a short time after his return to India he died of heart failure War work of all kind is being carried

a throughout the State with great zeal and ommendable results Primary education is ee throughout the State and it spends a large roportion of its revenues on its Education lep rtment

The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility town boasts of modern amenities such as electric light water works etc.

Attude to Fed r on—The question of accession to Federat on was fully considered by a Compittee of Stat a Ministers convened by to late 2R Hon ble Sir Akhar Hydati The Hydati Committee closely exuained the drait committee closely exuained the drait committee there are considered to certain specified subjects such as the protection of treaty rights and the rights of administration by the States of certain Federal subjects After Considering the opinions of la adviser after Committee manimously adopted a report Government of India drait and left is to the Princes to take such action as they might think necessary to safeguard their rights

These recommendations we a considered at a Conter nee of Princes and Mil teters held in Bombay in June 1939. The Conference passed are olution stating that the Princes found the revised dark! In trument of Accession until the form in which its ugit to protect their treaty rights was held to be inadequate for the purpoe and a condity that the orbit of feder I authority and jurisdiction has be n extented beyond constitution.

Revised draft Instruments of Accession were then drawn up and circulated amon individual Bulers. These ellelted diver e comments and sugge tions for further modification. (A fuller account of the various stages in the discussions of the Fed ration will be found in past issues of this book! While the negot ations were in progress the war broke out.

The efforts of the Viceroy to inaugurate the federal part of the constitution embodied in the Government of India Act came to an abrupt end While affirming that fed ration remained the objective of His Majesty's Government His Txeeliency said in Sept m'r 1939 that we have no choic but to h id in sups nee the work in connection with prepar tions for Tederation

It rnal R I rm n Si t —The pace of administrative and constitutional reform in the States has rapidly increased in the last I w years owing to the introduction of provi c I authonomy in British India it enpar t approach of Federation and pre sure—sometimes direct—from the Indian National Courr s

A new factor in the acce sion of the States to the proposed feet air rose early in 1928. The Co gress witch it dill thit white opposed the control of the feet of part of the Government of Indi A t intensified its opposition store. In other words the Congress demanded as one of the conditions are considered in the States of the Congress demanded as one of the conditions are considered in the Catalogue of the Congress demanded as one of the conditions of the conditions of the congress demanded as one of the conditions of the congress demanded as one of the conditions of the congress demanded as one of the conditions of the congres

emmed Many States could not escape the at their deliberations fluence of autonomous adjacent provinces

Numerous States announced their Rulers' in-ention to liberalise their constitutional machi ery and to improve their administration. Many ctually introduced reforms A few Rulers eclared that responsible government was ne goal of policy and took steps towards it. lany Rulers announced progressive schemes f administrative reform in their respective tates

An extraordinary development took place ally in 1939 when Mr Gandhi decided on fast to death to compel the Thakore aheb of Rajkot to implement his promise oncerning the membership of a reforms ommittee The Viceroy intervened and Mr andhi agreed to the adjudication of the Chief ustice of the Federal Court, which went in his vour But subsequently further difficulties ver the constitution of the committee arose wing to Mr Gandhi's promise to the minorities and Mr Gandhi eventually recanted and declard that his fast had been coercive in character le therefore left the committee to be constituted y the State Later Mr Gandhi announced a new technique" for agitation by States ubjects, in which he counselled moderation their demands and called off all civil isobedience movements in the States

His advice and direction was followed in lmost every Indian State where previously the ir had been thick with strife. In some cases he response was quick, while in others the ocal leaders were inclined to be resentful of this udden brake on their activities Eventually, lowever, quiet was restored on the "States ront," although stray "incidents" continued o engage the attention of the local public and f Mr Gandhi himself

As recently as October 1941 Mr Gandhi eclared "I am convinced that in the new leclared declared "I am convinced that in the new world order which is bound to follow the insensate putchery, dignified by the name of war, the Princes will have place only if they become true servants of the people, deriving their power not from the sword, but from the love and consent of the people" Mr Gandhi advised the people of the States to cultivate patience and prepare themselves for the responsibilities that would devolve on them, by doing mute constructive work. That did not mean submission to active and acute tyranny of which so many active and acute tyrnny of which so many accounts had reached him. That the victims must resist in the best manner they could

Princes' War Effort—From the beginning of the war, especially since the summer of 1940 when the hostilities took a turn for the worse, the Princes of India have devoted their wholethe Frinces of India have devoted their whole-lindia in such spheres as the application of the content of the concentrated his attention on how best he and his State could aid Britain in her struggle against the forces of tyrain. They rose to a man, ranged themselves behind the banner of His Majesty and vied with one another in the supply of men and moncy to assist in the prose-

ere contrary to the provisions of the Act prominently on the agenda, indeed, it is true to evertheless the tide of democracy could not be say that every other subject took a second place

1943 Meeting of the Chamber—The annual meeting of the Princes' Chamber was held in October 1943 It was addressed by Lord Linlithgow for the last time, for His Ex cellency the Crown Representative left India almost immediately after The address was listened to by the largest number of Princes that had ever attended any session since the inaugura tion of the Chamber His Excellency upheld the federal ideal as the best for Indian unity and for the constitutional future of India and declared that "that unity is wholly consistent with the survival and orderly development of Indian States" He emphasised that the Crown's obligations to protect carried with them equally binding responsibilities to ensure, if need be, that what was protected continued to be worthy of protection

The Viceroy, wanted Indian States to bring up their standards of administration to modern requirements and gladly acknowledged that in this respect some States were an example for other parts of India He made it clear that the "times are no longer propitious for Jagirdars and Thakurs who seek to assert or perpetuate a semi-independence wholly incompatible with their limited resources and so inevitably harmful to the interests of the inhabitants of the areas concerned" He was sorry that he had been denied the satisfaction of taking final decisions on questions such as civil lists, privy purses and the grouping of smaller States into a co operative administration. These problems would, he said, be tackled by his successor without delay

The Viceroy's moving appeal to the Princely Order was to see "that the splendid opportunity lying before the Rulers is not missed and to ensure that advantage is taken of it with such vigour and foresight, with such judicious blending of the old and the new, with such subordination of narrow, personal and local interests to true patriotism that the future of India-of Indian States in close collaboration with British Indian—may be ensured and that the future generations may remember with gratitude the part played by the leaders of Princely India in securing the stability of that common and glorious inheritance. His Excellency spoke significantly when, addressing apparently se paratists, he stated that "it is very difficult for units, however large, whatever their form of units, however large, whatever their form of government, whatever their resources, to exist save in relation to, and as part of, a larger whole

The Viceroy paid a warm tribute to the gallant record of the Indian States' forces and to the maximum co ordination of efforts with British India in such spheres as the application of ordinances and the tackling of the grim problems of food, sloth and indicates. meeting to discuss the Chancellor s draft reply to the Crown Representative and the cons deration of the draft did not conclude till the Chancellor was about to enter the Chamber to reach the continue of the Chamber to the Chamber to the Chamber to the Chamber to the Chamber to the Chamber to the Chamber to the Chamber to the Chamber to the Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief reference was made to Chamber but a brief differently from the Chamber but a brief differently from the Chamber but a brief to the Cham

> I am glad to be able to tell the House that the Viceroy has received an assurance from the Princes concerned that their resignation will not affect their determination to do their utmost to help in the prosecution of the war

> On the question of the future development of Indian States, I may add that discussions on this subject and its relation to post wir development in British India were initiated with representatives of Princes in October last These discussions are at the preliminary stage only and the reply to the Princes' deputation, which I have mentioned, merely referred to the discussions and to the importance of the The Government of India are aware of the necessity for so sliaping their post war development plans that benefits will, as far as possible, recrue to the whole country and not to British India only '

Commenting on Mr Amery's statement, the

The Chamber of Princes.

perial Majesty the King I mperor, with etful submission that in this matter o ensure an early and satisfactory ement "

Chamber of Princes, while emphasizing ortince of internal reforms in States ng, where necessary, from Rulers them nd their Governments, strongly recomthat unless dready done, the Govern of the States may carefully review their ue regard to local circumstances, the ant recommendations made by the Special ng Committee of Ministers of 1942 in 1945 and 19 recommendations, which are already in in many States and are receiving active eration of many others, include utory provision guaranteeing the rule of nd the security and protection of person reperty with powers to the States' courts that these fundamental rights are scrupil enforced, (b) the administration of justice igh an impartial and competent judicity, pendent of the executive, with suitable ision for the adjudication of disputes een the States and their subjects, (c) establishment of a council form of govern it providing for the advice and assistance of isters to the Rulers in the ordinary sphere administration, and the association of the ples with the governance of the States ough suitable representative institutions ir pice and from being inevitably conditioned local circumstances and with due regard the traditions and the structural balance of lety in individual States, (d) suitable cangements to ensure continuity of policy id the security and integrity of public service,) a clear demarcation between State expenditure t reasonable percentages of the ordinary evenues of the States, and (f) a fair and equita-de incidence of taxation allocating a definite and substantial portion of the revenues for the senefit of the people, particularly in the beneficent departments"

"This Chamber, while recording the fact that the States, individually as well as collectively, are giving active consideration to, and are working out, plans for post-war development, desire to emphasize in particular their suitable extension, unless already done, in the following directions with due regard to local conditions (a) the fullest possible collaboration with the Central Government in regard to such plans and policies for post-war development which affects the States and in the formulation and which they have been ade-

, the fulfilment of the fundamental, British India and the States, collaboration with rusing out of their treaties and these plans does not imply complete uniformity raiss an integral part of His Viges s of all details or the administration of these nets policy. The Chamber further plans in the States territories without their is Excellency the Crown Represents agreement by any outside agencies, (b) the need to the control of the con st indards of living of their peoples, with parti cular attention to the improvement of the conditions of ex-soldiers and their families, the tental importance to the continuance of conditions of expoldiers and their ramilies, the ationship with the Crown the Indian labour population, the arricultural classes and solicits. His Majesty's personal good the backward classes. The Chamber recommends to His Lycellenes the Crown Representa tive that in order to enable the States to raise necessary funds for the aforesaid objects they mix be given all possible facilities for the development of their own industries and resources as requested by the Chancellor and other representatives of the States'

A new development in the organisational of administrations with a view to enting, to the fullest extent possible and use regard to local circumstances, the ant recommendations made by the Special of Committee of Ministers of 1942 in aph 33 of their first report which have ully endorsed by the Princes' Standing and Post were Reconstruction It is not the princes' Standing and Post were Reconstruction It is not the second of the Princes' Standing and Post were Reconstruction It is not the second of the Princes' Standing and Post were Reconstruction. Reconstruction It is not Post war clear why this new organisation was created or whether it is soing to be a permanent institu tion Presumably it is intended to bring in the bigger States who are at present outside the Chamber of Princes in respect of the subjects mentioned in the nomenclature of the conference Be that as it may, the Nawab of Bhopal mau gurated the first session of this conference at Delhi shortly after the contretemps which overtook the Princes' Chamber in December 1944 His Highness made no direct references to the recent crisis, but his remarks on the question of internal reforms in the States and on post war planning contained some oblique observations

On the first issue, His Highness referred to the resolution on administrative reforms The recommendations approved by the Princes included statutory provision guaranteeing the rule of law with security and protection for person and property Other provisions related to a clear demarcation between State expenditure and the cyil lists of Rulers which 'may be fixed at a reasonable percentage of the ordinary revenues of the States" The necessity for an ad the civil lists of Rulers which may be fixed impartial and competent judiciary was also

Regarding post-war planning, His Highness declared the intention of the States to co operate declared the intention of the States to co operate to the fullest extent possible with these plans. He emphasised that the States, like British India, must look primarily to industrial development to provide the necessary revenues for progessive administration and social services. We believe," said His Highness, "that there is ample scope in India for the industrial development of British India or well as of the States."

ment of British India as well as of the States

Deadlock resolved -In the next 517 seven months one heard very little of the public activities of the Indian Princes—in an organisational sense There was no development since the resignation of the Standing Committee except for expressions of regret by British and Indian provisions of regret by British and that Indian newspapers and publicists In the

that an announcement might be expected very ment for British India on matters of all India soon. It was believed that His Highness the concern hawab of Bhopal would see His Excellency the Crown Representative and that the position would be ci rifled during the interview At the time of writing a definite note of optimi m prevails in informed circles whiel rate the chance of a speedy solution as bright quarters refer to a new spirit of concentration and co-operation which has been much in evident t recent important meetings amongst the representatives of the States and the Govern ment of India at which th re has been full and frank discussions on subjects of mutual interest such as industrial taxation and civil aviation

A meeting of Princes held in Bombay in a June 194 discussed many subjects includin the industrial policy to be adopt d by them It appears they expres ed readiness to fall in line with the policy of the Government of India with reg d to taxat on but they thought that this should be b ought about gradually They also claimed protection for their nascent indust res and a proper share of the quota of capital goods an l machinery to be imported from They also expressed their willingness in the future development of civil aviation but claimed that a convention should be established whe eby the States representatives

It was stated that the labours of the special committee of Pulers which was constituted afte the res gnation of the Executives of the Chamber of Princes in December 1944 had practically come to an end and that its functions would be taken over by the Standing Comm ttee of the Chamber when it was constituted

therefore be of re 1 help to the country. It is These experienc our duty and privilege to work for our people always to have them in our thou hts and to lı frthem

> We mut associate our people as closely po ble with the iministration of our tes Til i in fact being done in many States We shall I are to take immediate action States -where the la not lready been don -to implem at forth ith and to the full st extent the recommendatio s made at our previous meetings with regard to independent judiciaries representative instituti as and the fixing of the p ivy purse We must act in these matters not as if we re figlt ng a delayi " action but as those le din, a successful advance

Referrin to the Wavell Plan His Highness sa d that it was proof of the Vicer y s good will established whe eby the States representatives and sincerity towards India and her aspirations should have a voice in framing the policy to be followed.

The State swere not dire thy concern dust it followed. They shar d however the general desire in th country that an agreed s tilem at should be reached. The Princes would wish godspeed to an I t rim National Government for British India and would co-operate with them most cordially on matters of all Ind a concern action th States should take to collaborate with British India on matters of com 1 n concern in the interim be lod and on a long t rm basis needed careful cons deration

Our policy sa d His mi naces let live We seek justice for the Stat sa d and let live Committee of Princes and Miniters welcomed the Wavell Plan expressed the desire that an contribution toward at the greath s and glory agreed settlem at hould be reached and gave of our mothe land and for the ordered proor se

MERGER STREME

By far the biggest development affecting the | whi h aris larger o es with whom they have geographical eco omic and political finities. The St t a to which su h responsibilities are to be transformed by

If the Crown P p csentative has for a provided for thir ubject und r the supervision period had under intensive re i w the I the local Follitical authorities are therefore perplexing political and savis it trattice proli

By far the biggest development affecting the will have from the existence in Western Princely of a during the pat 1 months is a india and dopint of litt ally hundreds of mere rachems for Indian States decided upon by small units which though they are usually be Crown Representative under which amalier letter decident on the control of esources and gener I aversion f om neighbourly co-op ratio thr ha arien in thi part of to which so he responsibilities are to be times firred he be a pyris do these dust is also hay the units to be attached which is also hay the units to be attached which relief by over a narea of over 70000 and an a null record me than the own of the country. In the great might printy of an a humber of more than the 000000 and an a null record me than the own of the country and the sum of the country and the country and the sum of the country and the sum of the country and the sum of the country and t presentative's survey has fully established that [under close supervision of Political Agents, are without some drastic simplification of existing arrangements any kind of co ordinated development of the countryside or any form of real progress is impossible."

The 'communique' refers to the discussion of the problem in the period preceding the 1935 Act and says that the Maharija of Baroda (to whom many of the small units in Western India and Gujerat are tributory) brought forward proposals to bring these tributaries into closer relations with the Baroda State

A fresh approach to the problem has since been made on the lines of these proposals and on a wider basis with a view to afford to other larger states an opportunity to assume similar responsibilities in respect of units which have similar geographical, economic and political amenities with them

In order that the scheme may be carried into effect with the least possible delay Lt-Col G B Williams of the Indian Political Service has been placed on special duty in the area concerned

The 'communique' points out that the scheme contains due provision for the continued integcontains due provision for the continued integ-rity of the attached units and of the existing powers and privileges of their taluquars and shareholders in so far as may be compatible with modern requirements and subject to further review after a period of seven years as also for the allocation of a suitable proportion of the revenue for their personal requirements

The States to which these small units are to be attached will also be required to admit the inhabitants of attached areas to the benefits of administrative amenities such as secondary and technical education and medical treatment, on the same terms as their own subjects and to provide new hospitals, schools, roads and other amenities where these though clearly required, are beyond the present capacity of local re

The Crown Representative is conscious that the action to which he is now committed may meet with criticism on the ground that it is calculated to infringe the rights and lower the status of many ancient families, or alterna-tively that the Paramount Power should itself have assumed direct responsibility for such reforms as may be necessary He has examined the problem from both these points of view and with all due regard to pledges and obliga-tions for the maintenance and support of Indian States, however small and weak As stated above, provision has been made to implement above, provision it is been made to implement such obligations in so far as they are compatible with the overriding principle that autocratic powers shall not be abused and that nothing which is not inherently capable of survival should be artificially perpetuated. The ultimate test of fitness for the survival of any State is, in his opinion, capacity to secure the welfare of its subjects, and he regards the forthcoming qualified merger of these small States as a justifiable solution of any conflict in his obliga-

unable to achieve the conditions of administra tive efficiency which alone can justify in them the perpetuation of any form of hereditary rule. On the other hand, it has been signally demonstrated that in great and wealthy States such as even in considerably smaller States under requisite efficiency can be abundantly achieved. achieved

The assumption of direct responsibility for the necessary reforms, by the Paramount Power is regarded by the Crown Representative as impracticable because geographical and other factors preclude the absorption of these area in British India and because the Political Department is not an administrative organization or equipped with the machinery and resources of finance and personnel which can only be afforded by the administrative control of large territories. Moreover the areas concerned are so scattered and fragmentated as to make it impossible to bring them under unified central control These difficulties and defi ciencies can, in the Crown Representative's opinion, only be overcome by the course on which he has decided, which involves delegation of the responsibility to those who are in the best position to discharge it namely, the bigger States of Western India and Gujarat In framing the terms of that delegation he has been fully mindful of the interests of the inhabitants of these small States, of those to whom they own immediate allegiance and of the larger States with which a new relationship is to be established. with which a new relationship is to be established. To all these parties the Crown Representative admits a continuing responsibility which does not exclude his future intervention, as circumstances may demand, in furtherance of the essential object which he has in view, namely the firm establishment of conditions in which the areas concerned will secure and enjoy full opportunity for progress and development

The idea of co ordination of smaller States for administrative purposes is not new Years ago Lord Irwin (now Lord Halifax) in a confidence of their control of the control tial memorandum urged the Princes to put their houses in order and maintain certain minimum standards of administration

Later still Lord Linlithgow openly exhorted the Princes on the same lines, and, further, pressed the smaller States to pool their resources in order that they may adequately discharge their obligations as a modern state

In 1939 the Political Department issued a circular asking all States with an annual revenue of less than Rs 20,00,000 to join regional confederations In reply to this the Princes submitted a memorandum in which they insisted that grouping of States should be voluntary and that no conditions and restrictions as to the manner in which the police forces should be maintened or the administra forces should be maintained or the administra tion of justice should be provided for should be imposed from without, they were above all keen on maintaining unaltered the rights of the grouped states eas-a-ris each other

formulated a scheme federal in cl racter and i designed to take full account of the rights i affected—the rulers the citizen and the partle like The executive authority in the propo d con titution for the States will be exercised n behalf of the rulers by the Pre dent of the I ederation assisted by a Cabinet of wh m two-fifths will be members of the F deril Assembly The legislature will be becameral the Uppe House designed to uphold the autiority of the rulers and the States and the Lower stituted though it will be by indirect election that of their peoples On the Council each ruler will have a seat ba ed on the hereditary principle a d no other el ment will be repre sented to it The list of fe ler I subject is not very extensive so that the States Governments are left with a large measure of autonomy The principle of the rule of 1 w is accepted as well s that contrary to the rul rs opin on reco ded by the Joint Parliam ntary Committee of the fundamental rights of the citizens There is ample safeguard for the maintenance of Treaty rights a matter of no small importance from the poi t of view of th Pa smount Power The scheme further accords full recognition to the principle of region lism that is of geograplical cultural economic and other affinities as the Crown Representative s scheme is meant to do

In Lathiawar itself the protest aga not the merger scheme grew with the pas ge of time Wh reas the Hindu Mahasabh Wo king Com mittee opposed th attachment of Hindu taluq dars dars nd territo is to neighbours g bigger flushim States the Rul of attached St tes objected to the sheme o the grounds that it militated against the recognised concept of laramou toy and against the Go ernm at of I dia Act In the autumn of 1943 one of the I dia Act In the autumn of 1943 one of the att ched St tes nam ly Bhadwa T luk challen ed the tran fer of some cases fron the flies of the j d cial branch of the Politic l De flies of the j d clab branch of the Politic I De January Personation to the court of the attaching States States
The matter was settled by a pect i bunal The enforcement of the attachment scher with h it that the trant few mill gal and all eled to some petity difficulties which were overcoor observed that the attachment of me it cli was easily Nevertheless som at least of the am it was at versal of imperial polity.

Meanwhile the atta hment cheme which according to the April commun que was co, fined to the non jurisdictional and semi ju isdictional States was extended so a to include the 3rd and 4th class states a me of whom at least h d full juri dictional pows. This incress d the oppositi n of the princely ord r to the scheme

The judici I findin that the chema w s in alld created at end arrass ng situation for the I olitical Dep rf nent who being convinc d of the desirability of the step induced the Sec let ry of State for India to initiate in P rilament legislation valid time the attachment scheme This measure was en cted quickly and secured Royal a sent in M rch 1944 The Bill which in its original or it was comprehensive in chacter was restricted by n office I amendment to the States of Kati in are and Gui rat. On account of the war t m re t ictions on t ansport account of the war in ref ictions on tansport and communic tions the interest affected could not effe tively present thele case before Parlia ment I ven so Oppo itton MF acting on the strength of cables sert by some of th I dian Princes objected to the alid tion of an execu tive act whi h had been judicially h ld invalid and contended that the scheme was not only no so urgently necessary but would in its operation dversely affect the interests of both the Rule nd the indiects of the trached State

ment spokesmen on the other hand affirm that the scheme devi ed by the Politic I Depar ment in Indi was the only fea ible method ensuring to the subjects of the numerous wea and exc ssively fragmented States th ameniti of modern administration which were sought be made available to them through merger wit unit commanding better re ources Gover ment members al o ga e the as ur nee th t t Gover scheme did not involve any dep ivation of the rights of th rul rs of the attached States, ina much a what was transferred to the b gg States was only those powers which the agen of the Cown Repre entative h d till then bec x r ising on behalf I the Rulers of the ama

Payments from Indian States.

Many of the States make payments, varying in amount according to the circumstances of case, to His Majesty. These payments are frequently due to exchange of territory or settlem of claims between the Governments, but are chiefly in lieu of former obligations to supply or me tain troops. The annual receipts on account of these payments from Indian States are summaring the following table. The relations of the States to one another in respect of Cash Contribut are complicated, and it would serve no useful purpose to enter upon the question. It may, he ever, be mentioned that a large number of the States in the Western India and Gujarat States are summer of the States in the Western India and Gujarat States are summer of the States in the Western India and Gujarat States are summer of the smaller States of Central India States making payments directly to His Majesty

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula

The Portuguese possessions in India, all of which are situated within the limits of Bombay Province, consist of the Province of Goa on the Arabian Sea Coast, the territory of Daman with the small territory called Pragana-Nagar-Avely on the Gujarat Coast, at the entrance to the Gulf of Cambay, and the little 181 nd of Diu with two places called Gogola and Simbor, on the southern extremity of the Kathiawar Peninsula All these three territories constitute what is called by the Portuguese Listado da India

S Tome e Principe, Angola e Congo, Mozambique India, Macau and Timor (now temporarily occupied by the Japanese) The Governor of this colony is now virtually a prisoner in the hand of the Japanese. He is not, according to the Portuguese Premier, allowed by the Japanese to send code messages to his Government in I isbon and can only send plain worded telegraman about his health, etc. Most of the Portuguese have evacuated Timor and Japan pays no heef to the protests made by Portugal, which occupy together an area several times larger than the total area of Portugal useff, which

in foreign countries and Mozimbique (Portu The Christians of Daman guese East Africa) and Din are subject, under a new Treaty signed in 1928 between Portugal and the Holy Sec, to the Archbishop of Goa There are numerous churches in Goa, mostly built by the Jesuits and Franciscius prior to the extinction of the religious orders in Portuguese territory Old Goa, which was the capital of Goa up to 1903 there are beautiful churches and convents noted for their nit and architecture. In the convent of Bom Jesus lies the shered body of St Trancis Xavier Every ten years there is an exposition of the Saint's body and thousands of pilgrims from all over India and abroad flock to Gos to kiss the secred body. The last exposition took place on May 6, 1942, and the Saint's body was kept open for three weeks. The churches are in charge of secular priests Hindus and Maho medans enjoy perfect freedom in religious mat ters and have their own places of worship the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigo rously suppressed

The policy of the Portuguese Republic established in 1910 was to suppress all religious Societies which, it claimed, were interfering with the political affairs of the State As a result of this policy Jesuits were driven away from the country. The New State under Dr. Oliveira Salazar, the Prime Minister of Portugal, a deeply religious statesman, has entirely reversed the religious policy of the country. All religious Orders are now freely allowed and several of them have established Convents and Schools in the country, including the Jesuits who have started a Secondary College at Nova Goa A number of nuns have also come to the country Seminary is being built at Saligno and a new religious Order is started in Goa. The relations bet veen the Church and State are very cordial, though even under the anti-clerical republic the Law of separation of Church and State had never been enforced. At present the Church has obtained a legal existence in the country and Portugal even maintains in Goa and in British India a few missionaries, supported by the Lisbon treasury. The Nav supported by the Lisbon treasury The New State is based on corporative principles which have not yet been applied to Portuguese India But there is censorship of the press and only one political party, the Uniao Nacional, supporting the Government, is in existence. A new administrative code has been promulgated and a system of excessive centralization is in force, both financial and administrative. The finances of Goa are controlled by the Minister for Colonies The Governor-General of Portuguese at Lisbon India has to obtain his sanction before any expenditure is incurred

Mormugae came recently in the limelight and was buzzing with diplomatic activity due to its having been selected as the neutral port for the exchange of Japanese and American civilian internees. The arrangements for the exchange of prisoners were well executed by the Portuguese authorities without any litch

The expeditionary force which was sent to strengthen the garrison at Timor was not

(China) and Timor (Oceania), with missions island having been previously occupied to foreign countries and Mozambique (Portuguese East Africa). The Christians of Daman and Did are subject, under a new Treaty signed in 1928 between Portugal and the Holy See, to back to Lourence Figures.

The Country—A little over one thing of the entire territory of Gon is state to be under cultivation. The present police of the Government under Governor-Gener Col Jose Cabral is to bring as much lar under cultivation as possible For the purpose, technical and agricultural exper have been appointed to carry on propaganda as to demonstrate to the furmers modern metho of cultivation Statistics are being organis referring to agriculture, rice and coconut pr duction, area under the plough, etc Ti fertility of the soil varies considerab according to quality, situation and wate supply The Velhas Conquistas areas, a rule, are better and more intensively cultivated than the Novas Conquistas In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying The staple from half an acre to five or six acres produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the popula tion for two thirds of the year Due to lack of supplies of rice from British India, Goa is at pre sent passing through great hardships and the people are experiencing difficulty to obtain supplies of this necessity of life. With a view to securing equitable distribution of rice among the various sections of the population, the Government have decided to take over the production of both the crops this year A press note issued by the Government stated that this drastic step had to be taken on account of difficulties of importing rice and the hoarding resorted to by producers during the previous harvest, vithout any regard for the common interest of the population Next to rice, the cultivation of coconut palms is deemed most important from the variety of uses to which the products are applied Hilly places and infe-rior soils are set apart for the cultivation of cereals and several kinds of fruits, the most not able of which are the famous Alphonso and Mal curada mangoes and vegetables are cultivated to a great extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly due to the current of emigration to British territory There is a great shortage of agricultural labour in the Velhas Conquistas In the summer months, bands of artists. months, bands of artisans and field labourers from the adjoining British territory make their way into Barder and Salsette where the demand for labour is always keen Stately forests are found in the Novas Conquistas They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron ores, scrap iron and pig iron are found in parts of the formation. But have not have not have a retained in parts of the formation. the territory but have not been seriously worked Manganese also exists and some mines are being worked at present, the ore being exported to

In recent years a remarkable change has

paid only by those merchants who make large reserve fund with the exception of the yield of profits and by Government servants. The the rice tax which will constitute a separate everage income from other sources is not taxed There is a special ten per cent tax on all incomes derived in the shape of interest on loans tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief of capital from Portuguese India The chief sources of revenue are the land tax, interest on loans, excise and the customs. There is a special tax on emigrants—all persons, Goan and non-Goan at the time of their leaving Goa,—which yields to the State a little over Rs 10,000. The country being economically backward, the taxes give very little indication of its productive capicity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics. It is proposed to revise the system of taxation, specially the land tax which represents 12 per cent of the nettyield. The State has established in Bombay an institution called Instituto Indoin Bombay an institution called Instituto Indo-Portugues with an annual subsidy of forty thousand rupces from Government to be utilised for the promotion of social and economic welfare of Goans residing in British India and British The proceeds of the emigration tax have been enmarked for the subsidy to the This Institute is conducting short-Institute restitute This institute is conducting short-band, typewriting, book keeping and other commercial subjects, an electricity class, a tailoring class for ladies, Portuguese and Kon kam classes and an employment bureau and is doing useful work for the moral and social uplift of the Goan Community in Bombay

The tarm general is based on the three-fold

The tariff schedule is based on the three-fold principle, fiscil, protective and preferential There is a limited free list on which books and paper figure prominently. The fiscal tariff paper figure prominently ranges from 10 to 30 per cent according to the nature of the commodities, but the duties in several cases are specific, not ad valorem andT causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent on the construction of the const their basic price The tariffs were again revised last year, and the import duties on foreign goods generally increased The preferential duties on Portuguese wines, spirits and provisions have been lowered so as to make preference even more effective Sugar imported from Mozimbique enjoys effective protection, though its import is done through British India there are no exports from Gor to Mozimbique

For the last eight years the country has experienced recurring surpluses due to the increasing indirect taxes Public revenues between 1914 and 1941 have almost doubled and the indirect taxes yield to the State about 32 lakhs of rupees and direct taxes about 9 lakhs of rupees The surplus from 1935 to 1937 came to 17 lakhs which, together with other special funds, make up a reserve of about 65 lakhs of rupees available for developmental expenditure, in which sum is included about 17 lakhs of rupees due by other colonies of Portugal The fotal surplus for the last deen

about Rs 13 per capita. The income tax is funds have been merged into one consolidated The the rice tax which will constitute a separate reserve car marked entirely for the development of rice cultivation. The duty on imported ice which was introduced towards the end of 1938 has now been withdrawn The tax on rice was levied with a view to give protection to the local production but when Government saw that the price of paddy was sorring high, it saw that no useful purpose was served by keeping the tax on rice. Hence the repeal of this tax which has brought relief to the poor consumers. A notification in the Government Gizette says the price of paddy continues to remain at Rs 26/- per candy of 160 litres with the exception of Corquit variety. It is under stood that this price is applicable only to places of production or at the godowns of producers. The price of unboiled rice locally produced is fixed at Rs 28 a big of 88 litres. Boiled rice imported from Karachi is to sell at Rs 328 a big. The public debt of Goa is made up of dues to Portugal and small loans floated in the country itself. Most of the debt due to Portugal has been wined out by lump payments. The has been wiped out by lump payments. The currency of the country is the monopoly of the Banco Ancional I Itramarino which is the State Bank of issue for some of the Portuguese colonies Currency in recent times has expanded and the fiduciary issue has been increased from 10 The State holds millions to about 12 millions a percentage of share capital on which interest is payable by the Bank to the respective colonies The total fiduciary issue of the Rank at the end of last year was about 112 lakhs and its active note circulation has recently increased considerably, due to increased demand. The Bank does ordinary banking business with very few central banking operations. It pre serves a limited loan policy but purchases, on a large scale, British Indian notes and coins and remits them to Bombay where it maintains a branch financed by transfer of capital from Goa through the purchase of British Indian currency There was, during 1940-1941 a considerable re patriation of funds from British India, which re sulted in an expansion of the note circulation of Banco National Ultramarino to over 80 lacs of rupces There was also a large increase in the Savings Bank deposits The heavy demand for Portuguese notes resulted in a discount being But the Banco demanded for their conversion Nacional Ultramarino has withdrawn the facil ities for transfers and conversion of notes, at present, which it had previously allowed to its The Gor Government Treasury customers Offices also do not receive English notes for any payments and the emigrants have to pay Rs 3/- to Rs 5 for hundred to get the English notes exchanged into Portuguese These hard ships have been the subjects of representations by different Goan Institutions in Bombas and so for Government has not modified its orders, although Government used to freely receive The currency English notes at par before 1941 problem has considerably eased at present and merchants are freely receiving English currency notes for their goods, without charging any commission. It is only for Portuguese notes The Portuguese that commission is demanded

the present Capital -Nova Goa The ante Lapital - Roya dua the present capital of Portuguese India situated on the banks of the Mandovi Comprehends Panjim and Ribandar and is the seat of the Governor 9 netal Old Goa is some Panim six miles away from the new city occupies a narrow strip of land leading up to the C bo the cape dividing the Aguada bay from that of Mornugao and mainly slopes down to tle edge of the Aguada It was selected as the residence of the Portuguese Viceroy in 1759 and residence of the Portuguese vicerty in 1159 and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city with its row of public build go and elegant private residences as seen from the water le very picturesque and this impression is not belled by a closer inspection of its n at and spacious roads bordered by decept tidy houses plations roams ownered by decent cuty niouses. The most imposing public structures are the barracks an immense quadrangular builling the castern wing of which accommodates the Primary School the Public Library and the Government Pres Other not cable buildings at the Cathedral at Velha Gos and the various churches the viceregal palace and the High Court The square in the lower part of the town is adorned with a life si ed statue of Albuquerque standing under a canopy

Panjim has been undergoing in recent ye remany remarkable improvements. The electric l supply of the country has been reorganis d under the cont ol of the Municipality and an excellent system of light g public and private is now in force. Most of the important roads have been asphalted at a large cost and recently a large number of b lidings have come up on At who which is the Malabar Hill of Panjim. A deere has been published calling upon all houseown is to introduce septic tank as a pr limin ry step to the working out of a s heme of vater Bupply This decree has so far not been enforced

due to lack of water supply
The Government recently invited Sir M Vis weswar vya to work out a pl n for the supply of wat r to Nova Goa He h a submitted a eport

The e-tablishment of dictatorship in Portugal has produced profound changes in the adminis trative muchiners of Gon. As a tem of centralisation, financial and administrative, first because introduced with the realt that all important financial and idministrative acts require the sanction of the Lisbon Government. The fovernor General has to submit periodical reports of his administration to the Lisbon Govern A pres law controls the freedom of the Press and imposes heavy penalties on all crimes committed by newspapers. Old newspapers are exempted from deposits, but new ones have to keep with the State considerable sums of money before they are allowed to appear Livery paper has to be previously consored by official censors and so also the publication of books, brochures and pamphlets The powers of the Council of Government are also reduced, particularly their legislative functions They are for all intents and purposes a mere advisors body as officials and nominated members from A system of periodical conferences has been established, made up of all the colonial Governors now suspended due to war There is a common parliament and the whole Portuguese Empire is constituted into a single constituency electing about 90 members of the National Assembly Presidents of municipali ties and charitable associations are appointed The Governor-General economic condition of the country has deteriorated considerably in recent times. Due to searcity of necessaries of life, thousands of Coans have come to British India to earn their living Prices have risen by leaps and bounds and people cannot afford to buy in the black markets which are flourishing before the eyes of the authorities who seem helpless to check profiteer and So the result is increase of conference of conference of the second c So the result is increase of emigration to Pritish India

KARIKAL.

Karikal has on the Coromandel Coast between universal suffrage but in the municipal the Tanjoro District of Madras and the Bay Karlkal half the number of sants are reserved of Bengal The settlement is divided into Europeans or their decembrate. The countries communes, containing 110 villages in very fertile, being irrigated by seven branches all, and covering an area of 51 square miles the Cauvery, besides many smaller channels it is governed by an Administrator subordinate. The capital of the settlement is situated It is governed by an Administrator subordinate to the Governor at Pondicherry. The population lation has in recent years ruidly decreased 1888 it was 93,055, in 1891,75,526, in 1901, 54,003, in 1923, 57,023, in 1924, 56 922; in 1936, 60,447 and in 1941, 60,555, but the density is still very high, being 1,068 persons per square mile Kumbakonum is the only failule in Indian District which has a higher failule in Indian District which has a higher

the north bank of the river Arasalar, ab in rice with Ceylon, and to a less extent wit the Straits Settlements. It has no commen with I range and very little with other brene density is still very high, being 1,668 persons colored The port is merely an open read per square mile Kumbakonum is the only stend, provided with a light-house 142 fer taluk in Tanjore District which has a higher high, the light in which having a range of fror density Each of the six communes—namely, 8 to 10 miles. In 1899 Karikal was connecte Karikal, La Grande Aidee, Nedungadu, Cotwith Peralem on the Tanjore District Boan Kery, Neravy and Tirncular—possesses a mayor Railway Karikal finally came into French and council. The members are all elected by possession on the settlement after 1815

The Frontiers.

By those who tale a long view of politics in we are dealing was concerned, two policions the wide sense of the term, it will be seen that were tried. In Buluchistan, the genius of Si the Indian I routier problem, which has loomed so large in the discussion of Indian questions, has always borne a twofold character—the local issue and the international issue 1 or almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face But the tendency of later times until Germany's invasion of Russia was for the international aspect to recede and for the local aspect to grow in importance, until it might be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation

The Local Problem -The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail from the Arabian Sea on the West to the confines of Kashmir is a wild and troublous sea of some of the highest mountains in the world The thin valleys in these immense ranges are populated by hardy, brave, militant mountaineers But sparse as the population is, it is in excess of the supporting power of the country Like mountaineers in all parts of the world, these brive and fearless men have sought to supplement their eviguous agricul ture by raiding the rich plains of Hindustan We may find a fairly close parallel to the attration in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military by opening for the warner riginancers a min and a career in the famous Highland regiments, and in rendering military operations easier by the construction of Wades road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant payed by Neil Munro. read again that brilliant novel by Neil Munro,
"The New Road," he will appreciate what Wade's
work meant for the Highlands of Scotland, and
what lessons it teaches those who are called

Robert Sindeman devised the method of entering into military occupation of the principa points, and thence controlling the country at the same time close engagements were entered to the controlling the same time close engagements were entered to the controlling the same time close engagements were entered to the controlling the same time. into with the principal chiefs, through whom the tribe-men were kept in order. That policing was so successful that whilst the administration was expensive the Baluchistan frontier did no scriously embarrass the Government of Indu from the time when Sandeman set his mark of Not that the country was entirely raids or rising Occasional tribal necessitated occasional military operations and the Gomil Pies was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan in 1919 But speaking broadly, Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that general So far as this section of the frontier ! concerned it may be said that no frontier pro blem exists, save the need for an economic and constructive policy

Towards Afghanistan - Far otherwise hal it until lately been with the section of the fron tier which stretches from Baluchistan to the confines of Kashmir That was, for three quarter of a century, the scene of almost cerseles military operations which constituted the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constituted of the constitute of devistiting drin on the Indian exchequer For years one sought for a definition of the Indian exchequer. years one sought for a definite policy guiding the One expla nctions of the Government of India nation of their inconsistencies was found in the Once the existence of two schools of thought frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupa-tion of the whole country right up to the con-fines of Afghanistan, or at any rate, for military posts, live of a sight and posts, linked with good communications, which But those who would dominate the country But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan from tier would only shift the frontier problem farther

It sidered out old the ribes who peopled it. Yow it was throughout it of Great W. It dough the Wallrs (then sat dwhy we did not it low the precedent) built up a heavy bill of offene s which awaited Blainchist r and San lem ni e the fade is titlement when if occument were free from he immense preoccupations of the war It broke down under the strain of the wanton niversion of India by the Afghans in the hot veather of 1919. On February 20th the Amir Labibullah Khan was assassing ted in his sleep near Jelalabad Although he does not figure so prominently in frontier history as his iron ather Abdurrahaman Khan, he nevertheless has ligh claims on the favourable verdict of history None anticipated that any successor to Abdur ahaman Khan could hold in the least in a single State the fractious, fanatical tribes who make to the population of the Afghan kingdom. Yet his Habibullah did On occisions his attitude seemed to be equivocal as when armed gather ngs of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Tribal Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European tandards, the Amir had often to bow before he fanatical elements amongst his own people antil they had burnt their fingers by contact with the British troops At the outset of the Great War he warned the Government that he might often have to do things which seemed un-riendly, but they must trust him. In truth, the position of the Amir whon Turkey entered the war, and called Moslems everywhere to arms on the side of Germany, was extraordinarily difficult He received Turkish, German and Austrian missions in Kabul from which British represent atives were still excluded But he kept Afghani stan out of the war, and with the complete deseat of the Central Powers and their satellites, his policy was justified up to the hilt Indeed his success was the cause of his assassination The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove to avert the settlement of their account by the murder When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins But the conscience of Afghanistan revolted against the idea of Nasrullah, the archfanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother Amilitary movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne But Amanullah Khan soon found it was a thorny bed on which he lav, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a jehad promised his soldiers the triditional loot of Hindustan The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten Dalla, beyond the Khyber, was seized, Jelalabad and Kabul were bombed from the air, and there was nothing to prevent our occupation of Kabul, save the know-ledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sucd for peace, a treaty was signed on the 8th August, 1919

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze With one or two exceptions.

the regular troops, who in the emergent ought to have been hastened to the succour, could not stand the strain an appeal from their fellow tribesmen, and eith melted away or joined the rising This has ofte been described as the failure of the Curzo policy, which was based on the tribal militis but there is another aspect to this question The Militia numbered only some 3,000 mer They were distributed in a number of isolate and semi-isolated posts. There was no poss bility of their withstanding the onslaught of a Afghan invading force They were not intende for such a purpose If they had, when th invasion began, been supported by regula troops their loyalty might have remaine sound But other counsels prevailed It was at the outset decided in high military quarter that in the face of the Afghan invasion it wa inadvisable to send regular troops to support th Waziristan milita posts asit was concluded that the Mahsud and Wazir tribes of Wazirista would join the enemy Orders were therefor issued that the posts should be abandoned, the British officers in them withdrawing with such menas remained loyal. The officer commanding the Bonny by medical immediately described. the Bannu brigade immediately despatched : movable column for the succour and reassu rance of the militia garrisons in his area bu superior orders followed directing the return of the column forthwith. The militia were there upon ordered to withdraw and their commence ment to do so, accompanied by the burning o such stores as they could not carry, quite natu rally produced the instant uprising of the tribes men, who began to attack and loot the retiring convoys and the abandoned posts To expec the militia to remain firm in retreat in sucl circumstances was to refuse reasonable consider ation of the facts of the situation

Russia and the Frontier—The Curzol policy was up to this inevitable collapse greatly assisted by extraneous events. The greates external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three-quarters of a century a veiled warfant for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corpor ation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russiah and to advance. True, the advendance with a present administrators in the Tsarrist capital were not averse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilla enterprise between the hardiest spirits on both sides, accompanied by periodic panics in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Mery, of the generic

avol ed the Government of India in the humi ations of the Afghan War of 1838 with the ragic de truction of the retiring Indian force etween Kabuland Jelalabad slightly relieved by the her to defence of Jelalabad and the rmn ss of Gen rai Pollock in refusing to with raw the punitive army until he had set his nark on Kabul by the razing of th famous Bais Hissar fortress It involved us in the second forth West of 1800. Afghan War of 1878 which left the baffling problem of no stable government in Afghanis-There was a gleam of light when Abdur ahman khan whom we set up at Kabul to chere us of our perplexities prov d himself stro g and capable ruler if one ruthless in his nethods But in the e riv eighti a the two increases But in the e-rly eight a the two States were on the verge of war over a squabble or the possession of Penjdeh and then m n legan to think a little more clearly. There began a series of boundary delimitations and Agreements which clarified the situation without lower r finally settling it The old controversy roke out in another form when intrigues with a Surjat monk Doriles during Lord Curzon s hat the scene I ad only shifted to Tibet An Expedition to Lhasa re t the vell which had to long concealed the mysterious city and dispersed the miasma of this intrigue But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived assement of 1997 that the two countries arrived as a stage long sought by those who looked beyond the irno es. The actual authors of the Agreemen were Lord Grey the Foreign Secretary and Lord Hardinge formerly British Ambasador in Portugal but it had been desired by their countries. Ambassdor in Fortugal but it had been dean to by their predecessors whose efforts were rendered augatory by the intransigent attitude of the dominant forces in Petrograd. It was not mail? a ratic Russia was defeated on the battle as of lanchuria by Japan and disappeared as of the control of the desi two battle of Tau shins. It was not appeared the desired of the control of the c able to the conclusion of an Agreement embraced the whole frontier on and placed Alghani tan beyond the sphere of Russian influence There were many unsatisfactory to here the sphere of the sphere of the sphere of the sphere were many unsatisfactory to the sphere were the sphere were many unsatisfactory to the sphere were many unsatisfactory to the sphere were many unsatisfactory to the sphere were many unsatisfactory to the sphere were many unsatisfactory to the sphere were many unsatisfactory to the sphere were many un especially in ie tures in the Agreement Persia for w if tures in the Agreement especially in the Agreement especially in the Agreement with the what of Frisher War fluct again taking long views the Agreement ground again taking long views the Agreement ground the War of the two countries which put as end t the period of the War of the Wa ment in Moscow uncasines returned for the Rescow uncasines returned for the Respirated and all d circumstances which influenced the policy of the Tault regime exert pretisely the same pres re upon its succe sor

marked a f ature of Russian expansion in Man churia brought to an end by the disastrous lasue of the war with Japan The seeds of the G rman effort were sown when the Kaiser extending the hand of Christian fellowship to the Sultan of Turkey Abdul Ham d at a time when that sovereign was estracted by Furope for his direct complicity in the mansacre of Armenians or rath r one of the massacres of Armenians made German influence supreme at Constantinople Ills theatrical tour through hich was generally treated in Europe Palestine as an exhibition of opera bouffe soon bore fruit in the acquisition by German interests of the principal railways in Anatolia Later it fructi fied more effectively in the B hada Railway concession under which German interests secured the right of extending the Anatolian lines from the port of Haldar Pasha opposite Constantinople to a p rt in the Persian Gull Now successive British Statesmen of both parties nad declared that the acquisition of a territorial foothold in the Persian Gulf by any power— Russia and the port of Bunder Abbas being th n in view—would be regard d as an unfriendly act There followed a replica of the period of alating and excursions which had disfigured our rightons with R s ! Und unded even when their endeavour to se are Briti h co-opera name their endeavour to se ure brist a co-opera tion in the enterpri failed and when the Revolution in Turkey which set the Committee of Union and Progr in power entailed a temporary interruption of their influence at Constantinople the Germans pressed forward with their ent rpris They pushed the Anatolian rallways as far east as Bourgulu and constructed a line northwards from Baghd d to Samara a line northwards from Baghd d to Samara They sent a mi sion to explore the potentialities of the port of Kowett in the Persian Gulf and set the Turk in motion to subordinate the Sheika set the Turk in motion to subordinate the Sheika of Kowelt to direct Turkish so ereignty with a nominal vi w to extending the Bagh lad railway from Rasra to Kowelt or the vicinity of Ko elt iron leasts to Kowelt of the vicinity of Ro ett at tie de p wat r in it tel ind Bubian Island They commenced the most difficult part of the w rt in plercing the Amanu and Taurus ranges by a series of tunnels and faid the rails on the other side of the mount ins across the on the other side of the mount in the Euphrates to Ras al Ain Behind this rail way act ity stood a granilose policy which is indicated by a what become known in Germany as BBB—Berlin Byzantiam Baghdad Throughout tie pogress of the schemes, whi hadid not stop short of Baghdad but were directed through a port in the Persian Gulf at India the Germans wer anxious to secure the co operation of Great Britain if they could do so on the irown terms the tisto say without affering the enterprise as a dominant German adventure. Shortly before the commencement of the war of 1914 18 the ptrated negotiations with London which h d this end in view end d with London which is defined at view and is a definite agreement between the two Powers Under this agreem at the G if section of the line was to have be n B it i and the other portion German But this agreement which had not been sign d became waste paper with the outbreak of the war and the G man plan vani hed in thin air with the complete def at of Turkey and Germany Nevertheless the rail of Turkey and Germany way did not stand till during the war Germ ny made immense efforts to compl to the diffic it tunnel sections and the wo k was subst utially

Turkey and the Fiontier—The position of Turkey on the Indian frontier was nover of any considerable importance in itself, and never assumed any significance, save as the avant courier of Germany, when she passed under the tuterage of that Power, and for a limited period during the war Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Revolution that fine soldier Nazim Pasha became a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no one s interest, even that of the Arab, to turn her out When however Germany developed her "BBB" policy, Turkey was used as a stalking horse She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a de facto suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious. On the outbreak of the war, however, the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable These character These were completely successful with General Maude's occupation of Baghdad After the Russian debâcle we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power. The aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerrilla. disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Iraq Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to the Language Negative. be left to the League of Nations Negotia tions were promptly opened at Constantinople but it was immediately found that there could be no mutual agreement, the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Iraq issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot this commission reported that the best settlement would be for the Mean relative to be incorporated in Table 16 the Mosul vileyet to be incorporated in Iraq, if

prolong its mandate over that State for a period When the report of this of twenty-five years commission came before the League in 1900 Britain gave the necessary guarantee, and the Council of the League unanimously allotted the Mosul vilyat to Iraq The Turkish delegates who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions So the matter rested at the end of the year, with Iraq in occupation of the disputed Territory up to the temporary frontier which was known as the Brussels Line France and the Frontier—It is difficult find any sound policy behind the efforts of France to obtain a coaling station at Muscat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immenee traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite ammunition We can find no more definite purpose in it than a general din-pricking policy, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the prict of abstention These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente Far otherwise was it in the East. The consolidation of French The consolidation of Frenci was it in the East authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Sum and to find compensa at the expense of Siam and to find compensation there for the veiled British protectorals of Ebypt There had earlier been muttering. In Burma We were established in Lower Burma in the 'thirties and in the 'eightles the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British However, if any hones were entertained of extending the if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmes' War and the firm establishment of British rule Far otherwise was it on the confines of Siam It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma then a regular Province of the Indian Empire and French Indo China This policy was and French Indo China This policy wis definitely challenged by French encroachments on Siam Matters approached a crisis in 1894, and we were within and we were within measurable distance of a situation which might have ended in open was between the two States But as in the case of Panidah Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the immence of hostilities made statesmen on both sides and the major sid sides ask themselves what they might be going to fight about They found there was nothing to ngnt about They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam With the collapse of France in the second world war, however, both Indo China and Siam with the collapse of France in the second world war, however, both Indo China and Siam with the powers against the Allies in December, 1941

The New Frontier Problem—The whole purpose of this bilef sketch has been to show that for three generations—most assuredly since

he Indian frontier problem has never been a land Pe haver on the other is fully consolid to call problem it has been dominated by leading the problem of the aom I to critical land frontiers anywhere in the world in the world in this present time of a will be a communications acrial operations of a will be a communication acrial operations and a will be a communication acrial operations are also as a communication acrial operations are also as a communication acrial operation and a communication acrial operation and a communication acrial operation acrial operation acrial operation acrial operations for the communication acrial operation acrial operations for a communication acrial operation acrial operations for a communication acrial operations for a communication acrial operation acrial operations for a communication acrial operation cupation stolen from British magazines or secured from Russian and Afghan sources They have an abundant supply of ammunition Consider ble numbers of the fighting men have been trained in the ranks of the Indi n Army either as Regulars in the Pathan regiments or else in the tribal militias We found this to our cost in the events following the Afghan War of 1819 The Afrian regular army w so flittle account The tribesmen who ros at the call of the Jihad especially in Warlistan were of great account They gav our troops the hardest fighting they have even had on the Frontier their maximum than the months and the distribution was described. ma kamenshir and fire discipline were described by experienced soldiers as dmirable. The t bal mili is for all practical purposes di appeared What was to take its place?

I.—THF PERSIAN GULF.

From what has been said before it will be seen; vigorous Viceroyalty of Lord Curzon, who visit hat the keynote of this discussion of Indian rontier policy is that the external menaci has argely disappeared No part of the frontier is nore powerfully influenced by this consideration han the Persian Gulf Our first appearance n the Gulf was in connection with the long struggle for supremacy with the Portuguese, the I rench and the Dutch, who had established trading stations there With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian importance of the Gulf declined The Indian Government remained there primarily to preserve This work is quietly and efficiently the peace performed Piracy was stamped out, Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept vatch and ward, and our Political Agents regulated the external affairs of the Arab rulers on the Arab coast In return for these Great Britain claimed no selfish ad-The waters of the Gulf were kept free vantages to the navigation of the slups of all nations, and though Great Britain could have made any territorial acquisitions she pleased she retained possession of only the tiny station of Bassidu Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs France sought to acquire a coaling station at Jissa, near Muscat, and obstructed the efforts the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All cruses of difference were gradually removed by agreements following the Anglo French Entente Russia sent one of her finest cruisers to 'show the flag" in the Gulf, and established consular posts where there were no interests to preserve She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas This menace declined after the signing of the Anglo Russian Agreement and disappeared with the collapse of Bussian power following the Revolution Then Turkey either acting for herself, or as the avant courier of Germany, under whose domination she had passed, began to stir She threatened the passed, began to stir She threatened the Sheikh of Bahrein by the armed occupation of the peninsula of Al Qatar, and moved troops to enforce her suzerainty over Kuwait, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway Further to consolidate her interests, or to stake out a claim, Germany sent the heavily subsidised ships of the Hamburg-America line to the Gulf, where they comported themselves as the instruments of Imperial policy rather than as ineffective marklesters. inoffensive merchantmen inoffensive merchantmen She ilso strove, through the agency of the firm of Wonkhaus to acquire a territorial footing at Sharjah These events stirred the British Government to an unusual activity in the waters of the Gulf

the Gulf during his early travels and inc porated a masterly survey of its features in monumental work on Persia. He appointed t ablest men he could find to the head of affai established several new consulates, and was strumental in improving the sea communication with the Gulf ports The British Governme also took alarm They were fortified in the stand against foreign intrigue by the opini of a writer of unchallenged authority American Naval writer, the late Admiral Maha placed on record his view that "Concessi in the Persian Gulf, whether by formal arrang ment (with other Powers) or by neglect of t local commercial interests which now under political and military control, will impe Great Britain's naval position in the Farth East, her political position in India, her col mercial interests in both, and the Imperial interests and Australasia." The Imperi standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowner words of great import—"We (1 e, His Majesty Government) should regard the establishment a naval base or of a fortifled port in the Persi Gulf by any other Power as a very grave mena to British interests, which we should certain resist with all the means at our disposal" The negative measures following these declaration were followed by a constructive policy when the oil fields in the Bakhtiari country, with a gre-refinery, were developed by the Anglo Iranii Oil Company, in which the British Governmenths a large financial stake Since that dathe Persian Gulf has become the "Air Sur Canal" of the Empire the main Imper Canal" of the Empire, the main Imperi line of air communications running down i Arab littoral, and an important oil-field he been discovered and is being operated at the Island of Bahrein. The Company is a branc of the Californian Standard Oil Company and being American owned has introduced the USA into the political complex of the Gulf Another branch of the same Company and Another branch of the same Company and struck oil in Hass—a portion of Ibn Saud's Arabian kingdom shelving on the Gulf—and a British company is prospecting with success in Kuwait An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and daily armed at the destination in 1932. It and duly arrived at its destination in 1932 The im was at the outset officered by Italians The immediate reason for the new fleet was that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling The fleet was required to check it The British Government in 1935 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm island, off the Persian shore at the entrance of the Gul, which they held on lease from the Persian Gulf to Bahrein, on the Western, Arabian coast of the Gulf This move was calculated to remove causes of friction Pearls are found on the Arab coast of the

Persian Gulf between Kuwait and Muscat Rupee currency is in use on the Arab coast

Muscat

Muscat whi h is reached in about forty auscas will it is reached in about forcy ligh hours from Karachi is out lide the Persian fall project. It lie three he noted talles south a Cape Musandim which is the re I entrance the Gall but its natural strongth and his ortical prestige combine to make it inseparable from the politics of the Gulf with which it ias always been intimately associ ted

Formerly Muscat was p rt of a domain which embraced Zanzibar and the Islands of hi 1 m and Larak with Bunder Abbas on the P rsian ibore Zanzibar was separated from it by agreement and the Persians succeeded in stablishing their authority over the possessions

on the eastern shore

The r lations between Brit in and Muscat ha e been intimate for a century and more It was under Briti h auspices that the separa tion between Zan ihar and Museat was effected the Sultan accepted a Briti h subsidy in return for the suppression of the slave trade and in 189 se led his dependence upon us by and in 189 as ten ms dependence upon as or concluding a treaty pledging himself not to code any part of his te story without on consent. The Sultan paid a State visit to New D lhi late in 1937 and thereafter to London whither he journeyed say the Far East and America On his return home via India the a new treaty with the repr sentatives of His Majesty a Government in 1938

The Pirate Coast

Bahrein

North of the Pirate Coa t lies the little Archi pelago which f rms the chi fable of the Sheikh

Gulf pearl fishery which in a good year may be worth half a million pounds sterling. The anchora e is wretched and at cert in state of the tide ships have to li four miles from the shore which is not even approachabl by boats and passengers mails and cargo have to be I nded on the do key I r which Bahrel is iamous But in spite of this th tr do of the port is very large and the Customs revenue substantial in consequence which makes the Sheikh the richest ruler in the Gulf

The importance and wealth of th se islands h s been immensely increased by the dev lop ment of the B brein oil fields refer ed to above

In the nei bourhood of Bahrein is the vast burying ground which has hitherto baffled archæol gits The generally eccepted theory is that it is a relie of the Phænicians who are known to have traded in these waters

The British Government as was me tioned earlier in this review announced in 1935 that they p oposed tran ferring the princip | Britisi of Naval station in the Gill from Henjam on the Persian side of the water to Bahrein The ame place has sin e been itil sed for the pro i sion of a large aerodrome for the ervice of the British Imperial air line betwe n L ndon and Australia wisch is thus enabled to take a rote down the Western side of the Persian Guifand thus avoid difficulties in Persia

Knwaff

In the n rth west corner of the Guif Il s the port which has made mo e at it it in my place of similar ize in the worl! The importance of Luwa thes solely in the fact that it is a possible Guilt termints of the Bachd d possible Guit terminis of the Barda of the Barda of the R liway This is no new di covery for when the Euphrates V lley Rallway was under discus ion General Chesney selected it under the alternation name of the Grue—so c lled from the tesemblance of the formation of the Bay to a pair of horns—as the sea terminus of the lie No here else would Kuw it be called a good or a promising port The Bay i O miles deep and 5 miles broad but so sh llow that heavy ex pe s would have to be incu red to render it suitabl fr m dern oce going steamers li is sh itered from all but the westerly winds nd the clean thriving town is peopled by a me 80 000 inhabitants thicky dependent on the 8 2 for the mariners of Luw it ar 1 t 1 for their boldne a and hardihood

Khorramshabr (formerly Muhammerah)

On the opposit ide of the entrance to the Shatt-el Arab lie the terr tori sof Khorramshahr The town fo oursely situated near the mouth of the Karun River has grown in importance si ce the ope ing of the karun Riv r route to trade through the attention of Mes rs Lynci trade thro h the nterprise of Mes rs Lynci Brothers This route provid s the short at pas sage to Ispahan and the central tableland and already competes with the older route by way of Bushire and Shiraz. This importance h s reach which I must be tell this of the Sheikh in the state of the stat

Iraq.

In a sense Iraq and Turkish Arabistan can sardly be said to come within the scope of the rontiers of India, yet they are so indissolubly ssociated with the politics of the Gulf that hey must be considered in relation thereto Basrah is the present sea terminus of the Inghdad Railway and is also an important air port on the Empire air routel. It stands on the ight bank of the Shatt el Arab, 70 miles from the mouth, favourably situated to receive the abole water-borne trade of the Tigns, and Cuphrates Rivers. The local traffic is valuable, or the richness of the date groves on either side of the Shatt el-Arab is indescribable, there is a considerable entrepot traffic. Whilst Basrah is onsiderable entrepot traffic Whilst Basrah is he port of entry for Baghdad and for the trade with Persia which follows the carayan route ina Kermanshh and Hamadan Baghdad 15 the Croital town

Iraq is an independent Arab State set up in what formerly was Mesopotamia, under British Aegis under the sovereignty of King Feisal I He was, on his death in 1933, succeeded by his son, King Ghazi who died in a motor accident in Bighdad in April, 1939 His three year old son Amir Feisal was then proclaimed King, and Amir Abduhllah, uncle of the new ruler, was

appointed Regent

When the 1914-18 War was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad, then the great military enterprises necessitated by the fall of Kut al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Transjordan Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious In these circumstances King Feisal agreed to come from the Hedjaz and was installed on the throne under the regis of Great Britain

Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real-power unless King Feisal was to be a mere puppet, immense expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonics announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on

May 3rd he said-

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad the terms of which I propose to read out to Your Lordships. This

has their cordial assent It is being publish at Baghdad to-day.

The announcement is as follows —

"It will be remembered that in the autum of last year, after a lengthy exchange of view it was decided between the Governments. His Britannic Majesty and His Majesty Ki Feisal that a Treaty of Alliance should entered into between His Britannic Majes and His Majesty the King of Iraq This Treat which was signed on the 10th October, 195 and the term of which was to be twenty yea (subject to periodical revision at the desi of either party) provided for the establishme of an independent Constitutional Governme in Iraq, enjoying a certain measure of adviand assistance from Great Britain of the naturand extent indicated in the text of the Treatiself and of subsidiary Agreements which we to be made thereunder

"Since then the Iraq Government has majorent strides along the path of independent and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious the commitments and responsibilities of Halpesty's Government in respect of Iraq shound be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty alread signed, it has been decided to bring about the necessary modifications by means of a protocy which, like the Treaty itself, will be subject to ratification by the Constituent Assembly

"Accordingly a protocol has now been sign!
by the parties in the following terms —

It is understood between the High Contracting Parties that, notwithstanding the provision of Article 18, the present Treaty shall terminate upon Iraq becoming a member of the Leagur of Nations and in any case not later than for years from the ratification of peace with Turke Nothing in this protocol shall prevent a free agreement from being concluded with a viet to regulate the subsequent relations betwee the High Contracting Parties, and negotiation for that object shall be entered into betwee them before the expiration of the above period

It will be noticed that under this protoc the Treaty in its present form was to termina on the entry of Iraq into the League of Natio or in four years, whichever might be earlier

The position of Iraq as regards the Leagues was that when the Treaty was ratified B Britannic Majesty was bound under Arbic 6 to use his good offices to secure the admission of Iraq to membership of the League of Nation's soon as possible. His Majesty's Government would be in a position to take this step on the fillment of the two following essential condition namely, the delimitation of the frontiers. Traq, and the establishment of a stable government in accordance with the Organic Later was the stable of the property of the property ment in accordance with the Organic Later was the stable of the property of the p

rised January, 1932, adopted the report of the Irs can Commission recommending the termination the mandate subject to the admission of Irs to membership of the League and Iraq enterty

andate when the next Assembly of the Les ue oted for the admission of Iraq to League embership

Under the Treaty of Lausanne between urkey and the Powers which was signed in 9 3 it was agreed that the frontier between log Feisal's State and Turkey the important routier because the future of Mosul was in lapute should be settled by the Lesgue of vations should Great Britainand Turkey be un ble to come to agreement by direct negotiation bese direct negatiations were opened at Cons antipople but no agreement was reacted so he question was opened before the Council of the League in September 19 4 Whilst the natter was under discus ion complaint was nade by Great Britain that Turkey had violated he provisional frontier drawn in the Treaty M Lausanne and certain irregular hostilities were carried on in the disputed zone. This natter too was remitted to the League and a This

asset too was remitted to the League and a strated provisional boundary was drawn which was accepted by both parties

Here the matter remained until the autumn of 19.5 In order to secure the material for a decision the League of Nationa despatched a neutral commission to Mosul to investigate the situation This commission produced a long and invol ed report but one which led by devious paths to a commonsense recommenda tion It was that the first essential in the Mosul vil yet is stable government. The d sires of the people were for incorporation in the State of Iraq If therefore the British Government was willing to extend its mandate. over-lined was willing to extend its manuace over ling for a further period of twenty five year-a guarantee of stable government—thea Mosul should be incorporated in Iraq, if Dritain was not willing then Mosul should return to Turkey When the matter came before the Council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was the council of the League Great Britain was not was the council of the League Great Britain was not was the council of the League Great Britain was not was the council of the League Great Britain was not was not was not was not considered the council of the League Great Britain was not w gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne The issue was remit ted to the Court of International Justice at The Hague which decided in f your of the competence of the Council Great Britain hav competence of the counted and Dittatin have a few first in here is a surface to the was a frequent to extend he in index over 17 glora in the treatment of the whole of the area of the alloc ted the whole of the area of the alloc ted the whole of the area of the alloc ted the whole of the area of the alloc ted the whole of the area of the alloc ted the whole of the area of the alloc ted the whole of the area of the alloc ted the allocation of the area of the allocation of the area of the allocation of the area of the area of the allocation of the area of the area of the allocation of the area of the

aca u or vation. This recomme u uon was male ani accepted in 0 tober 193 wh eupon the M ndate was termi ated and I raq became and the redent o ereion atta and am imber of i Le sue retents. The Treaty of 1000 was large f ations The Treaty of 1076 was tart ity Tre ty of Alliance signed in the cui Jr. e 130 to come to fee as soon as large had been admitted as member of the Learne of Astlore League of Vations. It provides

I instice This meant the termination of the | that each of the two Hi h Contracting parties shall immediately come to the aid of the other in the event of war

It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of the Iraq State Basra has for long been in the closest commercial contact with India and is in many commercial contact with mine acts in many respects a commercial appanage of Bombay Its people have not much in common with those of the North They took no part in the Arab rising which followed the war and they ask nothing better than to remain in close to ich with India and through India with the British Government

Iraq a alliance with Great Britain was emphasised by the Iraqi Prime Minister General Nurl Said Pasha in April 1939 Broadcastin to the nation General N It said that alliance with Britain and the neighbouring States coupl ed with sincere friendship with Turkey and Iran were two principles on which Iraq's foreign

policy was based

On the outbreak of war with Germany in September 1939 Iraq severed diplomatic rela tions with Germany in accordance with the terms of her treaty with Great Britai but for sever 1 or ner treaty with Great British but for sever I years the German mini ter in Bandad had been working a ainst British influence. As Hittle ism went from strength to strength, German influence in Iraq grew in volume and intensity until when the war b gan the expul sion of the Germ n minister by the Cabinet threw into sharp relief the pro German sympa thies of the army leaders and the young r ambitious men who fawned upon them Later the Cabinet fell and was succeeded by ministries backed by Rashld All and the army backed by Rashid All and the army When Italy ent red the war this cabline took the first step is breach of the Auglo Iraq Treaty red to the Auglo Iraq Treaty relations with Italy with the re oil that the Italian Legation in Barddad became an active entre of Axis proj and and espicange in April 1941 a comp dat; put Rashid All into power The administration that followed into power the administration that followed turned openly hostlie to the Brith h demanded that no more British troops should be landed to protect lines of communication through Iraq and when this demand was refused began bott and when this demand was refused began hosti littles in the hope of Arks supports. Intel forces the property of the support of the support and rounded up Intitish residents in Inguista The rebellion was quickly quelled and the rebel laders finding thir position unten bie feed the country On May 30 1911 the Lord Mayor of Eschada accompanied by Iraqi Army and police officers came to the British Com mander to ask for an armistice whi h was quickly arranged and leg I Government in Iraq

was restored with the return of the Regent With the restor tion of constitutional govern m at u der the Premiership of Juri al Said

m at u det the fremiership of vari at said Iraq quickly returned to normal On the 16th January 1943 Iraq declared war on the Axis Powers and a few days late she acceded to the United 't tions Part signed at Washington on the 2nd January 194

Washington on the 2nd January 199
In April 1945, the Iraqi Government accepted
the invitation of the United States Go eram nt
to participate in the San Franci.co Confer nee
and a delegation was sent headed by Arebad al
Umari the Minister for loveign Aff in This er of the Umari the Minister for Foreign Aff irs. This ter also idelegation, in concert with delegations from other Arab States, later signed the Charter of the inadequate and the site is malarious United Nations

Iraq has also played a prominent part in the formation of the Arab League, a confederation Iran authority

The Iraqi Army has now been reformed and reorganised with the assistance of a British Military Mission, and is quickly becoming an efficient force which can be used, if necessary, to maintain internal security within the country

In October 1913, the Regent paid an official visit to the United Lingdom, where he had the honour of being entertrined by Their Mijestics the King and Queen for two days at Bucl ingham Palace He returned later in the year, after having toured war time Britain, which enabled him to form a personal appreciation of the extent and scope of the British war effort He left Iraq again in May, 1945, on another official visit, this time to the United States, spent a short time in Canada, and then proceeded once more to the United Kingdom

Iraq has filled a place of considerable strategic importance in the war during the invasion of Russia by German, and the aggressions of Japan in the Last The Gulf Ports and the roads, rullways and airways of Iraq and Per-la became a main route for the supply of the USSR upto 1944, particularly when the normal sea route was hazardous. Iraq has furnished a vital link in the long Allied lines of communication to the Far Last, and the export of oil to the Medi terranean through the pipeline from Kirkuk, and down the Shatt el Arab by tanker from Abadan has continued without interruption

A New Chapter —As the result of the Afghan War of 1919 Indian frontier policy was again thrown into the meltin pt There was much vague discussion of the position in the course of the month which followed the Afghan War and the troubles in Wa iri tan which succeeded it but this di cussion did not r ly come to a head until February M rcl 19
The Budget then present d to the country
t vealed a serious financi | position | It showed that de pite seriou increase in taxation th county had suffered a se les of deficits which had be n in need out of borrowing. Furth r heavy t xation was proposed in this Budget but even then the equilibrium which

flairs, or shall we revert to what was known Wazir militia either mutinied, as at Wana, or s the close border system, as modified by ord Curzon, of withdrawing our regular troops strategic positions outside the tribal area, aving the tribesmen, organised into militia, to eep the passes open, and punishing the tribes ien by expeditions when their raiding propen ties become unbearable

The Curzon Policy -The Curzon policy, dopted in 1899, to clear up the aftermath or he serious and unsatisfactory Frontier rising 1897, was a compromise between the "occupa ion" and the "close border" policies It was ared on the withdrawal of the regular troops so ar as possible to cantonments in rear whilst the contier posts, such as those in the Tochi at Vana and in the Khyber and Kurram were held y militia, recruited from amongst the tribesnen themselves The cantonments for regular roops were linked so far as possible with the indian railway system, so as to permit of rapid einforcement But it must be remembered hat like all Frontier students, Lord Curzon did not regard this as the final policy He wrote in the Memorandum formulating his ideas. It is of course mevitable that in the passage if time the whole Waziri country up to the Durand line will come more and more under our control No policy in the world can resist or reatly retard that consummation. My desire s to bring it about by gradual degrees and bove all without the constant aid and presence of British troops" The Curzon policy, though t was not pursued with the steadfastness he would have followed if he had remained in contol, gave us moderate or rather it should be of this policy produced an acute controversy aid bearable frontier conditions until the It was one thing to say that commanding posts afghan War It then broke down, because in Waziristan should be retained, it was Arghan war it then broke down, because in wazinstan should be tribal militia, on which it was based, could another to decide what these posts should be not, when left without the support of egular troops in the day of need, withtand the wave of fanaticism and other mounted, irregular force not territorially onditions set up by the Afghan invasion of recruited, officered by British officers.

ibermen but interfering little in their own 1919 The Khyber militia faded away, the The pillar of the Curzon system fell degerted

The Policy—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmaford, the then Viceroy, in a speech which he addressed to the Indian He said it had been decided to Legislature retain commanding posts in Waziristan, to open up the country by roads; to extend the main Indian railway system from its then ter minus, Jamrud, through the Khyber to the frontier of Afghanistan and to take over the duties of the Militia by regular troops That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned Such duties are unpopular in the regular army, which is not organised and equipped for work of this character Irregulars have always existed on the frontier, and as they had disappeared with the Militia it was necessary to recreate them The new form of irregular was what have been called Khassadars and Scouts The Khassadar is an irregular in the extreme He has no British officers and no uniform, except a distinguishing kind of pagn. In contradistinction to the old Militia, he finds his own rifle As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pry and no questions are asked If they desert in the dry of trouble, they lose their pay but the Government loses no rifies, nor does it risk mutiny or the lose of British and Indian officers But the application of this policy produced an acute controversy

V —WAZIRISTAN.

Geographically, Waziristan is a rough paral-elogram averaging 60 miles from East to West and 160 from North to South The western right and round Bannu to the sand desert half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand eet high, which forms the water shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan This is the western boundary On the east is the Indus North is the water shed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District South is Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus

The western half is a rugged and inhospitable

medley of ridges and ravines straggled and con-fused in hopeless disarray The more inhabited portions lie well up the slope at heights of four to six thousand feet Here are our outposts of

The submontane tracts from the hills to the in the Marwat above Pezu

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfail

Inhabitants -The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes, Dayways, Mahands, Dayways, and their properties of the race. main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Wazirs Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in lvely from the Durand Line, in the centre of the bright political comet like the Afghan War of grazing district, the latter within the centre of the bright political comet like the Afghan War of grazing district.

Unlike other parts of India, however these wild people a knowledge little allegiance to malks or headm n No one except perhaps the Mulla Powind h till his death in 1913 could be a supplement of them. A his following.

sweak of a y rottlen of them a histollowing. Policy—The policy of the Util h was at first one of non interference with the tribes. Even move only part of the country is administered Gradually it was found that more and more and the country of the country is administered Gradually it was found that more and more and this was attempted by expeditions: a portion of the country with Revulars followed the bodies where raiders usually debouched at the points where raiders usually debouched at the points where raiders usually debouched at the points where raiders usually debouched at the points where raiders usually debouched at the points where raiders usually debouched at the points where raiders usually debouched at the points where the points were described to some \$500 Millist with British Officers; their disposal who were be cked up by the participant of the points were occupied also for tithel seconts as necessary Gradually as occasion required posts were occupied also for tithel seconts as necessary or administration of the occasion required posts were occupied also for tithel seconts as necessary or administration of the washes which all similarity the Trecht in the Washes Washes Similarity the Trecht in British arms were shown in every recound for Government supporters. The Frontiers Wazırıştan:

The Frontiers of the land the grants of the rest of the land. The agriation was there is shooting up or other pursuit of tribal feuds is permitted upon them the villagers to proceed to and from any their women, the tribesmen applied ban against shooting upon the tribal for to introduce primary edulated beautiful to the wants of the highway efforts to introduce primary edulated possible and achieved as much as could be expected. The hospitals could be expected. The hospitals ensaries maintained for irregular alted Scouts, employed about the formally applied for the establishment been appreciated that the necessary surgical instruments, the the necessary surgical instruments, is they had saved this from the time. British formerly left the country. In they offered to provide such an institute the necessary surgical instruments, is they had saved this from the time. British formerly left the country. In the order, they offered what they had so occupied, following an encouraging from the local Wazirs, in 1929 A order the country of the local Wazirs, in 1929 A order the local Wazirs, was occupied, following an encouraging from the local Wazirs, in 1929 A coad had already been run out from through Chagmalai and the Shahur through Chagmalai and the re deprived of them A road has been connecting Fort Sandeman via Gulkach, Gomal river, with Tanai, on the Sar Wana road A motor road his also been uted from Razmak through Kaniguram, heart of the Mahsud country, to Wana completed in 1933 and the only disputes cred with its construction arose from the cord with its construction arose from the violent combustion was Peshawar city, where yof the tribesmen whose villages he along tute and who sometimes fought one another cure road-making contracts

ngress Agitation —A startling new deve cure road-making contracts
not upon the North-West Frontier during was the spread thereto of agitation carried in pursuit of its efforts to bring political ure to bear upon the Government of India, above them, His Majesty's Government Congress at its annual session at Lahore week following Christmis, 1929, adopted or gramme alming at the separation of India, at the British Empire and at the promotion in India to secure this end Indial, at a woedly set out "to make at the British Empire and at the promotion in India to secure this end Indial, at the British Empire and at the promotion in India to secure this end Indial, at a wordly set out "to make at the British Empire and at the promotion in India to secure this end Indial, and especially a campaign to promote ation, and especially a campaign to promote administration to a standstill, commenced over India immediately after the Congress to the N W in the British Christman and the secure this end Indian in India to secure this end Indian in India to secure this end Indian in India to secure this end Indian in India to secure this end Indian in India to secure this end Indian in Indian to secure this end Indian in India to secure this end Indian in Indian to secure this end Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian in Indian indian indiant in Indian indiant in Indian indiant in Indian indiant indiant indiant indiant indiant indiant in Indian in Indian indiant in

force The Afridis twice endeavoured to raid the plain and the Upper Mohmands in 193 Feshwar in force but by combined air and when spring and early auminer once mot la d action were both times driven back to facilitated their methods of camplations. their hills with no achievement to report The Oraks la of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western class attacked a post in the Upper Kurram and endeavoured to attack Parachia r Rurrain and endeavoured to state a Factorial Reliped by the machinations of Congress agents they anceeded in drawing two or tirecolans of Afghan tribesmen across the border into the fray Combined air and ground action cru hed these efforts The Tochl and ground The Wari a heavily attacked Datta Khei but were speedily brought to order by force The Mahauda were similarly repulsed and punished when they assaulted florarogha in the valley of the Takki Zam

All outbreaks of revolt were suppressed in the a me manner and the stablishm at of new fortified posts on the Peshawar plain diately opposite the main valleys leading out of Tirah and the construction of roads for their or Tinh and the construction of reads for their service now indicate the application of the a function of the application of the allowed and the log ref set to assent to the but being there by depirted of arcess to their normal winter craining grounds on the Khajuri and Aka Lh i plus and prevented from visiting Fe haves the application of the contraction of the contraction of the deferring centre they came in and accept and retrieved the contraction of the contract ed peace under the new conditions before the opening of the wi ter of 1931 3 The Afridis I ter asked for roads into Tirah but ar not yet sufficiently agreed among themselve about the point for construction successfully to broceed

Mohmand Mohmand Outbreak in 1933 — Di turb nees in the Moh n nd country during the summer of 1933 both illustrated the opera tion of the modern Frontier policy and the need to a construction of the process of the purpose as at all. The Mohmands may for the purpose of pre-entdescription be divided into two catego ies and the country of the same hills down to the Pethanse had country at the highla do of the H hmand country at the fact and the Low r Holmands whose country at these from the lower altitudes of the same hills down to the Pethawar Plain Through the country of the Upper H hmands pa ses the Durand line hat the total same than the same than the same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line hat the total same passes the purand line had been passes the purand l the Upfer II hmands pa ses the Durand line to the Afghan Government have never agreed to the Afghan Government have never agreed to the Afghan Government have never agreed to the Afghan t

in 193 during the r volutionary Red Shirt mpaign in connection with the Indian National c mpaign in connection with the indian assumed to Congress in the Pabawar Plain the Upper Mohamand decided to join in the disturbances and raids in the adminit ed territory immediately northward of Pesh war. The Lower Michamand re de cribed as the Assured Tribes. The m aming of the d scription is that the British Indian ambrofiles a ure them Thies The m aning of the d scription is that I were working the British Indian authorities a ure them the Upper M humanis s ing for rotection againg the titles of the Upper in the Cital and nod being carried to the stack of the Upper in the Cital and nod being carried to the part of the control of the control of the control of the control of the control of the Cital and the Cit

when spring and early summer once more facilitated their methods of campaigning commenced retributory raids upon the Halimzai and other Assured clans The attacked clans and other Assured clans The attacked clans appealed to the political authorities for belp and that help they were obliged to give

About the same time as this trouble was About the same time as this tronic was germinating ther appeared in Bajaur a country immediately to the north of that in which the events ju t described dev loped a Pretender to the Afghan throne He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be po sible in Afih ni tan. This c mpell d the British Indian authorities to take mea ures in fulfilment of their obligations of good neighbourliness to Aigh nistan

Road construction from the Peshawar Shah losd construction from the resultwar shall bade road north; and strough Ghaianai into the Hallmrai cou try and towards the passes which I ad from that country into the upper extremittes of the Bajaur Valley was undertaken and two b igades of troops with other details were sent for vard up it to assi t in dealing with the Upper Mohmands At the same time a replanes bombarded the village of Kotkai in Upper Bajaur which h d given sh liter to the Pretender furth r serial demonstrations were made and the Bajauris were given an nitimatum demandl g the surrender of the Pretender by a given date

The Upper Mohmands continuing aggressive and the Bajauris obdurate there was good prospect of a campaign over the same country prospect of a campaign over the same country as that covered by the campaign of 1897 It seemed likely that the Ghahamai Rood would be as and that another road for troops would also ha e to b constructed from Malak nd up the Baj ur valley itself so that by the meeting of the two roads in Upper Baj ur there would become establi led a circular road through it is part of the trib it rift ry resembling that running through Kortl Wa Instan

In the end the Upper Mohmands partly doubtl a because of punishment which they spd p rtly probably bec use of influence brought to be r upon them from Kabul retired to their hills and after negotiations entered into bonds it keep the peac and the Bajauri while maintaining on grounds of tribal custom their refusal to urrender the Pretender nevertheless expelled that pe son from their territory probably into Afghanistan H re then the trouble ceased The nett result of it was the construction of the road through Ghalanal and th rapid development of bus services and other activities of civilization which speedily took place along it

The Uppe Mohmands m de another descent in the s mm r of 1935 The Lower Mohmand quarrelled mong thems ly sov r th di tribu tion of road mai tenance contracts and th Upper Mohman is decid d to fi h in the troubled Upper Montana is uccid of on a in the crouosed we ters Successful military operations ended in the Upper M humands s ing for peace—and in the Gal uair to de being carried forward over the value ki. Tass and down beyond it on to the pli in which extends to the n turnit toad ju cti n where the Upper Bajaur Valley

Tori Khel Rebellion — The Wazirs and inaccessible country in and about the up Mahsudsin 1930 showed signs of rebelling against reaches of the Shaktu river were made Government in parallel with the Afridis Congress party agents endeavoured to persuade them to do so They were at the outset firmly dealt with and peace was thus assured almost without its having been broken All went peacefully until the autumn of 1936 and then trouble was produced in North Waziristan by the fagir of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name A Muslim lad was accused in 1936 of kidnapping a Hindu girl of Bannu Apparently, she eloped She was restored to her parents by order of the Civil Court, on the ground that she There was a good communal excitement about the matter and the fagir started an agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was an interference with There was also, in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque This was settled in the Lahore High Mushms accepted the decision The faque of Ipi lumped together the Bannu Girl Case and the Lahore (Shahidgan) Mosque Case and upon them raised among the Waziristan Tribes the slogan, "Islam in Danger" His demand for a holy war was only taken up by a sub section of the Pori Khel section of the Wazirs of Northern Waziristan Their elders begged Government to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did. The troops were heavily fired upon and had to fight their way out Efforts to round off the matter before it developed into a major affair failed and there followed a war in which the Tori Khel were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gangs fighting the authorities and others connived at such acts Not until the fall of winter towards the end of 1937 were the Tori Khel and the bands of arreconcilables under during leaders whom the fagir inspired by his agitation, beaten by extensive military operations into asking for peace. The faqir has not been caught for peace. The faqir has not been caught conditions and continues a troublesome influence. The summer campaign in 1937 involved the employment of 50,000 troops. Before they were withdrawn in the following winter 106 miles have been on new roads opening up some of the hithertol of the war

faqir of Ipi, however, assisted by sevenotorious outlaws continued to keep Wazirist particularly the North, in a disturbed condit throughout 1938 and on into 1939 It i therefore, found necessary to keep an ex brigade in the territory and spasmodic operation. against recalcitrant gangs proceeded by is and air and have not vet succeeded in restor normal conditions. In the summer of 1! a temporary complication was provdied by appearance amongst the Mahsuds of a Syr called the Shami Pir who was only just preven from leading a tribal incursion to support rebellion against the Government of Kat The persistence and expense of the trouble Waziristan, constituting as it does a heabreaking set-back to the "policy" which I seemed for fifteen years to be achieving mater results, has provoked renewed discussion Frontier policy especially in regard to milita commitments which were examined by a Defer Committee under the chairmanship of Li Chatfield who visited India on behalf His Majesty's Government towards the e Although hostile sections 1938 persisted with mischief there was thought April 1939 & be sufficient justification for hope that the period of major military operatives over and Waziristan was in consequent returned to the charge of His Excellency to Governor of the NWFP, in his capacity AGG for the tribal areas Sporadic durbances have continued into the period of terror of the tribal areas the Faltir remains second world war and the Fakir remains disturbing influence

Wazırıstan Outrages 1939 - During Waziristan was in a state of continual unre The list of offences committed by the Ahmed tribesmen by the end of the year mounted over fifty cases of major outrage They cluded blasting of bridges and destruction communications, holding up and looting lord snipping, kidnapping and several cases of murd The situation became intolerable and necessiti ed military operations Two columns of troops were sent to the Ahmedzai salient and it took three months to subdue the hostile elements and clear it of offenders and outlaws

A detailed investigation into the economic conditions in the tribal areas, as a preliminary step to the adoption of measures aimed at radical improvement of the tribesmen, was thereupon believed to be opportune and would probably have been attempted but for the pre occupations of the war

VI —AFGHANISTAN

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great British toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the tirst Afghan was should be in a position to move large forces the influence of Russia that the tirst Afghan was a fourth—the most melanchest.

that there were only two main gates up arrenals under foreign supervision to hur to India—through Afgh nistan the historic route to India along which successive in along the purpose of littish poil y to lose them and of kussis to endeavour to keep them at any rate half open To this of having pushed her trans Fershan railway to Samara and Afgh and the supervision of the purpose of littish poil y to lose them and of kussis to endeavour to keep them at any rate half open To this of having pushed her trans Fershan railway to Samara and Afgh and through a military fine of the transition of the same and the supervision of the same and the s

ty in the kingdom and in Central Asia
its zenith

der of the Amir —It is believed that ad lived Habibullah Khan would have this authority for a progressive policy lanistan, by opening up communications ctending his engagements with India s courted by the representatives of Persia ne Central Asian States as the possible centre of a Central Asian Islamic At this moment he was assassin-1 the 20th February 1919 The circumsurrounding his murder have never been volained, but there is strong ground for shef that it was promoted by the paries who had harassed him all his These realised that with his vindication war their time of reckoning had come, anticipated it by suborning one of his o murder him in his sleep His brother, Ith Khan, the nominee of the fanatical t, was proclaimed Amir at Jelalabad in ad, but public opinion in Afghanistan d at the idea of the brother seizing power he corpse of the murdered man layat and Amanullah, were not disposed ive their heritage Amanullah was at controlling the treasury and the arsenal pported by the Army Nasrullah found it ible to make head against him and with The new Amir, Amanullah, at once inicated his accession to the Government la and proclaimed his desire to adhere to additional policy of friendship But his ities at once commenced, he had to deal the war party in Afghanistan, he was nted with the dissatisfaction arising from anner in which the murderers of Habiband been dealt with, the fanatical element rasperated by the imprisonment of Nasrul nd the Army was so incensed that it had removed from Kabul and given occupa divert its thoughts A further element of exity was introduced by the political on in India The agitation against the tt Act was at its height The disturin the Punjab and Gujarat had taken

Afghan agents in India, of whom the prominent was Ghulam Hyder Khan ighan postmaster at Peshawar, flooded nistan with exaggerated accounts of dian unrest. The result of all this was to acc the Amir that the real solution of fleuities was to unite all the disturbing ats in a war with India. On the 25th his troops were set in motion and simularly a stream of anti-British propaganda enced to flow from Kabul and open in

Speedy Defeat -The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad Nevertheless the regular Afghan Army was rapidly dealt with Strong British forces moved up the Khyber and selzed Dakka Jelalabad was re peatedly bombed from the air and also Kobul Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelala bad Inten days the Afghans were severely defeated. On the 14th May they asked for an Armistice With the usual Afghan spirit of haggling, they tried to water down the condi tions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpinds on the 26th July On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp 196-197

Post-War Relations—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards During the hot weather of 1920 there were prolonged discussions at Mussoonie between Afghan Representatives and British officials under Six Henry Dobbs These were private, but it is believed that a complete agreement was reached Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace This Mission crossed the border in January 1921 and entered Kabul where a peace treaty was signed

The main points of the Treaty are set out in the Indian Year Book, 1923, pp 197, 198-199

Afghanistan after the Great War -Since the War the relations between Afghanistan and Great Britain have been good and improving There were painful episodes in 1923 when a murder gang from the tribal territory in British side of the Prontier committed raids in British India, murdering English people and Lidnapping English women and then took refuge in Afghanistan In course of time this gang was broken up His Majesty the King of Afghanistan bud head and the same which head to be same to b istan had troubles within his own borders which made him glad of British help The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern But Afghanistan methods of administration is an intensely conservative country and no changes are popular, especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of acroplanes and other assistance afforded by the Government of India the insurrection was Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty, he had to withdraw almost the whole of his adminis

Saviet Penetration—Taking a long view a much force with a view to injuring the other a much more notable development of the independence or otherwise such activities will policie of Afghanistan at the period to be necked Similarly neither of the con which the foregoing notes apply was the tracting parties will allow armed forces arms penetration of the Russians who had ammunition or other war material meant converted the former Trans Casplan States of Partie Russia into Soviet Republics The top asstructure through its dominations Trainst literal into Soviet Republics 1 no object of this policy was gradually to sweep into the Soviet system the outlying provinces of Peria, of China and of Afghani tan In Peria this policy was folied by the vigour of the Sipar Salah Reza Khan. In Chinese Turkestan Sipar Salah Reza Khan, in uniness ausersman it was pursued with qualified success. In Alghanistan it also made certain progress, The first step of the Russians was to extend the Soviet Republics of Tajiki.tan Uztekia and Tu kmanistan es as to absorb all Northern Afghanistan This was later all Northern Afghanistan This was later appare by abandoned for the moment for a more genito penetration Large subsidies, mostly delivered in kind ero given to Afghanistan Telegraph lines were erected all over the country roads wer constructed large quantities of arms and mmunition were supplied whilst an air force with Russian pilots and mechanics was created and was I reely developed In return the Russians received important trading facilities

Russo Afghan Treety -Outwardly the relation between the two States are friendly. In December 1992 the Afghan papers published the text of a new treaty concluded with Soviet the text of a new treaty concluded with Soviet the province was sign of a August Sist but the province which the try fixed in Moscow on February State The principal cluss of libs treaty as disclosed in the Afgh a papers are as soli we reason. are as foll ws -

Clause 1 -In the event of war or hostile action betw en one of the contracting parties and a third power or powers the other con tracti g party will observe neutrality in rea pect of the first contracting party

dominions also they will do nothing which may consists also they will do nothing which may the King returned to Kabul in it e late summer as portion or military harm to the other and the contracting parties particularly and the contracting parties particularly and the contracting parties are contracting parties and the contracting parties are political and during his long absence and the contraction of the contractio other parry Deadles this in case one accuracy of a third power or power is boothic towards one or the contracting parties the other contracting party will not help such hostile folicy at further will prohibit the executio of such policy and hostile actions and measures within its dominions.

Clause 6 -This treaty will take effect from the date of its ratification which should take place within three months of its signature it will be valid for three years After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan whi h mount d to no more than the establish ment of diplomatic relation

A British Minister is established in Kabul as well as the representatives of other European States The representatives of Afghanistan re established in India and in London and at some of the European capitals. The various sub-sidiary agreements under the Treaty have been carried into effect

The King a Tour —In the closing months of 19 7 His M jesty King Amannila accompanied by the Queens a dasta of officials commenced a long tour to India and Europe It is under a long tour to India and Europe It is uncer stood it at this was one of the cherished ambit tions of his father King Habibullah who was as assinated in 1910 King Amanulis when he set out was warmly welcomed in India and received a great popular greeting in Rombay and received a great popular greeting in Bombay both from his or religionists and from members of other communities who forgot the invasion of the communities who forgot the invasion of the communities who forgot the invasion of the was the guest of His Majesty King George V in London and wi then the principal huropean capitals He made a State visit to Turkey and returned to Atghantisan by way of Soviet Russia and F rish A series of treaties with the govern ments of the countries visited was announced and the King returned to Kabul in the late summer

institutions of the western istude he visited and in particular by the dramatic forcefulness with which Mustapha Kemai Fasha had driven Turkey along the path of reform or perhaps it would be more correct to any westernisation in this he was necuraged by the Queen who was desirous of seeing the women of Aigh hist n measures which fat dominous.

City 4 3.—The high contracting parties are very selective to the fat dominous.

City 4 5.—The high contracting parties are very selection and opportunity won by the fat of the fat dominous and opportunity won by the fat dominous contracting parties are very selection at local contraction at local contraction and contracting the fat dominous contraction and contracting the fat dominous contracting the fat dominous contracting the fat dominous contracting parties of the fat dominous contracting parties contracting parties of the fat dominous contracting parties contracting parties contracting parties of the fat dominous contracting parties contracting parties of the fat dominous contracting parties contractin With every appreciation of the spirit and rection of these changes, friends of His Majes advised the King to moderate the pace ney reminded him that in 1924 far less drastic anges had brought serious trouble in their ain In May of that year the "Lame Mullah" used the standard of rebellion amongst the ilzai and Mangal clansmen of Khost fullahs were openly active against the King nd His Majesty was equally frank in his ostility to them Possibly also well-wishers aggested that what was possible in Turkey, fter centuries of close contact with the Yest, and where the ground had been prepared y missionary effort and a long struggle for he emancipation of women, might be less easy n Afghanistan, where there had been no contact ith the western world

A Change of Kings —Events moved rapidly 1929 A notorious north Afghan budmash, Bacha-i Saqqao, raised the standard of revolt nd inflicted severe losses on the Afghan Regular roops, discontented as they were by arrears of pay Day by day the Afghan representatives in various parts of the world issued nessages asserting that the rebels had been lestroyed, and a rapid series of pronouncements leclared the withdrawal of all the reforms and he establishment of a Council of Provincial Representatives Communications with the outer world were broken King Amanulla and his family fled from Kabul to Kandahar and then from Kandahar via Quetta to Bombay where they took ship to Europe King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained Bacha-i Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul Without money, administrative experience or a disciplined following his throne was a thorny one and he was harassed by constant attacks The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch The most formidable of the new king's adver saries were led by General Nadır Khan, a scion saries were ied by General Madir Knan, a Scion of the old ruling house, with a wide knowledge of the world Heavy fighting took place Fortunes varied Nadir Khan almost gave up his chances as finally lost But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest Nadir Khan thus became victor and shortly afterwards, at the wish of the Afrans. shortly afterwards, at the wish of the Afghans, Bacha-i Saqqao was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom He despatched members of his family to the principal Afghan Legations in Purope A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with praymented success 1930, and was repressed with unexpected success and vigour There followed a serious rebellion in Kohldaman, Bacha i-Sauqao s country And thereafter This also was promptly quelled And thereafter Nadir Shah ruled without challenge He devoted himself to the reorganisation of his Army Fugland was strictly neutral during

her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him He gave evidence of his friendliness towards Britain and India He co operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India li response to the Congress agitation in the summer of 1930. The trade routes were reopened and the new King again took up Amanullah's mantle of reform but in a states. manlike manner which carried the Mullah along with him

Murder of Nadır Shah —This ordered marci of progress was tragically interrupted by th murder of His Majesty Nadir Shah on the after noon of 8 November 1933 His Majesty was attending a football tournament prize giving when a young man among the gethering efence. when a young man among the gathering steppe forward and fired several revolver shots into hir at close range, killing him instantly It late appeared that the assassin committed the crim in revenge for the execution of a promine Afghan who had been caught deeply involving treasonable activities after he had been mercifully treated for earlier behaviour of the The assassin's father was stated same kind have been this man's servant was not followed by general or widespred disorder. The members of Nadir Shah's familiand his prominent officers of State stood loyal by his heir, his son, Muhammed Zahir. The members of State stood loyal by his heir, his son, Muhammed Zahir. The members of State stood loyal by his heir, his son, Muhammed Zahir. The members are was all placed on his father's throne at his accession, was in due course acknowledge. his accession was in due course acknowledg and confirmed throughout the kingdom in t traditional manner The new King started i reign with a high reputation for courage as steadiness. He early issued assurances to I people that he would continue the policy of I No untoward ever father in affairs of State have occurred in the years that have sin past during which the young King has this sagacity and good government gradual strengthened his position on the throne at this sagacity and good government gradual strengthened his position on the throne at by the development of communications at trade, done much to encourage the establisment of settled conditions among his peop A mutual desire for close relations and part ularly economic understanding led in 1938 exploratory negotiations between India at Afghanistan with a view to seeking some for trade agreement. of trade agreement

The Chief Ministers of the Afghan State Muhmud Hashim Khan (Prime Minister) a Shah Mahmud Khan, two surviving broth of Nadir Shah and the Kings uncles Wi their help the stability of the Afghan Kingdi has been successfully maintained has remained not unfriendly to Britain a India, and they have adhered to the Saadab All the gre Pact with Turkey, Iran and Iraq All the gre European Powers and Japan maintain Emb sies or Legations in Kabul, and it must be record of the present Afghan Government that tune with the ideas of their predecessors a in the interest of their continued independen in the interest of their continued independer as they see it, they have pursued a policy as they see it, they have pursued a policy as their relations with the Power

VII -TIRET

Recent British policy in Tibet is really nother hase in the long-draw-not ducib between Great is an analysis in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central and Russia in Central Russia no open up friendly relations with a Power which was giving us trouble on the frontier and grad ally to pave the way to a good un ing grad any to pave the way to a good un-iteratanding between the two countries. After Varren Hastings departure from India the subject slept and the last Engli bman to visit beas until the Younghusband Expedition of 1904 was the unomical Manning In 1885. ni 1004 was the unomeral hanning in 2005 inder its inspiration of Colman Macaul y of the Bengal Civil Service a further attempt was made to get into touch with the Tib tans but it was abandon d in deference to the oppo int it was abandon a in deterence to the oppo-lition f the Chinese whose au crainty over fibet was recognised and to whose w multi the war with Japan Brittsh statesmen-were inclined to pay excessive deterence. But the to titlo on the Tibetan frontier continued to be most unsatisfactory The libetan were aggressic and ob tructive and with a view to putti g an end to an intofresthe situs alon a Consvention was necoliated between Great Britain and Chi a in 1890. This laid down the boundary between Sikkim and Thet is admitted a Britliah protectorate over Sikkim and pawed the way for ar agements for the situation of t view to putti g an end to an intolerable situa

The Expedition of 1904—In view of these condutes the Government of India proposed in 1903 to despatch a mission with an armed escort to Llasa to discus with an armed escort to Liasa to discus at the out tanding questions with the Tibetan authorities on the spot To this the Home Government could not saent but agreed in conjunction with the Chinese Germment to a joint meeting at Kin make Jong on the Tibeta side of the frouter Sir & ruck Younghubband was the British Jong on the Threet side of the Thirtish (Fig. 1978) and the Thirtish (Fig. discuss commercial questions if a c s ary

Railways to India

The prospect of linking Europe and Asia by Chinese Turkestan The construction of a railway on sing easier set strongth Asia Nilvo and Associated men sended for general results of the prospect of the prospec many years before the end of the nineteenth century A proposal was put forward in 1895 for a line of 1 000 miles from Catro and Port Bald to Lowelt at the head of the Persian Gulf Walle these projects were in the air German enterprise stepped in and made a small begin ning by con tructing the Anatolian railwy system its lines start from Scutari on the

in invelgling Turkey into it saw the final stages in inveiging Thrivey into it saw the nink bayers of the construction of the railway pressed forward with p sai nat energy. Thus before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and was in use from Scutari cross A tolia over th Taurus Monn tains to Aleppo and thence eastward across the The time is lines start from Scotari On Los (afine to Aleppo and neuron consecutions of the Borchorors opposite Con Emphrates to a point between Mebbin and start plus and serve the extreme we term lifewill. The Germans had also by that time and of the And open this foundation constructed a line to Bashdad at the eastern to be said the Bashdad Rallway.

Meanwhile Russia was pushing her railway stream as the property of the war compelled the British to undertake the stream as the property of the war compelled the British to undertake the stream as the protest of the mouth of the formation and Atghanistan to the borders of Shatel Arab the broad stream in which the

gris and Euphrates, after their junction, flow to the head of the Persian Gulf The system is to a metre-gruge line from Basra via a sirieh, on the Euphrates, thence northirds to Baghdad, the line passing a constrable distance westward to Kut-l-Amara, historic fame From Baghdad the line is eastward approximately to the foot of the se through which the Persian road crosses in the neighbourhood of Kifri in the direction Mosul It has for some time been open as as Kirkuk, 200 miles northward of Baghdad di 112 miles southward of Vosul Similarly, to Taurus railway has long been open eastered of Aleppo as far as Tel Kochek, on the roam frontier, a few hours' road motor run, inth-west from Mosul Through passenger rivices between Iriq and Istanbul are run a ad motor service is linking the railway termini Kirkuk and Tel Kochek. The gap in the alway has now been closed, and through mmunication was established at the end of 40 A line also runs westward from Baghdad Feluja, on the Euphrates

The Trans-Persian line to join the Russian aucasian system and the Indian railways st assumed proportions of practical import ice in the winter of 1911 Both the Russian d the Indian railway systems were by then ell developed up to the points likely to be the rmini of a Trans-Persian line The Russian stem reached Julfa, on the Russo-Persian ontier in the Caucasus During the war this line as carried thence southward into the region east ad south-east of Lake Urumia The Indian rail ay system, on the borderland of India and Persia, as similarly much extended and improved during e war A new agreement which was negotiated tween England and Persia specially provided for ritish assistance in the development of Persian tural resources and particularly for the tension and improvement of Persian roads itable for motor traffic, but the agreement me to naught

A railway connection between the India and the Russian systems has again assumer considerable importance after the German attach of Russia along with other democracle like China and USA against the aggression of Germany and Japan With the whole of the European west coast under German controlor or domination and the eastern shores of Siberi rendered unapproachable by the Japanese the only route which British and Indian supplies to Soviet Russia can take is via Iran The Quetta-Nushki line which had been extended during the last Great War upto Duzdap (of Zahidan) in Persia had been put out of use afterwards beyond Nok-kundi. This is again being set in order but it is not known upto the time of writing whether through rail connections are being arranged to the Soviet from in Caucasia from either the Persian Gulf of British Baluchistan in India

There also remains the possibility of linking the Russian and Indian railway system by way of Afghanistan The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontler of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman The completion of a broad gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan

The main interests behind Iranian railway communications had hitherto been the replace ment of mule tracks by rail roads, providing convenient rail connections between the posts in Persian Gulf and the interior to develop import and export trade and to give thorough connections between the different countries all round Iran The Iranian railways have, however, assumed special importance of late on account of supplies from the allies to USR through Iran

The Fighting Forces (Indian Army)

The great supey army of India originated in formed by linking existing battallons of ten he at all etablishm at of grands moven as companies each with large establish ments of some surolled for the protection of the facts in a fact of the East India Company but supeys armies were at the some time reorganised on ries of the East India Company but sepays were first enlisted and d sciplined by the French who appeared in India in 1665 Refore this who appeared in India in 1665 d tachments of soldlers were sent from England Bombay and as early as 1665 the first for tifled position was occupied by the East India C mp ny at Armagon near Masulipatam Madras was acquired in 1640 but in 1654 the garrison of Fort St. George consisted of only ten men In 1861 Bomb y was occupied by 400 sold: Is and in 1868 the number was only 95 of whom 93 were English and the rest French Portuguese and Indians

After the deciaration of war with France in 1744 the forces wer considerably increased in 1744 the forces wer considerably increased in the did not prevent the French capturing the train 1745 Following the French example the first training the french example and in the first training the first training training the first training t Duplet were contemplating fresh attacks. It became necessary for the Luglish Company to toma 1 rger military establishm at The new comma dant at once set about the organisation and discipline of his small force and the garrison was given a mpany formation was the beginning of the regular Indian Army of which lawrence subsequently became Com-mander in Chief In M dras the Europe n companies were dv loped into the Madras Fulli rs similar companies in Enegal and Bombay became the 1st Bengal and 1st Bom-haw William Companies of the Companies bothmay became the 1st Bengal and as Dom buy Fulli is The native Infantry were simi-larly ore nised by Lawrence and Clive By degrees Royal Regiments were sent to India the first being the 39th Foot which arrived in

Straggle with the French -From this Struggle with the French—From this time fra century or more the army in India was engaged in co stant war After a prolog ged war with the French whom Duplex had by 1750 raised in the position, of the heading, stream in India, the efforts of Stringer Lawrence Cive in India, the effort of Stringer Lawrence Cities and Tree Cools completed the downtall of and Tree Cools completed the downtall of and Tree Cools completed the downtall of the Stringer Cools of the de th f Tipu and the capture of Seringapatam

similar lines and cavalry and artillery com

panie were raised In 1 98 the Marquis Wellesley arrived as Governor Gen rai firmly imbu d with the neces Governor Gen ral strainly inside d with the neces alty of de torying the last ventices of French inducence in pursuance of this policy he with the French and then intend his attention to the Mahratta States in which Sindilla had established power over the Mughal Lumperor at Delih by means of a large regular strup off ceretely Lumopeans under the French adven terro by Luropeans under the Friend Abyen turer lerron. In campaigns against Shidhla in Hindustan by a Britl 1 Army under Gener I Lake, and in the Deccan against that prince and the R is of Betar by an army und r General Wellesley afterwards Duke of Wellington Wellesley afterwards Dirke of Wellington the power of these Chiefs was broken in the battles of La wariand Assaye Fre chi fluence was Bnally destroyed and the M ghal Fun peror was released from the domination of the Mahrattas Subsequenti; Holkar also was reduced and British power established on a firm footing

Indian Atmy Mutiny at Vellore -Th Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 18 7 The most serious of th s outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort while the striped flag of the Sultan of Mysore whose striped flag of the Sultan of Mysore whose sons were confined there was rai ed upon the ramparts. The mutiny was suppressed by Colonel Gille pi who kalloped over from Arcot at the head of the 19th Light Dragoons by w in the gate of the fort and destroyed the muti-neers. This retribution put a stop to any further outbreaks in the army

Oversens Expeditions—Several import ant overs as expeditions were undertaken in the early part of the nineteenth c ntury Bouroon was raken from Yos French Coylon and the Spice Islands were wrested from the Dutch and Java was conquered in 1811 by a force I rgely composed of Bengal troops which h d volunteered for this service

a d volunteered for time service in which the b ave Gillespie wh had distinguished himself in Jara was killed when leading the assault on th fort of Kalunga The Gurkhas wers overcome in this war after offering a stout resistance

stout resistance In 1817 hostilities again broke out with the Mabrattas who rose against the British during the progres of operations against the Pindaria Practically the whole army took the field and all India was turned into a vast camp The Mahratta Chiefs of Poons Nagpur and Indore in law in the property of the tost in succession and were beaten respectively at hirke Sitabaldi and Mehidpur This was The tide of

battalions numbered according to the The Bengal Army was hev were raised ed in three brigades of horse artillery, talions of foot artillery, two regiments of an and 68 of Indian infantry, 8 regiments dar and 5 of irregular cavalry. The and Bombay armies were constituted lar lines, though of lesser strength

Afghan War and Sikh Wars—), a British Army advanced into Afghan-ind occupied Cabul There followed rder of the British Envoys and the disretreat in which the army perished saster was in some measure retrieved sequent operations, but it had fargeifects on British prestige. The people g effects on British prestige The people Punjab had witnessed these unfortunate ons, they had seen the lost legions which coturned, and although they saw also onging armies they no longer regarded rith their former awe Sikh aggression nostilities in 1845-46, when a large porthe Bengal Army took the field under igh Gough The Sikhs were defeated ubborn fights at Mudki and Ferozeshahr, ening battles, but did not surrender hey had been overthrown at the battles val and Sobraon Two years later an ik at Multan caused the Second Sikh War after an indecisive action at Chilianwala. ave enemies were finally overcome at t, and the Punjab was annexed Other gns of this period were the conquest I by Sir Charles Napler, and the Second se War, the first having taken place in

conquest of the Punjab extended over inter to the country inhabited by those ent tribes which have given so much during the past sixty years while they turnished many soldiers to our army op order on this border the Punjab Fronrice was established, and was constantly d in small expeditions which, while they ed little bloodshed, kept the force em-and involved much arduous work

Indian Mutiny -On the eve of the Indian Mutiny—Un the eve of the in 1857 there were in the Bengal 21,000 British and 187,000 Indian troops, Madras Army 8,000 British and 49,000 troops, and in Bombay 9,000 British 15,000 Indian troops The proportion ian to British was therefore too large for

ian to British was therefore too large for

The causes of the mutiny were many
arious Among these were the annexaolicy of Lord Dalhousie, especially that
the from which the greater part of the
l Army was drawn, interference with the
ges of the sepoy with respect to certain
nees, and lack of power on the part of
auding officers either to punish or reward
mal spark which fired the revoit was the
uction of a new cartridge. The muskets uction of a new cartridge The muskets ose days were supplied with a cartridge ich the powder was enclosed in a paper, which had to be bitten off to expose the er to ignition In 1857 a new cartridge atroduced with paper of a glazed texture lt was currently reported was greased the fat of pigs and cows, and therefore 140,000 Indian troops

324, the armies were reorganised, the junciean alike for Mahommedans and Hind battalion regiments being separated, This was interpreted as an attempt to destrict the control of the contr the caste and the religion of the sepoys S ful agitators exploited this grievance, wh was not without foundation, and added repo that flour was mixed with bone dust and surrefined with the blood of oxen

Disaffection culminated in mutiny at B hampur and in an outbreak at Barrackp where sepoy Mangal Pande attacked a Europe The next most serious manifestat was the refusal of men of the 3rd Bengal Cava at Meerut to take the obnoxious cartrid These men were tried and sentenced to it terms of imprisonment, their fetters being riv ed on parade on the 9th May Next day's troops in Meerut rose, and, aided by the burned the houses of the Europeans a The troops then went murdered many The troops then went to Delhi Unfortunately there was in Meet no senior officer capable of dealing with t situation The European troops in the plaremained inactive, and the mutineers windlowed to depart unmolested to spread t flames of rebellion

Delhi is the historic capital of India time worn walls brood the prestige of a the It contained a gre sand years of Empire magazine of ammunition Yet Delhi wheld only by a few Indian battalions, who joing the mutineers The Europeans who do not succeed in escaping were massacred at the Delhi Emperor was proclaimed suprelin India The capital constituted a nucle to which the troops who mutinied in material places flocked to the standard of the Mughan An army was assembled for the recovery Delhi but the city was not captured until the middle of September In the meantime mutilished spread The massacres of Campa and Jhansi took place, and Lucknow was a sieged until its relief on the 27th September. Yet Delhi " magazine of ammunition sleged until its relief on the 27th Septemb The rebellion spread throughout Central Indand the territory that now forms the Central Provinces, which were not recovered until I Hugh Rose's operations in 1858 ended in the defeat of the Paris of Them. defeat of the Rani of Jhansi

Campaigns -During Minor Campaigns — During War begaintil 1879, when the Second Afghan War begaintil 1879, when the Second Arghan include there were many minor campaigns include the China War of 1860, the Ambeyla Campaign and the Abyssinian War Then followed to Alghan War in which the leading figure we Lord Roberts There were expeditions to Egypt and China, and Frontier Campaigns which the most important was the Tirah Can which the most important was the Tirah Can paign of 1897 There were also the prolong operations which led up to or ensued upon to annexation of Burma, several campaigns africa, and the expeditions to Lhass Burntil 1914 since the Afghan War, the army to India, except that portion of the British further was sent to South Africa in 1899, but little severe fighting although angaged in mag. little severe fighting, although engaged in man arduous enterprises

Reorganisation after the Mutiny of 1857 the East India Company ceased to and their army was taken over by the Cross At this time the At this time the army was organised into the armies, viz Bengal, Bombay and Madri the total strength being 65,000 British in 140,000 Indian stroduction of the command system. Four ommands were formed viz Punjab Bengal ladras and Bombay

Lord Kitchener's Scheme -This system isted until 1904 when under Lord Kitchener s borganisation the Madras Comm nd bolished and the Army divided into three Com nands—the horthern Eastern and Western nands-the Northern orresponding to the Punish Bombay and

lengal Commanda

In 1907 Lord Kitchener considered that con equent on the delegation of administrative owers to Divisional Commanders retention of obers to Display the Lieutenant Generals of lommands led to delay in the dispatch of usiness. The Command system was there re abolished and India was divided into two irmles—the Northern and Southern—each inder a General Officer who was responsible or the command Inspection and trailing of

he troops but was given no admini trative a possibilities

Larly in the War both Army Commanders ook ti e field and were not replaced until 1916 and 1917 when both had practically the same unctions as their prede essors. It was then unctions as their prede essors. It was then ealised that administration was being unduly coltained at Army Headq arters and the m chinery w becoming clonged with unnec s any chie chinery w becoming clonged with unnec s ary detail. To ceure efficiency at A H Q liberefore a certain measure of decentralisation was carried out in 1918. With the alteration of the control of th of the design tion Comm nd Army to t this time, a considerabl Increase was made in the dmini trative staffs of the two Comm nds and the General Officers Commanding were gi a powers to deal with all administrative of rolley and new principles of war

The commands were increased to four in 19 0 each under a General Officer Comma ding in thi ! One of these namely Western Command, was also laked on the 1st No ember 1938 and

res aced by an Independent District

The Chatfield Committee -In September 1938 an anno neem at was made on behalf of His Hajesty's Government that the outcome of the discussion aregued of the role of land and air the state of the s by His M Jesty & G ernment To beed for fly action to

The teed for rly action to place the defenc treat attion of India on a more satisfactory basis a saccepted and at the surgest norther formation of the first surgest in of the first surgest in the surgest s

After ret. Accepting

Several minor re organisations took place to 300 000 for there equipment of certain British arring the following respectively. The provision of the following the several provision of the following the following the several provision of the following the The following is the substance of the main recommendations of the Chatfield Committee

Report Modernised Re equipment -The Committee reported th t in the interests of Indian defence the whole of the array fore s in India should be

modernised with only such minor variations as would not affect the general level of efficiency The types of modernised units were to be as

follows -British and Indian Cavalry light tank regi

ments equipped with light tanks and armoured carriers for reconnaissance ladian cavalry armoured regiments equipped

with light tanks and armoured cars Indian cavalry motor regiments-provided

with motor transport for conveyance of the per sonn I who would be normally on foot British and Indian field artillery regiments-

all regiments w re to be m char I ed and in due course equipped with 5 pounder guns

Sappers and min rs units—with mechanised first line transport and mechanic l power tools,
British and Indian infa try battations—armed with rifles brens and in mortars and fully me-

chanised first line tr asport Units on the North We t rn Frontier would

retain a ce t in proportion of pack m les It therefore recon mended a thorough going scheme for re equipment of all branches of the service. One of the most important fe tures of the modernisation proposals was the mechanition of the bulk of the cavalry and of the first line transport of a large portion of the infantry with the object of greatly increasing the mobility of the

With this end in view the Chatfield Con mittee recommended that the ba is of distribution of the Army in India should b (A) Frontier Defence (B) Internal Security (C) Coast Defence (D)

External Defence Troops
With the increased efficiency and mobility afforded by modernisation it becomes pos ible to provide equ I security with fewer troops though it has to be recomised that it e mai tenance costs of a modernized unit are higher Th mittee carefully consider d these factors in rela tion to the def nce requirem ats of India and to

The total reduction of British troops as mea sured with the establi hment on July 1 1934

was approximately per ent A reduction in the number of mis was all o involved. Spril, of Mu timus—The principle that last uld as far as per title be made in all major respects it withelest in munitions in time of w r was ccept d a d s sch me for re-organ ising and where necessary exts ding the Ord nance Factories in India was recomm nded

rest of 11 500 000 which had been raid to the teom 534 30 000 or Re. 45 or real Accepting to the teom 534 30 000 or Re. 45 or real Accepting to the teom of raide, since 1033 in aid of India, that this c pital xpenditur cannot be found out ture expendance a capital grant up to for theresources available in India His Majesty's

Present System of Administration.

thave offered to provide it from the hequer. The cole condition attached mificent gift is that India should bring a forces up to the standard of equipsitated by modern warfare and adjustical plans to the conditions now obtainworld.

nated that a period of five years would for the completion of the modernisaand the provision of the total capital accordingly be spread over this period tal amount three quarters would be a free gift while one quarter would be d by way of a loan. The interest on a, hovever, would be entirely remitted thive vers, thereafter interest would syable together with instalments of

Defence Liabilities—In estimating ence requirements, the Committee had how far the prevailing conceptions as it is a liability for defence could be held light of modern conditions. Hitherto le has been accepted that India should ible for the "minor danger" of the ce of internal security and for the deer land frontiers, while Great Britain esponsible for the "major danger" of by a great Power upon India, or upon e through India

developments have, however, clearly vulnerable India is to attack in other a those that were envisaged when the has first laid down Such attacks, if dever mature, would so vitally affect a well-being that they would demand iate co operation in effective measures fence In such cases India's defence rly be most effectively and economical by co operation in the defence of side India strategically essential to her

c Committee recommended as a general hat the forces maintained by India adequate not merely for the narrower purely local defence, but also to assist ning what they described as "India's curity," and further that India should ge that her responsibility could not in iterests be safely limited to the local her land frontiers and coasts

ally appreciated that the forces mainindia could only bear a small share in or responsibilities, and that she could wrily bear in full the cost of such forces maintained in India. The committee led therefore that the contribution and by the British Government should ed at the higher level of £2,000,000 a light it has been provisionally raised by

basis it is estimated that it should be r India, without enlarging the annual for defence expenditure, to meet the atenance costs of the forces organised bed on the scale proposed From this ciple it follows that if forces held in he purposes covered by the joint rey are used outside India in an emercting India s external security, their maintenance charges should continue by India

The margin for exterral defence suggested is one tenth of the forces maintained in India in the case of the Army

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1921 with the authority of the Government of India

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India

The Secretary of State s principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. The post is filled by a senior officer of the Indian Army with recent Indian experience. The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army In order that he may beep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which had obtained for many years, a retired Indian Army officer of high rank used to have a seat upon the Secretary of State's Council, prior to its dissolution.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State The Viceroy's Executive Council exercise in respect of Defence administration the same authority and functions as they exercise in respect of other departments of the Government, in the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Defence expenditure and the direction of Defence policy have been excluded from the control of the Indian Legislature

War and Defence Departments—As a result of a decision to expand HE the Vicerov's Executive Council, the Defence Department, which had previously been responsible under the Commander in-Chief for the whole of the Defence Services administration, was divided on July 20, 1942, into two departments HE the Commander in Chief, then Field Marshal Sir Archibald Wavell, KOB, OMG, MC, relinquished his title as Defence Member in the Viceroy's Executive Council, and became War Member in the same Council, and head of the newly formed War Department Sir Feroz Khan Noon, KOBI, KOIE, at the same time became Defence Member on the Executive Council, and head of the re organised Defence Department

The Commander-in-Chief—The Commander-in Chief, besides being a member of the Viceroy's Executive Council is also member of the Council of State—As War Member of the Council of State—As War Member of the Executive Council he is responsible for the whole of the control of the R I N, the Indian Army and the Air Forces while in India Command, as well as the control of the department which administers these services—Below him comes the Secretary to the Government of India in the War Department (War Secretary) who controls the department, and has constitutional right of access to the Governor General, and the

right to call for papers on any subject assigned is to his department (which includes all the subjects dealt with at Defence Headquarters other than those as I ned to the Defence Department)

The Defence Member -The head of the Defence Dep riment is the Defence Member of the Vicercy's Ex cutive Council who ha India (Defence Secretary) who has the same constitutional ri_hts s his counterp rt in the War D p rtment The Defence Department has taken over the functions of the former Defence Co-ordination Department and in add tion a number of suble ts dealt with by the former Defence Department (now War Depart ment), These include such subjects as Cr t n ments Imperial Pri oners of war the Indi n Soldiers Board and certain military colleges and

The War Department deals with all army services proper and also the administration of the Royal Indian Vavy and the Air Forces in India in so far as questions requir ing the orders of the Government of India are concerned. It deals also with it questions concerned with the administration of Ecclesias. tical aff irs The Wr Department Secretar thas no direct relations with commanders of troops or the staffs of formatio a subor dinate to Army Headquarters The Army administration is represented in the Legi lature administration is represented in the Legislature by the War Member in the Council of Si te and by the War Secretary in the Legislati e Assembly The Dience D partim in is represented in the Exe utive Council by th Defence Memb r and in the Assembly by the Defence Sec etary

a's War Production.—The development a's War Froduction.—The development didia's equipment position has been menally rapid, and her own war ation capacity has been so far deve that she is now able to supply her armies a large part of their weapons and equip as well as contingents overseas. In 1942 factories turned out more than say times factories turned out more than six times tal number of transport vehicles possessed services in India before the war, and pro was made in the manufacture of armour Armoured fighting vehicles continued to

tisfactorily produced, after the initial ities which attended their manufacture at ginning of the war had been overcome

In the first twelve months | factories, together with a production of s arms ammunition more than double that of first 15 months of the war. But probably greatest advances were made in the suppl clothing and equipment Over two million of equipment and three and three qui million pairs of boots were manufactured which nearly half a million were sent over both to the middle east and other the of war 159½ million yards of khaki drill of war 1594 million yards of khaki drill million blankets, 184 million pieces of hos and 106 million cotton shirts, vests and p were also produced. To day the produc of rifles in India is 10 times the pre output, light machine guns, 12 times, bayon 17 times chell arms armunition, 4 times. 17 times small arms ammunition, 4 times, ammunition, 27 times and guns and carrie Among other important items armament stores now being produced in quan in India are six-pounder guit carriages, trij for light machine guns, anti aircraft gun sig binoculars, stereoscopes, clinometers and to copes

Indian Officers' Pay—A radical charvas made during 1945 in the pay of Inc. Commissioned Officers With effect fi November 1, 1944, I C O's became entitled receive, as a wartime measure, the basic of rank and lodging allowance admissible single British officers and a family allows applicable to married British officers T the pay of I C O s when serving in India now the same as that of British officers of Indian Army less Indian Army allowar When ICO's serve overseas they rece expatriation allowance at the rates of Ind Army allowance admissible to British offic of the Indian Army serving overseas

Army Reorganisation Committee-November, 1944, the Comminder-in Chief India, Gen Sir Claude Auchinleck, set un committee known as the Army Reorganisat Committee to carry out a preliminary investig tion of India's defence requirements after war and to make detailed recommendation regarding the size, composition and organisati of the future army in India The commit consists of a chairman, Lt Gen H B D Willer and five members representing all three of t armed services

An important step towards supplying office material for the Services has been the open of the United Services Pre Cidet Collet Formerly known as the Inter-Services Pi Crdet College and situated at Nowgong, t college has moved to Almora and will eventual be set up at Belgaum The training given the college is for candidates for commission in one or other of the Services who have apear before an officer selection board and have befound to require further development befogoing on to an officers' training establishmen After a five month voluntary course candidate once more appear before a selection board Of the 54 candidates attending the first cour at the United Services Pre Cadet College Shave been recommended for commissions

The Auxiliary Force

ry King's commissions on Indian officers have rendered distinguished service, lose age and lack of education preclude being granted the full King's com-

The first two avenues of selection menafford full opportunity to the Indian of ing a military ambition and of enjoying ary career on terms of absolute equality

he British officer who, as a general rule, aters the army by qualifying at Sand-or Woolwich Until 1931, ten vacancies at arst and three at Woolwich were reserved

ly for Indian cadets

A further measure adopted by the Govern ment was the establishment of the Prince of Wales's Royal Indian Military College at Debra Dun a Government institution for the preli minary education of Indians who desire to qualify for commissions in the Army through the Indian Military Academy, Dehra Dun

Freegency War Commissions for Indians— The present war has accelerated progress in this direction, and recruitment of Indians for emergency war commissions in the Indian Army is proceeding apace

Military Academy -In order to Indian train officers for the Indian Army of the future the Indian Military Academy at Dehra Dun was opened in October 1932 It provides officers for all arms cavalry, infantry, artillery and signals The first batch of officers passing out of the Academy received their commissions on the 1st

February 1935 A few years ago, how to improve the quality of candidates for the Indian Military Academy at A press Dehra Dun, was under consideration A press note was issued by the Defence Department in October, 1936, in which the problem was examined in detail It consisted of a memorandum which had been prepared on the subject by a Committee consisting of members of both Houses of the Central Legislature, and of a careful reply to this memorandum by the Commander in Chief, Sir Robert Cassels The Committee was constituted as a result of a debate which took place in the Council of State, during which the present difficulty in obtaining candidates of the right type for the Academy had been discussed

The members of the Committee prefaced their memorandum by stating in general terms that they did not agree with the policy being followed with regard to the Indianisation of the Army, since they thought that the process could be They then made observations and speeded up suggestions on various points—as, for example, that the provision under certain conditions for a refund by parents of part of the cost of training young officers was too extensive, that more scholarships should be granted to cadets of the Academy by Local Governments, that the fees charged by the Academy should be reduced, that passage of the final examination of the Prince of Wales' Royal Indian Military College by students who did not gain admission to the Academy should entitle them to admission to the Universities, that the activities of the University Training Corps should be expanded, that more Indians should be admitted to the Staff College, and that the problems created by the disparities in age between British and Indian officers of similar rank should be favour ably dealt with

The Commander-in-Chief, in reply, expressed gratitude to the Committee for their work and for the studied moderation and reasonableness of their recommendations Some of these recommendations he accepted, and he undertook that others would be fully and sympathetically considered. He asked the Committee not to expect startling results from the to expect startling results from the acceptance of certain of their recommendations, since the process of expanding the field of choice and improving the quality and quantity of the candidates for cadetships must inevitably be gradual, and depend largely on public opinion

cap city was expanded from 00 to 600 The entra ce examination for the I M.A h a been abolished and all candidates for Lmergency appendix and and and candidates for Limergency Commissions were required to appear before the same Sel ction Boards. There have been important modifications in the courses of tr i ing also. At present the whole system has been revised and brought into line with the

late t methods of Instruction e ol ed in Britain An I tere ting development with far reaching possibilities in the method of recruiting in Indi was the permanent adoption in the fourth year of the war of a new avstem of selecting officers

ring the War of 1914-18 the Victoria Cross awarded for conspicuous gallantry to 2 n officers 4 non commissioned officers and 6 ranks of the Indian Army

e Military Cross was awarded to 96 Indian ers for distinguished service rendered by the War of 1914 18 and to 3 Indian ers for service in Waziristan

A large number of Indian Officers and men were also granted Foreign decorations

Summary of India's Effort in the Great War-In a despatch by the Commander-in Chief In a despatch by the Commander-in Chief published in July, 1919, the whole operations of the Indian Army during the war are reviewed. His Excellency gives in it the following figures showing the extent of India's contribution in terms of men. On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks, enlistments during the war for all branches of the sarvier amounted to 701,000 make ches of the service amounted to 791,000, mak ing a total combatant contribution of 985,000 Of this number, 552,000 were sent overseas regards non-combatants, the pre-war strength was 45,000, an additional 427,000 were enrolled during the war and 391,000 were sent over seas. The total contribution of Indian per sonnel has thus been 1,457,000, of whom 943,000 served overseas Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent eyersens was 175,000 *

Effort India's Effort in the Present War— India's magnificent contribution in the present India's the Present units of the RIASC went to France in 1939 and grined particular praise for their courage and bravery in adversity Indian formations have been in action in Syria, Iraq, Iran, British and Italian Somaliland, the Sudan, Intrea, Hong Kong, Borneo, Malaya and Burma and Italy The total of her fighting forces is now over two milions. over two million

Africa —Essential prelude to the conquest of Hitlerite Europe was the purging of Nazi influence from North Africa Here, in 1940, assembled an Alhed army of which the Fourth and Fifth Indian Divisions were destined to

play a leading role

Against Marshal Graziani's Libyan army of Agrinst marshal Grazian's Lidyan army of more than 300,000 men, this Allied force under the command of Gen (now Field-Marshal) Wavell marched into the Western Desert. In the great clash at Nibeiwa they captured the Italian camp, thousands of prisoners and vast quantities of stores. Then came the Italian disaster at Sidi Barram where, in December 1940, 20,000 Italians capitalisted and ber, 1940, 20,000 Italians capitulated and Wavell's men swept on to Sollum, Bardia, Tobruk, Derna and Benghazi

In the meanwhile the Fifth Indian Division was busy with the Italians in East Africa Early in 1941 this division drove the enemy from Gallabat, Gedaref and Butana Bridge and then, with the Fourth, continued the pursuit deep into Eritrea.

Victories at Barratu and Ad Toolesan paved

Victories at Barentu and Ad Teclesan paved the way for the triumph at Keren where, after two weeks of bitter fighting, the Italians hoisted the white flag The Fifth went on to Asmara, Massaya fall and in Africa 1441 the Vicerov Massawa fell and in May, 1941, the Viceroy of Abyssinia surrendered at Amba Alagi Back again to the Western Desert went the

V ctory in Burma. The virtual end of the Bu ma c mpaign was h raided by the capture of Ran oon in May 1945

The road to victory we so es y one. In the spring it 194 our troop faced will it in when the Jap tor less are it into Burma and forced them fighting every foot of the way, into Assam it.elf where they turned at hay and let the enemy a effort spen i it elf

Ther followed veary months of relentless Ther followed very months of releatives, patrolling du ing which our little army used every dodge to keep the enemy gu sein, 1 ill we had built up sufficient strength to stik b ch. Early in 1913 came ur count ribow when the first Wi g to expeliition penetrated into Burma as far as the Irrawaddy

In the meantime gre t prepar the 4 were afoot in India for our roming offen i e In March 1943 the blow fell and Wingates men struck on e again-this time by air-in the

the Foulis rive e tutu z Moote Calao and Fifth indian Drigino in tune to their helps along north; red a bridg; d throw the les see micelly fast it as due to the enemy large and the state of the state

The year 1944 was one of further victories- The value of war orders handled by the Myitkyina, Mogaung, Tamu, Sitting, Tiddim, Fort White, Kalemyo

Quicker went the pace of the Jap retreat as 1945 dawned Akyab fell, Myebon and Cheduba and other landings took place along the Arakan coast In Central Burma the great squeeze began, Meiktili was captured and then—greatest prize of all—Mandalay fell to the ammunition and various items of persons 19th Indian Division

pursuit continued Yenangyaung, Toungoo Prome Pegu—the Japs were given no respite Finally came the debacle at Rangoon into which swept troops of the 26th Indian

Division

Indian States' Contributions —True to their addition, the contribution of the Indian tradition, has Princes been both spontaneous the end of March, 1943. notable To they had contributed Rs 3,41,57,000 and the in munition production and was poised fo annual recurring donations amount to nearly even more important gains in 1943. In 194 Rs 39,00,000 Special mention deserves to be made of H E H The Nizam's gift of £50,000 apart from his offer to the Viceroy of a gift of Rs 16,50,000 with a monthly contribution of Rs 1,50,000 towards the upkeep of those units of his State Forces which may be called upon for service outside Hyderabad The Nivim has made other notable contributions to the promotion of India's war effort. The donation of Rs 6,00,000 by H H the Gaekwar of Baroda for the purchase of aircraft and a similar sum by His Highness the Maharaja of Travançore for providing a trawler for the Royal Indian Navy for mine sweeping and submarine detec tion purposes are other outstanding instances of the substantial nature of the Princes' help Other offers of assistance from Princes both in men and money are too numerous to mention

India's War Supplies —India's contribution in the economic sphere has been no less important. The utmost use is being made of India's agricultural, industrial and mineral resources

Supply Department alone increased from Rs 8 crores in the first 16 months of the war t Rs 118 crores in 1941, Rs 223 crores in 194 and to Rs 142 crores for the first 5 months of 1943

and other equipment is being produced the first time India is planning to make number of special steels Machine tools hav also been made and supplied in large quantities Her ancient silk industry is reviving and meetin the demands for parachutes Rubber, produc the demands for parachutes Rubber production has increased and goes hand in hand wit developments in the use of substitutes and planting of new and novel rubber yieldin plants. In 1942 India made notable gain production of explosives had more than doubled Artillery equipment had advanced by ove 30 per cent, small arms ammunition by 2 per cent, gun ammunition by nearly 50 per cen and light machine guns by nearly 100 per cent

For the 2½ years of the North African war India was responsible for supplying the bull of stores for this theatre of operations troops in the Mid-East wore clothes made in India, to a considerable extent, and walked it boots supplied by Indian factories Nearly 90 per cent of the tents which protected the troops from the torrid heat, the canvas ground sheets which kept away the sands of the desert from tanks, planes, motors and vehicles and nearly all the timber came from India She sent over 1,500,000 tons of stores in a steady stream Other vital supplies to the Mid Eas included assault craft, camouflage paints, net: and hemp, medical stores and equipment for the comfort of troops Important supplies were also sent to Russia

INDIAN SAILORS', SOLDIERS' AND AIRMEN'S BOARD.

What was formerly known as "The Indian Soldiers' Board" has been recently reconstituted under the new name, so as to cover welfare work connected with two persons and families of personnel serving in all His Majesty's Forces

The Board is probably the most important and valuable non official institution with the Indian Army connected It was constituted on 7 February 1919, in place of the Central Recruiting Board, the purpose of which was fulfilled with the end of the last War Its object was at the outset to deal with a number of post-war problems—the finding of employment for soldiers released from the colours, the grant of rewards to those who had rendered distin-guished service, the relief of the dependents of those who had lost their lives in the war and of those who were incapacitated for further service, the education of soldiers' children and the safeguarding of the general interests of soldiers and their dependents, all matters de manding immediate and close attention. As years passed, the Board had gradually to adjust itself to normal peace conditions and it was decided to maintain it permanently for a series of duties which have from time to time expanded and developed

The Board is composed of three members of H E the Viceroy's Executive Council nominated by H E the Viceroy, of whom one is President, H E the Governor of the Punjab, the Defence Secretary, the Adjutant-General in India and the Financial Adviser, Military Finance An Under-Secretary in the Defence Department normally acts as Secretary to the Board, in addition to his other duties

The Board has its seat at New Delhi/Simla and co ordinates the activities of a large number of kindred organisations in the various areas from which the bulk of the Indian Army is recruited Under the control of these Provin cial Boards there exists throughout the country a network of subordinate organizations, including District Soldiers' Boards, Tehsil or Taluka Committees and other transfer of the state of the stat Committees and other kindred bodies There are Provincial Soldiers' Boards in Berar (CP), Bombay, Delhi, Kashmir, North-West Frontier Province, Punjab, Rajputana and the United Provinces

All District Soldiers' Boards were in 1931 put on a uniform footing, with the civil head of the District as President and a serving soldier as Military Vice-President The latter was either a Recruiting Officer or an Indian Army Officer detailed by Army Headquarters-except in the North West Frontier Province where the President was a soldier and the Vice President a civilian Fi e years experience showed the organization to need revision if it was to serve its purpose in the most efficient manner It was its purpose in the most emercial manner it was found for instance that Boards in areas where recruitment had demporarily at any rate topped began to decline in value through lack of attention and that the Millitry Vice-Irreldents of Boards mostly drawn from active batta tions could not maintain continuity of policy because of their frequent changes of station Reorganisation was therefore undertaken in 1930 This was achieved without interterence in the internal constitution of the Boards preserve continuity and provide constant supervi Training Battallons and similar units which are not liable to changes of station responsible for providing the Hillitary Vice-Presidents for the District Soldiers Boards in their neigh bourhood At the same time full advantage was taken of the experience and influence of was taken of the apperlence and induces of Recruiting Omers who were appointed additionable to the state of t

Soldiers Board business The whole organisation shortly after its revision improved out of all recognition. The District Soldiers. Boards revived and tile greatest importance is attached to an indirect result of this improvement namely the increase in the prestig of the excelder among its i how ities and its enhancement a fact particularly

gratifying in those areas where recruitment is n t now being carried on n thow being carried on In May 1900 Army Headquarter appol ted relimination officers as a whole time Deputy relimination of the May 1900 Army Headquarter appol ted relimination of the May 1900 Army Headquarter and the May 1900 Army Headquarter and the May 1900 Army Headquarter and the May 1900 Army Headquarter and He

the award of that decoration to the following

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed

Naik Darwan Sing Negi, 1-39th Garhwal Rifles —For great gallantry on the night of the 23rd-24th November, 1914 near Festubert-France, when the Regiment was engaged in re taking and clearing the enemy out of our tren ches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire

Rifleman Kulbir Thapa, 23rd Gurkha Rifles — For most conspicuous bravery during operations against the German trenches south of Mauquissart When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though the British soldier to save himself he urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German way he are leaven to a place of comweather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy s fire

(then Lance-Naik) Lala, in 1911, that in future Indians would be eligible Dogras—Finding a British Officer of Dogras—Finding a British Officer of Dogras —Finding a British Officer of Dogras increased during the War and afterwards by the dragged him into a temporary shelter which the covered of that decoration to the following to the bad he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance Nauck Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once When back with him on his back at once When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the chalter. he returned to the shelter After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry
For most conspicuous bravery and devotion to
duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his options tool be a separate of the time his entrenching tool, being exposed all the time to very heavy rifle fire For five hours until nightful he remained beside the wounded officer the did not be the work of the days of the consequence of the days of the consequence of the days of the consequence of the days of the consequence of the days of the consequence of the days of the consequence of shielding him with his own body on the exposed side. He then under cover of darkness, went have for conference and break back for assistance and brought the officer into

Naik Shahamad Khan, 89th Punjabis—For most conspicuous bravery He was in charge of a machine gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy s entrenched position. He beat off three counter-attacks, and worked his counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casual ties. For three hours he held the gap under very heavy fire while the heavy fire while it was being made secure When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw With between the regiment and brigade head of the en my He succeeded each time in dell vering his message althou h on each occasion his horse was shot and he was compelled to finish the journey on foot

Rana _3rd Riflem n Karan Bah dur Rana 3rd Gurkha Riflea.—For conspicuous bravery and resource in action under adverse conditions and utter contempt of danger during an attack. with a few other men succeeded under intense fire in creeping forward with a Lewis gun in order to engage an enemy machine gun whi h had caused severe casualties to officers and other ranks who had attempted to put it out of action No 1 of the Lewis gun party opened fire and was shot immediately Without a moment a heat tation Laran Bahadur pushed the dead man off th gun and in spite of bombs thrown at him nd heavy fire from both flanks he opened fire and knocked out the nemy machine gun crew The switching his fire on the en my bomb ra nd riflemen in front of him he silenced th ir fire He kept his gun in action and showed the gre t at coolness in removing defect which had

during the fighting in Burma in January, 1943. In an attack on Jap positions at Donbark in the Mayu peninsula two of our bren carriers were put out of action and as the crews had run out of ammunition the enemy rushed them. Hav Parkash Singh drove forward in his carries and rescued these men and their weapons. A fortnight later in the same area three of our carriers were immobilised by the enemy on in open beach covered by Jap guns. With complete disregard for his safety. Hav. Parkash bingh again sallied forth, rescued two of the crews and retrieved their weapons.

Subedar (now Subedar-Major) Lal Bahadur Thape, 2nd Gurkha Rifles, won the V C for 'unsurpused bravery' at Rass la Zondi, Tunisia, in April 1913 Ordered to secure the only passage by which a commanding feature could be seized by us, he led two sections, under a hall of automatic and mortar fire, across open ground and up a gully I ighting every much of the way he killed two men with his kukri and two of more with his revolver With only a couple riflemen he reached the objective where two more of the enemy fell to his kukri Having secured the feature the three Gurkhas covered their company a approach up the defile

Company Havildar-Major Chhelu Ram, 6th Rajputana Rilles, won the V C posthum ously at the Djebel Garci, Tunisia in April 1943 Dashing through intense enemy fire he silenced an enemy post single handed When his company commander was mortally wounded he tended him in the open and in doing so was himself seriously wounded Despite this he reorganised his company to meet a heavy counter attack and rushed from point to point shouting "Jats and Mohammedans, there must be no withdrawal Advance!" His inspired men drove off the enemy with bayonets, stones and rocks Still urging on his men, Company Havildar Major Chhelu Ram died from his grievous wounds

Havildar (now Jemadar) Gaje Ghale, 5th Royal Gurkha Rifles won the V C during an assault agunst the Japs in the Chin Hills in May, 1943 Leading his men along a knife-edged ridge with precipitous sides, he was wounded in the arm, chest and leg by a grenade Under very heavy fire and disregarding his serious injuries he led his men to close grips with the enemy and bitter hand to hand fighting ensued. He was soon covered with blood from his neglected wounds but, shouting the Gurkha battle cry "Ayo Gurkhahi!" he headed assault after assault. Spurred on by his example his platoon stormed and carried the hill position at very heavy cost to the Japs

Nak Nand Singh, 11th Sikh Regiment, was decorated with the supreme award for capturing despite being wounded six times, a Jap position single handed in March, 1944 Leading his men up a steep slope in the Kalapanzin Valley, in the Arakan, he dashed forward alone and captured a Jap trench Wounded in the thigh he then crawled forward under heavy fire and captured a second trench despite incurring wounds in the face and shoulder from a grenade which burst in front of him A few minutes later the whole of his section being killed or wounded, Nk Nand Singh charged a third Jap trench, captured it and killed all its occupants with his bayonet

Jemadar Abdul Hafiz, 9th Jat Regal won the V C posthumously near In in April, 1914 Ordered to drive the from a prominent feature he led two secup a bare hillside swept by enemy mac gun and mortar fire. Wounded in the leg Abdul Hafiz nevertheless reached the exposition, seized one of their machine by the barrel while one of his men dispose the gunner. He then took a bren gun one of his wounded men and advanced such ferocity that the Japs fled Mor wounded in the chest, his last words w'Reorganise! I will give you covering f But he had not the strength to pull the triof his gun and fell back dead on the battle

Sepoy Kamai Ram, 8th Punjab Regin is the Indian Army's youngest winner of V C, which he was awarded for gallanting first action, just after crossing the I Garl in Italy, in May, 1944 Volunteering deal with one of four German posts holding his company 8 advance, he crawled forward killed the occupants of the post and disposed of a German officer who confrom him with his pistol levelled Still alone, Kamal Ram shot the German gunner in second post and hurled grenades into the The remaining Germans surrendered I he helped to capture a fourth post and the company advanced In the fighting we followed Sep Kamal Ram rushed a he killed one of the enemy and captured two of the second contract the contract of the capture of the enemy and captured two of the capture of the

Rifleman Ganju Lama, M M, 7th Gu Rifles, won the supreme award for knoc out two Jap tanks single handed and, the himself seriously wounded, killing their c with hund grenades On June 12th, 1 Jap tanks and infantry broke into our perin at Ningthoukhong, Imphal Plain U intense fire Rin Ganju Lama crawled for and got his PIAT (an anti tank weapon) action only 30 yards from the enemy Dei a broken wrist and other wounds he destre two of the enemy tanks, advanced and engitheir crews Not until he had wounded killed all the enemy did he allow himself the vacuated to have his wounds dressed (a month before he had won the M destroying a Jap tank with his PIAT

Naik Agansing Rai, 5th Royal Gurkha Ri won the V C along the Bishenpur Silchar tr. Assam, in June 1944 When his company, held up by withering Jap machine gin firled his section against an enemy position silenced it. His company then swept up to position and Nk Agansing Rai went on to with a 37 mm gun pounding the company folose range. Rushing forward with a break he killed three of the enemy, this section dea with the rest of the gun's crew Later, tommy gun in one hand and a grenade mother, he advanced on a third enemy position and killed all its four occupants.

Subedar Netrabahadur Thapa, 5th Ri Gurkha Rifles, was awarded the V C posthiously for his magnificent defense of an isola position near Bishenpur in June, 1944 Pet tent Jap attacks broke down under the spri defence put up by this Viceroy's Commissio Officer and his men on a feature known "Water Piquet" The Gurkhas refused yield a foot of ground despite ruthless as-a

and very heavy artillery fire. At one time With hall st b eath he shouted to his havildar Bub. hetrab hadur Tiapa and I is runner of dvanced of caused e siderable hood by these de lis. ROYAL INDIAN NAVY.

The Royal Indian Navy traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was Company stationed at Surat 10ung that it was necessary to provide themselves with armed vessels to protect their commerce and settle ments from the Dutch or Portuguese and from the pirates who infested the Indian coasts. The first two ships, the Dragon and Hoseander (or Osiander) were desputched from England in 1612 under Captain Best and since those days under slightly varying titles and of various strengths the Government in India have always. strengths the Government in India have always maintained a sea service

The periods and titles have been as follows -Hon E I Co's Marine Bombay Indian Navy

1863-Bombay Marine 1877-H M Indian Marine Royal Indian Marine Royal Indian Navy

India's Naval Force has always been closely connected with Bombay, and in when the E India Co took over Bombay, C youn of the Marine was appointed D Governor From then until 1877 the was under the Government of Bombay although from that date all Establishments were amalgamated into a perial Marine under the Government of Bombay has continued to be the principal 1612-1686 of Indian Naval training and to a large 1686—1830 of administration In the winter of 19 1830—1863 Naval Headquarters moved to New Delhi

and DALHOUSIE MINTO LAWRENCE Officers also served as Auxiliary Cruisers Officers also served in the Royal Navy in the Grand Fleet Mediterranean North Sea North Red Sea and

Caspian Sea Fleets

In addition to transport duties in Indian Ports Officers were sent to Marseilles East Africa and Egypt for such duties and on the arries and Laypt for such course and on the sentity of Turkey into the War were employed on duties towing and in ming Biver Oratt and Barges to and in Miscopotamia and it was necessary to emilist a number of Temporary Officers Warrant Officers and men to the num hers of approximately 240 60 and respectively for the se and other duties

Reorganisation Schemes - After the War the Government of India asked Admiral of the Fleet Lord Jellicoe who was visiting India to draw up a ach me for the reorganisation of the Service His valuable suggestions were

unfortunately too ambitious for Indian finances

and could not be accepted Shortly afterwards the Eaher Committee arrived in Indi to report on the Indi n Army and although the R I M was not included in their terms of reference they strongly r ommended that the R I M should be reorganised as a compatant service The Government of India in 19 0 obtained from the Admiralty the services of Rear Admiral Mawhy as Director R.I.M to draw up a scheme of reorganisation; within limited lines His scheme however was not adopted and Admiral Mawby resigned

his appointment The R I.M then fell upon hard times money was scarce the report of the Incheape Com mittee necessitated or stic retrenchments, and the working of the Montagu Chelmsford reforms on their various stations on lighthouse duti a transport work carrying of officials etc Local Governments were naturally inclined to think that if they h d to pay they would like to have a say in the management and that If the work could be done the per locally they should arrange to carry out the duties them salves further the furthere Committee recommended that the thr a large troopships should be scrapped and all trooping carried out under contract which would have left the Mail e with only the Surrey Department and the Bomb y Dockyard

A Combatant Service - Happing for the Service however the Government of India in 19 5 appointed a D partmenta Committee under the Ch irman hip of Ge rai Lord Raw Il son in his capa ity f Minister f Defence and M mber of Council in charge of the Marine Portfolio to submit a scheme for the reorganis ilon of the Service as a combatant force. This committee recommended that the Bervice abould be reorganised as a purely combatant Kayal Service with the fittle of Royal Indian This

During the War 1914 1918 Royal Indian accepted by the Indian and Home Gov m Marine Officers were employed on many and ments and the necessary Act to permit India various dutiles Royal Indian Marine Ships Horrysalva Haddings Nontingson House of Patlament

To effect this change in the title it was nece sary to draw up a new Indian Naval Discipline Act and this had to be passed through the Assembly and Council of State in India.

In February 1928 the Bill was introduced but failed to pass in the Assembly by a narrow margin of one vote In February 1934 the Bill was reintroduced to the Assembly with certain minor amendments but in response to a plea for circulation Government circulated the Bill

In August the Bill was reintroduced and passed by the Assembly and Council of State On nd October 1934 the Royal Indi n Navy was inaugurated the historic ceremony taking

pl ce in Bombay

The Royal Indian M rine which had ren dered sterling service to India and the Empire

dered steining service to india and the Empire in peace and war then ceased to exist in peace and war then ceased to exist evolved from the late Royal Indian Marine is one of the Empire a h v Force and is under the command of a Figs Officer of the Royal Navy v ce dum 1 J H Godfrey of h Rh is been Fig Officer Commanding since March

1943 The Chatfield Committee ar port presented in February 1939 made f r reaching recommenda tions in regard to the Royal Indi n Navy as well tions in regard to the Royal Indi n Navy as well as other branches of the armed forces Shortly below the war permission was given for the establishment of the Royal Indian N val Reserve establishment of the Royal Indian N val Reserve With the outbreak of heatfillites a large scale programme for expanding the E IN was taken in hand and in th past 4; years the increase in the number of ships taking is establishments and personnel has b n rapid In fact Indias Naval Forces have expanded to more than Naval Forces have expanded to more than resulted in the Local Governments having to Naval Forces have expanded to more than defray the cost of the work of R I M ships 20 times their strength in ships and men since 1939

Already in 1940 a senior boys training est blishme t HMIS BAHADUR had been started at Karachi in February 194 a similar establishment for junior boys aged 14 to 15; H MIS DILAWAP was opened in the same t wn Boys enter H MIS BAHADUR direct milet six months traini g in it if is Dilawar

Most of the men however enter the N vy as special service ratings enlisting for five ye rs or less if sufficient for Active Eervice and th reafter being transferred to the Royal Indian Fleet Res rve f r a further five years trained in a sh re est bli hment. Officers of th Reserves undergo instruction in anoth r shore establishment H M.I S FEROZE the e belonging to the Executive Branch taking short but inten other studees. Fact of this ratify instructional period is spent at sea. Having completed their training Reserv Officers are posted for service aftoat. Those who have shown aptitude in any pecial subject may b brought back for a long course in it thus becoming specialist Asyal Service with the fittle of Royal Indian | song tour |

examinations held by the Federal Public Service in the operations that led to the downfall of the Commission These "regular" officers, as they Italian Empire in East Africa, taking part in the

Naval Training Expansion.

The expansion of Naval training facilities has proceeded apace In the past year two of the largest shore training establishments have been opened Respectively the 15th and 16th to be commissioned since 1939, HMIS ARBAR, at Bombay, provides initial training for all new entry ratings, while H M I S SHIVAJI, near Poona, has replaced the Mechanical Training Latablishment in Bombay, where engine room ratings had been trained during the preceding seven years Some of these artificers receive preliminary technical instruction in the Civnaval Centre at Pilani (Jaipur)

the Communications Branch are of trained in HMIS TALWAR, Bombay, while ratings in the Seaman Branch qualify for gunnery rates in H M I S HIMALAYA, Karachi, and for anti-submarine defence in H M I S In these three schools, Reserve MACHLIMAR Officers are also trained known as HMIS VAL uned A tornedo school, VALSURA, has been func tioning in Jamnagar since December 1942

The growth in the number of the R I N 's ships has been remarkable On the outbreak of war a large programme of construction was initiated the result has been a striking stimulus to the Indian shipbuilding industry A large number of ships and small craft have already been completed, and many more are on the stocks In July 1941 was launched H M IS TRAVANCORE, the first vessel for the Royal Indian Navy to be built in Indian yards, followed in October by H M IS BARODA Ships of this class are admirably fitted for minesweeping and haval construction for India patrol duties is also in progress in the United Kingdom and Australia Many ships completed in the British Isles have already seen much service in the Battle of the Atlantic as well as in Eastern waters. The Indian sloops Juma and Sutley were on convol escort duty in the Atlantic during the chase of the BISMARCK Later they were in action against Japanese bombers while escorting convoys on the Singapore Batavia run, returning, to the Mediterranean in time to take part in the invasion of Sicily HMIS KONKAN and H M I S KATHIAWAR, while on passage from shipvards in the United Kingdom, escorted convoys to the fighting-line in Tunisia II M I S KISANA was the unior anti-alreraft escort of the first Allied convoy to be heavily attacked by German glider bombs and made seven separate contacts with German U boats in the course of a single convoy battle

During 1942 the number of warships of all classes lunched for the Royal Indian Nasy was 21 times that recorded in 1949 and 1941 reckoned onether. At the present time ships built and launched for the Moral Indian Navy in India octumiler those built and laurched for it else where. In the former enterory are included of the Royal Indian Navy lawer excited 131 of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends there are 1 fast submarine of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends to the former of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends. octrumier those built and laurched for it else di ties and fast submirlie el teres

are called, are, as in the past, trained in the reoccupation of Berbera and the capture of United Kingdom

Massawa During the brief campaign that followed Nazi intrigues in Iran the Royal Indian Navy helped to convoy troops, support them or shore and seize German and Italian vessels Japan entered the war, RIN ship escorted convoys and fought hostile aircraft in Far Eastern waters and later during the Burms campaign

H. M. I. S. Bengal.

In November 1942 one of H M Indian ships Bengal, won world-wide renown by engaging in the Indian Ocean two Japanese raiders which were far more heavily armed and were ten time The Dutch tanker Ondina, which she her size was escorting, gallantly assisted her, and as i result of this engagement one of the raiders was sunk, the other made off, and HMIS Renga and Ondina reached port safely In the early months of 1943 vessels of the RIN's Coasts Forces did good work in support of our troop on the Arakan coast This included the inter ception of Japanese coastal craft conveying troops and supplies, participation in the raid of Myebon, and the bombardment of an enemy stronghold Since the war began, H M Indiat ships have carried on their essential routing that the stronghold ships have carried on their essential routing the stronghold ships have carried on their essential routing the stronghold ships have carried on their essential routing the stronghold ships the stronghold ships have said the stronghold ships have said the ships have s duties of escorting convoys, patrolling, and minesw ceping

In 1944 ships of the Royal Indian Navy again co operated with our land forces engaging the Support was enemy on the Arakan Front afforded by bombarding enemy shore position and by harassing the enemy's water born supplies. In four months these ships steamed more than 30,000 operational miles on 40 separate missions in enemy waters

The Royal Indian Navy was well represented in the eight amphibious operations by which the 15th Indian Corps advanced down the Arakan Coast from the Indian frontier to

Rangoon in the spring of 1945

Men of the RIN Landing Craft Wing, who had been training secretly for more that two years, established their reputation on the beaches of Akyab, Myebon, Kyaukpyu, Kangaw. Ru Ywa and Letpan They formed the specified of arch of these six arguments. spearhead of each of these six assaults, carrying troops to the beaches and keeping them supplied during critical phases of the ensuing battles Their endurance, courage, cheerfulne-s and efficiency won them high praise

The Indian sloops NAPBADA, JUNEA, KISTSA and CAUVIRY fired tens of thousands of shells in support of the Army s coastal advance in Arakan, penetrating as far as thirty miles from the open sea to increase the effective range of their bombardments

A floatilla of nine fleet minesweepers of the Royal Indian Navy cleared the approaches to the Rangoon River estuary before the arrival of the invasion convoy, whose (scort included

Ships of the Poral Irdian Nass have played one DSO, ten D

Agriculture

The agriculture of the sub continent of India ith its wide range of physical and climatological onditions varies considerably in character nd scope There is scarcely any cultivated rop of the temperate sub-temperate or tropical ones which cannot be grown in some part of his vast country from the warm humid coastnds to the perennially temperate altitudes I its mountain ranges

The total area of culturable land in India xeluding Burma is about 358 million acres thich is exclusive of a forest area of approxicately 68 million acres

The total gross cropped rea sown annually is roughly 248 million acres rea sown kinamy is roughly 240 minut acres of it this vast area 187 million acres are under creal and puise crops of all kinds which supply ood andfodder for India a human population of .00 million and her animal population of 380 nillion head of cattle sheep and goats

In Indian ag iculture the dominant climatoogical factor is the monsoon and in most parts if the country the total annual rai fill is precipitated between the months of June and October The winter and early summer months ire generally dry and high temperatures prevail in the months of March to June prior to the break of the monsoon rains Thus the agricultural season is naturally divided into two main sublivisions the Kharif season of the monsoon and he Rabi season of the cold weather Each of hese seasons has its own distinctive crops greater part of the Indo-Gangetic plain and the northern tracts of the Peninsula are ser ed by the main monsoon which falls between June and October Diring these months the average rainfall for the whole of India is about 40 inches varying from 15 (or less) to 50 inches in the main cultivated tract R I f II in the cold weather season between December and March is generally not me e than 2 to 4 inche The bulk of the rainf il in December and harch is generally than 2 to 4 inche The bulk of the rainf il in the outh of ladia including most of the Madras Province nd the b is of th territories of the two large Indian States of Hyderabad and Mysore is received from the North East mon soon and falls durin the period Octob r to Tebraary.

February Solls—Four main soil groups can be recognised in India vs. (1) the red soils derived from reclassic the Archanays tem which chas accepts the first many sold the south E as a second to the south E as a second to the south E as a second to the south E as a second to the south E as a second to the secon part of Bombay Berar and the Western parts if the Centr I Provinces and Hyderabad with extensions into Centr I I dia and Bund I khand The Md rs rgur soils though le s typical are also important (3) The great also graphical services agriculturally the most import not tract in Indi as well as the most censive smally the Indo Gangetle Pl in mbracing Sind northern Rainstans under the property of the connorthern Rajoutana m to the Punj b the plains of the United Provinces most of Bhar and Beng I and half of Assam (4) The piterite solis which form a belt round the Feunaula and extend through East Bengal that Ass m and Burma.

greater attention to the question of a more effective I nd utilization A considerable amount of scientific work is thus bein done on all these groups to a greater or lesser extent throughout the country both as regards their throughout the country both as regards their classification as well as their crop producing power Soil studies have been given a new orientation and have received fresh stimulus due to the concept of the soil profile or entire vertical cut of the soil being taken as the unit of study instead of the superficial layer supporting vegetation. A notable instance of such work is the recent classification of the black cotton soils of the Bombay Canals and the investigations regarding their suitability for sugarcane gro vin The importance of soil for sugarcane grovin The importance of soil survey and soil mapping is bein gradually recognized in different parts of the country At the Imperi. I Agricultural Institute Delhi a soil map of India has been prepared on the basis of available data while an Ali India Scheme of soil survey has recently been launched to collect and collat further data on Indian soils In Hyder had and Madras large s ale soil surveys arver out and mauras sarge s ale soil surveys of irri atton projects ha e been completed whereas inten ive survey of the sugarcane soils has been a special fe ture in the United Provinces and Bombay. In the latter Province soil maps are now supplied by the Department of Agricul ture on p yment whe eln all the nece sary informations required for the successful growing of sug cane are indicated

In addition to the four main groups of Indian solls mentioned above the des rt soils of India occupy a large tract in Eastern Sind extending over the whole length of that Province along the edge of the Indus all vium Rajputana and the South Punjab of which the Thar a Rajputana desert alone occupies an area of 40 000 aquare miles Alkali soils also form an important group of Indian soils which are known as reh or usar in the United Provinces kalar in Sind rakkar and thur in the Punjab and chopan or karl in Bombay Province Such soils are characte ised by a high degree of impermeability stickiness together with high alkalinity and frequent presence of large excess of free salts They are usually poor in nitrogen and humus and unsuitable for crop growing without prev ous reclam tion Porest soils occupy all rge prt of Indi Investigation on the nature of il posite of the haubatia Hill in UP nd of the I ulu K est in the Punj b indicate th t these soils belong to the Brown Earth and Podsol groups

AGRICULTURAL EQUIPMENT

Finance -In India farming is carried on with the minimum of capital and there is prac with the minimum of capital and there is prac-tically no outlay no buildings fencing and agricultur I machinery. The c lithators are for the most ps tilliterate and gricultural and bted ness is high nd rate of interest on loans are heavy Doung the past twenty years much progress has been me by the co-operative control of the property of the co-operative recent it. These found never water much sense. years it h been found nece s ry to supplement co-op ative credit by the d clopm at of a n-credit activities purchase and sale stellarmia and extend through East Bergal lour ass mand Burma. Described the state of the state for debt redemption, etc., will contribute largely to improvement in the economic condition of the agriculturists

Livestock—Practically all cultivation in India is done by bullocks and the efficiency and capacity of these in different districts varies considerably. The best types in common use are capable of handling what vould be considered as light single horse implements in Jurope Bullock power is also used for raising water from wells for field irrigation, for driving the chaffeutter and the sugarcane crusher and for treading out the grain in the threshing yard. In general, the Indian cultivator cares well for his draught bullocks which, in most cases, constitute the most important part of his moveable property.

Implements—In general, cultivating implements are few and simple and remarkably well suited for the tiliage operations for which they have been evolved. The ploughs are usually of wood, tipped with an iron or steel point, and stir rather than invert the soil from ploughs. Iron ploughs are also extensively used in some districts. A heavy wooden beam is commonly employed to serve the combined purposes of roller, clod-crusher and soil compactor. In the black cotton soil areas, the bakhar, a simple type of broad bladed harrow, is in general use In many Provinces, seed drills or seed tubes are utilised for drilling the crops in rows to facilitate inter cultivation. In less advanced tracts the seed is merely broadcast and ploughed into the soil Practically no harvesting machinery is in use, the crops being cut or gathered by hand and threshed—in the case of grain crops—under the feet of bullocks Cereal crops are winnowed by the agency of the wind although cheap mechanical vinnowing machines, designed by agricultural engineers, are receiving attention from the more advanced cultivators. With reference to the introduction engineers, of improved agricultural implements, this work is now being largely done by private businesses and agencies which are extending rapidly in the rural areas Work on mechanical cultivation is still largely in an experimental stage though tractor ploughing has proved very effective in the eradication of deep rooted weeds in the United Provinces, Bombay and certain Indian States One notable development of recent years in connection with agricultural implements is the large extent to which improved types are now being manufactured and sold by village craftsmen

Land Development —Considerable attention has been paid in many areas of the country, notably in Bombay and the Punjab, to land development measures designed to check erosion from excessive rainfall and to the preservation of soil moisture. A Land Development Section of the Agricultural Department has been formed and in 1943-44, this section carried out contour bunding in the scarcity areas of Bijapur and Sholapur districts over an acreage of more than 2 lakhs. The contour bunding of agricultural lands is combined with contour trenching and reafforestation of the Indian rainfall atthroughout the cour of precipitation and in deficiency in many trainfall contour trenching and reafforestation have been introduced in the bunded areas with remarkable success. The rabi harvest of 1943 44 was good while that of 1944-45 was fair in terms of

grain and good for fodder. In consequence, of inbour was a great problem of 1911 45 and out of a programme of 5 lakes are for bunding it was only possible to picte to o in he

The Dry Larming section was expanded a large number of dry farming tools were chared and is used on loan. This made po a large increased in the area under Dry Far and the results in increased crop out turn most satisfactory.

The amondment of the Bombay Land Impment Act was under discussion during the and it is expected that a simplified versitable exactly Act will be brought into force cliently.

Cultivation and Tillage.—The Impment of the ordinary cultivation and it methods in common use in India a wide field for increasing the yields field crops and, consequently, the profit the agriculturists. In many parts of it cultivation is good but, particularly in non-irrigated tracts and in areas I to failure of rainfall there is much room improvement. In this connection, the reseworl on dry farming methods, which is a conducted in Bombay, Madras and Hyder under the auspices of the Imperial Counce Agricultural Research, is of very a superstance.

Two economic factors which tend to down the standard of cultivation in a Provinces of India are the fragmentation sub division of holdings, resulting from In laws of inheritance, and certain systems land tenure whereby the cultivator, a tenant, has no interest in permanent imprement of his holding. In addition, the agriculturists rarely live on their lands but congrein villages for mutual protection. Efforts now being made in many Provinces to elimit these factors, which contribute to a low stand of cultivation.

The main object of tillage methods for 1 1c, cold-weather, crops is the conserva of soil moisture and the preparation of a 2 seed bed to ensure germination of seed achieve these objects, the land is given repelshallow ploughings or harrowings, which duce a surface much over a moist sub-soil khanf, 1c, hot-weather crops, the prelimit cultivation of the fields is usually much thorough as sowings must commence as as the rains break. The practice of drill the crops in rows is rapidly supplanting the method of broadcasting in many tracts former method permits the intercultivation of the crops by bullock implements and greateduces the cost of weeding. Harvesting generally done by hand implements. The of tractor outfits for mechanical cultivation still largely limited to large estates an certain tracts, to such specific purposes the eradication of deep rooted weeds.

Irrigation —The Chief characteristics the Indian rainfall are its unequal distribut throughout the country, seasonal irregular of precipitation and hability to failure or par deficiency in many tracts. The average and rainfall for the whole country is about 45 inc and there is httle variation from this aver from year to year But, within individ

tracts rema kably wide variation in total annual rainful are found. At many recordin stations annual rainful of less than half the avera e annuar rannal of tess than half the avers e precipitation are not uncommon and inc a 3 of extreme drought less than one quarter of avers or rainfall has been re orded in precarious tracts. Such tracts include oractically the whole of the Puni b and North West Frontier Province the United Provinces except the sub montane region Sind a la ge portion of Bihat most of Madras and the Bombay Province omitting the coastal belts and portions of the Central Provinces The Indi n canal system (excludin Ilurma) is by far the large t in the world Of the total cultivated area of 248 million acres about 56 million acres are irri g ted annually from one source or another this huge area 30 million acres are irrigated by canals 14 million acres by wells and 1 million acres from tanks and other sources. Protective irrigation wo ks have made agriculture stable instead of precarious in many di tricts.

The great perennial canals in the North of India draw th ir supply from snow fed rivers the inundation canals run only when the ri ers rise with the melting of the snow in April May and must close when supplies fall at the end of the monsoon Other canals depend for their supply during the dry part of the year on water stored behind great dams thrown across suitable gorges Water rates are levied on the area of irrigated crops m tured so that Government bears part of the risk of failure of crops Different r tes are charged for differ nt crops and vary s mewhat in diff rent p rts of India rates are also lower when the water has to be lifted than when

flow irri ation is given
The Madras Bombay and Sind Provinces Pose s some of the most spectacular irri tion schemes in the world. The Cauvery Mettur irrigation system inaugurated in 1934 is conside ed Fallon system inaururated in 1934 is conside ed to be the big est in the firitish Empire and the largest sing! block masonry res rvoir in the world with a storage capacity of 93 500 million feet. The Wilson Dam at Bhandar dara prounding "I et of water is it and the shade in the shade with t

the sukker harra e in Sind across the illus-in stee a desert whose area far ear eds that of any other scheme conceived by engineers About one quarter of the total irrigation

About one quarter of the total irriation of the country is not from lifting water from writs ran ing in depth from a few feet to ever fity feet. Their numbers I ve greatly increase! for freet is re is largely through Government ad ances f r th ir construction. The recurring cost of this form of irri, atlon has however freatly focressed owing to the it hydro of drau it eatths and the increasing cost of their majorature. maintenance

All a ticultural departments are now giving increased attention to the better utilisation of forcess, attention to the better utilisatin on other root of waf regriples existing, wells belonger or of waf regriples existing, wells belonger or of wafe to the well of 1 rgs existed for the control of the wafe of the control of

seasons ad distributed d ring the dri r seasons of the re r O ten the indirect fleet of the tank i maintainin the a b-soil wat r level is as Important as the direct tries ton.

Manures and Manuring—The great bulk of Indian soils are deficient in organic matter. In other arricultural countries of the world this want is usually met by the return of farmyard manur to the land or by the use of composts made from crop residues and similar waste o ganic materials. In India however cattle dung is largely utili ed for village fuel cattle uning is inrigely utili ed for village fold, but the practice of composting is not being apidly developed in many areas. The cultitation of green manur crops is making headway especially in the irrigated tracts and many Provincial Go ernments allow concersions to encourage their exten i p The use of certain oil akes especially g oundnut and casto cake is on the incre se and this method of manuring is no common with many irr gated crops With regard to artificial fertilisers nitrogenous org nic manures eg ammonium s'uphate and nitrate of soda are bein extended in use through the efforts of departmental and private agenc es and the question of the manufacture of such manures in India is now receivin close attention of the Government of India and Provincial and State administrations

Rice - Rice is the most extensively grown crop in India and on an average occupies about _8 / of the total cultivated area. It prepon derates in the wetter parts of the country viz in Bengal Bihar and Orksa and Madras Exclusive of Burma with his now politically separat d from the Indian Empire the a ea fluctuates sli htty around 7. million cres and the yield is about 7 million tons In 1940 41 total area under rice was 60 million acres with a total yield of approximately 7 million tons. The crop requires for its proper maturing a moist climate with will assured rainf li The cultivated varieties are numerous differl g greatly in varieties are numerous differing greatly and quality and in suitability for various conditions of soil and climate Ri e is either broadcast dilled or transplanted Broadcast rice is grown generally in low lying areas and is sown before the mon_oon

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are planted are transplanted. The cedlings are planted either singly or in small bunches cont ining from 4 to 6 plants each and are simply pu hed into the mud t distances of 9 to 1 inches apart The rice fields are kept more o less and r water and the first near a page more of respect to the real valid the crop shows signs of riperin. The area under impro ed vari ties of rice distributed by the agricultural departments is now over a million acres. Variou 3 h mes for the intensification of research on rice in all the principal rice growin provinces financed by the Imperial Council of Agricultural Research

are in pro ress India (excluding Burma) consumes more rice than she produces the balance in the past havin, been provided almost entirely by Burma Imports in 1930-40 were 000 tons mainly

belong to the species Trut cours rulgare Indian

wheats are soft weak wheats but there are some well-known Maccaroni wheats amongst The largest wheat acreage of recent years was that of 1933 34, namely, 36 million acres but the yield did not come up to the record harvest of 1939 10 which exceeded 101 million tons Recent crops have averaged about 9 million tons per annum which is only slightly, if anything, above internal requirements With the develop ment of irrigation from the Lloyd Barrage Canal in Sind and in the newer Punjub Canal Colonies a further increase in wheat production is certain The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in behruary to April and the threshing and winnowing go on up till the end of May The total area under improved varieties of wheat is now over 8 million acres The Imperial Council of Agricul tural Research has appointed two Standing Committees to advise on problems connected with rice and wheat

The Millets -I hese constitute one of the most important groups of crops in the country, supplying food for the poorer classes and fodder for the cattle The varieties vary greatly in quality, height and suitability to various for the cattle the various quality, height and suitability to various quality, height and suitability to various poil conditions. Perhaps the two best known varieties are Jowar (Sorghum the great millet, and Bajra the vulgare) Bulrush millet (Pennisetum typhoideum) which, between them, occupy about 50 million acres annually In 1940 41, the total area under jowar and bajra in India was 51 million acres Generally speaking the jowars require better land than the bayras and the distribution of the two crops follows the quality of the soil Both the crops are generally sown in the beginning of the monsoon and so they require to be thoroughly weeded It is often grown mixed with the several pulses especially Arhar (Cajanus cajonpigeon pea) and other crops, and is commonly rotated with cotton The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces rabi juar is also an important crop

Pulses—Pulses are commonly grown throughout India in great variety and form the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rota They are a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good, mixed cropping is common. The principal pulses are Arhar (Cajanus cajon), gram (Cicer arietinum), various species of Phaseolus and Pisum

the most impor-lia. The average area Cotton is one of the commercial crops in India under cotton in the quinquennium ending 1937-38 was 24 6 million acres and the average yield 5 5 million bales of 400 lbs each During the five-year period ending 1942-43, the average 22 3 million acres and 5 4 million bales respect ively In 1943 44 the estimated area and yield were 20 4 million acres and 5 1 million

wheats are generally white, red and amber butes respectively. The ascertained are under coloured and are mostly classed as soft from a improved varieties of cotton in 1943 44 was commercial point of view. Most of the Indian about 10 7 million acres. The consumption of Indian cotton in mills in India amounted to 1,110,000 bales in 1913 41. The principal export is of short stapic cotton below 7/8" in stuple but there is also in normal years an export of medium and a long staple Indian cotton, of staple length 7/8" to 1-1/16", such as Punjab American There is no Indian cotton belt, Bombay Province, the Punjab, the Central Provinces and Berar, Madras Province, Sind and United Provinces and the Indian States of Hyderabad and Baroda, all have important cotton tracts producing distinct types Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter Yields vary from October to May and June greatly, in the best irrigated tracts the normal yield is about 200 lbs of ginned cotton per acre, and yields much above this have been recorded, whilst in the poorest unirrigated tracts 60 lbs Of recent years, as the per acre is a good crop results of the work of the Agricultural Departments and the Indian Central Cotton Committee, the quality and yield of staple cottons have improved and also the yield and cleanliness of the produce from the short staple tracts

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Markets Act, the Central Provinces Cotton Markets Act and the Madras (Commercial Crops) Markets Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing In certain provinces, legislation has been enacted, or is under consideration, with the aim of pre venting the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural Departments have continued the property of the prop nued their campuign of cotton improvementapart from improvements in methods of cultivation

Exports—The figures for export by sea of Indian cotton from British India to foreign countries for the five fiscal years (ending 31st March) 1937-42 are shown in the table below -" (In thousand bales of 400 lbs each)

Countries $\begin{vmatrix} 1937 - | 1938 - | 1939 - | 1940 - | 1941 - | 41 \end{vmatrix}$ 547 291 United 395 411 472 Kingdom 43 76 23 Other parts 23 27 of British Empire 385 1,211 1,056 705 1,359 Japan Italy 151 92 52 229 126 France 95 169 141 China (ex-681 754 69193 clusiveof Hong. kong) 5 Belgium 196 68 142 Spain 15 Germany 192 166 52 289 239 Other 277 268 296 countries 2,731 2,703 2,948 2,168 1,488 Total

Sugarcane -India until recently a large importer of sugar is now one of the most impor tant sugarcane growing countries in the world The a cain 1944 4 wa estimated to 1 c 4 0 4 000 acres as against 4 113 000 acres in 1943 44 The crop is mostly grown in the subtrontane tr cts of North rn India more than half the area bein in the United Provinces The indi genous hard thin low-ucrose canes have now largely been replaced by a edling cames of hi h quality mainly the productions f th Imperi I Surgarcane Breeding Stations Colmbatore The total area under improved varie les of cane in India in 1940-41 was estin ated to be 3 a res repres ntin approximately 4 0 per cent of the total area. The number of factories in different Pro inces and States has increased from 57 in 193 33 to 167 in 1941 4 with 151 working factories during the season of 1943 44 The production of sug dl ect from ane durin the se son of 1943 44 totalled 1 216 400 tons as against 1070 00 tons in 104 43 showing an increase of 13 f per cent. The aver eartr thon fort he whole of India was 10 0 Owing to the intern t onal situ tion sugar imports were negligible durin 1943 44 but the supply position conti ues to b sat sfactory

Glisseds—The crops classified under the heading are chiefly groundnuts linesed sessamum and the cruciferous cike ds (rape mustard etc.) Although clisseds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature they cover an immense area.

Groundnut—India has the largest area und reconstruct in it is world Madras ranks et al. In the world Madras ranks et al. In the world Madras ranks et al. Jute — Jute fibre is obtained from two species of pl his called Gorchorus Capsularies and Ghor chorus Olitorius respectively are conditions required for jute calitation are (a) high tem perature (b) deep soil of I irl) fine texture (r) rainfall of over 40 inches so distributed that while the young plants have enough moisture to the condition of

The crop is sown broadcast during February to May on well prepared seed beds It is commonly weeded and thinned thrice Four to five months after sowing when the crop is about to

flower it is cut

The plants often grow to a helph of 12 feet or more The pl nts are submerged ut der water for rettin and when ritting is complete that is in about ten to twenty days the justus are moved The fibre is then carefully separated from the stalk washed and dried when it is ready for being converted into various uses

India practically holds a monopoly of the pro duction of raw jute. Attempts have been made and are still being made in different parts of the world to grow jute but nowhere has it been possible to grow jute on such a scale as to break down the monopoly of India.

Th annu lw ld consumption of the fibre in recent years vari d from 79 to 1 5 lass of bales of 400 lbs each the av rg consumption bei gne r about 100 laces of bls 5 hipping difficultie and otter is to s su lng out of the w dverset aff cet d the just trade in 1944 There was however increas d consumption of jute in Indi for war nurrosses

better quality eigerette tobacco both in Medras and in Bihar. The area under tobacco in British India in 1940 41 was 11,25,000 acres as ac dust 11,80,000 acres an 1930 40. The total yield of dried leaf was 423,000 fons in 1940 41 as against 110,000 tons in the preceding year.

Live-stock Census —The report on the 5th quinquennial Census of Live stock in India, taken in Induary 1930, shows that there were then in British India, excluding United Provinces Bihar and Orisa, 110 million heads of bovine cittle, made up roughly of about 57 million heads of oxen and 22 million heads of buffaloes

For draught purposes cattle are mainly used everywhere though male buffaloes are impor tant as draught animals in the rice tracts and damper parts of the country I or dairs purposes, the buffalo is important, the milk yield being high and the percentage of butter fat consider The bert known ably above that in cow's milk breeds are the Murra buffaloes of the Punjab. the Jafferabadi buffaloes of Kathlawar, and the Surti and Pandharpuri buffaloes of the Bombay Province The cittle and buffalo population in India is abnormally high amounting to over 60 per cent of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill fed and inem-Nevertheless the best Indian breeds any merits. Of the draught types, the have many merits best known breeds are the Hissar (Punjah), Hansi (Punjab), Bhaganari (Baluchistan), Nellore (Madras), Amrit Mahal (Mysore), Kankrej (Gujarat), Kangayam (Madras), Kherigarh (UP), Malvi (CI), Khillar (Deccan), Nimar (East Khandesh), and Dangi (Konkan) Amongst the best milking breeds are the Sahinal (Punjab), the Gir (Kathiawar) and Scindi (Sind) Of the dual purpose (1 e draught and milk combined) the best known breeds are Hissar (Punjab), the Hariana (Punjab and U P), the Thar-Parkar (Sind), the Kankrej (Gujarat) and the Gir (Kathiawar) On the Government cattle breeding farms reduces bards are bards. cattle breeding farms pedigree herds are being built up and from these selected bulls are issued. preference being given to special breeding areas to villages which undertake to exclude 'scrub' bulls and where serious efforts to maintain a good strain of cow are made Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage The premium bull system is also working well in some

Catle Improvement —India possesses some very fine breeds of cattle, each breed being peculiarly suited to the area to which it is indigenous To mention some, there is the heavy fast Kankrej breed in Gujurat, admirably suited to the sandy deep rutted roads found in this part Then we have the Dangi or Kala Kheri born and bred in the hilly, heavy rainfall area of the western ghats Rain and water logged conditions do not affect this breed, indeed, the more the rain, the better it thrives On the plateau of the Central Deccan, we have the Khillar, a light fast draught animal which thrives on very meagre pastures and is essentially suited to the hard stony country in which it is reared

A good deat has been done for the improvement of cattle. The various Provinces have farms on which pedigree bulls are bred and reard. These are placed out in suitable villages on a premium system. In the Province of Bombay, iterd Registers are maintained for 8 of the breeds of the Province, shows are held annually and progress is to be noticed in those areas in which such work has been undertaken. In addition, the Bombay Live stock Improvement Act of 1933, known as the "Castration Act" which is intended to prevent promiceuous breeding by undesirable maie stock in the villages in the Province.

Sheep Improvement—It has been estimated that the number of sheep in India is in the neighbourhood of 4½ crores and that the total quantity of wool produce is 8½ crore poundannually. The production of wool per sheep varies greatly in different parts of the country. In the North West I ronther Province, Bain chistan, Sind, the Punjah, United Provinces litajputana and Western India States, the annual production per sheep is estimated at between in 11bs to 11ba, while in the rest of the Provinces it does not exceed 11b. The average for the whole of India is in the neighbourhood of 19 bb per sheep per year. This would indicate the vast scope for increasing wool production.

The improvement of finer qualities of wool has been engaging the attention of the Imperial Council of Agricultural Research since 1933, and a systematic breeding on the five principal Indian breeds of sheep was undertaken in the Punjab (Hissar), Madras (Hosur) and Bombay (Poona), and promising results have been achieved The Wool Analysis Laboratory in Poona has systematized the methods of valuation of fleeces for selective breeding and further research on wool fibre and its relation to sheep breeding is being carried out and successful results extended in the districts

Dairying—India is still far behind other countries in the matter of dairy farming and in the retail dairy business. This is mainly due to the climatic conditions of the country and the vast distances t, be covered in transporting milk. The only solution seems to be Co operative dairy produce, handling and sale societies. Dairy farming in India is at present, a cottage industry, each household producing a few pounds of milk, at present this milk is converted by very wasteful methods into products that can be stored and transported long distances, such as ghee, (clarified butter), country butter, and Khawa, a desiccated whole milk produced by boiling milk and evaporating the water contents until a solid mass is obtained

Each Province has its Agricultural College where Dairying in all its aspects is taught, and for higher training in this subject, there is the Imperial Institute of Animal Husbandry and Dairying A good deal of research is still necessary

The butter trade has improved considerably of late years In cities pasteurizing plants for the retail milk trade are gradually increasing Milk is now sold in sealed bottles, this trade, however, is small The Indian milk consumer in large cities still demands his milk just prior to consumption Unlike the two deliveries of milk in other countries, the milk producer in our large

cities has to deliver milk about 5 times a day | mouth disease hæmo-rhagic Septicamia black this naturally makes milk more expensive | quarter and anthrax in ruminanta while luber | India is expensive of the same difficulties as culosis Johnes disease and contagious abortion this naturally makes milk more expensive India is experiencing the same difficulties as in the cities when dry

The Government of India maintain an Institute of Animal Husbandry and Dairying at Bangalore

Animal Husbandry -Details of the steps taken and progress made in the control of disease and improvement of stock are given in a blennia!

review of animal husbandry in India

The control of contagious diseases of live-stock in India is carried out by the Civil Veterinary Departments in the Provinces and major Indian States The staffs of these departments are States The staffs of these departments are for the most part resmited from among the graduates of Indian Veterlaary Colleges of which there are five or one each at Lahore Patma Calcutta Bombay and Madras The chief research centry is the Imperial Veterhary? Research Institute at Mukteswar in the United Provinces and its branch at listinger near Barelly This institute is maintained by the Government of India and has recently been considerably expanded the latest additions being a poultry research station and a nutrition institute A certain amount of research is allo conducted at the Provincial Colleges

In addition to research the Imperial Veterinary Research Institute also manuf ctures large quantities of sers and v coines for the use of the Provincial Departments in their fight against disease and until recently was the only manu facturing centre for these products. Serum lastitutes have however been opened in recent

other countries when milk was produced in the are assuming greater importance than in the cities (ie) the destruction of cows and calves past Glanders and Surra are both scheduled diseases under the glanders and fracy act Glanders is incurable but surra can now be successfully treated with Namanol. AGRICULTURAL PROGRESS

Lalithnow Commission The Famine Commission salong agos 1866 made the first proposal for a separate Department of Agricult re but little resulted except the collectin of agricultural statistics and other d ta with the object of throng these proposes. of throwing light on family problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived intere t in the matter and their proposal for a new Department for Agriculture and silled subjects in the Government of India and for provincial departments of agriculture bore

ad for provincial departem macofagriculture bore fruiter insulty Pr vincial Department manily concerned themsel a set first with agricultural, existing but e pe insulai farms were opened kitatis but e pe insulai farms were opened with the concerned of the control of the contr

Arr altural Progr .—The historical aspect, ture was appointed and in the same ye r an of agricultural de element in India has limperial Mycologist was added followed by an been folly dealt with in the report of the lamperial habomologist in 1903 The press at Lallithone Commission The Program of the lamperial habomologist in 1903 The press of the lamperial habomologist in 1903 and the press of the lamperial habomologist in 1903 and the press of the lamperial habomologist in 1903 and the press of the lamperial habomologist in 1903 and the lamperial habomologis imperial intendencial was annea pintowed by an imperial hatomologist in 1903. The pres nt departments of agriculture however owe their e istence to the foresight and energy of Lord Curron whose famous despatch of 1903 marked the comme cement of the reorganisation which the comme cement of the recognisation which took pice in 1905. That scheme provided for a central resear i institute at Pusa completely staffed provincial departments of agriculture with agricultural colleges and provincial research instit tes and an exprimental farm in each important agricultural tract. The Indian Agricultural Service was constituted in 1906 Since that date progress has been steady and continuous With the advent of the reforms of 1919 agriculture became a provincial transfer red subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseas s and pests of pi nts and anim is The Impe isi Sug reane breedig station t Colmbatore is yet another bran hof the Imperial Agricultural Research Institute

Parallel developments took place in the own conditions provision made for matters connected with animal health The now world-famous Imperial Institute of Veterinary Research at Mukteswar started in 1893 as a modest hill laboratory for research on rinderpest It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector-The departments were completely General provincialised in 1919, the Government of India continuing to finance and control the Mukteswar Research Institute and its branch station at Izatnagar (Bareilly)

Recent Progress -As now constituted, the agricultural departments include a complete organisation for bringing the results of the ap plication of science to agriculture into the village At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the enect of improved seed, methods, implements in collaboration with the special marketing and manures is shown under the cultivators' staff appointed in the various provinces

Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demon stration and seed farms and seed stores ascertained results of the work of the agricul tural department are striking enough The latest available figure regarding the area under improved varieties of crops in British India was approximately 23 00 million acres These figures by no means represent the whole extent to which improved strains have replaced old varieties as it is almost impossible to gauge the full extent of the "natural spread" of improved varieties Improved methods of cultivation and manuring are steadily spreading, work is in pro gress on most of the major crops and each year brings new triumphs

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing A central marketing of agricultural produce section has been established under the Imperial Council of Agricultural Research It works

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves cribing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an Imperial Council of Agricultural Research

The primary function of the Council would be to promote, guide and co ordinate agricultural, including veterinary, research in India and to link it with agricultural research in other parts of the British Empire and in foreign countries It would make arrangements for the training of research workers, would act as a clearing house of information in regard not only to house of information in regard not only to research but also to agricultural and veterinary matters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs 50 lakhs to which additions should be made from time to time as financial conditions permit. Its Chairman should be an experienced administrator with a knowledge, if

possible, of Indian conditions and, in addition, there should be two other whole-time members of the Council for agriculture and animal hus bandry respectively The Commission suggest-ed that the Council should consist of thirty six members, in addition to the Chairman and the two whole-time members Of these, eight would be nominated by the Government of India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton Committee and the planting community respect ively and five would be nominated by the Council for the approval of the Government of India The Council would largely work through a Standing Finance Committee and sub committees A provincial committee should be established in each major province to work in close co operation with it The advisory duties of the Agricultural Adviser to the Government of India would be taken over by the Chairman and whole time members of the Research Council, his adminis trative duties being taken over by a whole time Director of the Pusa Institute

Constitution of the Council—In a Resolution issued on May 23, 1929, the Government of India stated that whilst they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the commission outlined the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be desirable that the Tegislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India They had, therefore, decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to and control of funds which is mentioned below

and an Advisory Board the functions of which 19 9 to consider the terms of a memorandum would be to ex mine all proposals in connection with the scientific objects of the Council which might be submitted to the Governi g Body to report on their feasibility and to advise n any other questions referred to it by the Govern ing Body The Governing Body would consist of the Member of the Governor General a Council in charge of the portfolio of Agriculture who would be ex offic o Chairman the Principal Administrative Officer of the Council who would be ex-officio Vice-Chairman one representative of the Council of State two representatives of the Legi lative Assembly one representative of the European Business community elected by the Associated Chambers of Commerce of India, one representative of the Indian busines community elected by the Federation of Indian Chambers of Commerce and Industry the Chambers of Consultance and Lindships Provincial Ministers of Agriculture two representatives elected by the Advisory Board the Secretary to the Govt of India in the Dept responsible for the admi istr. tion of Agricultu e from time to time appoint

The Advisory Board would con ist of all those whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities who under the Indian commercial communities was under the modified scheme would be member of the Governing Body In view of their exclusion from the Advisory Board the university representation would be increased from three to our and the sclentific representation by the addition of the Durector of the Indian Institute of Scheme. of Science, Bang lore a representative of the Forest Research Institute Dehra Dun and a representative elected by the Indian Research Fund Association A representative elected by the Indian Research Fund Association A representative of the Cooperative Movement would allo be added The Frincip I Administrative Officer to the Council would be ex-officio Chairman of the Advisory Research

The Government of India further announced that for the lump grant of Rs 50 lakhs recom-mended by the Royal Commission they had mended by the Röyal Commission they had decided to substitute an initi liump grant of lis 25 lakhs of which Rs 15 lakhs would be paid in 10 9-30 supplemented by a fixed minimal print annually. The annual grant would be devoted to all of which Rs 6 lakhs would be devoted to all or which Rs 6 lakhs would be devoted to all the substitutions of the scheduling by the substitution objects of the Commission of the substitution of lakhs to the cost of its staff nd secretariat The Council would have an entirely free hand in regard to the expenditure of the grants made to regain to the expenditure of the grants made to lor scientific purposes subject to the condition hat no liability in respect of such matters as lave or pension contributions after the reserved or which the grant had been given would be acurred.

The Government of India also stated their eciaion that the Council should not be consti

of association and the Rules and Regulations At that meeting it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs ... lakhs to the funds of the Council This offer was gratefully accepted and the Revenue Member of the Nizam s Government has been added to the Governing Body the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board Since then donations of one lake each payable in 20 equal annual instalments have been made by the Mysore Baroda Cochin Travancore and K hmi States and each nominates one representative to the Governing Body of the Council and two technical members to the Advisory Board The Bhopal State was admitted as a constituent member of the Council on payment of a donation of Rs 50 000 in 0 equ l annual instalments and was allowed the same representation on the Council as has been granted to the other consti-tuent States The Gwallor State has also become the Financial Adviser I CAR and such other a constituent member of the Council on payment persons sthe Governor General in Council might of a donation of Rs one lakh in not more than 5 annual instalments and has been allowed the usual representation

By a Resolution of August 4 1930 the Secre tarl t of the Imperial Council of Agricultural Rese rch w sco stuted a Department of the Government of India This arrangement was ended by a Resolution of January 15 1939 and connection between the Government of India and th Council Secretariat is now through the Department of Education Health and Lands In the same Resolution it was announced th t the two Expert Officers of the Council Would hencef th be designated Agricultural Commis loners with the Government of India nd Animal Husb ndry C mmissioner with the Government of Indi re pectively

IMPROVEMENT OF AGRICULTURAL MARKETING IN INDIA.

In view of the importance of agricultural marketing as an aid to the general economic recovery of the country, the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture and generally endorsed by the Central Banking Luquiry Committee regarding marketing surveys After consultation with Provincial Governments, it was decided that the first step should be the appointment of a highly qualified and experienced marketing expert with practical knowledge of agricultural marketing in other countries

Central Agricultural Marketing In accordance with this decision, the office of the Agricultural Marketing Advisor to the Govt of India, which has since been redesignated as the Central Agricultural Marketing Department, was constituted with effect from 1st January 1935, at Delhi with Mr A M Livingstone as the first Agricultural Marketing Adviser After more than six years of useful activities in India, during which period he was the guiding spirit of the marketing organisation all over India he relinquished charge of his office, on the 17th March, 1941 The present incubment of the post of Agricultural Marketing Adviser is Mr D R Sethi, CIE, IAS, who also holds in addition the post of Agricultural Production Adviser to the Government of India

The post of Deputy Agricultural Marketing Adviser to the Government of India which had been added on to the Department in July 1940 but was held in abeyance since March 1941, was also revived about the same time and Khan Mas also revived about the same time and which Bahadur A R Malik, MA, B Sc (Edin), Senior Marketing Officer, Bengal (now redesignated as Director of Agricultural Marketing, Bengal) was appointed to it. Since about the middle of March 1945, Khan Bahadur A R Mulik is carrying on the current duties of the post of Agricultural Marketing Adviser vice Mr D R. Sothi, who has proceeded on layer. The staff Sethi who has proceeded on leave The staff now consists of a Deputy Agricultural Marketing Adviser who carries on the duties of the Agricul-

tural Marketing Adviser, two Senior Marketing Officers, four Marketing Officers, one Supervising Officer (Grading Stations) and fifteen Assistant Marketing Officers The commencement of the year 1943 also saw the Department bifurcated The commencement of the at two stations, etc., Delhi and Ajmer, a major part being shifted to the latter place to release accommodation for war Offices in Delhi

With the help of suitable subsidies from the Imperial Council of Agricultural Research, the Provincial Governments established similar organisations in their respective areas and have, in some cases, further added to their staffs to meet the growing demand for developmental work of a practical nature Certain leading Indian States have also co operated by appoint ing full time officers in their States and over 200 States have nominated officers to deal with marketing questions In Provinces and States which have no Senior Marketing Officers the Director of Agriculture supervises the work of the marketing section The Central Marketing Staff are responsible for the survey work in a large number of States which do not have staffs of their own They also have to advise and assist the local marketing staffs in carrying out their work

Marketing Scheme -The Marketing Scheme was originally sanctioned for a period ocneme was originally sanctioned for a period of five years and the new organisation was given the two fold task of (1) carrying out marketing surveys and publishing reports describing in detail the present system of marketing of some of the more important agricultural and animal husbandry products with recommendations regarding the lines of future improvement and (ii) drawing up suitable grade specifications after examining the chemical grade specifications after examining the chemical and physical characteristics of market samples of such commodities and testing their working under practical conditions

Apart from the Report on the Cold Storage and Transport of Perishable Produce in Delhi which was issued in 1937, all India Marketi Survey Reports in respect of wheat, linsee

skins coconuts and cashewnuts have already been published while the reports on bananas sheep and goats fish cattle barley and gram are expected to be released shortly The reports on some other commodities 11.Z rape eed mustard and toris wool and hair stone and small fruits maize and millets castor seed sanihemp ghes and other milk products, sesamum and niger seeds fibres meat and poultry are in different stages of preparation and some of these are very nearly complete Handbook on the Quality of Indian Wool which is intended to serve as a guide to wool merchants and persons interested in wool and a Preliminary Quide to Indian Fish Fisheries and Methods of Fishing and Curing have also been published. It is also proposed to take up shortly the drafting of a survey report on mangoes and to bring the data in the wheat report up-to date by issuing a suitable supple

About the begt to of 1943 a rapid survey was also undertaken in respect of certain. vegetables (peas beans cabbage cauliflower tomatoes and carrots) and certain important by the Agricultural M rketing Adviser shortly Under instructions from the Govt of India tapid surveys were also conducted about the same period in regard to (1) bones and bone meals and (11) Indian requirements of agricul tur l implements and machinery and the relevant reports prepa ed In 1944 the Department also carri d out a rapid survey of milk production in Delhi provinc in connection with a scheme to the supply of milk to Govern ment servants in Delhi and New Dehli

Celd Storage Transport—With a vi w to studying the commercial posibilities of cold storage transport of peri hable products like fruits etc certain refrigerated trapport tril awere conducted duri g 1940 41 on two N W R cold storage Westers 241 Federa W cold storage wagons cold storage wagons All India survey work on cold storage wagons All India survey work on cold storage was also carried out in part during that period. In view however of the recent transport difficulties and the consequent shortage of w gons the experim at and survey on cold storage has had to be po tponed for the present

Gr ding and Mrki g—In discussing steps which might be taken to improve th Sener I levet of quality the Royal Commission thought the torg nised tr de associatios in India. thought th t org nised tr de associatos a min-fed trouble of gre t assi tame in pplying effective pressur to secure improved quality out by the pressure of the pressure of the pressure of the two great pressure of the pressure of the pressure of two great pressure of the pressure of the pressure of two great pressure of the pressure of the pressure of the first the physical renders of the pressure of the pressure of modities with as fruit eggs efc on the basis of at tutory at nadards and secondly the modifies "ch as fruit eggs etc on the cashs of at tutory at dards in descondly the condition of control tens in standard in the condition of control tens in standard in the condition of control tens in the condition of control tens in the condition of control tens in the condition of control tens in the condition of

eggs tobacco grapes coffee potatoes milk of prescribed grade designations applied to groundnuts rice hides sugar citrus fruits schedule products. As a result of consultation markets and fairs co-operative marketing lac with provincial governments and repre entative trade and manufacturing interests further commodities were added to the schedule to the Act which now includes fruits vegetables eggs dairy produce tobacco coffee hides and skins fruit products ata oliseeds vegetable oils (including hydrogenated oils and vegetable including hydrogenated wis and vegetable flats) cotton rice i c wheat sann hemp sug reans gur (laggery) myrobalans and burn. The grading and marking rules in respect of most of these commodities h we been duly prepared and notified. Tentative grade specifications and rules for several varieties of rice. and fruits have al o been drawn up Sev ral Indian States have adopted similar legislation and are applying the AGMARK to the com modities graded in their areas

The development of trading on the basis of the stand rd methods of gr ding is definitely cat hing on In the early stages experi cat ming on in the early stages experimental grading stations are operated on the basis of provi lonal standards subsequently the process of grading and marking is done commercially on a voluntary basis by packers holding Certificate of Authorisation issued pulses including in antitotte man the pulse in the pulse including in antitotte may be the primary producer vegetable survey was completed and the report or co operative society or an association of thereon submitted to Government. The draft primary producers village collectors and proming of the report on pulses will be taken unpresented the individual 1 ger packer or manu. eessors or the indi idual I reer packer or manu facturer holding a key position in the process of distribution

> By the close of the year 1944 the standardised grading and marking of the many commodities referred to above was being carried out com mercially at some 63 centres During 1944 alone more than Rs 813 lakhs worth of produce were sold under the Agmark as compared with about 549 lakhs in the previous year as per

demand was responsible for keeping up the progress in the grading of commodities like Act, 1937. In order to ensure that grading is ghee, butter and eggs—Grading of ghee recorded a sharp expansion in the United Provinces in 1944 mainly because of a decision of the consisting of one Chief Inspector and 7 Inspector. ghee, butter and eggs Grading of ghee recorded a sharp expansion in the United Provinces in 1944 mainly because of a decision of the Provincial Government to ban all exports of ghee out of the Provinces except for a limited quantity of Agmark graded glice for civilian consumption in areas normally catered for by the United Provinces The United Provinces Government have also fixed higher prices for Agmark graded mustard oil as against the ungraded oil. The grading output of this commodity is therefore on the increase. It is noteworthy that this principle of standardising the qualities of commodities subject to substantral inter and intra provincial movements is becoming increasingly popular The Bihar Govt are now following the example of the becoming increasingly United Provinces Government and are exploring the possibilities of adopting similar arrangements in respect of the marketable and exportable surplus of ghee and mustard oil in that province The egg grading scheme is also progressing satisfactorily and a proposal to reduce the number of grades for hen and duck eggs to three only so is to facilitate rapid marketing has been engaging attention recently An interesting experiment for marking the date of grading on the shell of graded eggs was initiated at Delhi and was attended with a fair amount It is proposed to adopt the principle on a wider scale as soon as circumstances permit

Staples like rice and ata being in short supply due to war conditions have, however, recently gone down in the grading scale Towards the close of 1943 an experiment was imitated in Madras Province to grade rice according to ad hoc war quality specifications and to link up such grading with the activities of the local Civil Supplies Department The scheme expanded considerably but had to be closed down towards the close of 1944 due to low arrivals in the market of good quality rice. The Department also decided recently to abandon the ata grading scheme as it was not considered to be of direct benefit to the pro-The view has generally been adopted that as far as possible the grading of commod-ities, the quality of which could not be verified by definite chemical tests, should not be allowed on any considerable scale to commodities like fruits and vegetables, sugarcane gur and bura, when graded by producers' organisations only

The task of assisting The task of assisting the formation of such organisations is also being pursued vigorously

Special mention should be made here of the scheme for the grading and marking of sannhemp introduced towards the close of 1942 sannhemp introduced towards one cooler. The scheme was drawn up as a result of complaints received from the Hemp Controller in the United Kingdom regarding the low of exports of hemp from India. The in the United Kingdom regarding the low quality of exports of hemp from India The scheme follows the general lines of all other grading schemes under the Agmark in that grading is done by authorised process holding certificates of authorisation issued by the Agricultural Marketing Adviser to the Govt of India have, by a notification under the Sea Customs Act, prolibited the export of sannhemp not graded under the Agricultural Chemist to the Government of

tors has been appointed at stations at Benarcs, Vizianagram and Bombsy major portion of the cost of this staff is recovered from the trade by means of a charge of six annas per bale The Vice President of the London Hemp Association visited India towards the close of 1944 and discussed the scheme with the Agricultural Marketing Adviser and the Inspectorate staff. As a result of these discussions sions, certain modifications in the scheme will shortly be carried out so as to ensure harmonious working

In the beginning of 1944 a conference of tobacco interests convened at Guntur decided that the quality of exports of all types of tobacco from India should be controlled and that no tobacco should be exported on consignment account unless it conformed to Agmark specifica tions In pursuance of these recommendations an inspectorate staff consisting of one Chief Inspector and 8 Inspectors has recently been created for checking the quality of the exportable Agmark graded tobacco but the extent of application of compulsory quality control is still under consideration. The Inspectorate is expected to start functioning very shortly It will be set up at Guntur, an important Virginia tobacco centre, and its entire cost will be met from the grant of Rs 10 lakin per annum made to the Imperial Council of Agricultural Research by the Government of India out of the excise duty on tobacco Similar proposals for compulsory grading of the several kinds Similar proposals of fruit juices and products, sponsored in con sultation with a representative conference held in May 1941, are also expected to take shape shortly It is proposed to work the scheme in pusuance of the powers conferred by the Defence of India Rules by means of a suitable order.

Inspection of Graded Produce-In order to ensure adequate control of quality and proper grading, several persons in the provinces and States were authorised by the Agricultural Marketing Adviser to inspect graded produce and grading centres The co operation of agricultural, veterinary and allied departments in all provinces was sought for in this connection and several of their officers were provided with the necessary authority to inspect grading stations and graded produce Arrangements have also been made for controlling the quality of graded produce by systematically analysing samples collected by the inspecting staff both from the packers' premises as well as from the markets Nearly 10,000 samples of ghee and quite a large number of edible oil samples were applying at the Control Control and the control of the control analysed at the Central Control Laboratory, Cawnpore, during the calendar year 1944 Several samples of graded gur, bura, butter and fruit products are being periodically analysed at the Imperial Agricultural Research

was appointed to assist the Cerealist at Lyalipur in this work A Rice Analyst was also added work on rice samples was made over to him work on rice samples was made over to him for the purpose of keeping a vigilant watch on the quality of Agmark eggs put in Dehli market an Egg Grading Demonstrator has also been appointed and the number of stale egg put on the market has decreased considerably

The exercise of quality control by examination of samples at these laboratories naturally involves ot samples at these islobtatories naturally involves a certain amount of unavoidable expenditure. This is partly offset by the sale of AGMARK labels to authorised packers. It was however observed that the Ag leutural Produce (Grading and Marking) Act 1937, under which such recoveries were being made did not permit the levy of any further charges th n what the labels etc were costing to the Department In order therefore that a portion if not the whole of the inspection cost could be recovered from the packers who were the chief beneficiaries from the grading sel eme the Act was amended in about grading sel fime the Act was amended in about; the middle of 1943 so as to pen int recoveries on labels for this purpose as well as for arranging, any special publicity with regard to patticular commodities in the early stag s b fore the grading of a particular commodity in spassed the experimental stags and proved its merit the experimental stags and proved its merit provided by the stage of the experimental stags and proved its merit provided by the stage of the stag control as far as possible self-suppo ting particularly with regard to commodities mainly produced resport eg sannhemp or commodities like ghe the grading of which has now become dintiely established. The principle of recovering a part of the cost of quality control The principle has also been extended to the commodities and also been extended to the butt r (and vanaspati which is not how ver being graded). The f irly rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the first rapid expansion in the grading of the grading of the grading of the grading expansion in the grading of the grading of the grading expansion in the grading of the grading expansion in the grading of the grading expansion in the grading of the grading expansion in the grading of the grading expansion in the grad

shee from year to year has also co umitted the Department to ensure it at proper arrangements ar instituted or existing ones at in order to provide for an unfalling check on the quality of the graded products. Certain new measur so as to mak the scheme self supporting

the Central Provinces In 1943 an Ata Analystion this basis unanimous support was not forthcoming owing partly to the existence of an excessive number of sm ll futures trading to the headquarters staff and the entire analytical associations so ttered all over the country and partly to the opposition of one or two important trading institutions and certain influential exporting and importing interests

> With a view to bringing about uniformity in the different contract terms for wheat and linseed (including the Standard Contract) adopted by the trade an informal Conference of the representatives of 3 important trade associations of Bombay was convened in Fel ruary 1941 Besides suggesting certain changes in the tolerances and limits of rejection changes in the toerances and limits of rejection for damaged slightly damaged and shrivelled grains the Conference made important recom-mend tions etz that (1) 5 tons should be adopted as an alternative to 500 maunds as the minimum unit of transaction and () that the Cwt should be adopt d as an alternative to the maund as the unit of quotation In the case of linseed the Co ference further suggested that the cleaning charge under Refraction should be These latter suggestions lowered were cir culated to the trade interests concerned and they have been accepted

In the case of wheat it has been decided to amend the Standard Contract for wheat as finally agreed to in 1938 and thereby implement the above mentioned recommendations

The Standard Groundnut Contr ct was examined at the Bombay Conf rence 1941 and several minor changes were suggested. These were afterwards circui ted to the tr de interests concerned As reg rd Hand Picked Sel cted Groundnuts (kernels and nuts in shell) the Contract terms agreed to at a Conf rence h ld in 1940 were further revi ed and accepted by butt r (and leading trade assort tions of Bombay Three clar graded) leading exporters of groundnuts in M dras to grading of adoptet the St adard Groundnut Contract to multicet it from the begt ni g of 194 m d they have arrangements repo ted th t the Contract terms he have halg accepted both by the sellers a d pur halg age ts and that thy wo ked very well during the pelod of adoption. The question of the graded products. Certain new measur | law according been in trutted to gut a daring the pe lod of adoption. The question | law according been in trutted to gut a daring the period of adoption. The question | law according to standard contract terms from the period of the per coal rence have furth er acreed to a proportionate adopt the standard contract terms a luntarily herease in the charges I vied on graded give compulsion being introduced only if the trade fall to do so

Standard Contract T runs.—The Standard Standard Co tain rs.—For most commodities control true. The standard in the contain rs. u.e. in India are very variably agreed to by the Oran and Oliseed were the contain rs. u.e. in India are very variably active 1938 and similar terms for ground in the standard as a mitorant Court rune in the contents are subject to appreciable dams of the contain rate which the standard contents are subject to appreciable dams of the India and India and India and India and India are subject to appreciable dams of the India and India an

with boxes of standard patterns for use in transit! Unfortunately, due mainly to lack of funds, the of eggs and fruits Careful records were kept of the results for comparing the standard and the ordinary containers

In the Travancore experiment conducted during 1939 and 1940 covering about 3,00,000 eggs, the loss by damaged and broken eggs in the standard boxes was only 0 52 per cent as compared with damage and loss through pilfer age of 1 77 per cent in the ordinary baskets. As a result of the experiments, almost the entire exports of eggs from the State to other markets like Madras were packed in the improved containers in 1941 This was facilitated by the grant of suitable concessions in freight rates by the railway companies In the Bengal trials the total wastage in the standard boxes was 0 5 per cent as compared with 2 5 per cent in the case of baskets. The experiments conducted by the Rampur State revealed that in 3 out of 4 containers of eggs consigned to Nainital in August 1941, the contents were absolutely undamaged, while in the case of the fourth, the damage was only about 1 per cent Such reductions in the physical loss of produce are of small magnitude, but even a saving of 1 per cent on this score alone would represent an economy of something like Rs 51 lakhs in the cost of distribution of the eggs put on the market These experiments, however, received a set back during 1942 owing to transport difficulties created by the War

Legislation Regulating Markets—The draft model bill for the regulation of markets circulated by the Agricultural Marketing Adviser in the year 1938 formed the basis for necessary legislation in provinces and States Agricultural Produce Markets Acts are now in force in the Punjub, North West Frontier Province, Sind, Madras, Bombay, Central Provinces, Mysore and Hyderabad and the question is under consideration in other provinces and States where no legislation already exists It is, however, observed that due to abnormal conditions, legislation relating to regulated markets is not making the desirable progress It is, however, gratifying to note that the necessity for organising regulated markets has recently been stressed by the Central Food Advisory Council and attention of the Provinces and States has been drawn to the draft bill proposed by the Central Agricultural Marketing Department in 1938 in this connection

The attempts at regulating the markets were fittingly strengthened and supplemented by the passage on the 28th March 1939, by the Central Government of the Standards of Weight Act, 1939 The Act came into force with effect from the 1st July 1942 and the Standards of Weights Rules, 1942 have also been prepared Rules will be enforced as soon as sets of standard weights are ready for distribution to the Pro-vincial and State Governments

Broadcasting Market Quotations The dissemination of reliable and accurate market intelligence is an essential function of the marketing department. The solution of the problems of food administration and price control would have been facilitated if a properly coordinated All India Market News Service had been in existence from the beginning and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated in the local product of the Agricultural Produce (Grading and Marking) Act, 1937 was suitably amended Proposals for the same have accordingly been submitted to the Govt of India recently Development of Export Markets—The Royal Commission on Agriculture and more recently the Indian Government Trade Commission and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated and efficient running would be best facilitated in the local product of the Agricultural Produce (Grading and Market) Act, 1937 was suitably amended Proposals for the same have accordingly been submitted to the Govt of India recently proposals for the same have accordingly been submitted to the Govt of India Produce (Grading and Market) Act, 1937 was suitably amended Proposals for the same have accordingly been submitted to the Govt of India Produce (Frading Act, 1937 was suitably amended Proposals for the same have accordingly been submitted to the Govt of India Produce (Frading Act, 1937 was suitably amended Proposa

Central Agricultural Marketing Department had to rest content with a skeleton service of limited value Similarly, except in the United Provinces, where a fairly comprehensive market intelligence service is being run under a special marketing staff, the arrangements in this behalf in the various provinces and States are totally inadequate

The Central Agricultural Marketing Department at present broadcasts (1) the daily market rates of a number of commodities at Hapur market, (2) the daily quotation for a few com modities like rice, gur, pistaches, raisins and almonds at Peshawar and wheat, rice, cotton and wool at Karachi and sugar at Bombay, (3) the daily market rates for cattle at Rhotak and Bahadurgarh and (4) a weekly market report dealing with the fluctuations in prices of commodities like wheat, rice, oilseeds, pulses and several graded articles at various centres In order to ensure accuracy in regard in India to cattle prices, three recorders have been appointed at Rohtak, Bahadurgarh and Bombay from Central funds During the year 1943, at the instance of the Food Department arrange ments were made to broadcast daily the market rates for coarse grains at a number of selected centres all over india, but this broadcast was discontinued after a short time The Department is also issuing a monthly review of prices and stocks relating to various commodities

Agricultural Publicity—The necessity for publicity for any scheme of agricultural improve ment should be obvious Efforts are accordingly being made to keep the public informed of the activities of the Department through the media of newspapers, exhibitions of special posters at railway stations and other suitable public places, and by putting up demonstrations stalls at the various agricultural and industrial exhibitions in the provinces and States In these exhibi tions, public demonstrations are given of the tions, public demonstrations are given of the technique of grading by exhibiting illustrative maps, diagrams and charts relating to the production supplies and prices and by sale of the actual graded commodities. A brief pamphlet on the "Story of Agmark" has also been prepared for distribution to the public. In the recent period, publicity of the above sort has however been modest as it was not considered desirable to increase the demand for Agmark products when it might not be possible to meet products when it might not be possible to meet At the same time it due to scarcity conditions it was found necessary to arrange for special publicity if any section of the trade in a particular commodity wanted it and was prepared to The Agricultural contribute towards the cost The Agricultural Produce (Grading and Marking) Act, 1937, has therefore been suitably amended to recover such cost

The question of setting up departmental AGMARK stalls was examined recently and it was considered necesary that their establishment and efficient running would be best facilitated only if the Agricultural Produce (Grading and Marking) Act, 1987 was suitably amended Proposals for the same have accordingly been

sioners abroad have pointed out repeatedly that it to the trade interests in India in order to find the main obstacle in the way of attempts at out whether such dressing could be done as a state of a tandardisation in the quality and have India The trade in India left that such dreving the stressed the need for an organised attempt to improve the quality of exported goods. The mechanic i means an I technical knowl de Central Agricultural Marketing Department has improve the quality of exported goods. With great difficulty some more informati means the beginning p it closes strendton to this was secured on the point and it was decided to problem. A scheme for the grading and marking of cedlac exported out of India was initiated in 1941 and during the period from July 1941 to January 1942 consignments of graded seedlac weighl g about o 194 maunds were sent to the United States of America. Though the report on the first consignment was favourable the experim at had to be abandoned due to the abn rmal conditions consequent on the War A reference has already been made to the scheme for the grading and marking of sann hemp exported from India This scheme is still in its fo mative stage and it is too soon to judge its usefulness As a result of the joint efforts of the oscimies as a result of the joint endes of the Central Agricultural Marketing Department and the Indian Government Trade Commissioner in Alexandri Indian tobacco has also been introduced in the Egyptian market and trading has been carried on on the basis of Agmark grade The Indian Government Trade Com grade The Indian Government Trade Comout of the Control of the American Control

IMPERIAL INSTITUTE OF SUGAR TECHNOLOGY.

The Indian Sugar Committee of 1920 recommended inter alia the establishment of a Central Research Institute as necessary for the proper development of the Sugar Industry in this

The recommendation of the Sugar Committee was accepted and the Imperial Institute of Sugar Technology was started at Cawapore by the Government of India on 1st October, 1936, to carry out research in the different branches of Sugar Technology and to help the Indian Sugar Industry in various ways by rendering technical assistance to Sugar Factories, by training students in all branches of Sugar Technology, by providing short term courses to technical men already engaged in the Industry, etc. From the 1st March 1945 the control of the Institute has passed over to the Indian Central Sugarcane Committee, formed by resolution of the Governor General in Council and registered under the Registration of Societies Act XXI of 1860 The Committee is constituted by members from every section of the industry, viz cane growers, sugar manufacturers, sugar merchants and Sugar Technologista

The Institute is financed by grants from the Sugar Excise Fund

ļ,

The work of the Institute has been organized under two broad heads, (a) office work including general administration and, (b) research and teaching The former includes the technical, the statistical and general sections, the latter consists of three main sections-Sugar Technology, Sugar Engineering and Sugar Chemistry,

the last comprising of Sugar Chemistry, Chemistry, Physical Chemistry and B The laboratories are well equipp mistry instruments required for research on sug allied products Attached to the Institute Experimental Sugar Factory, wo Sugar Engineering and Chemical Englishoratories, Sugar Research and Testing Bliggi Burger of Sugar Research and Testing 1 Bilari, Bureau of Sugar standards and r schemes for the manufacture of sugar ca India, prevention of deterioration of sugar

The functions of the Research and Station at Bilari are (1) testing of existing and processes in use in the open pan in (11) undertaking research work for intro improvements in the plants and process giving demonstration of new machines a proved process and (12) The Indian (Sugarcane Committee have recently cons a gur and khandsarı sub committee for a on the lines of work of the Research Sta

Apart from the technical work und Sugar Production Rules (1935) technical ance and advice on various aspects of the industry are given by the Institute to sugtories, central and provincial governmendian States and others The Institute yours to meet all technical requirements tories so far as its staff and equipment ! The more important types of work whi Institute undertakes for rendering te assistance to sugar factories are (a) ad promoters of new factories, (b) advice rela extensions and alterations of existing fac

Temporarily diverted to the Sann Hemp Grading Scheme

(c) advice relating to improvements in working | Tor most courses a period of factory training is of plant (d) advice relating to improvements in an essential condition for the grant of diploma or vestigations into special problems and (h) analy tical work

The Sugar Trade Information Service under the control of the Director is run to meet the re qui ements of the sugar trade and industry in India

The scope of the work of the Institute was brought to the notice of all persons interested in the sugar industry through a booklet entitled Functions and Activities In order to estab lish and maintain contact with the sugar facto ries and enable them to be in touch with research work carried out at the Institute and develop ments elsewhere arrangements have been made for issuing brief summaries on matters of t chni cal interest under the title of Sugar Notes Description and results of various experimental and research work carried out in the Institute are being published annually in the publication en titled Scientific Reports of the Imperial Insti

complete training in their respective subjects of charge to factorie on receipt of eng in

of plain (d) survives (e) technic I control of cartificate There are six regular courses of manufacturing process (f) advice regarding training for students desiring to qualified working targeness and cost of production (f) in technical posts in sugar factories er: Fellowship and Associateship courses in Sugar Technology and in Sugar Engineering and the Sug r Engineering Certificate Course the Su r Bollers Certificates Course Besides facilities are pro vided for men already engaged in the industry to have the necessary technical training during the off scason provided they have the requisite edu cational qualifications. The off season courses art—(a) Chemical Control (b) Bacteriology (c)
Pan Bolling (d) Fuel and Boller Control (e)
Statistical Methods (for research students)
(f) St tistics (for sugar students) (g) Dutch lan
gauge (h) G rman Language () Milling Plant operation and control and (1) Sugar storage

In order to afford adequate facilities to the Sugar Factories in India for selecting properly qu lifled staff and at the same time to reduce unemployment amongst the educated technical workers in the u ar indistry the Institute maintains an Employment B irea i wilch collect the of Spar me belong we are an area of the control

The chief ch vacteristics of the Indian rainfall ; cold weather rains are even heavier than those of the south west nonsoon the principal non-storage systems are found

> The expedient of storing water in the monsoon for utiliation I ring the subsequent dry weather has been practi ed in India from time imme mort I In their simplest form, such storage works co sist of n e rihen emb nament constructed across a valley or depression behind which the wat r collects and those der irrigating o ly a few acres each to the huge irrigating o is a few acres each to the lugs re-restroirs recently comple ed in the Deccan which are capatle of storling over 0.000 million cubic feet of water By gradually releasin water from a work of the latter type a supply c n be maintal ed long after the ri-on which the reser oir is situated would other wise be dry and useless

> The Three Classes—Previously all irriga-tion works were divided into three classes. Productie Protective and Minor but during the tric nium 19 1 4 the method of deter min! g the source from whi b the funds for the mini s the source from while the funds for the construction of Government works we e provided was changed and now all works whe ther m jor or minor for which capital accounts are kept he eben reclassified under two heats Froductive and Unpoductive with a third class embracing are a trig ted by non-capital we are the recognition of the satis. fied before a work can be clas ed as productive is that it sh ll within ten year of the com pletion of construction produce sufficient re nue to cover its w rking xpenses and the int re t charg s on its capital cost Most of the larg st irrig tion sy t ms in India belong to th p oducti e class

Unproductive works are const ucted primarily with a vi v to the prototion of prec ious tracts and t guard ag i st the necessit for periodi al venditure on the clief of th pop la tion in times of fami e They ar financed fr m th current r enues of I dia g ner lly fr m the nn l grant (r [mi relief nd in 1 nc a d ar not directly r m ne ti e ti construction of e ch u h wo k being sepa t tely 11 tifled by a compart o of the e ch acre prot ted to sed upo such f ctors as the probable est of mile r lief th popula t n f the tr ct th rea lready protected and th militum es wilci m st be protected in order to tide ove a period of sev re drought) with the cost of such protection

Nearly one eighth of the whol area irrigated I di from Government wo ks is effected by mi or works for which no capital account

The main increase has been in the class of Rs 3-4-0 to Rs 5-4-0 per acre for wheat, from productive works, which irrigated 4½ million Rs 3 to Rs 4-4-0 per acre for cotton and from acres in 1878-79 and rose to 20,756,209 acres in During the year 1941 42 the areas irrigated by productive and unproductive works amounted to 25 43 and 3 87 million acres respectively

The area irrigated in 1941-42 was the largest in the Punjab in which province 12 78 million acres were irrigated during the year, excluding area irrigated through channels which lie in the Indian states The Madras presidency came next, with an area of 7 71 million acres, followed by the United Provinces with an area of 5 89 million acres

Capital and Revenue —The total capital out lay, direct and indirect on irrigation and navigation works, including works under construction, amounted at the end of the year 1941-42 to Rs 15,206 lakhs The gross revenue for the year was Rs 1,636 lakhs and the working expenses 481 lakhs, the net return on the capital being, therefore, 10 34 per cent

The return on capital invested in productive rrigation works was highest in N-WFP where the yield was 12 29 per cent The return was 11 15 per cent in the Punjab, 8 97 per cent in Bombay, 7 94 per cent in UP and 2 67 per cent in Madras

for Charges Water -The charges for water are levied in different ways in the various provinces In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madris and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for writer These methods may, however, be regarded as exceptional Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown Lower rates are often levied in cases where irrigation is by "lift", that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field

Various other methods of assessment have been tried such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful The cultivator fully under-stands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop

Rs 3 to Rs 4-4-0 per acre for cotton and from Rs 2 to Rs 3-4-0 per acre for millets and pulses Charge is made for additional watering. Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole of part of the irrigation assessment is remitted

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces, under which the cultivators pay a small rate for a term of years whether they take water or not In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply By paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives

Central Board of Irrigation and Bureat of Information—Set up in 1927 with the main object of providing sub-committees to advise on technical questions, the Central Board of Irrigation, consisting of the Chiel Engineers for Irrigation of the Provinces expanded its activities in 1931 to coordinate research and maintain a Bureau of Information

The Research Committee and the Board meet every year, and the technical papers contributed and the discussion thereon are published. A comprehensive library is main tained between the contribution of the co tained, literature on irrigation, hydro electric eng neering, rver control and allied subjects being collected from all parts of the world and indexed in detail for the supply of information to the irrigation departments Provincial Convergence and Indexed States contribute to Governments and Indian States contribute to the cost of the Bureau in return for the informa tion service offered

A new departure, instituted in 1942, was the inclusion of a limited number of Chief Engineers of Indian States by invitation as Board Members The first two States to be represented are Bahawalpur and Mysore

Hydro-dynamic Research—In the year 1937-38, the Government of India, at the instance of the Central Board of Irrigation, took over from the Government of Bombay their Irrigation and Hydro-dynamic Because Station The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single province. Thus in the Punjab they vary from Rs 7-8-0 to Rs 12 per acre for sugarcane, from Rs 4 to Rs 7-8-0 per acre for rice, from This control of rivers, the protection of bridges and the like The authorities mainly interested in hydro- They therefore asked it e Government of India dynamic research are the Government of India to t ke if over with effect from April 1 1937 who administer small brigation schemes in Balachtstan and Italyputana and have large the Government of India decided to maintain railway interests and the Provincial Govern ment of India decided to maintain ments with large triggaloup rojects in operation 1931 38 and 1933 39 and in the meantains to

The Station was originally being maintained by the Government of Bombsy from Provincial revenues and in 1934 35 the cost of running of Sind from Bombay the Irrivated area in the hanged its name Presidency proper was reduced to about 400 000 l sperim at Station ac es and the Provincial Government did not ln addition to ti

consider the question of its future Subse

quently in y decided to continue to maintain the Station for a further period of five years Finally in 1944 the Go ernment of Indiit was roughly 1 0° lakes. With it e separation put this St tion on a p rmanent basis and of Sind from Bombay the irrivated area in the hanged its name into. Indian W terways

In addition to the C ntral Station six pro led justified in keeping up from their own vinces multitain Irrigation Rese rch Organiza revenues a re earch station the results of tions real to Punjab United Provinces Sind which would be applied mainly els where Bombay Bengal and Madre.

The results obtained in each province are given in the tabl below -

WELLS AND TANKS

a year or two and then allow d to fill in to record the country of the country of a declaration of the country of a declaration of the country of a declaration of the country of the coun

So far we have dealt only with the great tril in titeally on reaching the surface. By this gation schemes. However the real easten instrument it he will. The most re this great easter that the surface is the surface of the surface is the surface in land as being under wells. As cover the will as few face as with which the apparatus can be construct as being under wells. As cover the will as assessing the surface of the surface in land as the surface will be sufficiently and the activity of the test form a varying depth is more as eful in the use of it well water as the surface of the

practically unknown in the Punjab and in Sind, The gross assessed revenue amounted but it is found in some form or other in all other Rs 48,10 414 compared with Rs 43,66,341 di provinces, including Burma, and finds its highest development in Madras In the rootwarl amounted Rs 15,52,384 compared with tracts of Bombay and Madras all but the small 14 98 000 in the previous year. The net reven est tanks are controlled by Government In the zemindari tracts only the large tanks are State works According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is So far from tanks being extremely precarious a refuge in famine they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the REASOR

Irrigation in Bombay —The irrigation works in the Bombay Province fall into two categories -storage tanks and canals for which capital and revenue accounts are kept and small tanks bandharas and drainage channels for which neither capital nor revenue accounts are kept The most important of the works in the first category are situated in the Decean They have been successful in banishing the famine which formerly devastated that portion of the Province The works in the second entegory are scattered all over the Province and consist of nearly 12,000 small tanks, mostly in the southern part of the Province and in Gujarat and about 400 bandharas in Nasik and Khandesh Districts

The total capital outlay on works in the first category to the end of 1941-42 amounted to Rs 10,80,68,371 The expenditure incurred during 1941-42 amounted to Rs 16,54,727 as against Rs 15,56,633 in the previous year

An area of 328,194 acres was irrigated inclu sive of 12,167 acres on which a consolidated water and land assessment is levied in 1941 42, against 309,960 acres in the previous year also have a similar legislation for the province

14 98 000 in the previous year. The net rever amounted to R4 32,59 060 on the basis assessment or R4 11,10,588 on the basis realisation The comparative figures a Rs 28,68,305 and Rs 20,48,500 respective during the previous year

The area under irrigation by non-capit works during the year was 207,534 acres, agair 105,817 acres in the previous year, and trevenue derived therefrom amounted Rs 7,66 808 as compared with Rs 7,62,7 in the previous year

Cheap Power for Irrigation in Bombay.

The Government of Bombay, early in 194 decided to undertal e a scheme for the develo ment of electricity to ensure cheap supply power for irrigation, industries and lighting the rural areas in the Province during the pos war period Mr P B Advani was appointe Officer on special duty in the Public Worl Department to examine the project scheme when fully worked out will operate (
the lines of the grid system in England It proposed to have a network of generating station built in centrally situated areas in each division in the province to ensure the generating power and its distribution at a very cheap rat In England the grid system is administered be the Central Electricity Board which is responsib for the erection of generating stations and di tribution and regulation of the supply electricity. The Bombay Government would

Meteorology

ern Hemisphere is turned away from the sun in the northern winter Central Asia becomes an area of intense cold conditions of the temperate zone are pushed outhward and we have over the northern pro vinces of India the weste ly wind and east ward moving cyclonic storms of tempe ate regions while when the Northern Hemi phere is turned towards the sun Southern Asia be it an immense current of air which carries

M moons .- The all important fact in the meteorology of ladi is the altern tion of the meteorology or non: 15 to 15 t season The summer rains cea e 1 th pro-vinces of the Norti West Frontie Provi ce and the Punj b ab ut the middle of Sept mbe after whi h cool westerly and northerly wind a t in over th t are no the we ther becomes atter who is the are fr sh and pleasant fr sh and pleasant Thes fine we the conditions ext nd slowly eastward nd southward so that by the end of October they mbracell p rts of the centry except the outlern half of the Peninsula and by the nd year has ee tended to the whol of the India iand and mea area the r los withdrawl g to the Equatorial Belt Thus the char cteristics of the cold weath from Oct her to F bruary over India are —Westerly winds of the t m perate tone over the extr me north of Indi to the south of these th north-s at wind of the south of these th norms at wind on the winter moseon operhaps mor prop I the north-east Trades and a gr of 1 lly e tend if g area of fin weather which as the seas progress a filly embrace the whole I disalland not sea area. Two except in a to these fine weather on ditions exit todaying this period, the the disalland not sea area. Two except in a to these fine weather on ditions exit todaying this period, the trade of the season was to the season to the sea

The meteorology of India like that of other relief on in which the weather is uncettled during townkies in targety a result of its geographical like period of gen raily settled conditions is position. In Fig. 1 and are a of Assa to the Northwest India This region durin January northward and the enormous sea expanse of the Indian Ocean to the southward are a succession of shallow storms from the west determining factors in settling its principal ward. The number and character of these meteorological relatives. When the Korth State are very largety from year to year storms vary very largely from year to year ud in some years no storms at all are recorded miral Asia becomes in normal years howe er in Northern India. The meteorological periods of fine weather alternat with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even h.avy rain oc urs. In the case of Peshaw the total r infall for the four months December to M. cl. amounts to 5.75 inches while the tot 1 fail f. the four months June comes a super heated region drawing towards to September is 4 65 inches showing that the ainf ll of the wint r i absolutely greater in this regin than that of the summer mon with it the enormous volume of water vapous with it the enormous volume of water vapous within it has picked up 1 the course of its long soon. These two periods or supportance. The passag over the write e passe of the Indian ocean so that at one sea on of the y ar parts; of Indian so that at one sea on of the y ar parts; of Indian so that at one sea on of the year parts; of Indian so that at one sea on of the year parts; of Indian so that of North west Indian that of Indian so the Indian soult is a souther or evaluation. greatest co sequence as on it largely depend the grai and wheat crops of Northern India

of the ace of gestest hat In March the mainsum tempe turs alightly acceding 100 occur in the Deccan in April mat m per tur varying between 100 nd 105 and per tur varying between 100 nd 105 and in May between 105 and 110 prevail over the greater p rt of the interior of the ountry while in June the lighest m an maximum temperatures exceeding 110 oc ur in the Indus Valley near Jacobabad fempe at res exceeding 10 hav been r co ded over a wid ar a including Sind Rajputan th West nd South Punjab and the Jacobabad west of th United Provinces but the high t temperature hitherto reco ded is 1 7 regist ed at Jacob bad on June 1 th 1919 During this peri d of ri ing temperatur and diminisi ing barometric pessure g eat alte tions t ke pl ce in the ir mo em nts o e I dia 1 lud ing the disappearanc of the north e at winds d the at ci culation of the wi ter mensoon of the witer measure of the area over india and its discert as becomes a local ci cilation baracterised by trong hot winds down the tiver alleys of Northern India and lacrea ing. I nd a dea winds in the coat region These land a de wind as they has weather consistent with the constitution of the Madras co t and the other weather constitution of the Madras co t and the other weather constitution of the consti

been established over North west India, in the aqueous vapours last week of May or first week of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole character of the weather changes During the hot weather period, discussed above the winds and weather are mainly determined by local conditions Between the Lquator and Lat 30° or 35° South, the wind circulation is that of the south east trades, that is to my from about Lat 80°-30° South a wind from south-east blows over the surface of the sea up to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic To the north of this circulation, ie, between the Launtor and Int 200 to 250 North, there exists a light unsteady circula tion the remains of the north east trades, that is to say about 1 at 20° North there is a northeast wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere Still further to the northward and in the im mediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and It is now necessary to trace the changes which occur and lead up to the establishment of the south west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic Hence the towards the northern Lopic thermal equator is also progressing northward and with it the area of ascent of the south east trades circulation Thus the south east trade winds cross the equator and advance further and further northward as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the tempe rature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas Thus we have the southern Trades circulation extending northward and the local land and sea circulation extending southward about the heginning of June the light unsteady interfering circulation over the Arabian Ser finally breaks up, the immense circulation of the South east frades with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions the south-west monsoon proper This is the most important season of the year as upon it depends the prosperity of at least five sixths of the people of India

When this current is fully established a continuous an movement extends over the Indian Ocean, the Indian seas and the Indian iand area from Lat 30°S to Lat 30°N the southern half being the south-east trades and the north ern half the south west monsoon The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows

To the south of this easterly wind of the the westerly the current and to the north of the westerly

By the time the area of greatest heat has over the Indian land it is highly charged with

The current enters the Indian seas' quite at the commencement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two sens. The Arabian Sea current blows on to the west coast and sweet ling over the Western Ghats prevails more of less exclusively over the Peninsula, Central India, Rajputana and north Bombay The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burms, I get Pengal and Assam while another portion sweeps over Bengal and after meeting the Himalaxas gets deflected and blows as a south easterly and easterly current right up the Gangetic plain. The south west mensoon continues for three and a half to four months, 112, from the beginning of Tune to the middle or end of Septem ber During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sca current, the total volume of which is probably three time as great is that of the Bengal current, blows directly on to the west coast districts directly Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coast districts and to the hilly range, the total averaging about 100 inches, mo-t The current of which falls in four months after parting with most of its moisture advances across the Peninsula giving occasional uncer tain rain to the Deccan and passes out into the Bay where it coalesces with the local current The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aracalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Lastern Punjab Eastern Rajputana and the North-wist Himalayas In this region the current meets and mixes with the monsoon current from the Bay

The monsoon current over the southern half of the Bay of Bengal blows from south west and is thus directed towards the lengserim hills and up the valley of the Irrawidy to which it gives very heavy rain That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low lving districts of hast Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives ex cassive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advances from the southward over Bengal, is then directed westward by the barrier of the Himmlayas and gives general rain over the Gangetle plain and fairly frequent rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kashmir

wind of the Arablan See current there exists Bismas it is over 100 in the north Assam and his thinks are number coupley from 111 has I valley and elimitathes steadily westward and in the Panjah through Agr Allahatad and part of Choic Aspur to Ories where one or the other current of the monston prevails in this area the rainfall is conditioned by its whole of Indial including Birman is storms from the Bay of Bengal which exhibit a marked tendency to advance along the track and to give it heavy falls of occasional

alaz Th total rainfall of the monsoon period (Ju e t September) is 100 inches over part

May 3 1 inches June July 7 0 11 . 10 3 t gent Beptember 7 0 October 3 9

of the west recommendation in the commendation is a Cyclonic storms are an almost invariable ward if below '00 inches over a lan, part of feature of the mone on period. In the Arabian the centre and est of the Penin ui and is Sea they ordinarily forms at the commencement of \$5 inches in South Marians it over 100 and end of the season '6. May and November inches on the Tenasserim and South Marma but in the 11 yil ley form a constantly recurring coast and decreases to 1.0 inches in Lipper leature of the monoscon season

INDIA METEOROLOGICAL DEPARTMENT

Functions f the Department.—The India M terrological Departm nt w s in tituted in 1875 to combine and extend it work of variou provincial meteorological services which had apring up before that date. The arious duties which were imposed on the Department at the time of its formation were from time to time a pplemented by new duties Some of the prace time functions more or less in the historical order in which they were a sumed may be biefly summarised as follows—

- (a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms
- (b) The issue of storm warnings by wireless to ships in the Indian seas and the collection of meteorological data from al ip
- (c) The maintenance of systematic records of | m teorological data and the publication of clima tological statistics These were o iginally under taken in order to furni h data for the investiga tion of the relation betw en weather and discuso.
- (d) The issue to the public of up to-d te weather reports and of rainfall fo ecasts Ti ese d ties were withinking recomme tret by a Committee of Enquiry into the causes of famine in India
- () Meteorological researches of a general character but particul rly regarding t orical storms and the forecasting of monsoon and winter
- (f) The tudy of agricultural meteorology, fe th atudy of the mete rology of soil I rand the Ir lay rs near the ground with p rticular ref re ce t the growth of plants and crop med city. Prod ction
 - (c) The issue of sea onal rainfall forecasts

- (h) The is ue of the trapile warnings of teavy rainfall and frost (cold wave) mainly to Gov rament officials (e.g. canal and railway e gineers Collectors Directors of Agriculture etc) and through the newspapers to the public in general
- (i) Supply of m teorological astronomical and geoplysical information in response to enquiries from officials commercial firms or pri te individuals
- (f) Technical supervision of rainfall regis tration carried out under the control of provincial Government authorities
- (1) The tudy of temperature and moisture conditi as in the upper air by means of instru ment-carrying balloons and of upper winds by pilot balloons and regular compilation of statisti s of upper air data
- In addition to these meteorological duties the India Meteo ological Department was from time to time made responsible for or undertook various other important duties such as-
- (1) Determination of time in India and tie Issue of time signals also the determin tion of e rors of chronometers for the Roy I Indian havy
 - (m) Observations and researches on terrestrial m gnetism at Bombay and atmospheric electricity at Bombay and Poons
 - (n) Regular study (mainly by spectro copic examination) of the sun at the Solar Physics Observatory at Kodaikanal
 - Maintenance of seismological instruments at various centres

Famine.

I amines may be said to arise when large groups of people fail to produce enough food for their ovn needs and lack the means of obtaining it from other sources. Such conditions may be promplessed either by successive failures of the more on which four fifths of India's agriculture depends even today, by natural distances such as floods or earthquakes, or by hur as capeles such as war and grain market appeals to It is, ho ever rare for a famine to be directly true able to only one cause Is 30, se eral pass their part

The Famine Codes

The experi nces of this f mine showed the he experi nees of dais i mine snowed the nees ity of placing i lief on an organi ed basis. The first great I mine Commission which sat under the presidency of Sir Richard Strachey, fel borat d the Famine Code which amended to meet later experience, form the basis of the lamine relief system to-day. They recommend left to privat ag ney except wh re that was unequal to the demands upon it. They advised that the land owing classes should be assisted by loans and by Re eral suspensions of revenue in proportion to the cropf flure. In seeding a mon oon Internal wis wer common used for proportion to the cropf time of the coupled with tiem were ideepr as a familie Code to the providing correments families to the definition of the common internal ways of the corresponding to the families were of the contract of t e i the lowest amount sufficient to main tain he ith under given circumstances the duty of Governme t is to s ve life it is not bound to maintain the labouring population t its normal level of comfort.

defect, being eleven inches below the mean In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be immune, were iffected The people clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life States was affected, and the Marwaris swept from their impoverland land right through Central India like a horde of locusts, leaving most consuming centres in the country were all desolation in their train. For these reasons contributors causes of the famine When relief had to be given on an unprecedented shortages became apparent in Bengal their scale. At the end of July 4,500,000 persons were supported by the State, Bs 10 crores outrageous scale. A few areas such as Midna were spent on relief and the total cost was pore, were short of food from natural cau estimated at Br 15 crores. The famine were Most of the other famine stricken districts. estimated at Rs 15 crores. The famine was also marked by a wide-pread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life Aided by loans to the extent of Rs 3½ crores, the Indian States did a great deal to bring their administration into line with that in British Although actual deaths from starva tion were insignificant, the extensive outbreaks of cholers, and the devastating epidemic of malarla which followed the advent of the rairs induced a famine mortality of approximately a million

The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, while if their condition were the immediate crisis allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of 'putting heart into the people'. The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of ievenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non official help. The wage scale was revised the minimum wage was abolished in the case of able bodied workers, payments by results were recommended, and proposals were made for saving cattle

1943 Bengal Famine

Localised famine conditions have recurred fairly frequently since 1901 but until 1943 it district of Bombay and in the Ceded District seemed that the procedure laid down by the of Madras. There were also acute food short Famine Codes was capable of declaration. Famine Codes was expable of dealing with all eventualities. Unfortunately, conditions in

rainfall over the whole of India was in extreme in 1913. The province is estimated to be 83 per cent acif sufficient for food and before 1942 Imported most of the balance of its needs from Burmy. The cutting off of this supply was followed by a series of natural disasters includ ing the Midnipore hurricane which late in 1942 devostated a wide area and is estimated to have destroyed 1,500,000 tons of rice. During the monsoon of 1943, when famine was already present in Bengal, floods in the Damodar river held up relief supplies from the UP and Punjab at a critical period. Public nervousness over the full of Burma, the denial police, by which A very large area in the Indian | bouts and the larger stocks of rice were removed from I ist Bengal to prevent their use by the Inpinese and the general shortage of food in most consuming centres in the country were all effect was intensified by speculation on a most outrageous scale. A few areas such as Midna pore, were short of food from natural caue. Most of the other famine stricken districts suffered because rice prices were far beyond the reach of the people, because speculators had drained the area of stocks or because the avail able grun was hourded by its owners

> According to the l'amine Codes, assistance should have been provided from outside. In Very large 1943 the problem was twofold Very large supplies were not readfly available elsewhere owing to the general dislocation of Indian grain markets, the movement of supplies into Bengal was difficult owing to the congested state of the railways A fairly steady stream of grain did, however, reach Calcutta from July onwards but it does not appear that the Bengal Government evolved a satisfactory plan of distribution Many famine areas in the province were virtually without relief until the army assisted the civil authority to organise food distribution and medical relief in November 1943. This relief, coupled with a record rice crop, which became available in January February, 1944, overcame

> Famine conditions were accompanied by epidemics of cholera, malaria and dysenter, which probably caused as many deaths as star vation itself. In March 1944 Mr. L. S. Amery, the Secretary of State for Ladar appearanced in the Secretary of State for India, announced in the House of Commons that the 1943 famine deathroll was 689,000 This figure, however, must be regarded as provisional, owing to the state of vital statistics in Bengal and the large number of people who were missing in the large scale migration caused by the famine A Com mission of Inquiry to investigate Indian food shortages in 1943, with special reference to Bengal, was announced by the Government of India in June 1944 Sir John Woodhead was the Chairman of the Court of the bound the Churman of the Commission and it began work the tollowing month

During 1943 famine broke out in the Bijapur ages in Orissa, in Travancore and Cochin and the Madras district of Malabar In none of these areas did conditions approach the severity of the which the difficulty of obtaining relief supplies would be so great that the Codes' provisions could not be filled, were not envisaged. This state of affairs, however, arose in Bengal early controlling supplies and prices of food

Hydro-Electric Development.

successful industrial development and favourable initial conditions clusted by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilication of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil These commodities are all diment to obtain, and costly in India except in a few favoured areas Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy Water power and its transmission by electricity offer, on the other hand, good possibilities, both as regards the quantity available and the cheapness at which the power can be supplied. In certain parts of India

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year Perennial rivers with sufficient water throughout the vear are practically non-existent in India therefore, must be stored for use during the dry season Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur, and the progress already made in utilising such op portunities by the electrical transmission of power affords encouragement for the future Further, hydro electric schemes can sometimes be associated with important irrigation projects, the water being used for both electricity genera-

tion and irrigation The Industrial Commission emphasized the necessity for a Hydrographic Survey of India On this recommendation the Government On this recommendation the Government of India in 1918 appointed the late Mr G T Barlow, CIE, then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr J W Merres MICE, Electrical Adviser to the Government of India Mr Barlow died, but Mr Meares, issued a preliminary report in September, 1919, and a Triennial Report in 1921, indicating that a minimum continuous water power of nearly 6 million kilowatts with a maximum of 13 million kilowitts could be developed in This excluded practically all the great which were then uninvestigated. The rivers, which were then uninvestigated The Government of India has since formed a Central Technical Power Board for developing hy dro electric resources of India and for carrying out a systematic hydro electric survey in India The present stage of progress and some of the plans under consideration for development of hydro electric power in the post-war period in some of the major provinces and states are indicated in the following paragraphs

Bombay Hydro-Electric Works

Cheap motive power is one of the secrets of brought into operation by Tata Sons, Lid, and continued under their management until 1926 when they were transferred to the management of the 1sta Midro Licetric Agencies, Ltd, in which Mesers Lata Sons retained a substantial interest These undertakings are -

The Tata Power Com-,, 1927 puny, Ltd

These Hydro-Plectric schemes have a com blined normal capacity of 231,000 kW and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Greater Poona

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India Its population in cluding suburbant the 1941 census was 1,489,893 with a total population of approximately 2,000,000 in all of the areas served by these companies. Its cotton mills and other factories consumed about 150,000 HP, which until these Hydro Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above ser-level within a few miles of Bombs, City, situated on the shores of the Arabian Sea with their heavy rainfalls was taken full advantage of for providing Bombay City and vicinity with an adequate and economical power supply

The hydraulic works of the Tata Hydro Electric Power Supply Company are situated near Lonavia at the top of the Bhor Ghats The monsoon rainfall is stored in three lakes, namely, Lonavla, Walwan and Shirawta, from which it is conveved in open masonry canals to the Forebry at Khandala and thence through steel pipes to the Power House at Khopoll at the foot of the Ghats, where the head at turbine nozzles is 1,725 feet or approximately The normal capacity 750 lbs per sq inch of the Power Station at Khopoli is 60 000 LW This scheme was formally opened by H E The Governor of Bombay on the 8th of February

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro Electric Supply Company's lakes, where additional power could be developed These investigations resulted in the formation of the Andhra Valley Power Supply Co and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across the Andhra River and a tunnel 8 700 feet long driven through solid trap rock to the scarp of the Ghats from which the water is false in of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the The head of generating station at Bhivpur: The head of water at turbine nozzles is 1,740 feet or approvi The electrical The greatest Hydro Electric undertakings in mately 750 lbs per sq inch. The electrical India are the three schemes developed and energy is transmitted to Bombay over a trans

mission line 56 miles long for an menting the pply from Khopoli The present installed apacity at this station is

The Tata Power Company scheme on the scheme on the w s investigated and developed along line imilar t the Andl ra Valley scheme and b s a normal installed p city of 99 000 kW The power is transmitted to Bombay over a trans mission line 6 miles long and is used to augment th s pply of the two earlier companies to mills factories and railways

The Tata Hyd o-Fl ctric Power Supply Co tle Andhra V llev Power S pplv Co d th d th the Andrea V liev Power S pplv Co d the Tasa Fower Company operating a sunt unler one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co Ltd the form joint of the mill and find tries in Bomb y City the B B & C I Raliway for their suburban Excritication the whole of the energy required by the G I P Railw y in Rombay City and for their m in line traction up to Poons and Igatpuri th whole of the electrical energy required by the Poona Electric Supply Company and the distributing lic usees in Thana Kaljan and the Bombay suburbs

The e three schemes operating as a unit under one in nazement provide an adequate and conomical power supply in the areas mentioned abo e for all purpos s. The rate for energy dell sted to the Mills Factories and Railways has for several years shown a steady decrease and now averages 0 3 of an anna per u it which downward trend will continu as indu trie d el p nd individu l consumption in rea e This power supply greatly enhance the natural adv ntages Bomb y has as a great manufactur log trading and shipping centre

For the development of industries and agri For the development of industries and agri-culture in the northern portion of Bombay Fresidency the Bombay Government has embaried on the provision of an elettical measurement on the lines of the Friesdam as somewhat on the lines of the Friesdam as somewhat on the lines of the Friesdam as somewhat on the lines of the Friesdam as the Friesdam and from a me of the elected St. call by the list also proposed to c natures that the Friesdam and the state of the to c astruct initially tw new hydr electric stati as t Bhandardena and Bhatgar for anyphysing power to this grid

Mysore Hydro Electric Works

The first Hydro-Electric Scheme of my magni tud undertaken in Indi or indeed in the L t was that on the Cauvery Ri er in Myso e State which with it generating station t ans mis on line and distributing system was in augurated in 190

The Cauvery Riv r rises in the dist lct of Coorg in the W stern Ghaits and flows acro s Mysore State The prin ip i object of this scheme was the supply f powr to the mining companies on the Kolar Gold Fields about 92 miles f om Sivasamudram the site of the generating station This transmi ion line

The initial undertaking has constantly been expanded so that its total norm I capacity no r stands at 4 000 l W This gre t increase h s been made possible by the construc tion of the krishn rajasagar reservoir near Mysore City which has a capacity of 44 000 million cubic feet of storage above the mi imum draw off

The number of the consumers of all classes continue to increase rapidly every ye r with greatly incr ased power demands. The Govern ment of Mysore ha e encouraged the use of el trical energy and hav made a survey of Hydro Power t ource of the State and pre pared lians for the con truction of a number of generating station at the most economic sit a as and wi en nece vary

The number of lighting and power consumers of all classes in about 00 towns and villages within the Mysore State has increased to more than 60 000 Demands for very large addl tional blocks of power made it necessary for Government in continuing its policies for the industrial development of the State to sanction the c nstru tion of a Power Station at the Shimsha Falls for the production of 17 200 KW and the construction of a Power Station at the Jog Falls for the production at the first instance of abo t 48 000 kW Th power station at Shimsha F lls was completed in June 1940, thus bringing th tot I installed capacity of Siva amadram and Shimsha Stations to about

The transmission system consists of 866 route-miles of 78 000 and 37 500 volt lines with a total of 1 100 miles of circuits The transmission system is now being extended into every District within the St t which together with the ap-propriate distribution systems will supply hydro electric pow r to more than 250 towns and villages within the next _ to 3 years

El tricity in Trava cor St t Electric a pply undertakings are of recent growth in Trav neo e Although the first power station w s in existence in the High Ranges as early as 1905 it was only towards the latter part of 19 7 that Government created a separate organisation to carry out a programme of electric 1 development in the State Electric supply was first introduced in Trivandrum in N cb 19 2 The could author on this undert king till 1941 42 was Rs 11 5 labbs uther Ning till 1441 42 was its 11 5 lashis The Scheme is been paying a satisfactory return on its investme t ever since it sta ted wo king The gross revenue during 1941 4 was Rs 75 lashs and the tot i gen tion 1 55 million units The number of consumers at pre cnt is about 800 The c are 65 miles of L T ov rhead dist button lik as besides 16 miles of 3 3 kV underground cables

With the lead gf n by Government in the supply of electric power to the capital two other unde taki gs wo ked by p lvate agencies one in Kottayam and the other in N gerooil we e sho by fterwards inaugurated Th we e sho tly fterwards inaugurated Th former came i to exi tence e ly in 1932 while the generaling station This transmi ion lines the cases, was defaulted by the was for a number of years the longest line in middle of 1934 The Kott yam Electric Asia Sinc 190 th supply of elet teal supply distributes power to nearly 800 consumers from a distribution net work of about 200 che and will be a supple of the supple supple of the supple supple of the supple supple of the supple supple of the supple supple supple supple of the supple sup former came to extinence e ly in 1932 winds the latter was put into operation towards the middle of 1934 The Kott yam Electric Supply distributes power to nearly 800 consu mers from a distribution net work of about A scheme to supply Quilon was inaugurated towards the middle of 1934. The capital expenditure on this undertaking is about Rs 3½ lakhs. Very rapid progress has been made in its operation during the last four years, the generation having reached over 2 million units per annum, bringing in a gross revenue of about Rs. 1½ lakhs. The supply covered about 20 miles of 11 kV lines, 45 miles of L. T. Distribution and 2½ miles of 3 3 kV underground cables and caters for about 850 consumers. Power was supplied from a thermal station of about 630 kW capacity till the supply was changed over to the Pallivasal Hydro Electric System in May 1940.

Quilon is an important industrial town and the power requirements have not been able to be met from this small thermal station to any appreciable extent. The total capacity of installed power plants in Quilon is well over 2,000 H P but as many of them are in a very unsatisfactory condition on account of their old age it should be possible to secure all these loads, now that the Hydro Electric Supply is available from the Pallivasal system, the bulk of which is utilised by the Illmenite Mining Industry, the Cotton Mills and the Ceramic factory at Kundara

Pallivasal System

A preliminary survey of the hydro electric possibilities of the State was carried out as early as 1919 by Mr F J Jacob, the then Chief Engineer of the Public Works Department But as a result of the subsequent investigations conducted in 1925 by Mr K P P Menon, the present Electrical Engineer, Government came to the conclusion that the development of a power scheme utilising the falls of the Mudira puzha river possessed great economic possibilities. Accordingly, detailed investigations were taken up and completed by 1933 The work was started in 1934

The first stage of development of the Pallivasal Hydro-Electric Project was nearly completed by the beginning of 1940 and it was inaugurated in March when the supply was switched on by Sir C P Ramaswamy Aiyar from the Pallivasal Generating Station The scheme as now completed comprises of a temporary diversion dam, a pressure tunnel of 10,200 ft in length and 8 ft diameter section and two penstocks each 7,800 ft in length, the generating station and transmission lines extending up to Alwaye on the west and up to Kundara in the south The power station has three 11,000 volts, 3 phase, 50 cycle elternator sets each of 4,500 kW capacity directly coupled to the pelton wheels operating at a head of 1,980 ft. The total effective capacity of the station is 9,000 kW. The third generating set will be used as a standby Power is transmitted to the plains at 66,000 volts. The transmission system consists of 134 miles of 66 kV double circuit lines connecting the generating station with 5 major sub stations at Kothamangalam, Alwaye, Pallom, Mavelikara and Kundara besides 26 miles of 33 kV single circuit line connecting Alleppey with Mavelikara and 3 miles of double circuit of 66 kV lines from Alwaye to the aluminium factory now nearing completion.

The mains distribution comprises of miles of 11 kV single circuit and 10½ miles of double circuit lines and about 92 miles of LT distribution net work. Almost all the Municipal Towns coming within the network of the Pallivasal Hydro Electric Supply have been provided with low tension distribution. Thus the first stage of the scheme covers a large portion of the north and central Travancere, and it has been so designed that extensions to the transmission system can be added easily to distribute power to other areas such as Peermade in the east and Trivandrum in the south

The availability of electric power in most places in Travancore and the very low rates of tariff now offered are expected to open up great possibilities in the industrial and agricultural development in the State By the end of 1941-42 the system had a connected load of over 6,000 kW and 2,375 consumers distributed over 19 distribution centres. The peak load of the generating station had reached 2,500 kW and the generation 11 2 million units

The Department has been keenly alive to the needs of the agriculturists for electric power, the chief uses of which are for dewatering the punja fields, the crushing of sugarcane and lifting water for irrigation. All reasonable aid is rendered to prospective consumers. Proposals for the supply of electrical machinery on hire purchase system were sanctioned by Government in September 1940 and the response from consumers has been very considerable.

A satisfactory agreement was reached between. Government and the Aluminium Production Company of India Ltd, towards July 1949 whereby Government agreed to supply 4,500 kW of power from the middle of 1941 and 7,500 kW by the middle of 1944 for an Aluminium smelter plant to be installed near Alwaye The Company will be requiring another block of power aggregating to a total of 14,000 kW for bringing their factory to its fullest output Government have agreed to make this block of power also available as soon as circumstances permit An agreement was recently reached with the Cochin Government for the supply of power for the entire requirements of that State The demand from this source exceeds 3,500 kW

The agreement with the Aluminum Production Co and the Cochin State has necessitate the full development of the Pallivasal Hydro Electric Scheme so as to bring the generator and transmission capacity to cope with their large demand. This development will consist of the installation of 3 further generating sets of 7,500 kW each, 2 more penstocks and the provision of adequate storages, in the upper reaches of the Mudirapuzha river. Two more 66 kV transmission lines from Pallivasal to Alwaye are also proposed to be constructed.

The total capital expenditure on the Project till the end of the financial year 1941 42 was 148 79 lakhs To meet the anticipated power requirements within the next ten year. Schemes have been worked out for the construction of two new hydro electric stations at Neriamangalam and Sengulam

Works in Madras

The Prkara Hydro Electric Scheme an undertaking of the Madras Government was roumented at the end of 1920 the first stage of the project being compileted at the end of 193 The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Migrir Plateau having a catchement area of neaty 38 sq milles

The Scheme utilizes a fail of about 3 100 feet variable in the psaage of the Fykars river in the Night District The flow it ough perennial is very irregular and otten drops to values around 0 cus es during the dry season. The flow of the control of the season of the control of the season of the control of the season of the control of

and two 1950 MA 11 kV/110 kV tran furners were added 1 1933 and t 1 liker immediately below the Mettur Damand in it are to materer transmission in has been claimed in we installed there 1,200 kVA 50 pp.m.

generators coupled to overhung type twin horizontal Iraneis Turbines one on each side. The turbines operate under a variable head from 60 to 160 feet developing a maximum of 16,000 HP each Power is generated at 11,000 volts, 50 cycles, 3 phase and stepped upto \$6,000 volts (110,000 volts later) for transmission to various load centres

Transmission and Distribution System -Power is transmitted to Singarappet in the north and Lrode in the south by means of two 66/110 kV trunk lines (a total mileage of 100 miles) At I rode the taking off from the power station Mettur System is linled with Pykara network and both stations can work in parallel as and when operating conditions demand 66 kV lines have also been extended to Vellore, Tiru vannamalal and Villupuram, a distance of about 140 miles

Considerable lengths of 11, 22 and 33 kV lines have also been constructed or are under construction for extending power to various places

At all important load centres out-door trans former stations are provided for stepping down the voltage to 11, 22 or 33 kV as required. At Trichinopoly which is an important station in the southern area, two_2,000 kYA synchronous

condensers are installed for ensuring proper voltage regulation

Mettur Scheme Extensions —The peak load at the Mettur power house has already risen to about 14,000 kW

A 4th generating unit is being installed for increasing the capacity of the station to meet the load demands successfully even during periods of low heads in the reservoir and to afford greater relief to Pykara in emergencies

Papanasam Hydro-Electric Scheme -This is the third hydro electric scheme to be undertaken by the Madras Government The scheme was sanctioned in 1938 and has just commenced operation by the end of 1943

The scheme utilizes the fall of about 330 feet in the passage of the Tambraparni river in the Tinnevelly District A reservoir of 5,500 million cubic feet capacity has been created by the construction of a masonry dam across the Tambraparni river in the foot hills of the Western Ghats above Papanasam in the Tinne velly District

The following are the main features of the

- 176 feet masonry dam constructed on the Tambraparni river just below where it is joined by Kariar The reservoir so formed provides a storage of 5,500 million cubic feet and water will be drawn therefrom by means of two 81 feet pipes embedded in the dam and fitted with valves to control the flow
- (b) A diversion weir located lower down the river near the head of the Papunasam Falls, which provides a small storage of 28 million cubic feet for daily regulation
- Two 9 feet diameter steel pipes leading water from the diversion weir to the headworks Only one pipe has been about 3,500 feet long installed in the first stage.

- (d) I our 69 inches penstock pipes, each 6-0 feet long leading the water down the hill slove from the headworks to the power station below Only three penstocks have been erected in the first stage
- The power house is situated near the Agnetia temple at the foot of the Papanasan I alla. The gross head developed is 300 feet The keneraling plant will comprise four 60 gr p m , 7,250 kV 1, 11 JV, 50 cycle, 3 phas vertical generating sets each coupled to a vertical type I rancis reaction turbine of 9,850 BHP Only three units have been installed initially
- extends to (f) A transmission system extends to Tuticorin, Kollputti and Maduru This system is linked with the Pykara-I lectricity System at Midura Construction work on the second stage is expected to be taken up shortly including the erection of the 4th generating unit

Machkund Hydro-Electric Scheme-The Madras Government has under consideration the development of the Machkund hydroelectric project on the borders of the Madras and Orlean President with an installed cannot be considered that the consideration with an installed cannot be considered that the consideration with an installed cannot be considered that the consideration with an installed cannot be considered to the consideration with the consideration of the consideration with the consideration that the consideration with the consideration of the consideration of the consideration that the consideration is the consideration of the and Orissa Provinces with an installed capacity of 51 750 kW initially, increasing to 103,500 for meeting the future power requirements of the Andhra districts of Madras and Orissa

Works in Kashmir

A scheme of much importance from its size, but more interesting because of the develop ments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed thirty six years ago by the Kashmir Durbar utilising the river Jhelum, near Buniyar about fourteen miles from Baramulla The head works of the Jhelum power installation is situated six and a half miles from the power house, at Mohora and the main connection between the two is a tumber flume. The government of the forehow at the deliver and of works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 792 feet long lead from the forebay to the power house and from forebay to waterwheels there is an effective head of 395 feet. There are four horizontal waterwheels each coupled on the same shaft to a water-wheels each coupled on the same shaft to a 1,000 kVA 3-phase, 2,300 volt, 25 cycle gene rator running at 500 r p m The power house is of sufficient capacity to allow of 15,000 kW generating plant being installed within it transmission lines run side by side as far as Baramulla, 21 miles from Mohora at which point one terminates The other continues to Srinagar, The installation at Baramulla was originally utilised for three floating dredgers further 34 miles and two floating derricks, for dredging the river and draining the swampy countryside and rendering it suitable for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and the polygraphic in the satisfactory results and the polygraphic. with satisfactory results and the power load is building up At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but also for heating. The whole of Srinagar city is now electrically lighted and there are a num is now electrically lighted and there are a num ber of power loads

Besides the Jhelum power installation, there are two other schemes, the Muzafferabad hydro electric installation utilising a tributary of the er Kiben Gangs and the Jammu hydro-cited and lation. The Manafersbad pow-ture is the state of the state of the state up to 10 to 10 km s 300 voit 50 cycle ernator. This serves Muz ffersbad town d Domel on J. V. Boad. The Jammu power use employs five generating sets. Of the c • 26 kW set is driven by a Dies I oil engine. d the remai ing four generating amon masters 1 65 kW are driven by water rhines

In addition to the above schemes new sources power capable of feeding 1 rge cale man f c re re be ng e plored in view of th beginning large scale indust ies in Jammu and kashmir ate being explored The State has Iready ovided funds from cap tal expendit r not rged to revenue for the impro ment of a State's lectrical system. In estimati us into the elect ical and financi l in estrati as into the elect ical and missions to a little so of a number of hydro-lect i lower g nerating tatio a set dr con ld r ion and th UP Go ernment h sheady decided to proceed with the reconstruction of the power station at Badrabad on the Ganges canal in reasing its capacity to 7500 kW and the de elopment of the Sarda Can I Hydro-Electric 8 heme with an installed cap city of 55 00 kW This station will be ultimately linked up with the large steam station at Cawnpore

Puni b a Hydro-Electric Project

Situated on a spur of the Dauladhar Range at elevations anging between 6 000 and 4 000 feet above sea level and connected ly means of a tunnel over 15 000 ft long are the works of what was origin lly known as the Uhl River Hydro Fle tric or M ndi Scheme which is now oper ted by the Punjab P W D Electricity Branch with its Headqu ters at Lahore

This project owes its origin to the need which began to be felt in the Punj b during the War of 1914 18 for making energy available for industrial and gricultural purposes at rates cheaper ti an were then prevailing

The site was discovered in the year 102 A detailed project was prepared by 19 3 Work on the co struction of the first tage of heme was tarted in 19 6 The total capital outly on the scheme to the end of the year 1939 40 has be n Rs 6 8 6 lacs

Due to the extensi e nature of the construc Due to the extens e nature of the construc-tion works it was found necessary to build two sm ll temp rary Hydro ele tric power stations one at Dhein near Sh nan and the other t Thuji near the headw k at Brot which we e link d to ether nd the combined installed capacity was 1440 kW

Water is withdrawn from the Uhl and the amba D g Riv at B ot and conveyed by a Lamba D g Riv I salled if g have get and collected by a g ti ternal dismeter con rete lined ircular pressure tunnel which is one of th longest tunnel in I di di sthe fir t steel m the tun el to be built i Asia The tunnel is ab ut 3 miles long and is de igned f ra mi I full di cha ge of 600 cus es (but it can carry up to 800 if rea | ed) Th tun i f ds st el penstocks which run down the lope to the Si an Powe St tion near Jo i darn ar of the Uhl and its t ibuta y into ele trical e ergy

This ii e supplies subst tions at Ramera Path note Dharluval Amritsar and Laho e

A single cir uit 13 kV line also runs from ro- lect i Amritsar t Jellundur and is conti ued at 33 con id r kv t serve G raya and Ludhi na Sub tations slready 4 66 kv si gie circuit lin starts from Laho e while a similar line from Lahore serves substations at Shahdara, Shelkhupura, Chuharkana, Mohlan, Jaranwala and Lyallpur respectively

From these various substations 11,000 volt lines radiate to supply between them about sixty towns and villages In addition to sixty towns and villages In addition to serving 25,000 consumers directly from its own mains, the Branch also furnishes bulk supplies to the NWR for its own workshops and to the PWD Central Workshops, to two licensees (the Amritsar Municipality the Juliundur Electric Supply Co) and also to the Kapurthala State at two points. The connected load at the end of March, 1941 was 41,820 kW, the total number of units generated being 82,290,232 and the revenue assessed 32 05 lacs for the year 1940 41

Investigations are on hand in regard to the development of a number of hydro electric schemes in the province. The construction of a hydro electric station at Resul with an installed capacity of 22,000 kW has already commenced. This scheme, though intended primarily for development of irrigation will be linked up with existing hydro electric system to improve the operating conditions of both systems

Schemes are in hand for the extension of the 66 kV transmission system to serve new substations at Sialkot, Daska, Wazirabad, Gujranwala, Kamoke, Sangla and Chak Jhumra, respectively In addition, these schemes also provide for the reconstruction or alteration and expansion of the existing substations at Juliundur, Goraya, Ludhiana, Ferozepur, Chuharkana, Lyallpur and Lahore, respectively, to enable them to opton for the respectively. cater for the rapidly growing demand for

electricity

The possibility of introducing tube wells irrigation in certain parts of the Punjab adds to the interest of hydro electric projects in this province. This would enable thousands of acres of uncommanded land to be brought under cultivation thereby greatly increasing the food supply of the Province. the food supply of the Province

Nizamsagar Project — The Hyderabad State has decided to proceed with the Nizamsagar Hydro Electric Project as an immediate postwar measure for bringing hydro electric power to Hyderabad City The scheme is intended to utilise the water stored in the Nizamsagar dam and it is expected that electric power varying from about 1,500 kW as the minimum to about 11,500 kW as maximum could be generated. It is proposed to instal 2—4,000 kW hydro electric generating sets and to construct 80 miles of 66 kV transmission lines for supply to Hydroglad City. to Hyderabad City

Tungabhadra Project —An agreement has recently been reached on the apportionment of the waters of the Tungabhadra river between the Governments of Madras, Mysore and Hyderabad For the share of the waters, it will be possible for Hyderabad State to utilise three drops in the irrigation canal for generation of hydro electric power, giving an initial output of about 15—25,000 kW

Future Hydro-Electric Projects—There are a number of hydro electric power sites on the Manjeera, Kaddum and Purna tributaries of the Godever and of the Godavarı and on river Dindi, a branch

and supplies substations at Kasur and Ferozepur | of Kistna river as well as on the upper and while a similar line from Lahore serves sub- lower reaches of the Kistna The ectual power potentialities of these sites need detailed investigation

KOLHAPUR STATE

The Kolhapur State has embarked on the generation of electric power from the water stored in the Radhanaguri dam which has recently been rused to the height of 85 feet. The power house will be situated at the foot of the dam and the installation will comprie 4—1,200 kW Kaplan sets operating on 65/125 feet head. The power will be transmitted by means of 32 miles of 33 kV double circuit lines to Kolh upur City for augmenting the water supply to the city and take over the load from the existing oil engine station also intended for the extension of the irritation system in the State by the installation of about 240 electric pump sets in the area served by the transmission lines

HYDRO-ELECTRIC DEVELOPMENT IN N.-W F P.

Malakand — The possibility of generating electricity at Malakand was first recognised some 25 years ago. The waters of the Swat specific the state of the swat specific the sw river to the north of Malakand are utilised for fertilising the north eastern part of the Peshawar valley by driving a tunnel known as Benton tunnel under the Malakand pass and constructing a can'll it is recognised that by extending it by another half a mile upto a point above the upper Swat canal, advantage could be taken of a natural fall of some 250 feet for the production of electricity This scheme was sanctioned in 1934 and a new tunnel known as Burklit tunnel, 12 feet in diameter, was constructed From the tail of the Benton tunnel, water is discharged over a regulating weir into the new power funnel from which it emerges through an power tunnel from which it emerges through an open channel with waste weir into the forebay At the remote end of the forebay, a spilling syphon is provided to allow evacuation of excess water automatically in the event of sudden through of load From the forebay the water flower through the sudden through through the sudden through the sudden through the sudden through flows through penstock pipes 515 feet long with external diameter varying from 61 inch at the top to 55 inch at the bottom into the power house situated below at Malakand

The available discharge is 200 cusees with a total head of 250 feet. The generating plant consists of three reaction turbine sets each generating 3,200 kW at 11 kV, 3 phase 50 cycles. The pressure is stepped up by transformers to 66 kW and power transmitted by The generating plant formers to 66 kV and power transmitted by the a 30 mile double circuit line to Mardan and thence by 74 miles of single circuit ring main to Peshavar Contemporate and line passing to Peshawar Cantonment, one line passing through Charsadda and the other through Risalpur and Nowshera Thirty seven mile of 11 kV branch lines are also provided for the province the province that the province the serving important towns in the province.
The scheme came into operation in 1938

The hydraulic works and the power hour have been designed for the installation of the more generating sets at a future date, but one set is proposed to be installed as an immediate post war measure with the extension diate post war measure with the extension of 66 kV lines from Nowshera to Wah for supplying the cement works

Local Self Government

A field of the administration of India profoundly affected by the Reforms of 1919 relating to the India Act of 193 was of the tribe or clan by which the village was that of local government. It is was one of the originally settled subject tr n f rred to Indian mini ters and and r their leadership considerable d velopments of local govern mentin I dia for the past quarter of a c tury h been encouragin but nneven At the annual repo ts of provinci I governments i As the annual repol is of province in Governments above, there are some towns which I av shown a real sens of responsibility in civic affairs and I was admit thered them efficiently. In a minority of cases however the local city fair is have si naily failed to discharge their dutte. to the public be efft with the result that they have been supersed da d the conduct of muni cipal affairs has reverted to official cont of The greate tauece seal e been won in the P esiden cytowns and particularly by the Municipality of Boinbay The difficulties in the way of progr s w re manife t Local government i at to b a er atio —the de lutio of authority from the 60v nment to the local body and that to a peorl who for centuries had be n accustomed to autocratic administration. Again the powers entru ted to local bodies were i I nificant and the financi is pport was sm ii Th r are low ver ma y encouragin sings of improvement

Throughout the greater part of India the of 637 rament organisation and from the vida es are built up the larger administrative titles—taballs sub-divi ions and districts

The typi al Indian village has its central radient I site with an open space for a pond and a cutil tand Stret hing round this success lie the villa e la da consisti g of a cut that d area and (very oit) grounds for faming and wood-cutting Ti inhabitants of tha illag pass their life in the n lidst of these storps surrou ding n ided tog the rin a little community with its own organisations dg ern mert will h differ in h ract in the various typ of vill differ in h ract in the various appropriate and fishith styll of an tionarie ritisans and its little is it should be noted how a rith the freetaln portions of India eg in the greater Part of Assam in Lastern Bengal and on the West coast of the Madras Pr lide cy the village as he redescribed does n terist the people if ling in all 10 offertions of houses or in 8 parat homesteads —(Guidleer of Inda)

Types of Villages.—"(1) The seriety or r it twatt village which the preval at form cutable vorthern India. If re the revenu is a war i on Indi ii 1 culti alors There I so I at resp ability amo g th VIJ TIS I the non-cultivated is ds m y te set want f ra common purvose chas gra

() The joint or landlord village the type prevalent in the United Provinces the Punjab and the Frontier Province Here the revenue was forme ly assessed on the villag as a whole its incidence bel g distributed by the body of uporior prop leters and a certain amount of collective responsibility still s a rule rem ins The village site is own d by the p opri tary body who allow resid nees to the tenantry artisans trad rs an l oth rs The waste land is allotted to the villag and if wanted for cultivation is partitioned among the shart holders The village government was originally by the nunchaust or group I hads of superior families I times one or more headm n have been added to the org misation to represent the villag in its dealings with the local authoritis but the artificial character of this appointment as compared n is character of this appointment as compared with that which obtai sin a ripatwar villago is evidenced by the titl of its holder, which is g erally lambardar a verna ular d rivative f om the Engli h word number. It is this type of vill ge to which the well krown d scription in Sir H Maine s Village Communit is alone applicable and h re th co proprietors are in g neral a local oligarchy with the bulk of the village population as tenants or labourers under them

Village Autonomy -The Indian villages formerly pos ess d a i rge d gre of local au tono by since the ruling dynasties and their local representatives did not as a rul concern them I es with the ladivid al cultivators but them I es with the individ al cultivators our regarded the village as a whole or a me large isandholder a respon ble for the payment of the Government rev nues and the maj tenance of local ord ? This autono y has now dis-appear d owing to the ct. bit he ct of local cl. of the certain to the the present revenue of the control of the control of the control of the certain of the control of the control of the control of the certain of the control of the control of the control of the certain of the control of the certain of the c munication the growth of individualism and the peration of the individually system system which is at ading even a the north of Indi he orthels the villag remains the first unit of dmi tr t on the pri cipal villag function ries—the heal in the accountant and the villag watchman-ar largely utilised and paid by Government a d th re is still a large degree of common village feeling and interests

Punchayets - I'r some years there was an active propaganda in favour of reviving the vill g council trib nal or Pu chayet a d the Dece tralisation Commi ton of 1908 made th I flowing special recommendation -

Whil therefore we desire the d velopm at o! p nehayet syst m and consid r that the the set will it a commonwhiteness with the set of the s he pear out if who i respectful or law and e risin powers to limited I enchant in these

villages in which circumstances are most favourable by reason of homogeneity, natural intelligence and freedom from internal fends These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages, and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers"

These recommendations, however, were never implemented and the punchaset system, while it still exists in non official form, is tend-There is still the possibility that ing to decline nay be revived. For present purposes it unnecessary to refer at greater length the subject of village self-government. it may be revived Various meisures have been passed, but it is too early to say what life they have Punjab Government has passed a Village Punchayet Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases Other Governments have taken steps in the same direction

Municipalities — The Presidency towns had some form of Municipal administration, towns first under Royal Charters and later statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated and from the point of view of self-government, these Acts did not proceed It was not until after 1870 that much pro Lord Mayos Government, gress was made in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the manage ment of funds devoted to education, sanitation, medical, charity, and local public works New municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of muni responsibility were conferred on the committees of many towns by permitting them to elect a mendations of the Committee and there was

private citizen as chairman Arrangemen were made also to increase municipal resource and financial responsibility, some items of pu vincial revenue suited to and capable of devi lopment under local management being tran ferred, with a proportionate amount of province expenditure, for local objects The general prin ciples thus laid down have continued to gover the administration of municipalities down t the present day As the population of mot Indian towns rises, so does the number (municipalities increase For the most par they display a lively interest in civic affairs an are actively engaged in improving the cond tions under which their fellow citizens live

District Boards —The duties and function assigned to the municipalities in urban areas at in rural areas entrusted to district and loca Boards In almost every district of British Indi subordinate to which are two or more sub-ditrict boards, while in Bengal, Madras and Bha and Orissa, there are also Union Committee

As in the case of municipalities the tendence has been throughout India to increase th elected members at the expense of the nominated and the official members. Boards are practically manned by Indians most important item of revenue is provincia The principal objects of expenditure ar education which has come remarkably to the front in recent years and civil works such s roads and bridges Medical relief is also sharing with education, though in a less degree, the lion's share of the available revenue

The annual audit reports on the working o local self-government institutions in the variou provinces reveal on the whole a disappointing record There is a general reluctance to increase local taxation and several municipalities are conspicuous for their negligence in recovering There are, of course, some honourable exceptions, in Bombay Presidency, Ahmedabri and Sholapur furnish encouraging example In 1939 a Local Self Government Committee was appointed by the Bombay Government under the chairmanship of Professor V G Kale. The Committee made several recommendations To overcome the general reluctance to impo-additional talation the Committee suggested that taxition by local authorities was likely to be better appreciated if it were associated with specific services rendered to the people, the idea was to earmark yields of certain taxes for definite purposes The Committee also laid for definite purposes The Committee also the down the principle that citizens generally should only understand that amenities can be provided only if they are paid for, thus a compulsory education cess was suggested to finance ambitious educations of the suggestion of the s educational schemes

In August 1940 the Bombay Government convened a conference of Presidents of all important local bodies at Poona to consider the Committee's Committee's report under the presidentship of J A Madan, 108, then Adviser to the Bombay Governor The conference was opened by Sir Bogger Turnels by Sir Roger Lumley who paid a tribute to the Committee for the careful manner in which their investigation was carried out and for the balanced Judgment which had been brought to bear on the

important of with its th Chittaranjan Avenue i imeasuring 50 highas and 150 ity respectively

The Cossipore Chitpore Park has a small arti- to the town has been widened to 150 ft for a ficial lake and football grounds four for schools and clubs of North Calcutta Few tennis courts are also provided The Deshabandhu Park has also been provided with play-grounds Several wide roads have been laid through this highly congested area. The approaches to the City have also been adequately widened

Good progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones A 84 ft road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been constructed, which provides a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east An interesting small work is the extension of a storm water sewer from Jagannath Ghat Road to Strand Bank Road carrying with it the construc tion of a 60 ft roadway Another important scheme is the new 60 ft road between Darpanarayan Tagore Street and Pathuriaghat Street which, with the side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east and-west diagonal road through Ahiritollah The widening of Kilakar Street represents the most important effort yet made to penetrate the inner recesses of Bara bazar and provides a new 60 feet road from Harrison Road to Jagannath Ghat Road with short lengths of widening of cross roads in accordance with existing alignments Running, as it does, through an area with a population of over 200 to the acre and closely built up with four or five storeved houses, the gross cost of acquisition Demolition was of land was exceptionally high of greater difficulty than usual owing to the height of the buildings and the narrowness of the lanes

It has been made financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazaar and other costly and thickly-populated commercial areas by the passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties

The Government in Notification No 592M, of the 24th April, 1939 intended the powers of the Trust to an area in the Howrah Munici pality for the purpose of constructing the Approach road from the west to the New How ran Bridge The Main Approach Road running from East to West was constructed at 84 feet in width with a 54 feet carriageway and from the Bridge Approach to Dobson Road a new 70 road with a 50 feet carriageway with two low level roads had been constructed

The Suburban Areas to the south and southeast of Calcutta required greater attention and extensive development schemes were under Several open spaces and squares have been laid out in various parts. A large number of insanitary traks have been filled up, which required approximately 20 million c ft earth

length of one mile and 100 ft for a length of unother mile It now gives a most pleasant drive from Chowringhee to Tollygunge A 100 ft wide East to West road, from Ballygunge Railway Station to Chetly Bridge, and for recrea tion an artificial lake of 167 bighas with adequate grounds have been constructed. The "Lake trea," as it is now commonly known, consisting of land originally acquired for the provision of earth and partly for a statutors open space for one of the Trust schemes, assumes more and more the nature of a Model Park, and comprises well laid out football grounds in addition to its The Trust pursued the natural amenities policy of planting and embellishing it as a place of public recreation for south Calcutta and found scope here for various experiments in Park technique, of which the most interesting was a Children's Pool properly designed for the purpose and believed to be the first of its kind in the Indian city But all its activities have now come to a stop and must await the return of better times, as whole of this area has been requisitioned by the Government for Military requirements

The Southern Avenue Scheme was approaching completion but came to a stop on the outbreak of war with Japan Increasing difficulties due to control of materials and to the demand for road rollers for military purposes meant a restric tion of road construction which was accentuated by the exodus of labour from Calcutta area with the large lake and its amenities has already proved very attractive for residential houses and almost a new city is springing up, relieving considerably the congestion in the main city. The the amenical of Southern Arenne From the junction of Southern Avenue city Gariahat Road, the work of widening and Gariahat Road and Old Ballygunge Road upto Sved Ameer All Avenue has also been held up for the same difficulties

The central section of the eastern part of Calcutta has already been developed by the Trust into a beautiful residential area with the arrust into a beautiful residential area with the amenity of a large park near Park Circus known as Eastern Park, measuring 65 bighas, with large playing fields for football, tennis, etc The Gorachand Road Scheme providing for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally has been completed the outer fringe of Entally has been completed and the Schemes providing the wide Avenue on its north was taken up but had to be temporarily suspended

The Trust pursues a liberal policy in the development of open spaces and recreation grounds The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres In 1912, Bompas, the first Chairman of the Trust, pointed out that in the ratio, viz, about 9 per cent of its public open spaces which measured about 1,250 acres (in cluding the Maidan, the Horticultural and the Zoological Gardens) to its total acreage, Calcutts was almost on a par at that time with London was almost on a par at that time with London possessing 6,675 acres of public parks or gardens, while the neverther the property of the parks of public parks or gardens, while the neverther than the parks of public parks or gardens, while the neverther parks or gardens, and the neverther parks of the pa while its percentage exceeded that of New York, But it must be pointed out that about 1,000 acres of Calcutty's 1,200 was accounted from was accounted for in the Maidan and new open Russa Road which forms the southern approach spaces in other parts of Calcutta were an urgent

KETI BANDAR AND SIRGANDA are we other minor ports in Sind They are under he jurisdiction of the Principal Collector of Customs, Sind Neither of them, however, is of sufficient importance to deserve detailed mention

MANDVI which is situated south of Sirganda is the chief port of Cutch

NAVLAKHI is the Chief Port of the State of Morvi and has a fine situation on the coast of Kathiawar. Ships anchor two miles from the pier Navlakhi is the terminus on the metre gauge line of the Morvi Railwix and is thus directly connected with Delhi, Rajputana, Gujarat and Kathiawar. The port is open throughout the year and has been greatly developed in the last decade.

BEDI Bedi Bandar is the principal port in the State of Nawanagar, situated a few miles from the city of Jamnagar, at the head of a tidal creek some eight miles long, near the mouth of which is the roadstead called Rozi, in which ocean going vessels he at anchor

There is at the head of the creek a spacious basin equipped with warehousing accommodation and railway connections offering facilities to merchants for the effective conduct of extensive trade Goods are transhipped between the basin and steamers which lie in the Gulf of Cutch by means of lighters which are towed up and down the creek by tugs as the state of the tide permits

The consistent encouragement of the Ruler and the number and importance of the merchant class in Jamnagar with their trade connections at other places in Kathiawar and beyond, have all assisted in developing a large and important traffic

No merchandise is handled at Rozi Its linding strige, connected by road and rul to Jamnigar, is used exclusively for mails and prisenger traffic to and from Cutch

OKHA Port Okha, situated in a detached portion of Baroda State for distant from the Gaekwar's main territories in Gujarat is dissimilar from other Kathiawar ports. It is an entirely modern conception, begun and completed with enterprise for the express purpose of dealing with ocean going traffic and commodities

It lies in a strategic position at the extreme north east point of the Kathiawar Peninsula, readily accessible to all steamers trading along that coast. The Harbour scheme has been well designed, there is an excellent ferro concrete jetty, served by railway lines and trains, alongside which large vessels can he at all states of the tide, and there are also swinging moorings for other vessels in a protective position. The wavehouse accommodation and railway connections are good. Ohha is far removed from the large centres of population, being 231 miles from Wadhwan. Junction through which railway centre its traffic must pass.

DWARKA Just below Port Okha is Dwarka, a famous place of pilgrimage, and a port of call on the Bombay-Karachi route Steamers he off at some distance from the shore and the traffic is chiefly local.

PORBANDAR The foreign trade of Porbandar was at one time prosperous, but it is now chiefly construide

BHAVNAGAR, the capital of Bhavnagar State, hes half way up the Gulf of Cambry on its western side. The Gulf is defined by a very great range of tide, attaining as much as 40 feet it Bhavnagar, which is situated on a creek several miles from the open waters of the Gulf The port facilities comprise an anchorage 8 miles or more from the port proper, between which and large vessels at the anchorage goods are moved in lighters while the port itself can accommodate small coasting steamers which lie on the mud it low tide. There is ample ware house accommodation and good direct railway communication with the whole of India.

PORTS IN BOMBAY PRESIDENCY Apart from Bombay, which is the most important Port in the Presidency, there are no other Major Ports, though there are a number of Minor Ports at which trade is carried on in fair weather Among these may be mentioned Dhollera, Broach, Surat and Bulsar on the Gujarat Coast and numerous small ports on the Konkan coast, the more important among these from the point of view of trade, being Ratnagui, Dabhol, Malwan, Vengurla and Honavar

The Dhollera port is connected by road to the Railway Station at Dhandhuka at a distance of 18 miles. It possesses natural advantages and is situated within convenient distance from the chief centres of trade and industry in Kathiawar and North Gujarat. Broach and Surat are well known old ports.

The safest harbours on the Konkan coast are lagad and Vijaydurg in the Ratnagiri district an i Karwar in the North Kanara district Details regarding the value of import and export trade in 1937 at these various minor ports are given below—

surat is situated 14 miles from the state with which it is connected by a river negotiable only by small country craft. Surat was one of the earliest and most important of the East India Company's factories, and its trade was very considerable in agricultural produce and cotton, the value of which was estimated in 1801 at over £1,000,000. A hundred years 1801 at over £1,000,000 and in the last fifteen years the decrease has been even more marked, most of the trade being now transferred to Bombay owing to the linking up of the two ports by the Bombay, Baroda and Central India Railway.

MANGALORE: To the South of Coa les district headqua ters is Man lore open to the coasting trade of Larwar Honavar and Dh thal Mangalore is situated at the junct on of the Gorpur & Netravati Ri ers about 130 miles south of Mormu o It is a tidal port served chiefly by backwater communic tion with the hinte | nd It is the North West rn terminus of the South Indian Railway ndlan Rallway Vessels up to .00 tons can nchor inside the backwater larger vessels lie about two mile from the shore

The chief exports to Europe are pepper tea and cashew kernels (exported al o to the United States) from nei abourin ar s coffee nd sandalwood from Mysore rubber to Ceylon and tiles ri e s it fi h dried fruits and fi h manures to Ceylon Go and the Per lan Gulf The foreign import trade is steadily incre sing

The principal exports from Negapatam are groundnuts for I grope and coloured cotton situated ten miles from Berhampur o piccegoods, tobacco and fresh vegetables for Bengal Nagpur Rallway Penang, Singapore and Colombo, the port being the chief provisioning centre for the cooles who are constantly leaving by this route to work on rubber and tea estates in Ceylon and the kederated Mala, States

CUDDALORE is situated about 15 miles south of Pondicherry Steamers anchor about a mile off shore, and the harbour wharves are situated on the western bank of the Uppanar Backwater and have been provided with a quay wall to facilitate the loading and unloading of cargo boats therefrom

The export trade consists principally of groundnut kernels and coloured piecegoods in small quantities. The coasting trade consists mainly of grain and pulse. The foreign import trade is chiefly of boiled betelnuts from the Straits

MASULIPATAM the principal port in the delta of the Kistra River, has few natural advantages Large vessels cannot anchor within five miles from the shore and the harbour wharves are distant another three miles up a tortuous tidal creek Native craft up to about 150 tons can cross the bar at the south of this creek at high tides but in foul weather communication between ship and thore is practically suspended Steamers touch at the port occasionally and foreign trade is chiefly by steam vessels with foreign ports, the principal exports being groundnuts, castor seed and oil cake

The prosperity of the port has never recovered from the cyclone of 1864, when a tidal wave caused a disastrous mundation involving the ioss of 30,000 lives

COCANADA is situated on the Cocanada Bry, just north of the Godavari River, some 80 miles south of Vizigapatam and 270 miles north of Madras In spite of several disabilities, It ranks fifth in importance among the ports of the Madras Presidency Large steamers anchor about 6 to 7 miles from the shore and service is maintained with lighters which land cargo at the numerous small whaves and jetties constructed on the banks of the Cocanada

The principal shipments to Europe are raw cotton and groundnuts and castor seeds import trade consists chiefly of herosene from America, sugar from Java and metals from the United Kingdom, Germany and Belgium

BIMLIPATAM is 22 miles north-west of A good road connects it with Vizianagram sixteen miles distant and mother road with Vizigipitam. The harbour is an open roadstead and ships lie about a mile off the shore and loading and unloading is effected by highters The foreign trade has revived to some extent The imports are of little importance. There are considerable exports of Bimlipatam. lighters jute myrobalans, niger seeds, gingelly seeds and groundnut kernels

Coastwise imports and exports are of little importance

GOPALPUR in the Ganjam Distri

North of Gopulpur, the sea board fo miles is that of Orissa the maritime tri which is chiefly inter Provincial and the ports that deserve mention are Balasore, C bali, Cuttacl, I also Point and Puri

BALASORE, situated on the right bank Burabalang river and headquarters of district of that name, was the only port of Orissa could boast until the opening up country after the great famine of 1866 frequented at that time by vessels with c of rice from Madras and with cownes, largely used for currency, from the Lucci and Maldives The port is of historical in as being one of the earliest European 8 ments in India, factories having been estab here in the 17th century by Inglish, I French, Danish and Portuguese Merchants

Balasore as a port is practically de Foreign ships have ceused to visit since and coastal ships since 1910. In occacountry craft of negligible tonnage enters d the cold weather season for paddy, but be that there is no sea borne trade. The no import trade

CHANDBALI, situated on the left bank Bait irani River is a port of some importan the Orissa Coast. It has a flourishing cotrade with Calcutti but there is no to foreign trade as in former days. The excensist mainly of rice and the imports cotton twist, piecegoods, kerosene oil, sal gunny bags

CULIACK is situated 253 miles from Cal at the apex of a triangle formed by the Mahi and Krijuri rivers It is on the main line of way running between Madras and Calcutta a connected by canal with Chandbali bet which a small inland steamer trade exists which links Cuttack with Calcutta distrince up the coast from Cuttack hes port of False Point which has been closed 1921, as the seaborne trade had en disappeared

The decline of the small ports is said to be to a variety of reasons and usually the reason quoted is that the Forts have silte but this is not actually the case. The law declined for two main reasons namely have declined for two main reasons namely have the law treally because the law treally the same treally treally the same treally treally treally the same treally t coastal Railway which has automatically out the sea trade since it cannot assist it secondly that larger deep draft steamers taken the place of the smaller coasting steamers. The long and sailing ships of 30 years ago deeper draft steamers cannot enter such s ports as Balasore, Chandbali and I ports as Balasore, Chandball and Point and hence the trade which at one found its way by sea has now been caugh the railway and carried to the larger ports Calcutta from where it is distributed elsewl

It has a s PURI is an open roadstend Customs Office

The Introduction of Western Learning

In the early days f its dominion I dia, the East India Company had little inclination for the doubtful experiment of int od in western learning into India Warren Lord William Be tinck s minute of 1835 liastings the dominating figure of the time was a (based upon Macaul y s famous minute) maks

But m ss eduction sst tance

sim n a bee to gil de a peopl alien in senti . Poy to institit the Hindu College for the ments and projudice, into the channels of promotion of western securi Plann ng Then n we let demodern iff and western if also if the need to modern iff and western if also if the project of the project in the project is also influence grew apace "Fifteen years later the ordering return configuration and the presents formulate of Phile Instruction in Bengal Texture complexitées and difference so do point of project that a taste for I gilsh lade be a widely Government local bodies and d sseminated and that indep ndent schools c n private per o softearning have in the past devot at the limit of the l ange who percei on the cenemes of capitation pointed with the for cultivating a leafer for education of under in memory of the gre t rul r where it did not ext t. The result t that the who left I dia in 18 A still more structure has become top-heavy. The lower remarkable into atton w made in 1835 by the clasest are largely liliterate while the middle establishment of the Calcutta Vedical C liege. classes who con titute the bulk of the nitill whose object we to teach the principles and senting is in point of numbers at least educated practice of medic less use in strict accordance

> whole trend of missionary policy in India by his insistence on te ching rather than on pre hing and by the found tion of his school and Colleg Calcutta In Madras the m ss onarieshad been still earlier in the field for ay rly as in 1 87 a small group of missionary ci cols we a being directed by Mr Schwarz The Madras Christi Coll g top n d in 1837 In Bombay the Wilson School (afterwards College) was founded in 1834

Issuings the dominating figure of the time was a [brest upon Macaul y s famous minute] mas is a full policy was to enable the and in the first tady acceptance by Government learn to the law and literature of the law and its of the new policy Government then det mined bearing the policy was to enable the and it of the new policy Government then det mined bearing the policy of the control of the the pool _ kven it = act of 1813 which set part | earning | . be insuch through the medium of a lab of musers for thirdwords in any of the musers of a lab of the protects as them for the encouragement of the protects of the sciences was interested as the protects of the In the following dies to the new terrain took; "to the find of it is at this she more recently tirm root in India on I, though the Milharums is the Camania University of Hyderabal, December days attill held alsof, the demond for I neight for direct outcomes of the unsert or high recipols outstripped the means of Go grangent education felt by the leaders of the Mulim for providing them. Lost notely there has been a minimary of late a marked appreciation among Muslim [10 Mills.] of late a marked appreciation among Madim later of the need for improving the instruction at level of their coroll, loud a, and in many of the provinces of India a great impulationard colorational advance among the Muham and the Corolladian community is now netherally [1].

GROWTH AND ORGANISATION OF ENGLISH EDUCATION

An epoch in Indian educational history is university chairs for disnaced study. They were arked business thanks Wood's despatch in a rare of the dangers of a too literary course of Perhaps its most notable feature. In instruction they hoped that the system of the emphasis a high it last on the importance of primary education. The old idea that the aducation imported to the higher classes of overty would filter down to the lower classes was discorded. The new policy was boldly to combat the innorance of the people which may be considered the preatest curse of the country. For this purpose Departments of Public Instruction were created on lines which do not differ very materially from the Departments of the present day. The despatch use broke away from the practice followed since 1835, whereby most of the available public finds had been expended upon a few fewers. ic funds had been expended upon a few Government schools and colleges and instituted a policy of grants in aid to private institutions It emphasical the importance of encouraging the study of the verniculars as the only possible media for mass education

Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has pivot of the Indian education system It has andoubtedly been of value in several ways It enabled Government to select recruits for its service on an importal basis. service on an impartial basis it did much, through the agency of its Colleges to develop backward places, it accelerated the conversion of Indians to a zeal for western education, and it cost little at a time when money was scarce On the other hand, there new universities were not corporations of scholars, but corporations of administrators they did not deal directly with the training of men, but with the examination of candidates, three were not concerned with learning, except in so far as learning can be tested by examination The colleges were fettered by examination requirements and by uniform courses, their teachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own sake but as a means for obtaining marketable analigeations. In certain important respects qualifications In certain important respects the recommendations in the despatch were not the recommendations in the despiten were not collowed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts, they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions, they recommended the establishment of

instruction they hoped that the system of education would rouse the people of India to develop the vast resources of their country

The incouragement of the grant-in aid system was edinerted to an even greater extent by the I duration Commission of 1882, which faroused the policy of withdrawing higher education from the control of Government within certain limitand of sti mulating private effort. In theory the decision was cornet, but in practice it was irretrievably a rong. In its fatal desire to case money, Government deliberately accepted the mital en belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay And, ir the course of time, an unworkable system of dual control grew up whi reby the Universities with no funds at their disposal vere entrusted with the duty of control and their disposal vere entrusted with the duty of controls. with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to east a blind eve on the pri vate institutions and to be content with the development of a few favoured Government institutions

The Reforms of 1902-4

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the control of the Act was to tighten up control, on the part of Go vernment over the universities, and on the part of the universities over the schools and colleges. The Government retained the power of cancelling any appointment retained the power of cancerna and appointment and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public by the officers of the Department of Public by the officers of the Department of Public Instruction Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects, but their scope was in practice limited to post graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connection with institutions I ingoutside those boundaries. Neither the Commission nor the Govern Neither the Commission nor the Govern ment discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system

Department of Education, Health and Lands of the Government of India—

In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council The first member was Sir Harcourt Butler In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture The enlarged Department has been designated the Department of Education, Health and Lands

The Hon'ble Sirdar Sir Togendra Singh is the Member in charge of this Department, and Dr John Sargent, OIT, MA (Ovon) D Litt, is the Educational Adviser and Joint Secretary to the Government of India in this Department Dr D M Sen, MA, PhD (London), Deputy Educational Adviser to the Government of India, continues to be the Secretary of the Advisory Board of Education

There are two more posts of Deputy Educational Adviser, three posts of Assistant I ducational Adviser, three posts of Education Officer and three posts of Assistant Education Officer

During the year 1945, the Government of India created two posts of Educational Liaison Officer for India in the USA, and in the United Kingdom The former is held by Mr M S Sundaram, MA, Blit (Oxon), formerly Assistant Educational Adviser to the Government of India, and the latter has not yet been filled up

With a view to increasing the supply of properly trained technical personnel who are likely to be required in connection with the various plans for post war developments, the Government of India have decided, pending the extension of facilities for advanced technical instruction in India, to make arrangements immediately

Committee that further action on the region would be possible only when an adeal would be possible only when an adeal would be possible only when an adeal with a production of text books.

In regard to the reports of action taken proposed to be taken by Provincial Government and Technical Education Committee and Technical Education Committee and Technical Education of the Board noted with apprecia

- (a) to send abroad a certain number of students, at Government expense, for advanced courses intechnical and scientific subjects directly related to the probable post-war needs, and
- (b) to establish a properly equipped organisation in this country and also in the United Kingdom and the United States of America for providing advice and guidance and also assistance in regard to admission to courses of studies, etc., for those students who may desire to proceed overseas for study at their own expense or who may be sent for this purpose by firms or private bodies

The Government of India hope to make arrangements for sending this year about 1,000 such students

Advisory Board of Education-This Board was revived in 1935 and is attres-Central to the Lducation, Health and Lands Departme of the Government of India The Hon! Member of H L the Vicerov's Lecunical in charge of the Department of Education, Health and Lands is the Chairman of the Realth and Lands is the Realth and Lands is the Realth and Lands is the Realth and Lands is the Realth and Lands is the Realth and Lands is the Realth and Lands is the Re Board The other members are the Education Adviser to the Government of India, twel-Board nominees of the Government of India, of who four shall be women, one member of the Coun-of State elected by the Council of State to members of the Legislative Assembly elect-by the Legislative Assembly, three memb-of the Inter-University Board a representation of each Provincial Government who shall either the Minister in charge of Ideals (or his deputy) or the Director of Public Instit tion (or his deputy) or such other person who the Provincial Government may noming in this behalf and five members to be nominat to the Government of India in consultati with the Crown Representative to respre t the Indian States

The main subjects discussed at the first i meetings of the Board have been reviewed the previous issues of the Year Book. In treference is made to the subsequent meeting

The eleventh meeting of the Central Advis Board of Fducation was held at Karachi on the 16th, 17th and 18th January 19 preceded by the meeting of the Stand Committee on the 15th January. The ager consisted of 17 items decisions in report important ones are given below

Item III—The Board considered the visof the Standing Committee on the representation of the Standing Committee on the representation of the text books Committee on the report of the text books Committee on the report of the text books Committee that to note that the report been received favourably by Provincial Governments, etc., and agreed with the Stand Committee that further action on the relevant would be possible only when an adequation of paper was made available for production of text books

In regard to the reports of action taken proposed to be taken by Provincial Governments, on the reports of the Examinations (mittee and Technical Education Common of the Board the Board noted with apprecia the favourable views expressed by Province Governments etc., though they regretted much that it had not been possible for authorities to make available to the Buther considered opinion on the subject cerned in greater detail

Item VIII—The Board considered the vote of the Provincial Governments etc. as we the Provincial Governments etc. as we the Provincial Governments etc. as we the Provincial Governments etc. as we the Blind, London, on the report of the Local Committee on a Uniform Braille Code for I together with the recommendations of that Committee on the suggestions submitted by various authorities. The Board accepted recommendations of the Expert Committee Uniform Braille Code as finally apprint ouse in all the schools for the blind in I

The Board howe er furth r directed that any difficulties experienced in the actual 1 e of the Code houd be brought to the n tie of the

Item VIII—With regard to the question all phases of biladnes of with the art to the of conditions of service of feachers at all star as ed cational needs of the billed the main recommendations covered of education the Board con if red the twoff maintenance of billed the main recommendations are to the conditions of the same recommendations covered in the properties of the same recommendations are to the committees recommendations covered in the properties of the committees are to the committees are to the committees are to the committees are to the committees are to the committees are commendations covered and the properties of the committees are commendations covered and the properties of the committees are commendations covered and the properties of the committees are commendations covered and the phase of billings and the phase of billings are to the committees are commendations covered and the phase of billings are to the committees are commendations covered and the phase of billings are to the committees are commendations. lek leave etc not p eviously con il red ly the T bers Committ e required in tigatio Thy accordingly appointed a Committee to examine and report on the i sue

Item XIV -The Board considered Mem AI)—the Hoard considered the question of s lection t apply priate stag of ed cation which they re arded a a matter fittal importance to the dividement of the thread more specialized forms of education in the control mapping led a Committee to ex mine the best ways and m ms of () selectin pupil or tudents for variou forms and selection pupil or tuneristor various states of hier education (b) adulting parental and pupils I rer rd to the choice of careers with d + r ard to the experin ntal w rk in this connection which was alre dy bein carried out in this country

liem Ai — The Board con idered the que tion of i cl ding. Edu ation as a ubje t in the curri ulum of the BA dgr of Inian University 3 They fels the the subject could by Orlady be included as a part of post-gradum on a three ser Honours Course of the Characteristics of the Ch as one of the subjects in the existin person of the BA degree

Hem YII -The Board considered a pro-Posal fo th establishment of a c tral i tit ite rosal to the establishment of a c trail it it to of ladin architect o and regional planning reed at from the Secretary o th Service Architect Organisation They considered that the secretary of the free that the secretary of the free that the secretary of the secretary of the free that the secretary of the contry in sen ri and of detailment of the control of the secretary of the seconomic of the secretary of the secretary of the secretary of the to that Cou cil when establi hed

The items lat! g to the Committee s Reports are mention d below

Item VII -Report of Joint Committee of the Central 4de ry Boart I Ed rate a and Health o the p even on of 61 names in Ind 1

(f) The blind abould be given a simple el n entary education to fit them to be skilled eraftsm n in a workshop for the adult blind The exi tin a hools re t animot s that day ttendance is un ti factors

M ntally defective and ba kward (i) 3f ntally defective and ba kward blind lildr n have a special claim for con ideratio as soon s the normal tlind have been firs ly est bil hed 31 hy then respon I to trait in nd c n be employed in stellere in it try. The d finitely f ebl mind d should not be place a alongsid normal children Some blind childre who may appear to be feel le min i d re in fa t o ly as s of serio is m tal retard tion they louid not be place I among the definitely mentally d f cti e

(1) The trainin of daf mute blind children i highly special dand costly nd should not be mb rk d upon in India employment of the normal blind have been u ti st bit bed

((v) The Committee consider that for or ctical and economical considerations it is desirable to put Irimary and middle tions in one unit beparat chools for

tons in one unit beparat chools for boys and girls sloud be pro ited wi cross roumbers permit At the primary state however, a in the c coi norm i children mix d classes may have to be retailed for economi reasons. In any ca e it is considered to the control of the coordinate of the control of the coordinate of the co onwards there should be separate schools for boys and girls

The period of computory education of blind childr n when this pri-ciple is applied should begin t the age of six and hould continue for two ters beyond the li-Iin It of sixteen with view to making up the probable educational deficiency due to their handleap

(v) The general standard of edu tion chools for the blind must be raised so ti t it fits in with the n tional scheme of ed cation and as the ducation and the welfar of the blind i as much a fu ction of the state as the eduction of oth r childre the re ponsibility must r st primarily with Government

(vi) The teachers for sch ols for the blind should reclive the same course of trining as the ordinary teachers together with some as the difficulty teachers together with some supply me tary training to fit them pecially for their vocation. They should be on the me scal of pay but possibly with a high r initi 1 s 1 rv t the di cretion of the appropriate authoritie

(vis) Modern workshops in India should have section for the training of young adults

(iii) There should always be close to an University of College post. It would be operation between schools and employeent de irable that those who will be required to services

Recommendation of the Central Advisory I wird of I direction

The Board expressed their general agreement with the recommendations of the Committee and decided that as soon a the views of the Central Advisory Board of Health on the report become available, the report, alone with the views of the two Boards, should be forwarded to the Government of India the Provincial and State Governments and the other authorities concerned for necessary action

Item IX—Report of the Committee on Training Recruitment and conditions of Service of Leachers in Universities and other institutions of higher education

The Committee made the following main recommendations

- The best method of selecting university teichers is through a properly constituted Selection Committee, an honest and independent Committee which should be above suspicion
- (2) Selection Committee should consist of members between five and seven, with Vice Chancellor of the University is Chairman The members should always, where possible, be persons with high academic qualifications or academic experience and of high character, the law depends they have depended to the contract of the law depends of the character. the lay element should be reduced to a minimum, and that appointments by University bodies should be of persons from outside the University if there is the slightest reason to suspect that persons otherwise appointed may be open to influence or pressure
- (3) Appointments for posts in technical colleges should also be made by a Selection Committee This Committee should contain more members with the necessary technical knowledge or experience, and indeed with some appointments of a technical character it may well be that the choice should be left almost exclusively to such persons, though the Vice-Chancellor or the person who holds the position corresponding to the Vice Chancellor, in a University as the case may be, should always be present
- The Governing Body of every nided college receiving a grant ought to contain a representative element, rg not less than two persons appointed by the University and this should in all cases be a condition of the grant The Committee of the Governing Body selecting teachers for appointment should melude one of these members one of these members. There ought also be some machinery whereby the University itself can review all appointments made
- (5) A representative of the University having special knowledge of the subject concerned should be associated with the Public Service Commission selecting teachers for appointment in Govt institutes
- (6) No one with less than a second class M.A degree of an Indian University, or foreign No one with less than a second class

tike po t anniunte clas es should possess some teaching experience

(7) In the teachers training Departments lecturers must have at least a second class Master's decree and undergone a teachest

Training course

(5) In colleges or Departments of Luginer ing and Technology, Tecturers in theoreted subjects as Mathamatics Physics etc., should ordinarily possess first class MA degree Lecturers in all applied sciences should have a first ell sengineering degree or its equivalent ozether with a reasonable amount of practical experience in industry

- (9) In Medical Schools lecturers in the preclimed subjects of physiology and Bio chemistry may be pure scientists without necessarily possessing a medical degree at all but they should ordinarily possess, like other lecturers a first class MSe degree or its equivalent. Medical graduates teaching preclinical subjects should possess at least; B Sc degree and Lecturers in clinical subject such as medicine, surgers, etc. should have a least a first or second class MBBS
- (10) Lecturers in Agriculture should ordinari ly possess a first class Master's degree in the busic sciences, and Lecturers in the applied sciences should possess a first class post graduate degree in Agriculture
- (11) Only first class graduates in law prefer ably possessing an LLM Degree should be appointed as Lecturers in a law ficulty of college
- (12) Professors and Readers in University Departments, and Readers in constituent colleges should be men of more than werge ability and should ordinarily have had from five to ten years teaching experience, re-earch and original work being regarded as additional qualifications
- (13) The Principal of a college must po see academic qualifications of a high order, and must also be a man of high character and personality, possessed of those qualities which are generally recognised as essential in an administrator
- The following minimum scales for different grades of teachers are recommended

University Departments

Junior Lecturers Lecturers Professors Readers 1000 to 1250 500 25-800 300 20 500 210 15 300

- (.3) The ratio between the number of students in a college and the number of teach rs in the service of that college should be 0 1 as a general rule but for poet-graduate and honours classes the ratio should be 1 1 or teen 10 1 for the beautiful for t for the latter

Recommendation of the Central Advisory Board f Educat

The Board d pted the report subject to a few mino modifications and it was decided that the report should be forwarded to the revolucial and State Governments and Univ resident and the state of the st titles for neces ary action. It was also decided

Hem A - P p t of the Aq cillu al Ed rat n

The Committee made the following recom

- 1 Agricultural Education including educa-tion in Animal Husbandry and D fryin, is ori ally a b anch of Technical Education but in vi v of the special circumstances of Ind a it will be necess ry t any rate for some time to come to d al with it eparat ly Since however it scope and function a er lated so closely to those of Te huical Education gener lly refe enc may usefully be made to the general conclusions contained in the Report of the Technial Education Committee of the Board
- The aim of proper syst m of Agricul tural Ld ation should be to provid () general ed ation combined with practical trainin suited to the needs of future f rmers (t) mo e d anced ientific and practical instruction fo those who will be call d upon to ad lae farm is a admi listrato s or organi s and also for te chers and research workers (t) moe d anced
- 3 The existing figure of a Agricultural Education r holly in dequite to neet the probabl requireme ts of the country in th near f ture and it is necess ry to bring into e istence as early as po sible a omprei en i e and planned system of Agricultural Education
- It is unn essary to in lude Agricultural I ducation as uch in the rriculum of any Junior Ba io (Primary) School All that is equired at that at g is to make po islon for Y ture Study and practical eleme tary gard n
- B youd the Junior B lo sta a ricul tur I instruct on and trainin should b arranged in the followin type of institutions -
 - () Senior Ba ic (Middle) Schools where Agriculture is adopted as the basic craft
 - () Ag icultural H h Sch! which combin Gen r l i duc tion with a strong agricultural bias Th e ne d not n cessarily b loc ted in rural reas only
 - Farm In titutes (on Mod 1 Farm) (i) Farm wher traini will b provided for h md r and Stockmen
 - (t) Agri ultural Schools Imparti special education in Agriculture Agricultural Colleges and Agriculture Department (r Facult's) of Uni rsities which will p epare stud nts for the B chelor degre in Agricultur cov if a per d of at least thre ye in the se of stud ts passing out f Agricultural High Schol d for ye rs in the tural High Schol d for yers in the ca of those pas gout faademic High Sclools Colle and fultie of Universities ill al o prepare students for post-graduate degr s of varyl duration
 - () Central institutes of advanced research.

In addition to regular full time courses teachers must possess at least a Master's degree (111), (117) and (17) will also provide short term in the subject which they are to teach, and extension or refresher courses in particular it is desirable that they should also receive branches of Agriculture and Animal Husbandry, pedagogical training including Veterinary Science, Dairying, Poultry Farming, Listate Management, etc

- Agriculture Departments (or I iculties) of Universities, is distinguished from indepen Agricultural Colleges, have several idvantages arising from the close association of the students and teachers with those engaged in other studies
- (7) Provision should be made for the training of the personnel of the Agricultural and Veterinary Departments as follows -

Agriculture Departments

- (a)Field Assistants —One year's course at า Farm Institute
- Non graduite Assistants -2 years course (b)at an Agricultural School or the normal course at an Agricultural High School
- Graduate Assistants -4 verrs' course at in Agricultural College or University
- (d)Gazetted Officers —Post graduate courses of varying st indards

Veterinary Department

- Stockmen —One year s course (a)
- (b) Compounders (or Pharmicists) -One year s course
- (c) Veterinary Assistant Surgeons -3 to 5 years' course at a Veterinary College
- Gazetted Officers —Post graduate courses (d)of varying standards
- (8) All examinations in the school stage will be conducted by the appropriate educational authorities Examinations for the Bichelor's and higher degrees should be conducted by Diplomas and certificates Universities for short courses of advanced research will, however, awarded by the institutions concerned There should be two external examinations in a four-year course one at the end of the first two years and the other at the end of the course In the case of a three year course, however, there should be only one external examination at the end of the course All other tests should be conducted internally
- In order to ensure that proper standards of instruction and training are maintained, the Imperial Council of Agricultural Research should set up a Council of Agricultural (including Animal Husbandry and Dairying), Education, with power to endorse diplomas and certificates awarded by agricultural institutions and also to make recommendations to the appropriate authorities in regard to the standards of agricul tural examinations in Universities The Education Department should be represented on the Council
- (10) Similar qualifications are required for teachers of Agriculture in Senior Basic (Middle)
 Schools or Agricultural High Schools as for teachers of other subjects, except that they must have undergone a course of practical whose efficiency can be depended upon or to must have undergone a course of practical whose efficiency can be depended upon or to training in Agriculture

 (2) Powers resumed by Provincial Governments may be redelegated by them either at once or at an early date to those local bodies training in Agriculture

 (2) Powers resumed by Provincial Governments may be redelegated by them either at once or at an early date to those local bodies training in Agriculture

 (3) Powers resumed by Provincial Governments may be redelegated by them either at once or at an early date to those local bodies training in Agriculture

- (11) Teachers of agricultural subjects should receive silarles similar to those of teachers of other technical subjects
- (12) The same standards of fees and the same ficilities for free concessions, scholarship, maintenance allowances and hostel accommoda tion should obtain in respect of Agricultural Lducation as in regard to other branches of education
- (13) While there are strong arguments in favour of Education Departments being admini stratively responsible for Agricultural Educa tion, as for other branches of education, it is not practicable in the existing circumstances to effect this change at present and all agricultural institutions except Senior Basic Schools Agricul tural High Schools, Agriculture Departments of Arts and Science Colleges and Agricultural Departments (or Faculties) of Universities should continue to be in the Administrative charge of Agriculture Departments
- (11) Every endeavour should be made to promote associations of agriculturists including organisations of young farmers who should be enrolled while they are still at school Agricul tural exhibitions, fairs and similar meetings should also be encouraged

Recommendation of the Central Advisory Board of Education

The Board adopted the report with certain amendments and directed that the report as approved should be communicated to the authorities concerned for necessary action

Item XI -Report of the Religious Education Committee

The Committee submitted an interim report which has not been published. The Board noted that the Committee had not been able to arrive at any agreed decisions on some of the most important issues and felt that in view of the importance of the subject the Committee should be asked to pursue the matter further It was therefore decided that the Committee, with such additions to the such additional to the such with such additions to the membership as the Chairman might think it desirable to make should continue their investigation and present a report to the next meeting which should indicate clearly these points on which there was general agreement, as well as those, if any, about which agreement could not be reached

Administration of the XII --- Report Committee

The Committee made the following recom mendations

- (1) Provincial Governments should assume full administrative and financial responsibility for all school education
- (2) Powers resumed by Provincial Governments may be redelegated by them either at once or at an early date to those local bodies whose efficiency can be depended upon or to

- - (i) A Provincial Advisory Board of Fducation which hould take cognisance of the
 - (a) Regional Ad Isory Board of Education These Boards will be concerned with adult Education and Louth Service also in addition to all education upto the High School stage
 - i) Mana era or Managing bodies for individual school or groups of schools exercising such powers as may be prescribed as and when uitable local persons are available
- In order to link up voluntary institution with the gener 1 system volunta y educational orga isations should be adequat ly represent d on Provincial and Regional Advi ory Boards
- (5) In a der to secure co-ordination between the lower stages of education and education in the University sta e Provinci I Advisory Boards sho Id be represented on the principal executive and academic bodies of the University co (erned by the Director of Public Instruction and one other member
- (6) The All India Council of Technical Education should have re ional committees which may cov r the a eas of one or more provinces
- () There should be an fficient organisation of S hool Attendance Officers in each Provinc The need for Women School Attendance Officers requires pecial consideration
- (8) When and wher (8) When and wher possible School Attendance Committees consistin of member of Local Boa ds or other influential local persons should be set up to decide locally what case should be sent for prosecution
- (9) It is ess ntial that s hool attendance cases should be disposed of as speedily as possible and steps ho ld be tak n if necessary to assign special court days for them with a rota of Magistrates who will be available to sit
- (10) No substantial developments in the ducational field are possibl without a very onside abl strengthening of the administrative staff of Education Dep rements both qualitativ ly and quantitati ely. It is also n cessary that the sal ry and status of ducational officers should n t be appreciably lover than tho e of comparable Co ernment a rvants in other e vices
- (11) In the event of the Central Government givin, a grant to a Pr vincial Government for an approved scheme of development th former may requir s one of the condition to be attach d to the grant that Provincial a bunts should be audited on behalf of the first Gov rument as well a the Provincial of the the standard of the the standard of the the standard of the the standard of the the standard of the the standard of the the standard of the standard o l artan tooy timetic of a fine a single audit of a fine at though in single audit addition to this in o d r to ensure r tisfactory co-per tion it is surgested that a Committee of th Central Adviory Board of Education should visit Province once in five ye rs discuss the progress oft er if n cessa ; to discuss the progress common i t rest

- (3) In order to culist public interest in (1) Suitable means should be desired ducational administration each Provincial to ensure in fullest co-ordination and coperation between Provinces and liter Provincial Advisory Roard of Fidures (2) Interest 2.9 In regard to admission to Teach ers Traini g Colleges and other educational institutions should not be allowed to impede the workin of the Educational system in any province
 - Pecommendat on of the Central Advisory Bo rd of Education
 - The Board adopted the report with a few sodifications and decided that it should be forwarded to the Governments concern d for necessary action
 - t War Educat nal Developm at m India :
 - The most important recommendations mad by the Central Advisory Board of Educ tion in their Report on Post War Educational Development in India were given in the last is no of the Year Book. As opinion is yet third with reg rd to these recommendations they are repeated in this I sue as well
 - (Primary and Middle) Education.— A system of univers 1 compulsory and free (1) educ tion for all boys and gi is between the ages of six and fourte n should be introduced as speedily as possible though in view of the practical difficulty of recruiting the requisite supply of trained te chers it may not be possible to complete it in less than forty years
 - (2) The ch racter of the instruction to be provid d should follow the general lines I id down in the reports of the Central Ad Isory Board s two Committe s on B sie Education
 - (3) The Senior Ba ic (Middle) Sci ool being the fith a school for the gre t majority of future citizens is of fund mental import nee and should be generously staffed and equipped
 - (4) All education depend on the te cher The present status and remune ation of teachers and especially those in Primary School are d plorable The standards in regard to the tr ining recr itment and conditions of service of tea hers prescribed in the report of the Committee approved by the Central Advisory Board in 1943 rep esent the mi imum compa tible with the ucce s of a nation I system
 - these should be adopted and enforced everywher (5) A vast increa e in the number of trained women teachers will be required
 - (6) The total estimated annual cost f tle p oposals contai ed in this ch pter when in full operation is Rs 00 crore approximately
 - Pr Primary Education.—(1) An adequate provision of pre-primary in tru tion in the firm of Nursery Schools or classes is an essential adjunct to ny national sy tem of educ tion The provision in this re pect at present is n gligible
 - () In a ban are where ufficient children av ilable within a reasonable radius 18 par te Nursery Schools or departments may e provided el ewhere Nurs ry classes be provided el ewhere Nurs ry classes hould be attach d to Junior Basic (Primary) chools
 - o off er if n cessa; to discuss the progress (3) Nurs by Schools and lasses should of de clopme t sch m and other matters of invariably be staffed with women teachers who have received special training for this work

- (4) Pie Primary education should in all course cases be free While it may not be feasible to make attendance compulsory, no afforts should be spared to persuade parents to send their children to school voluntarily, particularly in areas where housing conditions are unsatisfactory and/or mothers are accustomed to go out to work
- (5) The main object of education at this stage is to give young children social experience rather than formal instruction
- (6) On the basis of a normal age range of three to six years provision has been made for 10,00,000 places in Nursery Schools and classes
- (7) The total estimated net cost of the proposals set out in this chapter when in full operation is Rs 3,18,40,000

High School Education — (1) The high school course should cover six years and the normal age of admission should be about eleven

- (2) Entry to high schools should be on a selective basis, only those pupils should be admitted who show promise of taking full advantage of the education provided Additional places may be provided for those not selected provided that no cost falls on public funds
- (3) In accordance with the general principle set out in (2) above, places in high schools should be provided for at least one child in every five of the appropriate age group
- (4) In order to secure the right children, the methods of selection to be employed will require the most careful consideration. Special arrange ments will have to be made for the transfer from Senior Basic (Middle) Schools to High Schools of suitable children and particularly of those who show signs of late development
- (5) High Schools should be of two main types (a) Academic, (b) Technical The objective of both should be to provide a good all-round education combined with some preparation in the later stage for the career which pupils will enter on leaving school
- (6) The curriculum in all cases should be as varied as circumstances permit and should not be unduly restricted by the requirements of Universities or examining bodies
- (7) In order that no poor child of ability may be excluded, liberal assistance in the form of free places, scholarships and stipends should be available throughout the course
- (8) In order to secure teachers of the right type, the salaries paid in all recognised schools, whether maintained by State or by private bodies, should not be less than those prescribed by the Central Advisory Board of Education
- (9) The estimated minimum net annual cost of the High School system outlined in this chapter when in full operation is Rs 50 crores

University Education.—(1) In dian Universities, as they exist today, despite many admirable features, do not fully satisfy the requirements of a national system of education

(2) In order to raise standards all round, illiteracy, adult educ the conditions for admission must be revised must be provided for with the object of ensuring that all students are capable of taking full advantage of a University as illiteracy disappears

- course The proposed reorganisation of a high school system will facilitate th Adequate financial assistance must be provid for poor students
- (3) The present intermediate course show be abolished. Ultimately the whole of the course should be covered in the high school but, as an immediate step, the first year of the course should be transferred to high school and the second to Universities.
- (1) The minimum length of a Universidegree course should be three years
- (5) The tutorial system should be wide extended and closer personal contacts establish between teachers and students
- (6) The importance of establishing a hi standard in post graduate studies and part ularly in pure and applied research should emphasised
- (7) Steps should be taken to improve t conditions of service, including remuneration University and College teachers where the now in operation are not attracting men a women of the requisite calibre

(8) An Indian University Grants Commits should be constituted for the purposes and with terms of reference set out in this chapter

- (9) To provide for the increased number able and well prepared students which national system of high schools may be expect to produce, approximately 2,40,000 plator double the existing number, should available in Universities
- (10) The estimated total net annual confidence of the scheme for University Education set (in this chapter when in full operation Rs 6,72 lakhs
- Technical, Commercial and Art Education (1) In view of the prospective net of post-war industry and commerce for skill technicians, and in order to eater for the at tudes of those who will derive greater bent from a practical course, the establishment of efficient system of technical education at stages, on the lines set out in the report of the Technical Education Committee, is a mat of great urgency
- (2) Due regard should be had to the recomendations of the Abbott Wood Report respect of the scope and content of Techninstruction
- (3) The estimated gross annual cost of t proposals contained in this chapter will approximately Rs 10 crores and the net contained in this chapter will approximately Rs 10 crores and the net contained in the co

Adult Education.—(1) Comprehensive rangements on the general lines set out in a Adult Education Committee's report shot form an integral part of any national system education These are particularly imports in India today in view of the very high p centage of illiterates

(2) Literacy is a means, and not an end itself Although the main emphasis in the beginning may be placed on the liquidation illiteracy, adult education in the full self must be provided for those already literathe amount of this should progressively increas illiteracy disappears

i) It is estimated that even with the Health of the School Child.—(1) Provi od ction of a universal system of basic ston for ensuring the physic l welfare of all cutton there will be eyer or cores of illiterates pupils and students should be made on the group 10-40) to be dealt with Pi us should made to sol e this problem by a campaign had over twenty years Before this cam to open fi e year should be devoted to the essary preparations including the recruitment trains of the staff of teachers requir i

4) In this as in all branches of education quality of the teacher is of suprem impor c. The difficulty of obtaining a sufficient nber of teachers of the right type particularly men must on no account be und restimated

5) The respon ibility for adult education st rest with the State but every effort should made to enlist the aid of suitable voluntary anisations where er available

b) The estimated total annual cost of the posals contained in this chapter is Rs 3 res At the hight of the literacy compaign imay be exceeded by Rs 5 to lakhs b tavera annual cost for the twenty year be a l ttle less than Rs 3 crores

ranning of Teachers — (1) The proposal the recruitment and training it acher set out in the Report approved by the Centr 1 visory Board in January 1943 should b erally followed

The existi g training Institution ely sufficient to meet wastage among exi tin chers and to tr in those hitherto untrai ed 3) New Training Schools and Colleges studing University Education Departments) st be provided to supply the add tion i chers whom a national ystem will requir rese will amount to over 0 00 000 non dastes for chools of all type and 1 80 000 dustes for high schools

4) Arrangements should be mad to pick suitable boys and gi is towa ds the end of high scho i course This is particularly fortant in girls high schools in view of the t lacrease in the number of women teachers

5) The courses provided sho ld be es lly pr ctical nd hould be specially rel ted then eds of th schools in which the trainee I subseq ently serve

6) ho fees hould be charged either i sining School or Training Colleges libe i istance should be av ilable for the main ance of poor stud nts

Refresher course ar Refresher course ar of the ntmost port to a d should be p orlided. For all typ feachers but particularly for those in rem te al areas. I a lilities should be p ovided for c th and sele t d teachers should be n mag disconting extending the control of the control mag d to study educational methods in foreign

3) It is impossible to calcul to the precision of cost of the proposal contain d in it is provided in the proposal contain d in it is precision of social and recreat of training the left in the provident of social and recreat tem will seek requised for a nation | seek provident of social and recreation will seek requised for a nation | seek provident of social and recreation will seek provident of seek provident of the provident of seek provident of the provide

lines et out in the report of the Joint Committe

() The cost of the School Med cal Service including provisio of meals and special schools etc h a on the analogy of other countries been estimated at 10 Jer cent of the total expenditure on the schools I roylsion has been made for this in the estim tes of the cost of the national system at the ar propriat tages

Educat n f th H ndicapped -(1) vis on for the m t lly or physically handi apped should form an es ntial part of a n tional sy tem of duc tion and should be

() Apart from the needs of boys and girl in set ools and colleg s special att ntion should be paid to thos in the 14 0 age group who ar n longer ttending school. To erv these a Youth Moveme t on an All India b sis should be et up

(3) A Youth Movement should aim at co dinating and supplementi g rather th n supers ding tile work I o ganis tions aiready dealing with spects of this pr bi m.

(4) The main need of a Youth M ement (3) The main need of a footh in ement will te for leaders both men and women who will have to be specially t sined. The possi bility of fi ding suitable recruits mong dem bulised officers and N C O s hould be explored

(6) It is impossible to estimate the ultimate of the type of officer who will be capable of cost of the provision contemplated in this carrying a scheme of the kind contemplated chapter. Rs 1 crore may be included in the into successful operation. estimate

Employment Bureaur -(1) Employment Bureaux form an essential part of educational administration they are especially necessary in India in view of the restricted openings at the moment for progressive employment

- (2) Employment Bureaux, if they are to fulfil successfully the functions set out in this chapter, must be staffed by trained experts with practical experience of teaching and of industrial conditions
- While contact should be maintained Unemployment Lychanges, Labour Tribunals, etc, established by other Departments, Employment Bureaux, which deal with the output of educational institutions, should be under the control of the Education Depart with ment
- (4) It is estimated that the gross annual cost of running Employment Bureaux (apart from those separately established by institutions of University rank) will amount to its 64,00,000 This should be regarded ultimately as a normal part of administrative expenditure

Administration —(1) The Provinces should main the main units for educational remain the main administration except in regard to university and higher technical education, the activities of which should be co ordinated on an All India

- (2) In the event of the Indian States taking part in educational development on an all India scale, it may be necessary, in order to form economic educational units, to group the smaller ones or attach them to larger States or contiguous provinces
- (3) A national system of education will require much closer co operation, financial and otherwise, between the Central and Provincial Governments
- Provincial Governments should be left to make such changes in their administrative arrangements as the carrying out of education developments on the scale contemplated may require Experience, however, suggests that they would be well advised to resume all educational powers from local bodies, except where these are functioning efficiently
- In order to enlist local interest in educa-(5) In order to enlist local interest in educa-tion, School Managing Bodies, School Boards and District Education Committees may be constituted, if and when sufficient people of the right type are available to serve on them An Education Advisory Board for the whole Province may be desirable
- (6) A strong Education Department will be required at the Centre and in this connection the scope and functions of the Central Advisory Board should be enlarged
- (7) Steps should be taken in accordance with the recommendations of the Board's Committee on the Recruitment of Education Officers (1943) service and to enable it to secure the services. The present Bureau has not so far been able

- (8) Arrangements should be made for the exchange of officers between the Centre and the Provinces and between one Province and another The desirability of establishing a senior educa tional administrative service on an All India basis should receive consideration
- (9) The Director of Public Instruction should be directly responsible for the general administration of Education other than university and higher technical education, throughout the Province He should also be Secretary for Education should it be thought necessary to keep in existence a separate point of this kind of this 1 ind
- (10) Provision has been made under each separate branch of education for the cost of administration which may be estimated at 5 per cent of the gross annual expenditure

In their report, the Central Advisory Board of Education have forestandowed the bric outlines of future developments when therefore, that 'while it is impracticable, at so carly that 'while it is impracticable, at so carly the contract of a stage and before plans on a provincial basi have been prepared, to indicate the precies steps necessary to implement a scheme of this magnitude, it may be suggested that the first five years should be devoted to planning propagated and particularly to the president propaganda and particularly to the provision of the institutions necessary for training teacher and that thereafter the actual carrying out of the scheme should be divided into seven five year programmes, during each of which are not agree or agree there is no reason who the area or areas—there is no reason why the should be contiguous provided that each i of adequate size—should be fully dealt with The size of these areas in the case of each Province will be determined during each programme period by various factors, of which the state of the state the supply of teachers available will be the most important "

In accordance with the general wishes (the Board expressed above, the various Provincial Governments have been busy framit their post-war development plans Province planning is yet in a state of flux and in arease any definite developments must awa the action taken by the Vicerov's Executive Council It may however be affirmed that it opinion in the provinces is generally in favo opinion in the provinces is generally in fivo of the Board's report and there is no dou that when the provincial plans assume concre shapes, they will be patterned according the Board's frame work. In the end it can affirmed that the report has now truly become a historic landman. 2 historic landmark and whatever developme the future of Indian education may take, the report will stand as a high beacon light

Bureau of Education—The old Bureau Education was abolished in 1923, but on advice of the resuscitated Central Advise of Education, the Government of Intervived the Bureau in 1937 under the control revived the Bureau in 1937 under the control the Educational Adviser to the Governm of India for dealing specifically with the colling and descention tion and dissemination of literature relating do any much steful we It though at least two Committees of the Central Auditory Based of the Central Auditory Based with a lew to expandice the activates For Example the Adult Education Committee of the Lateral Advivory Do rid or Faguration 1939 the Lateral Advivory Do rid or Faguration 1939 about the established a Bureau to collet and all titudes information with regard to the adult of central Bureau to collete collate and publish provess of the measurements in all parts of the courty. The Bureau of the Central Advisory Board of Education should be equipped to undertake this latter function. The Central the Country Shades of Education and the Central Advisory Board of Education should be equipped to with the general policy outlined but thought it advisable to wait for action by I owned to the Central Advisory Board of Education that the Central Advisory Board of Education should the Central Advisory Board of Education should the Central Advisory Board of Education should make the Central Advisory Board of Education should make a Bureau 1983 recommended that the Central Advisory Board of Education should maintain a Bureau

() to circulate to the pro mees stand rd text books produced in different parts of the country

(1) to issue a periodical containing good reviews of recent books

(iii) to maintain a staff competent to produce as required in Indian languag s either original books or compilations suitable to Indian needs from m terials available in stand rd text books produced in oth r cou ties

The But au should be in a position to give general guidance to Education Authorities in regard to text books and other literature especially in scientific and techni al subjects and should also be prepared to produce books where the restrict of demand is not likely to make it an economic proposition for a provincial authority to task the responsibility of producing them. This re ommendation was accepted by the Board at their preserving in January 1944

1043 recommended that the Central Advisory | The Governm nt of India however propose Board of Education should maintain a Bureau | to take up shortly th questi n of expanding the whose function it will be

Statistical Progress

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India

(a) STUDENTS

NB—The number of scholars in Universities represents the research students in the affilial Universities or the number of students under the direct control of teaching or unit Universities

Primary Education.—The position with regard to Primary Education Acts has been stated in the previous issues. Here it will suffice to say that in Assam, Bombay, Central Provinces, N-WF Province, Punjab, Sind, United Provinces, Bangalore, Coorg and Delhi, more than half the primary schools are managed by Local Bodies, while in Bengal, Bihar, and Orissa over 80 per cent of the primary schools their post par adjustional development sche. Orissa over 80 per cent of the primary schools are under private managements, in Madras, 46 per cent by Local Bodies and 49 per cent by private managements, in Baluchistan, almost all the primary schools are Government managed, and in Ajmer Merwara about 60 per cent Government managed For British India as a whole, the percentage of schools, under Local Bodies management is 46 per cent, and that under private management 53 per cent

their post war educational development sche They were of opinion that the success operation of their plans for post-war developm would involve important administrative chan and a re-adjustment would be necessary amon the various bodies now concerned with primary and secondary stages of education They accordingly appointed a Committee examine and report on the issue This Committee submittee a report to the Board at the mittee submitted a report to the Board at the The Committe With regard to the control of primary education, the Central Advisory Board of Education have recommended that Government should assume full responsibility for the administration of primary education wherever practicable meeting held in January 1945

920 regular schools and 814 literacy classes for education combined with some prep men, and 131 regular schools and 122 literary classes for women In the Central Provinces, the number of adult schools was only 18 with 793 men and 304 women under instruction Madras had only 8 schools with 202 men ind 43 women on roll In the North West Frontier Province the number of adult Classes has been dwindling since 1939, and at the end of the year 1942 43, only 61 classes were left with 634 under instrucclasses with 381 adults enrolled therein. The Punjab had 148 regular adult schools for men, and 2 for women. In them, the enrolment of men was 4,809 and of women 37. In addition, there were temporary classes started by the Government, where 97,083 adults were receiving instruction on the 31st March 1943 In Sind only 16 permanent night schools were left on the 31st March 1943, others having 438 men were enrolled in heen closed them The United Provinces and 1,343 regular schools and 3,356 temporary classes for men, and 100 regular schools for women In all, 46,699 men and 1,590 women were enrolled Among the Centrally Administered Areas, Ajmer-Merwara had one adult school and Delhi 29 with 640 adults under instruction

Secondary and High School Education – The total number of high schools in British India according to the latest available statistics for the year 1942 43 was 3,632 for boys and 532 for girls 1,169,265 boys and 170,581 532 for girls 1,109,200 boys girls were enrolled in them These figures include boys and girls reading in the primary number of boys who appeared for the Matriculation High School Final, Anglo Indian and European High School, and Cambridge school Certificate Examination was 139,717 of whom 94436 were declared successful. The corres ponding figures for girls were 16,898 and 11,336

The recommendations of the Central Advisory Board of Education with regard to high school education contained in their report on Post War Educational Development in India were the following

- (1) The high school course should cover six years and the normal age of admission should be about eleven
- Entry to high schools should be on a selective basis only those pupils should be admitted who show promise of taking full advantage of the education provided Addition al places may be provided for those not selected provided that no cost falls on public funds Places in high schools should be provided for at least one child in every five of the appropriate age group
- In order to secure the right children, the methods of selection to be employed will require the most careful consideration. Special arrangements will have to be made for the transfer from Senior Basic (Middle). Schools to High schools of suitable children and particularly of the senior of suitable children and particularly schools. ularly of those who show signs of late develop ment
- (4) High schools should be of two main types (a) Academic, (b) Technical The objective of both should be to provide a good all round

- in the later stiges for the careers which will enter on leaving school
- (5) In order that no poor child of may be excluded liberal assistance in the of free places, scholarships and stipends be available throughout the course
- In order to secure teachers of the type, the salaries paid in all recognised s whether maintained by the State or by I bodies should not be less than those pres by the Central Advisory Board of I ducat

With regard to the question of curre the Board had recommended that "the culum in all cases should be as varied cumstances permit and should not be t restricted by the requirements of University or examining bodies. The Board sugthe following list of suitable subjects, is not necessary that all pupils should ill of them up to the school leaving cert standard though some are obviously si only for the senior stage

A B—The Committee have suggested a Association for decision, (11) a plan should be curriculum for Muslim Elementary schools devised, with ways and means, whereby pupils in Anglo-Indian schools may make use of the facilities for vocational training provided in technical and industrial institutions—thus the Board felt is not possible out of the present Government grants for Anglo Indian education

Muslims —During the year 1942 43, the number of Muslim male students decreased by 135,681 to 3,414,660 and that of female students by 51,577 to 894,796 The Muslim male students formed 29 0 per cent of the total male students, while the Muslim female students formed 24 7 per cent of the total female scholars

The appointment of a special Committee by the All-India Muslim Educational Conference to consider the Report of the Central Advisory Board of Education on Post-War Educational Development in India was referred to in the last year s issue of this Book The Committee completed their deliberations towards the close of the year 1944 and published a report on the subject, whose main recommendations

Basic (Primary and Middle) Education

- (1) Agree to the desirability of compulsory school life of eight years but suggest that seven years period in a largely rural country like India is enough. In view of early maturity of Indian children, ignorant homes, and absence of pre-school education, age of compulsion should commence from 5
- 'Westage should be stopped at all cost all boys and girls even though they join school on voluntary basis, should be enjoined to stav on till the completion of the prescribed course
- (3) Basic education as sponsored by the Board being yet in an experimental stage should not be made obligatory
- (4) Religions and not "some handicraft or industry" should form the basis of education
- Denominational schools should continue but they should be reorganised The question of financial assistance to such schools should receive serious and sympathetic consideration
- (6) There should be separate schools for Musim boys and girls as a matter of principle except in areas where the number of pupils is so small as not to justify a separate school or where women teachers are not available In co educational schools, girls must be separated at the age of 10
- (7) In Urdu speaking areas the medium of instruction should be Urdu in the Urdu script, but in non-Urdu speaking areas Urdu should be taught to Muslims in the Urdu script as an additional language
- Arabic should be taught in connection with the teaching of religion
- (9) Provision should be made for the teaching of English as an optional subject in the last two years of the elementary stage, wherever there is a demand for it

Pre-primary Education

(10) Regard the provision of pre-school education so urgent that a start should be made even with specially trained men teachers in the event of the non availability of women teachers

High School Education

- (11) The principle of selection for high schools will be harmful to the interests of backward communities especially of the Muslims In view of the reasons stated in the memoran dum it is urged that the selective system should The interests not be applied to Muslims of the poor but promising Muslim pupils should be safeguarded, and they should be given preference over their fortunate brethren in the allotment of places, which will necessarily be limited in High Schools
- (12) Places should be reserved for Muslim pupils not by their percentage in population but in proportion to their historical status and political importance in consultation with local Muslim Advisory Committees
- (13) Do not agree to the division of high schools into "Academic" and "Technical," but suggest Multilateral type of schools, com mended by the Spens Committee If this suggestion is not accepted the Committee request that Multilateral Schools for selected within areas only may be accepted as a third urban areas only may be accepted as a third
- (14) In the courses of study, (1) Religion, and, (11) Islamic History and Culture should be added for the sake of Muslims, and muster. and dancing should not be made obligatory for Muslims
- (15) Special provision should be made for Muslim girls

University Education

- (16) The functions of the proposed University Grants Committee, besides the allocation of funds, should be purely advisory
- (17) The proposed number of places at the universities should be more than doubled and liberal grants given for expansion and research It is imperative that seats should be reserved for Muslims

Technical, Commercial and Art Education

- (18) That technical institutions should be established in industrially developed areas should not be too rigidly followed
- (19) The functions of the proposed Council for technical Education should be purely advisory
- (20) In all kinds of technical institutions, places and scholarships should be reserved for Muslims in consultation with the Muslim Advisory Committees
- (21) A Committee should be appointed to inquire into and report on the Nautical and Aero nautical Education

Adult Educ t n.

- () Attempts should be made to make the age group 10 30 literate while the remainin should be educated mainly through visual instruction talks and lectures concentration on the literacy of those who show a desire for it rega d to the use of the mother to u
- (23) The five years period of preparation should be cut down by three years
- (4) A Committee should be appointed to enquire and report on the sp ediest and effective measures for the Adult Educ tion of Muslim women

Training of Teachers

- (2) Approve generally the proposals con t ined in this chapt r but have made the following observations -
 - (a) To attract Muslim women to the teaching profession technical qual fications (success in Government examinations) should be waived in the case of persons of good social position who have had private education
 - (b) Due regard should be paid to the recruit ment of Muslim men and women teachers and their number should be fixed
 - (c) The teaching of Religion and Muslim History and Culture should be entrusted to Muslim teachers
 - A ped gogical institute should be established in each administr tive areas should be

Halth of the Schol Child, Edction f th Handi pped, Recretvad Soial Activite

f 6) Appreciate the propose is made und rethese chapters but it is suggested that in Hotels reservation of seats should be made for Muslims

C ntral Education Department or a Central
Education I Servi r any hang i th Education I Servi r any hang i th purely dvi ory functions of the Ce trai Ad isor, Bo rd would be deprec ted by Muslims

Depressed Classes—The education of the utrivesed classes do s not now me et the same difficult probl m as it did pre lou is Sectral facilities by wy of a hol rall be recombined from fees to a pply of books etc.

The pressed lass pupils are encouraged to attend ordinary a hools and egreg to set cols a celling gradu lipt abolished It is true however. that, stadd by abousing it is true nowever; that it is a summary of their duction. It is an an inputs obstacles in the w y of their duction but no let ment will have to give way to public opinion. During the y ar 194 43 the total enrolment of depressed class pupils. f Il by 136 537 to 1 339 651

It is encouragin to record that recently the Government of India sanctioned schol rships to the value of Rs. 3 lakhs for the education of scheduled astes

Medium of Instruction-The position with medium of in t uction and examination in the h h school st e was explai ed in the l st years some Th e las not b en much chan e ver ti t du ing the year At their ne ting leld in De ember 1943 th Inte Uni e sity Bo rd consid ed the q estion of the adoption of th mother ton ue as the medium of instruct on in the Uni ers ties and a re ommendation of the E amin t on Committee of the Central Advi o y Board of Lduc tion th t in vew of th fact that in the ligher at ges of education stud nty re not only ex mined in forel n l ngua e onstitute a furth hat is the au st on wheth examinces should not be given the opt on of answerin e amin tion questions in their moth r ton ue merits forther onsideration. The Boy ! reaffirm d the onsideration The Boat reaffirm d the followin re ol tion of the Fourth Conference of the Indi n Univer ities and expressed the

medium of instruction in the degree cour es -"Resolv d that in the opi ion of this Co f rence the nedium of in tuction at d fie ent sta es of educ ti n up to and i lud ing the d gree ours should as far as circumst no s permit be the mother ton ue of the students

of n on that in truct on in the high schools might be gi en in the mothe t ngue but th t it is p ematur to mak the mother tongue the

But in view of the pre ent condition in Indi the m dium of instru tion in the Hi h Schools ho ld o di arily be the mothe to gue of the pupil but where owl g to the to gue of the pupil but where own g to the exi tence of pupils will different mother tongue in the me chool or for other special re ons it is not possible to do o the medium f instruction should b En lish or any other modern Indian language

That with a view to attaining this end the Universities of India are r quested to take ateps for enriching the liter ture of the respective Indian l nguages

That Engli h should be compul ory subject of study in the High School Cours a

Th t mode n Indi n langua c and lastern The tmode n limin ranguage of and reaction of Cassical lange a should be recognied as optional subject for st dy in the Hi h school and Intermedit e and B A cours s d they hound a far as possible be taught through he medl m of the moth tongue of of any modern Indian language of an allied n ture

That modern Indi n languages my! recognised grad lly n't na far a possible alternativ hy with En llah as medi m of in trit in for the Inferm dit e and D gree Courses exceptin fo En li h, and if n ces ary fo. S. ivene athleter. fo S ience subjects

That inst cti n and work in all res rch lastit tions hould be through the medi m of Engli h except in such places when it is alre dy b ing don through ny of the modern Indian langue es for special reason

The Central Advisory Board of Lducation considered these observations of the Inter-Board and recommended University greater stress should be laid on instruction in the higher stages of education being given through the medium of the mother tongue and that it may often be very useful for instruction to be given in part through the medium of the mother tongue and in part through the medium of English

At their meeting held in December 1944, the Inter-University Board reiterated their previous recommendation (quoted above) with regard to the question, but the Central Advisory Board of Education at their meeting in January 1945, decided to request the Inter-University Board to suggest ways and means for attaining the goal

From all this it is clear that the question of making mother tongue' as the medium or instruction in high, Intermediate and degree classes is at present confined to the passing of resolutions only. No educational authority of resolutions only No educational authority has been bold enough to start the experiment, which is bound to achieve fruitful results

Professional and Technical Education -Technical education is assuming great import-The Committee of the Central Advisory Board of Education appointed to explore the mode of developing the facilities for technical education in the country as a whole, met at Dehra Dun in October 1943 under the Chairmanship of Mr John Sargent, CIE, MA, Educational Adviser to the Government of India The Committee's report was adopted by the Board at their meeting held in January 1944. This report has since been published and copies are available for sale. The Committee's main conclusions and recommendations as adopted by the Board are the following

- (1) In view of the recent expansion of industry and the likelihood of further development after the war it is necessary to plan immediately a comprehensive system of technical education at all stages
- (2) The function of technical education may be described as two-fold, (a) to meet the needs of industry and commerce for properly trained workers of all grades and (b) to provide a suitable form of education for those boys and girls whose natural abilities can best be develop ed by instruction on practical lines
- Technical education should be regarded as an integral part of any educational system and as in no way inferior to education of the academic type
- Education from the earliest should be given a more practical character, and the curriculum should aim at making boys and girls familiar with practical as well as academic subjects
- Technical education must include com mercial education and art in relation to industry
- (6) Agricultural education should be regarded as an essential branch of technical education and should be closely linked up with the other branches Senior Basic or Middle as well as High Schools in rural areas should have an agricultural bias

 (12) There should be only one external examination at the end of a course Other examinations should be conducted internally

- (7) In view of the great importance of agricultural education for this country a special committee of educational and agricultural experts should be set up to consider the subject
- (8) In order to provide suitable instruction and training for the different types of workers required there should be the following main types of technical institutions -
 - Junior Technical or Industrial or Trade Schools,
 - (b) Technical High Schools,
 - (c) Senior Technical Institutions
- (a) and (b) will normally provide full time instruction preparatory to employment, while (c) will also provide part time instruction for those already in employment
- The type and duration of part-time instruction should be determined in consultation with employers and according to the needs of the locality It is desirable that part-time classes should be held during the day rather than in the evening
- (10) Wherever circumstances permit polv technics are to be preferred to monotechnics
- (11) The following courses of studies should be provided in technical institutions
 - (t) a two year full-time course in Junior Technical or Industrial or Trade Schools to which pupils should be admitted on leaving the Senior Basic (or Middle) schools at the age of about 14,
 - (11) a six year full time course in Technical High Schools to which selected pupils will be admitted on completing the Primiry Junior Basic stage at about the age of 11 The first three years of the course will be mainly devoted to general subjects,
- (111) three year full time Diploma course in Senior Technical Institutions to which students will be admitted after passing the final examination of a Technical High School or an equivalent examination,
- (10) a two year full time Advanced Diploma course in Senior Technical Institutions for those who have passed the above examination,
- (v) a three year part-time Certificate course in Senior Technical Institutions for students already in employment, and who possess the Technical High School Leaving Certificate or an equivalent certificate,
- (vi) a two year part time Advanced Certificate course for those who have passed the above examination and
- (vii) classes in individual arts, crafts and other subjects related to Industry and Com merce for which there may be a sumcient demand

- branch of industry or commerce
- (14)(d) Teach rs of general subjects in Techni al High Schools should receive the ame gr des of pay as teach rs in ordinary High Schools They may be granted up to five increments for appropriate industrial or com mercial experience after the ag of 0
 - (b) Teachers of technical subjects should receive the following scales of salaries -
 - (i) Workshop or Laboratory As istants— Rs 50-1 75 The i itial salary should be fixed according to experience
 - (ii) Teachers Class III Ra 75 5 150
- (116) Teache s Class II-Rs 175 10-3 5
 - (tv) Teachers Class I-Rs 400 5 1 000
 - (r) Principals-Salary according to n ture and size of the institution

E Principal Delhi Polytechnic, Delhi

(1) Technical Higher School affiliated to the Board of Higher Secondary I ducation, Delhi, provides general and basic technical education with workshop practice to the Higher Secondary Technical Certificate Standard

Sensor Department!

- (11) Commerce I-trains persons who have passed the Higher School or an equivalent examination in commercial subjects in theoretical manner
- (111) Art—stress the utilitarian aspect, in addition to the esthetic, in the teaching of Art
- (10) Architecture provides instruction in the science and practice of architecture to each le men to take up careers as architects enable men and builder?
- (v) Engineering—Electrical (including Radlo Service) and Mechanical -are taught in varying standards
- (11) Applied Science—gives training in Chemical Engineering and the technology of many chemical products in scientific and semi comm
- (111) Textiles—trains persons engaged or interested in the Textile industry, chiefly in Weaving, Dyeing, Bleaching and Printin^g
- Pre Courses—Comprise Pre Engineering, Preliminary, courses, etc (viii)

In all departments industrial practice is given importance and the aim is to train persons to take up positions in responsible and supervisory grades

The Technical Figh School is the first in India to implement the technical section of the scheme of the Central Advisory Board of Education and is a part of the education reorganisation undertaken at Delhi Education in the lower and is a part of the education reorganisation undertaken at Delhi Education in the lower department (5th to 8th class) is general, except that young pupils orkshop practice. Otherwise wood and metal winded department of a good it is similar to the high school. A boy can thus change school at any stage. at any stage

In the upper dides differs from that of an ordinary higher school Along with a sound ordinary higher school Along with a sound general education, After completing the course training is given. After completing the course the boys take the Secondary Education, Delhi Board of Higher Secondary Education, Delhi Gort the Higher Secondary Technical Certificate Passed pupils may limost always with stipends as apprentices (a yrise to responsible positions after a few years. The institution gives all assistance in pillicing students in industry assistance in pillicing students in industry.

Delhi Polyticenic—The Polytechnic, To enable these students to acquire further founded by the comprises the following Departments—

Comprises the following Departments—

Polytechnic offer evening courses in Engineering Polytechnic offer evening courses in Engineering Applied Science, etc., leading to and Polytechnic Certificate Textiles. All-India and Polytechnic Alternatively, they may continue with higher technical education (a) in the University of Delhi—B Sc course (b) in Engineering and Ichnical Colleges all over India after putting in another year at the Polytechnic for the Pre-Lugineering Examination of the Government of India (c) in the Schor Departments of the Polytechnic in Ingineering, Textiles, ctc, for All India and Polytechnic Senior and Advanced Diploma Courses

Summary of Courses of Study for Senior Departments (11) to (viii)

- All India Certificate Part Time day and/ or evening course—Senior and Advanced grades—8 to 10 hours in 3 evenings per week
- All India Diploma -Full Time day cour e -Semor and Advanced grades-30 hours per week
- Polytechnic Certificates and Diplomas will be awarded for shorter courses in certain Lyaminations will be internal
- 4 Pre Engineering—Equivalent to I Sc of a recognised university The Pre Engineering Board of the Government of India control these courses and the final examination
- Short period courses -of varying grades in different trades

All India courses and final examinations are controlled by the All-India Boards of Studies in different subjects on which the Central and Provincial Governments, Association of Principals of Technical Institutions (India), Professional Bodies, eg, Institution of Engineers, Institution of Indian Architects, etc., and industrial employers and employees, etc., are represented. The Educational Adviser to the Consequence of Indian architects. Government of India will endorse the Certificates and Diplomas, on behalf of the Government of India

Industrial or Commercial apprenticeship 18 a special feature helping students acquire practical training in industry or commerce, concurrently with theoretical and laboratory training at the Polytechnic Arrangements are made for such apprenticeships for all students students

The following table shows in summary form the number of such institutions and the students attending them -

Madras — Mysore

Intermediate Colleges—4s mentioned in the last year a issue a three year Degree ourse has started functioning in the Delhi limp out ce no intermediate college is left and all the highs chools have become higher see a dust in the college of the co development the Central Advi ory Board of I ducation in India recommended that the present Intermediate curse hould be aboil hed and ultimately the whole of this course hould be covered in the Hi h School but as an imme diat step the first y ar of the course should be transferred to his h school and the econd to uni rsities As is likely if thes recommendation i accepted by the povinces and the tion I accepted by the povinces and the un versities in India and if the Delhi experiment proves succes [1 all the intermediate coll ges will dl appead up ig the next few years In British I dia the tot I number of intermediate olleges was 135 (11 for men and 0 for women)

olleges was 155 (11 for men and 1547 women) during the year 194 -43. The previous year the total number of these colleg was 1 9. The apparent increase of 6 colleges is d e to the fact that flurishing high schools got tlems lies converted it to intermediate coll ges as a first step to their being upgraded as degr e colleres

Inter-University Board of India—The functions of this Bo rd are giv a in the 1914 45 i ue of the Year Book and I all pre ious issues They vill all o be found in the Hand issues They vill alo be found in the Hand Book of I day Universities an author tative

pul lication of the Bo 1 The last annual met n of this Board was if Twenti if one held at Patna on nd and 3rd December 1944 und the ch irm hip of Dr Sachchidananda Sinha D Litt Bar 41 Law M L v ccCh neclior i Path Uni writy

of Debit University to co sid't que'ti as regarding the minimum qualifications of medici e o Edicat m 3 Law 5 Engheeri appointment to po't of tech [pot 1 Commerce a d'1.7 hology) graduat 1 see conditions of a rvic and 1 in the four Colle minimum que'te h rs a better the question limited to 7 V D T and the cutter of the control of the

DS should be open to graduates f other universities with such restitions as might be imposed by individu luniversities

In another re olution the B rd re ommended that in view of the post war need for ngineers for o d de elopment practic I teps be taken by the universities to investigate ways and me a for an increase in the output of traned en ince s and that courses n tech ical engine r ing b b ought as fa as possible in a line with ing b buight as in as possible in a line win modern p ctice in mo e adv ced countri and pecial ref esher courses be p o ided f post gr duat engin ers who are already in ervic Th Boy d also con ide ed it de irabi that a chair of Highway Engineer na be in ti

With regard to the question f conc lons to students with war services the Board e pressed its strong opinion that whate er c necessions m ght be given to students on w r services they must be submitted to ordinary ex mination tests before they are granted degrees or diplomas Te Board further recommended that the universities should permit such students to join correspondi courses or to it for hi her examinations of oth r uni rsities or xamil ! g bodies under the latter s scheme of educ tion i

The Doon School—This school which is established in the Chand Bagh and Shinner's functions within their walls

Estates at Dehra Dun owes its origin to the initiative and enthusiasm of the late S R

Das The aim of the school is to develop in an atmosphere of Indian culture and social have, for example, given considerable thought and of the school is to develop in an atmosphere of Indian culture and social environment many of the best features of English Public Schools. The school opened in September 1935 with 70 boys; there are now four houses with accommodation for 278 boys in all, and a house in which 15 additional new boys stay until there are vacancies in the large houses. A E Foot continues to be the Headmaster. He is assisted by twenty masters of whom four have been appointed from England. The school prepares candidates for the manage of the Conference meet yearly in rotation normally at one another's schools and discuss matters of common interset. They have, for example, given considerable thought to the Cambridge Certificate Examinations in India and have helped the Syndicate with their advice. They have inaugurated schemes for exchange of masters among themselves and for possible exchanges with English schools after the war, some of them hope to offer after the war a two-year post matric course of Administrative Training to those forms and discuss matters of common interset. They have, for example, given considerable thought to the Cambridge Certificate Examinations in India and have helped the Syndicate with their advice. They have inaugurated schemes for exchange of masters among themselves and for possible exchange of them hope to offer after the war a two-year post matric course of Administrative Training to those forms and discuss matters of common interset. of whom four have been appointed from Lugland. The school prepares candidates for the Senior Cambridge Examination (Cambridge School Certificate) and thereafter for the United Provinces Intermediate Examination, and subsequently for entrance to the Indian Military Academy, and Medical and Engineering colleges or for English Universities Some boys take the Cambridge Higher School Certificate. The school is open to all boys in India without distinction of caste, creed or social position and the school will aim at providing a thorough general education for boys between 11 or 12 and 18. The maximum aga for admission is general education for box's between 11 or 12 and 18 The maximum age for admission is 13 The annual inclusive fee is Rs 1,525 plus a dear food charge of Rs 100 per annum Places are allotted according to the priority of application. At present names are likely to be at least four years on the waiting list. The Board of Governors of the Society, which maintains the school, includes the Hon'ble Sir A Ramaswami Mudaliar (Chairman), Sir B L Mitter (Vice Chairman), Sir Exan Jenkins, Mr John Sargeant, Sir Akbar Hydan, Sir Maurice Gwyer, Rai Bahadur Amarnath Atal, Rai Bahadur Chhuttan Lal and A C Turner (Honorary Treasurer). His Excellency the Viceroy is the President.

Conference — The Indian Public Schools' ne conference was founded is composed of the heads of certain institutions which set out to give an all-round training of the character, emotions and body as well as of the mind, under conditions somewhat similar to those of the best Public Schools in England All of the present member schools are mainly boarding schools, though several of them admit day-bovs also, but there is nothing in the rules of the Conference to exclude Day School Many of the schools started life as Chiefs' Colleges, but they have now bound themselves to abolish social exclusiveness as a qualification.

im India and have helped the Syndicate with their advice. They have inaugurated schemes for exchange of masters among themselves and for possible exchanges with English schools after the war, some of them hope to offer after the war a two-year post matric course of Administrative Training to those training to manage landed property efficiently, and they have now offered their services provided their standards are in no way prejudiced, for experiment and for other help in the National System of Education envisaged by the Central Advisory Board

The general views of the Conference on education can be found in their Pamphlet "The Indian Public School" (OUP) Member ship is at present confined to the following schools -

The Aitchison College, Lahore, The Doon School, Dehra Dun, The Daly College, Indore, The Scindia School, Gwalior the Rajkumar College, Rajkumar The Rajkumar College, Rajkot, The Shivaji Military School, Poona

It is expected that a number of other schools will soon fulfil the necessary conditions and will soon fulfil the necessary conditions and will wish to join Copies of the Objects, Rules, and Conditions of membership of the Conference can be obtained from the Hon Secretary, at present the Principal, Rajkumar College, Rupur This year's Chairman is Mr C H Barry, MA, Principal, Aitchison College, Lahore Lahore

Indigenous Education —Of the 15,373,727 scholars under instruction in British India during 1912 43, 464,693 (552,010 during 1941 42)

ROV SCOUTS

The Boy Scouts movement initiated in England by the late Lord Baden Powell (the Chief Scout) has spread widely in India both initiated in among E repeans and Indians The Vicerov is Chief Scout for India and the heads of Provinces and States are Clief Scouts in their own areas The aim of the Association is to develop good citizenship among boys by forming their charac ter-training them in habits of observation obedience and self reli nee-in ulcating lovalty and thoughtfulness for others—and teaching them services useful to the public and handlerafts useful to themselves The Association is now directly affiliated with the Boy Scouts Inter-national Bureau

GRAND SUMMARY.

. . .

The Co operative Movement

Rural Poverty -The outstanding feature ! Rural Poverty—The outstanding feature of 1 di nruial economy that is bound to arrest the atte tion of any observer is the appallication of the properties of the state of the Enquiry Committee estimates that it e aver income of an gricult it in Ritish India do a not work out at a higher figure than Its 4 a year. The vast magnitude of this evil will be better realised when we tak into account the predominance of the a redultural population in India In 1891 of preent of it evotal population of the count y lived on agricultural realised in 1891 of the preent of it evotal population in 1891 of 1891 of the preent of it evotal population in 1891 of 1891 of the preent of the count in 1911 a 1893 the preent of the form of the preent of or use agric iturist may be du to a v fiety of ca es but it would apper that agricul ure has in a large measure ceaed to be an industry worked for profit the cultivator labous not for a net return but for sub astence. The extent of an res hold g which no ke out at about 6 acres for an agricultural fulle of 6. sixtence. The extent of an "re bold which we keep to a supplemental trail mily of 5 persons I too innied ate to wait and the supplemental trail in mily of 5 persons I too innied ate to low at no did y comfort even with the low at no did y to mily the special trail in mily of 5 persons I too innied ate to the vicisitudes of sevenors and the vaoants of the vicisitudes of sevenors and the vaoants of the vicisitudes of sevenors and the vaoants of the vicisitudes of sevenors and the vaoants of the vicisitudes of sevenors and the vaoants of vaoants of va out by the competition of m chi e m dearticles He is now being drawn steadily 1 to the sphere of influence of markets both nation 1 and inter of indicence of markets both sation I and inter hation I and he has n it hy the organisation I a do he has n it hy the organisation I and he has n it hy the organisation I and he had not have the first and he had not have the first and he had not have the satisfactory of the satisfacto

progress in agriculture is well nigh imposible without the background of general education All there factors lead to the most outstanding feature of Indian rural economy—th el ronic and almost hop less INDEBTEDNESS of the cultivator

Rural Indebtedness -Ti e Central Banking Rural Indebtedness—11e Central Bunking Enquiry Committee has a timated that the total rural ind btednes in India is about 1s. 900 crores Though indebt dness of the articultural popul tion has contin d from oldtimes it is acknowledged that it is rien oldtimes it is acknowledged that it is a rien consid rabit durin the l st c ntury and mo e especially during the lat 50 ye rs. This colos l burden of d bt i the root protlem which has got to be feed in any attempt to while has got to be feed in any attempt to wards the conomine rag nation if in seed A pe uliar fe ture of this indebtedness is that the debt with it remains unpil duri it elifetime of the fit it rail outret d it passes on a lunden to his heirs so that many relational as sent the it care rule that the seed of the conomination of the rease of the duck they in their turn pass on with some fu th r i cre se In their turn pass on with some su th r i cre is to their successes a granton and improvide cuttavas nea a d one attam have f rite extravas nea a d one attam have f rite to the first success of the cuttam description of the cuttam description of the first success of the cuttam description of the first success of the cuttam description of the first success of the granton of the cuttam description of the granton of the cuttam description of the granton o rural eco omy

Genesis of the Movement -Itis no wonder under the c roumstances detailed above to find that the Indian griculturist has constant that the Indian grienturist has constant rec use to borrowing and that too not only for any I ad improvement that h may contempl to but I r his curr a grientural needs as also for period and unproductive pu posses and the second of the seco vi s which the sowcar pe forms as a retail trade man and the buye of his pr duce make I im the dominant force in the vill ge red i g lim the dominant force in the vill ge red | in the agriculturist to the position of a f tolling for general in all representation without v r h pig for a 1 se from his clutche getting that he might tak and therefore becoming latt se fatalit and absolutely unprogress. In 1883 the L nd improvem nts Loan Act was been supported by the Agriculturist Loan Act readiling Governm t to adv nee loans repayable by the Agriculturist Loan Act readiling Governm to the day need to the tolling the say limit the say in the nat and at low rates of inter to lo improvements and also for c rrent agril ut submitted a rowth to the same than the submitted at rowth to the submitted at rowth to the submitted at rowth to the submitted at rowth to the submitted at rowth to the submitted at rowth to the submitted at rowth to the submitted at rowth the submitted at row

on the possibility of introducing land and agri I major provinces like Bombas. Bihar, the Central cultural banks and the discussion thus initiated Provinces and Assam show distinctly smaller by him was continued by Mr Dupernex of the digures. The Punjab with 26,810 societies U.P. in his "Peoples Banks for Northern stands first in the number of societies India". The caste system of the Hindus and (924) per one lakh inhabitants, while Bengal the ideas of common brotherhood among the which has a larger number of societies than the Moslems were evidences of the peoples' naturall aptitude for co operation and the midhing of The progress in smaller areas, like Coorg and Southern India furnished a practical proof of Ajmer-Meruara, must be regarded as very this aptitude. The Government of India in satisfactory in view of their small population, 1901 appointed a committee to consider the since the number of societies per one lakh inhabit question of the establishment of agricultural tants works out in their case at 160 0 and 127 6 banks in India and the report of this committee respectively. It is a stisfactory to note that resulted in the passing of the Co operative Credit the co operative movement has spread not only Societies' Act of 1901. The co operative move among the British Indian Provinces but also in ment was thus launched in India on the 25th The Act aimed at encouraging March, 1001 thrift, self-help and co operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sums only Knowledge or and confidence in their reliaw members which or and conidence in their tenow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same fown or village or group of villages and should be members of the same tribe, class or caste. In order to provide facilities in urban areas for the small man, urban societies were also permitted. The Act introduced the principle of unlimited liability for rural societies. The local Governments were empowered to appoint special officers called empowered to appoint special officers called Registeers of Co operative Societies, whose duty it would be to register societies formed under the Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well The seed thus sown has grown to day in the course of 40 years into a fine tree with twigs and branches, spread out in many directions In apite of several weaknesses in the co operative movement in India to day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country side ment towards the awakening of the country side and has led to a steady improvement in various directions of the life of the Indian cultivator Moreover, the use of the vote, the elective system, self-help, self-reliance, compromises gives and takes, work on an organised plan, rounding of angularities are great items in the training up of a citizen and the co-operative societies have been great schools for political and civic education. Since the launching of and civic education Since the lunching of the movement in 1904, there have been amendments of the co operative law and committees and commissions of enquiry to remedy defects and to suggest further lines of action

Growth of Co-operation -In the first few years of the movement the number of societies grew up very slowly but the growth was considerably accelerated from 1910 and the average number of societies from 1910 to 1915 was about The pace of growth still further quickened and now there are 1,26,305 agricultural societies and 18,819 non-agricultural ones Table 1 shows the distribution of these distribution of these societies by provinces It will appear from the

Punjab stands second in that respect with 67 5 Indian States and compared to the total population, Kashmir, Gwalfor and Indore lead in this matter though the premier States of Mysore, Baroda and Hyderabad have also made consi derable progress Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1943 at 69 lakks Taking the normal family at a little under 5, it is clear, therefore, that about 31 crores of the people of India are being served by this movement. There is no single movement in the country franchit, with such tremendous nossicountry fraught with such tremendons possi-bilities for the uplift of masses as the co operative movement and there is no single movement with such a large percentage of the population affected by it Though the Punjab leads in the number of members of societies, 37 0 per one thousand inhabitants, Bombay comes next with 31 8 while Modess, Pengal and Sind rank with 33 8, while Madras, Bengal and Sind rank thereafter This shows that the size of societies varies in different Provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society re-compared with the other provinces of British Of the smaller areas, Coorg takes a leading place with 128 4 members per one thousand-inhabitants, while Travancore has an average of 28 8 Membership is a much better test, in many respect to the the test in many respects of progress than the number of societies and from this point of view, the process in the Punjab, Bombay, Coorg, Travancore and Ajmer-Morwara must be regard ed as distinctly satisfactory There is, however, a third aspect also of the growth of the movement Morely the number of accounts. Merely the number of societies, or the member ship in the societies is not an index of the work that is being done and of the benefits which are being conferred by the movement on the population affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their working capital than from merely the number of members. In this direction, the marvellers progress so far this direction the marvellous progress so far achieved by the movement should also be noted From about Rs 68 lakhs, which was the average up to 1910, the working capital has advanced very rapidly and stands to day at more than Rs 1,21 crores It is pleasing to note from Table 3 that this large sum has been derived mostly from that this large sum has been derived mostly from non Government sources The share capital from fund and deposits bers together contribute about Rs 48 crore and this is really owned capital or the members own money The provincial or central bank and other societies contribute a little less—3. table that progress in different parts of India own money The provincial or central pana-table that progress in different parts of India own money The provincial or central pana-has not been uniform Bengal, the Punjab, and other societies contribute a little less—3: the United Provinces, and Madras have the largest Number of Societies—while the other public contribute about 34 crores This latte

item show to a remarkable extent the growtl as loans for the n edy ones. The heavy to d of public confidence in co operative institutions of unproductive debt of the verse land in and speaks well in general of the man g ment farm r its habit of investing his s i a ff any of the societies and the very useful purpos in lands and ornaments and hi lillieracy they serve in the banking organisation of the land consequent lack of the banking habit population respectively. The tunjable at et of liberio e been bro the 1 to extlere et al. with 10 at 10 startes and libragal stall behind it in districts bardgaration in the control of the 10 startes and libragal stall behind it in the startes are started by the s also achieved consi lerable progress though the and achieved coustlerable progress though the movement there started comp ratively later. such as his current agricultural needs, land like figures show that these tiny agricultural improvement, purchase of stock and imple societies in India work with about Rs 16 cross ments, manures and seeds as also for unproduce of their own capital (including members' deposits) tive purposes, such as repayment of old debts, weddings and funerals He thus requires credit not only as a producer but also as a consumer—a producer who hardly makes profits from his industry and a consumer who has no rising steadily as years pass by post savings to enibe him to tide over a bad period, but who is a perpetual borrower lead; to live for to day and letting to morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need or scope for improvements in his methods In such circumstances, it is imperative for the management of the rural co operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose And vet, it is in this respect that there is considerable scope for improvement

The funds of an agricultural credit society are raised from entrance fees, share capital deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund The income from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial these banks as distinguished from borrowed The ideal placed before these societies nosition is the development of members' deposits to the extent of making the society fluorially self-sufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them, and are, therefore, eminently desirable Attempts are where made to encourage them, but the response has been small, except in the province of Bombay, where they form one fifth of the total working Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of the profits of these societies to reserve funds, and thereby provide against unforeseen losses, bad dobts and losses on the realisation of certain assets such as by investment depreciation The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital

collected by the agricultural societies in India at present are by no means They aggregate to about 31 crores Their financial position as on the negligible of rupees 30th of June 1943 stood thus

In thousands of rupees Share capital 4,45,24 8,82,36 Reserve and other Funds Deposits 2,84,89 Loans 12,95,98 Total Working Capital 20,08,47

in this head) as against their outside borrowed capital of about Rs 13 crores The owned capital was thus about 55 2 per cent of their total working capital, and this proportion is

Central Financing Agencies -The forma tion of banks in urban areas on co operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sould basis, the Co operative Act of 1904 was amended in 1912 and the Co operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies thereafter the number of central financing agencies grew rapidly all over the country, especially in the Punjab, Bengal and the United Provinces The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them On the 30th June 1943 the number of central banks was 589

There are four main sources from which a central bank derives its working capital which stood in 1942 43 at 32 8 crores (a) Share capital, (b) Reserve, (c) Deposits, (d) Loans

The prid up share capital and reserves of central bunks constitute the owned resources of resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8 Deposits from members and non members constitute the bulk of the borrowed The total amount capital of central banks of deposits held by central banks in the year 1942 43 from individuals and other sources amounted to Rs 16 7 crores and from primary societies to Rs 5 crores Deposits in central banks are mainly of two kinds, viz , savings and Current deposits are not universal but confined only to selected central banks in selected areas The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available and where loans for long periods are advanced, the periods of deposits are also comparatively long In addition to funds obtained by deposits, central banks raise loans either from outside banks, from other central banks, from the local provincial bank or from Government The total amount of loans held by the central banks in 1942-43 from outside banks, from other co operative banks and from the provincial banks was Rs 3 1 crores and from Government Rs 66 Central Banks do not directly borrow loans from Government, the central banks of Indian States, excepting Mysore and Baroda and Cochin do to a greater or less extent hold loans from Government, while in Gwallor, loans from

Government constitute the most important it is therefore thought ne essary to in its them of the total working capit! Borrowings in the maintenance of fluid r s recs on a term outside to hak are generally confined to extrain see is and in some Provinces the Government Security of the Province has prescribed or Promisory Notes executed by societies or Promisory Notes executed by societies are constrained by the province has province that the province has provinced to the province has provided to relate the control of the province has provided to relate the province has provided to relate the province has provided to relate the province has provided to relate the province has provided to relate the province has provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided to relate the provided the provided to relate the pro venc arrow other joint stock behavaste also n w canh. has fixed for itself a maximum term true. The main source of loans is therefore the Leyond with no loans are in general provided a bank and where a provinced a bank is not loned to the borrowing. Hent The risks the central banks reg. nearly problished following figures will clearly show the position from I sving any direct dealings with either the and tra sactions of the aper bank. In 194-43 vanc afrom other joint stock banks are also n w Imperial Bank or any other joint stock bank or with one another This rule is however not imperial Bank Or any business have very not rightly observed in the l'unjob and Madras Se erai central bunks in the country due to their long standing now possess sufficient resources to be independ in any outside financial assistance but they all continue credit arran ements mainly with the provincial bank on which they rely for emergencies

In the initial stages several central banks developed from o dinary urban societies which gr nted advances to indi idual sh reholders A few of such central banks have contin ed the A lew of such central panks have confine at the practice and the amount advanced by entribanks to indi idual members during the year 1942 43 wa. Rs 3 rore chi dy in Bon bay the Punj b nd Madras This practice ho ever is gr dually being abandoned as the hif function of a central bank is to fin nee ocieties and to serve as their balan ing entre Tic total ad ances made by centr I banks to societies at the end of the year 194 43 amounted to over Rs 18 O crores

After meeting management expasses the profits of central banks at distributed as allowed profits of central banks at distributed as allowed to the second of the second of the second of the second banks of the country duri g the year 194 43 amounted to 184 45 1 kbs on the total w 141 g capital of 18 32 crores the rate of the second of th part of the country but the most usu Irate paid was 4 per c nt per annum

The position since June 1933 has grown more scrious, since the fall of prices of agricultural produce and the world crisis and trade depression reduced the repaying capacity of the agricultural borrower considerably and increased the terrible load of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the co-

found in not basing the loans sanctioned on the | ble | but it cannot leave any a lequate margin rebaying cap city of the borrowing member of aving which could be employed to rede me perhaps the essays social or of mettle purposes (often longities) will age taken as also the or for the redemption of of debts and remerally purcha, or of the willager suffer and what he in, the unsecond member of the agricultural planner recover from the borrower by way of by ti e members which mi st be the case where The ce tral financing agen les are more con cerned with the assets that in the last resu t

Land Mortgage Banks -The loans advanced by co operativ societies to their members and by the central financing agencies to their consti tuent s cieties are from the very n ture of th ourse from which they de i st the bulk of their finance for short or intermed it e terms only By conce trating upon the growth and multi-plic tion of rural credit societies and thus upon i cilities f resportant cilities f r short and intermediate term lo ns the co-operative movement did n t provide f the red mption of old debts or for increasing the earnings of agriculturi ts which alone would prevent any further incre so in their debts and provide any nurther incre so in their debts sup-pave the way to the paying off of the old ones it doe not em to have been adequately re lised that th remove to re the lightent g of the heavy load of indebted as does not d pend so much upon the easy terms on which co operati c fl anc can be made available as upon tile asc tal me t f the amount of I dividual indebt edness to the sourcer upon so fully fi an ing the agriculturi is that they c nid be preven ted from resorting to the sou or any more and above all on making agriculture an industry sufficiently paying to le ve little sa i g after all legitimate curr nt expenditur n agriculture above all on making agriculture an industry assumed the project of the agriculture and legitimate current expenditure in agriculture all legitimate current expenditure in agriculture all legitimate current expenditure in agriculture all legitimate current expenditure in agriculture all legitimate current expenditure in agriculture all legitimate current expenditure in agriculture all legitimate current expenditure in a succession of the seat of the m v m of that co- or it and the seat of the m v m of that co- or it and the seat of the m v m of that co- or it and the seat of the m v m of that co- or it and the seat of the m v m of that co- or it and the seat of the m v m or vide access the seat of the seat of the m v m or vide access the seat of the sea

industry. The loose scrutive of the purpose interest or the part payment of the princip i stated in the lorn apple tions and the absence of the loans been more than megodo on the of a careful watch on the way the loan is seen if the reling floor or in his how. The cooperative mor mant by concentration on the credit olds to other borrowers and where the societies are the state of the state of the societies of the the composition of the state of the societies of the state of the state of the societies of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the societies of the state of the state of the societies of the state of the st desirable as a pr liminary tow rds tackling the important questions of the redemption of old debts The Indian Central B nking Enquiry see the second passes that in the last recol debter The Indian Central string, Eddory, more funds that they could not see any energy view to plus of debt conclusion on a volta e than the Registrar himself for org mining the could be the constitution of the country of the coun ameriasi g legislation to secure it need to the settleme to d debts on a compulsory b sis. A simple R risi I olv ney Act as recommended by the Royal Commissi n on Agricultic and endorsed by the Central Banking Committee would also be an important step towards libers ting tho e wh h ve air ady gi n up all their assets from the I cubus of an estral nd old assets from the cubus of an estrat in did debt so that at let it it y and their hei coull start with cle n si te In any cas the need at the class to the griculturists for land improvement and for the redemption of old debts seems obvio s and it has now been recognied the the time has come for the provi sion of thi fa lilty by the sarting I land mortgage banks

The sethree main types of such banks. The strictly cope attemty is an association of borrowers who rais credit by the i such mortgage bonds b rl g inter st and made pay ble to be r The comm in type works for profit and deel r di idends The third type—the quasico operative—has a mixed membership of borrowers and non borrowers ope atl g over fairly large areas and fo med with sh e capital and on a limited liability ba is The banks org nised o far in liability ha is the banks ofg mised to lar in indid are in a sense of the cooper tire type though siricily speaking they belong t the qual cooperative v lery admitting as they d to the m mber hip a f w n borrowing, individuals for attracting initial capital as well s busin s talent organising capacity and off lent management

in special cases The Central Banking Committee think, however, that for a long time to come the resources of these institutions will be vinces. In some Provinces, like Bombay, these not be laid on the intensive and extensive develop ment of agriculture, since as pointed out above,

unless agriculture becomes a paying industry, the redemption is impracticable and illusory. The

bulk of the funds of these banks will have to be raised by debentures and for these purposes there will have to be in the Provinces central land mortgage banks as in Madras and in Bombay

Government will have also to render assistance to these institutions for the success of the all Provinces, comprising propagands and the debenture issue, and its guaranteeing the focusing of non-official co-operative opinion interest as in the Punjab ought to meet on the various problems that confronte all reasonable needs, though in special cases the movement from time to time The all reasonable needs, though in special cases there would not be much harm in the Govern-have come to be regarded in an ever increase ment purchasing debentures of a certain ing measure as the third arm of the knowledge of and While mutual value control over one another among members is the insistent feature in the case of the unlimited liability credit society, the insistence in the case of a land mortgage bank with limited

liability is on the capacity and business habits

of the directorate, in order to ensure sound valuation of security, careful investigation of

titles, correct assessment of borrower's credit and repaying capacity and on the efficient management of affairs. The recent rise in the value of agricultural lands has tempted the

agriculturist to sell off one or more of the plots he holds and pay off a large part of his debts to the soucar and to the Land Mortgage Bank from the price realised so that the business of the land mortgage banks has been decreasing considerably. This factor with the low yield on investments has been causing some unxieties

The operations of the Land Mortgage Banks and Societies in India during 1942-43 were as under -Number of banks or societies 1,19,782 Number of members Share Capital Rs

the Registrar to carry on propaganda and organise co operative societies. For this purpose For this purpose the assistance of non official honorary workers was imperative and in the various Provinces a band of such workers was brought into exist

ence, who as honorary organisers of the district

In some Provinces, like Bombay, these mainly required for enabling the cultivator to institutions are mixed institutions with a redeem his land and his house from mortgage and to pay off his old debts. One feels, however, extremely doubtful whether the emphasis should others, like Madras and the United Provinces, and of cooperative societies. In other the interview of the literature of the individuals were not admitted as members and the institutions became provincial unions of co operative societies In some Provinces, like

Bihar and Orissa, they became federations of co operative societies, while in others, like Bengal and Assam, they are known as co operative organisation societies. Whatever the exact form assumed by these provincial institution their functions were more or less the same i

all Provinces, comprising propaganda and th

movement, the Registrar and his staff repring the administrative side performing more or less the functions assigned to them under th statute, the provincial bank with the centre banks and banking unions representing th financial side and as such concerned more wit the financing of the movement and the institute

unions, federations or organisation societic representing the propagandist side and as suc concerned more with educating popular opinio and representing non official views to the author ities A few years back, the All-India Co operative Institutes' Association was established with a view to co ordinate the activities of th provincial institutes, to formulate non official co operative opinion on important co-operativ problems from time to time and to encourage the growth of co operative literature

It was soon perceived that one of the seriou handicaps to the successful working of co opera tive societies was the ignorance of the member and the absence of trained men as office bearer Illiteracy of the rural population however, has been found too big a problem fo of societies these institutes and they have, therefore, at tempted only to spread knowledge of co operatio and co operative principles to the members of societies and to train up the office-bearers i various ways Education has thus develope into an important function of these institute.

3,23,69,878 In Bombay, the Institute has created a special education board which maintains co operative 7,78,17,964 schools at different centres and conducts period cally training classes suitable for different type workers and employees of co operative In the Punjab, however, co operativ education has been organised by the Co operation Department, though the Punjab Co operation Union renders active assistance therein In Bilis and Orissa a permanent Co operative Training Institute had been established at Sabour in the Bhugalpur Division which is controlled by governing body which includes the Registrar, an

or taluans actively co operated with the officials a few representatives of the Co-operative Feder The Training Institute has now been trans in carrying on propaganda, organising new tion The Training Institute first for a societies as a result thereof and looking after ferred to Pusa Madras has organised 6 training societies as a result thereof and looking after ferred to Pusa Madras has organised 6 training societies as a result thereof and looking after ferred to Pusa Madras has organised 6 training societies so started in some measure. With institutes In the United Provinces, Bengal and the societies so started in some measure. the societies as started in some measure. With institutes. In the United Provinces, Bengalette rapid growth of co operative societies, the Central Provinces, arrangements for cooperative training and education have not be been provinced on the movement it was desirable to perly made, though there also it is the Department of the movement it was desirable to perly made, though there also it is the Department of the movement in the movement in the cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, arrangements for cooperative societies, the Central Provinces, area for cooperative societies, the Central Provinces, area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperative societies, the Central Provinces area for cooperativ the training classes. The need for proper cooper given it the popular touch it is. In recent attive training and an it is plant been felt in an increase and engree in recent years and the Contraction of the cooper of the coope is no doubt wh tever that any serious attempt; at improvement of the co-operative societie in the country must include a proper organistion of co-operative education not only for the offic bearers of soci ties or the magrandin pectors of central and provincial by as but al. for the inspectors auditors and assistant regis for the haspectors auditors and assistant regis-trans of the co-operative departments. Bombay, and the consolidation hollings and does not obtain in India better living societies in the Punjub

rapid multiplication of sale societies and their of cultivation in common efficient vorking. It is really in the develop-ment of this form of co operative effort that ultimate success must be sought for in India, for credit alone could never bring comfort Where it has been tried with success, the results have been extremely entisinetory to the members The tremendous headwar made in European countries like Denmark and in the United States of America in co operative marketing organisa tion and the successful examples of the cotton sale societies in Bombay should arrest attention and invite concentration on the co operative organisation of agricultural marketing. The jute and paddy sale societies of Bengal have not met with success, it is true, but the cotton grower in Gujarat and the Bombay Karnatak has reaped considerable benefit from the cotton Absence of fraud in weighment, sale societies produce against risks of fire, prompt payment of sale proceeds, financial accommodation till the produce is sold, information of daily price fluctuations in the Bombay market approach to the sale proceeds against risks of fire, prompt payment adopted in establishing a Co operative Consolidation of Holdings Society is to call together a persons directly interested in land in a give fluctuations in the Bombay market approach to the sale procedure. gunnies and genuine and certified seed, bonus and a dividend are no small gains to the agricul turist, who was otherwise at the merev of the adatya or worse still of his village sowcar The cotton sale societies of recently combined in a federal Surat havo federation which has taken over the co operative ginning factory already started by the members A few societies for the sale of other articles have also been organised in Bombay, such as jaggery, tobacco, chillies, paddy, onions and arecanut. Bengal has several jute sale societies with a Jute Whole Bengal sale at Calcutta and several paddy sale societies with a sale depot in Calcutta. The Punjab has several commission shops which provide storage facilities so that the grower could wait for better prices, but which sell to local mer-chants yet, rather than to the merchants at the port Madras has a number of sale societies, but their transactions are small and they have not yet made much progress Recently pro consolidation has been achieved in the surface operative marketing societies have garh Division where scattered holdings at been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been started with government encouragement particularly common and it is not rare to see 1 been seen and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen achieves and the seen a and assistance in Madras and Bombay, the results of the working of which will be watched with great interest by co operators all over the

Of these the most import inture the marketing succeeds to the property of his ancestor and societies particularly for the sale of cotton in which is in force in some European countries Lach hoir is given a proportionate chare of each item of the inhedited Marketing Societies - Maileting of Agricul property and not a share of the v hole, equivalent tural produce is the real crue of the whole to his portion. The result is that successive question of rural prosperity and betterment and generations descending from a common ancestor. as group marketing is always more effects e than inherit not only amaller and smaller shares of individual marketing especially in India where his land but inherit that land broken up into the individuel producer is illiterate and consti-tutes a small unit, co operative marketing har-been accepted now as one of the most desirable ideals to work for It is only the complexity of the working of co operative sale solicities, the difficulty of providing for marketing finance the difficulty of providing for marketing finance of families in default of direct heirs and the lack of appear knowledge on the part of their recognity amongst a large the lack of expert knowledge on the part of division of their property amongst a larg co operative officials and the lack of rodown number of distant relatives, and by the brea and storage facilities that have prevented the up of the foint family system and the custom

The disadvantages of fragmentation ar obvious A part of land is nasted owing t fragmentation being so excessive as to preven any applicultural operations, and another par is lost in boundaries. I regmentation involve endless waste of time, money and effort, it re-trains the cuitivator from attempting improve ment it prevents him from adopting sciential methods of cultivation, it discourages him from carrying ont intensive cultivation, it enforce uniformity of cropping, and especially restrict the growing of fodder crops in the period during the cartest control of the control of the cartest control of the cartest carrying and carrying carryin which cattle are usually sent out to graze on th The economic loss due to this s ster fields can be easily imagined, and the only solution This most difficul consolidation of holdinga Important and interesting experiment originate in the Punjab in the year 1920 The procedured or the procedure of the procedur whereby a majority in a general meeting migh approve a method of repartition, and then carr out actual adjustment of fields and holdings such a manner that no single individual migh have any grievance. As the result of patter work which has now extended over 20 year some very strlking results have been achieve and the movement for consolidation in the Punjab has assumed the dimensions of a It is steadil important agricultural reform gaining in popularity, and, as more staff is traine and the people become better educated to the advantages of the system, the figures for the are consolidated are mounting up year by year This work began in 1920 21 and in 10 year since then, 263,462 acres were consolidated b the end of July 1930, out of the whole cultivable area of about 30 millions, at a average cost of Rs 2 5 per acre

In the Central Provinces some success consolidation has been achieved in the Chatti results of the working of which will be watched with great interest by co operators all over the country Both these Societies have been rendering useful service to the country by undertaking on behalf of Government work in connection with food distribution and rationing Consolidation of Holdings—The law of primogeniture, by which the eldest son alone acres broken into 40 plots. The Local Government found it desirable to resort to legislation and passed the Central Provinces Consolidation of Holdings Act in 1928. Any two or more permanent holders in a village holding together not less than a certain minimum prescribed are of land, may apply for the consolidation of the Alprimogeniture, by which the eldest son alone is that it gives power to a proportion, not less than a certain minimum prescribed are of land, may apply for the consolidation of the Alprimogeniture, by which the eldest son alone. that one half of the perman at right holders ! holding not less than two thirds of the occupied area in a village to agree to the preparation of a scheme of coi solidatio which a heme when confirm d becom a binding on all the permanent right holders in the village and their successors

In Bombay a Bill was introduced in the Legislative Council in 19 3 to deal with certain features of the problem Wh n this Bill was introduced a good deal of opp lition w s created and it had to be ultimately dropped

There are 11 so leties for consolidation of holdings in the United Provinces and 11 in the Baroda State based on the Punjab model

Rural Reconstruction -One of the main reasons why the achievements of the co operative movement falls short of the expectations of the promot rs and workers lies in the extrem backwardness of the rur I population and it I not too much to state that the utilimate's scees or otherwise of the co operative movement lies bound up with gen ral rural de elopment and progress Eo long ans agriculturists remain attesped in liliteracy and ignorance re heavily and almost hopelessly indebted have a fatall tic and little outlook on life and 1 are an extremel low standard of living carrying on agriculture with simple tools and implements in more o less a primitive fashion no great approach to the ideals and the goal of the co-operative and all other rural mo ement is possible. The co-operative movement itself is I deed a great experiment in rural reconstruction siming to pr tect the agriculturist from exploitation of the u urer th middl man-dal land the m r chant but con entration on the credit side of the movement with but half h rted attempts

Collectors the work being co ordinated by Divi sional officers The Punjab has appointed Brayna of Gurgaon fam as Commissioner as Commissioner for Rural Recon truction and Bengal has made a similar appointment and it appears that all Provincial Gov roments are devoting con. der able thought to this very import at work

Better Living Societies -The Punjab 1 s been responsible for introducing this very desir able type of co operatic soci ty to promote better living among its members. Ther a emo e than 300 such oct it is i that province and they have been doing quite important work in their own way The societies do not collect any levy from their members except the small

any try from their members except to mail ntrance fee and they lay down a programme of work and make rule for carrying it out from year to year volation of which is punishable with fine under the by laws. Though these societies in the first int noe have for their object the ourt liment of ruinous expenditure. on marria a and other social occ si ns tiey h e also helped in various oth r matters so that sp t from as ing to their members thou sand of tupe each year thy recontributing to the general village uplift in some measure Some of the secociet shave levelled and paved and so pt the villag lands some have promoted sanitation some have indue d the villagers to imp ove ventilation in their hous some have repaired and roofed th village drinking li some have arranged th tall m nure should be pitted some h e discouraged expenditure on lowell ry and some have stopped wa te on f rms finus a variety of ways these sool ite generally have been great f ctors in the impro sment of conditions in the life of the vill g It is an illy hoped that such bett living societies will be started in large numbers in the various pr inces of India or bett still that the co credit societies would take upon operati themselve th fun tio performed by these soci ties and ti t th term better living be given as wide a connotation as possible so that the co-oper tive mo ement would be doing good to liself a d the nation by carrying on the general wo k of village t plift as well as its own

Urban Credit Societies -- Whil the chi f objective of the cooper tive movem at w from the fir t to do s rvice to the rural popula tion it must be remembered that the Ac of 1904 permitted two clas es of societies -rural and u ban recognising thus it suitability of the co operative method frolving the pro-blems of urb population also At prent there are in all 18 50 non agioultur is cold ties with membership of 45 83 of the e 70.03 are or dissociets there the geometries for other purposes

economic objective of strengthenin the position

f the agriculturi t

In the Central P ovinces and Bera the local Government c ried on simila work from Anyonember 10 9 The later part of 1085 as a dishough a lovernment of 9 The later part of 1085 as that of the metch nat and trade s and though the later of th

the stimulation of trade and indestries in and around district and talula towns. The principal business of these banks is chort-term credit and in this respect they recomble the ordinary commercial banks. In the abone of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialist and help the development of cottage industrials, which still play a very considerable part in the industrial economy of India. Another very important function which fails to peoples' bank? It is financing of the marieting of the produce of the land from the field to the port or to the principal market centres and thus assist in the capital and works on a mutual bass. It has والمراجعة والمناطقة والمناطة والمناطقة والمناطقة والمناطقة والمناطقة والمناطقة والمناط principal market centres and thus assist in the capital and works on a mutual bisis. It has development of the internal trade of the country now, however, widened its scope and has been It is only, however, in the Bombay and Bongal Presidences that we meet with some good until the by now writing policies for larger amounts under its ordinary branch. It has by now written a business of over two croces. The Bengal Madras there are 1,170 non agricultural cradit societies but most of these are not real respect. Presidencies that we meet with some good institutions functioning as peoples banks. In Madras there are 1,170 non agricultural en dit societies but most of these are not real peoples' banks. The Punjab has 1,05, unlimited liability societies and only 227 with limited liability. Even here we hardly find any development of real peoples banks. In Bengal the ment of real peoples banks. In Bengal the limited liability urban credit societies number 582 and though these societies seem to have you public confidence the more important of them are salary earners credit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, working on sound lines. The question of starting Peoples' Banks in Bihar and Oris has not yet been seriously taken in hand. In the Bombas Presidency, institutions with a working capital of Rs 20,000 and more are classed as urban banks Since 1922 co operators in this Presi dency have been very keen on having a full fledged peoples bank in every taluka town, for it has been realised that with the proper development of urban co operative banking, there is no doubt that the various units will come into touch with one another and that mutual settlement of terms and co ordinated mutual settlement of terms and co ordinated and harmonious work will greatly assist the development of inland trading agencies, Peoples' banks are a repository of peoples sayings, a nucleus for co operative activity and an institution giving facilities for internal remit tance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Province on the 30th June 1940 there were 181 urban banks most of which are fairly successful. The total membership was 210,460, the working capital was Rs. 5,07,51,125 and the reserve fund amounted to Rs. 59.25,040. It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the cooperative movement in India and other provinces might well follow Bombay a example in this direction

An important variant of the urban co-operative society is the Thrift Society The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the end of the term with interest In many societies, loans are advanced also but not exceeding a certain fixed proportion, usually \$\frac{1}{2}\$ of the deposits. The Punjab has more than 1,000 such societies, and the bulk of the manbars are solved masters.

Joint stock insurance company, while the Madras societs—the South India Co operative Insurance Society-started vigorously as a full fledged life insurance society with share capital and compartitively low rates of premia, and has already written a large business of over Rs 32 crores

Review -The Co operative Societies Act of 1901 had limitations which vere soon recognised and at a conference of the Registrars, a bill was drawn up which became the Co operative Societies Act of 1912. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than oredit, substituted a scientific classification based on the nature of the liberature of the activation of the arbitrary on the nature of the Hability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks

In 1011 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co opera tive Societies and be wented from the sowcars In 1914, the Maclagan Committee on Co operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co operation repayment of loans was insisted upon, and all those societies that falled to live up to the ideal of co operation were sought to be climinated From this time onwards the share of non officials in the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary The Government of India Act of 1919 made co operation a provincial transferred sub-ject and the local Governments were left free to

The steady growth of the Central Financing Agencies relieved the Registrars partly of the need for attending to this very important matter in the development of co operation, but propa ganda still remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non official institutions should be established to take over this function from official bends. official hands Accordingly Co operative Institutes were started in various Provinces, and the bulk of the members are school masters to the village through their branches in the There are over 125 thrift societies for women divisions and the district, in other cases as a federation or union more or is a complete of this has been successfully attempted through no primary ocities. The results is a new off of logeration. In the non-actualities may be reforth became creas sphere a still smaller leadway has been made imply important some adding to the primary Interest an unimber of ouniang societies september as the still smaller leadway has been made in the primary some adding to the primary Interest an unimber of ouniang societies september as the still smaller leadway has been made in the proposed of the second aven audit.

The growing difficulties of the Co operative lenders' bills have been passed to restrict the Movement throughout India in times of evils of usury and debt legislation has been or is unprecedented depression led the Government being passed in Madras, Central Provinces, of India to hold an All India Co operative Bombay and a few other provinces as storeduce. Conference at New Delhi on the 20th January agricultural debt and to bring it within the 1934 In December 1936 and 1939, other Conferences of Registrars net at Delhi and ing and reorientation of the cooperative discussed the situation further

It may also be mentioned that the Indian States were not slow in introducing the co operative movement within their limits, and the and by promoting secondary occupations for the movement in some of the more important of the agriculturists on a co operative basis, change the States, such as Hyderabad (Decean), Mysore, Baroda, Gwalior and Indore has made consider able progress, more or less on the same lines as those followed in the neighbouring British Indian Provinces

The landmarks in the history of the co operative movement in India are the Co operative Credit Societies Act of 1904, the Co-operative Societies Act of 1912, the Maclagan Committee Report, 1915, the provincialisation of co operation, 1919, the establishment of institutes, unions and federations for propaganda, the Committees of Enquiry into the co operative committees of Enquiry into the co operative and its problems and towards a reorientation movement in several provinces, provincial and expansion of the Co operative movement legislation, the Report of the Royal Commission now lacks force But the same forces are on Agriculture, 1928. Reports of the Indian now lacks force But the same forces are on Agriculture, 1928. Reports of the Indian leading to an ever increasing industrialisation Central and Provincial Banking Enquiry Committees, 1931, and marketing surveys, debt her increasing population on agriculture Already mittees, 1931, and marketing surveys, debt her increasing population on agriculture Aiready conciliation schemes, land mortgage banking with the end of the War in Lurope, the Govern and organisation of provincial marketing ment of India and the Provincial Governments societies societies

The movement has thus developed rapidly and the stages of its evolution may be briefly as-agricultural credit, credit, central credit organisations, apex cooperative banks, propaganda by non officials, non credit agricultural co operation, urban co-operative banking, long-term loans and debt

In recent years, the Provincial Governments have been seriously undertaking programmes in the development in India for the next few the interests of the agriculturists Money-decades

movement has also been taken carnestly in hand which would by the conversion of the credit primaries into multi purpose societies, by or ganising co operative sale of agricultural produce whole emphasis of the movement from merely credit to the entire needs of the rural population Active mass soile efforts at rural reconstruction and at increasing the earnings of agriculturists represent the keynote of the present day trend of the Co operative Movement

The titanic struggle in which the forces of barbarism have drawn the Empire has led to concentration on war effort increasingly in this country on the part both of officials and nonofficials, and the drive that was taken earnestly in hand a few years back towards the allago are increasingly busy with formulating plans and policies of post war reconstruction and it is of interest to note that Co operation looms large in these plans and policies. Decelerates in continuous transfer of the continuous trans urban these plans and policies Developments in cooperative muketing and rural industries can be
micials, expected at an early date and co operation, though more controlled by Government than ever before, will be the accepted organisation redemption schemes, land mortgage banks, co operative education, rectification and consolidation of the credit movement, organisation of supervision over primary societies and rural reconstruction, and co operative marketing

The Council of this Institution act as local technical advisers to the British Standard their draft specifications Institution on President H P Bhaumik, Secretary Rn C C Seal Bahadur quartars—8, Gokhale Road, Calcutta OBE Head

ISMAILI \ ASSOCIATIO \ -This Institution-a phi lanthropic and humanitarian body—was estab lished by the members of the Ismaili Dharmic Library in 1911 under the name of the object with the Club, Recreation uplifting and elevating the poor, without distinction of caste or creed It also tries to improve the social, economic and spiritual condition of the depressed (Harijan) and poor classes of people and with this intent has founded p mary schools, associations and such other departments in order to ameliorate their con dition and to achieve these objects by con structive and constitutional means It also maintains orphanages, lecture halls and Social Workers who constantly travel and impart general education It has branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sind), Poona, Warrangal, Gondia, Dhoraji, Burna and East Africa It publishes three Anglo-Vernacular papers, namely the "Ismaili' (a weekly Anglo Gujarati), "Al-Islah" (weekly Urdu), 'Nızarı' (a monthly Anglo Gujaratı), for the benefit of its members and the propagation Its central office is situated in of Islam Bombay at Kandi Moholla, Imamwada Road

KALAKSHETRA—INTERNATIONAL ARTS CENTRE, ADYAR, MADRAS—Literally The Abode of the Arts' was founded at Adyar in 1936 by Shrimati Rukmini Devi, to emphasize the essential unity of all true Art

Rukmini Devi strongly holds that for India's true renaissance the glories of all her ancient cultures-Hindu, Buddhist, Islamic-must enter into the hearts of her people and becom-part of their daily lives. No less does she hold that for world peace and happiness the great culture of the East and of the West

must become the common heritage of all
Rukmini Devi, her staff and students in
Kalakahetra are engaged in studying and
popularising the principles and practice of arious Hindu Classical dances, Bharata Natva, Kathakali etc Special features are instru mental and vocal music, foll songs, dramatic arts, and punting. There is besides a crafts

department including furniture and interior decoration and a weaving section

Bookbinding and publications are also part the Centre has an of the Centre s activities The Centre has an unique and rare collection of Afteen hundred Tamil primiers manuscripts on the Kambo Ramayana some of those annotated by the late

Mahamahopadhyaya Dr Swaminatha Iyer
Rukmini Devi has a deep understanding
of Western Arts also largely through the
inspiration of the great Russian dancer

Madame Pavlova Dotoressa Montessori has entrusted to Kalakshetra the sole right of preparing an supplying throughout India educations might revolutionize an which material
